THE

ECONOMIST,

WEEKLY COMMERCIAL TIMES,

Bankers' Gazette, and Railway Monitor:

A POLITICAL, LITERARY, AND GENERAL NEWSPAPER.

"If we make ourselves too little for the sphere of our duty—if, on the contrary, we do not stretch and expand our minds to the compass of the object—be well assured that everything about us will dwindle by degrees, until at length our concerns are shrunk to the dimensions of our minds. It is not a predilection to mean, sordid, home-bred cares that will avert the consequences of a false estimation of our interest, or prevent the shameful dilapidation into which a great empire must fall by mean reparation upon mighty ruins."—BURKE.

VOLUME XXIX.

BEING FROM JANUARY 7TH, 1871, TO DECEMBER 30TH, 1871, INCLUSIVE.

THE EVIDENCE OF FIGURES AS TO THE PROSPERITY OF THE COUNTRY.

The week before last we called attention to the evidence given by the improved Revenue returns to the prosperity of the country, and now that the year is closed, there are some other equally important figures which confirm this conclusion. They are plain enough to tell their own tale.

First,—the traffic on the railways of the country has increased considerably. The figures are these for 1870, as compared with 1869 (for the principal railways):—

Railway Traffic—2nd Half-Year, 1870.

	Aggregate Receipts of 2nd Half-Year. 1870.	1869.	Increase in 1870. Amount	%	Decrease in 1870. Amount	%
	£	£				
Bristol and Exeter	225,063	216,270	8,793	4·1	...	...
Caledonian	920,907	870,794	50,113	5·7	...	...
Glasgow & Sth-Western	287,400	270,634	16,766	6·0	...	...
Great Eastern	1,118,432	1,081,960	36,472	3·3	...	...
Great Northern	1,206,981	1,154,520	52,461	4·5	...	...
Great Western	1,837,925	1,800,119	37,876	2·1	...	...
Lancashire & Yorkshire	1,394,642	1,330,555	64,087	4·8	...	...
London, Chatham, & Dover	364,223	373,835	...	...	9,612	2.6
London & North-Western	3,599,429	3,434,505	164,924	4·8	...	...
London & South Western	801,316	777,016	24,300	3·2	...	...
London and Brighton	713,905	702,323	11,582	1·6	...	...
Sheffield	633,233	638,541	...	...	5,308	0.8
Metropolitan	206,115	202,341	3,774	1·8	...	...
Metropolitan District	39,103	19,605	19,498	99·5	...	...
Midland	2,023,509	1,881,752	141,757	7·6	...	...
North-British	691,560	688,119	3,441	0·5	...	...
North-Eastern	2,379,005	2,165,200	213,805	9·8	...	...
South-Eastern	624,150	643,051	...	...	18,901	3·0
	19,066,968	18,251,140	849,649		33,821	

Net increase, £815,825 4·5 %

Secondly,—the Clearing-house returns have increased, which is one of the best tests of the prosperity of the country.

	£
The aggregate for 1870 was	3,997,884,000
— 1869 was	3,693,959,000
Increase	303,925,000

Thirdly,—the dividends of the Joint Stock Banks have increased, as the following table shows:—

Bank Dividends

	1870.	1869.	Improvement in 1870.
London and Westminster:—			
1st half-year	9	8	1
2nd —	9	8½	½
	18	16½	1½
Union Bank:—			
1st half-year	10	10	...
2nd —	7½	7½	...
	17½	17½	...
London Joint Stock:—			
1st half-year	7¼	6¼	1/0/0
2nd —	9⅛	7¾	1/8/4
	16/8/4	14	2/8/4
National Discount:—			
1st half-year	8	7½	½
2nd —	8½	8¼	¼
	16½	15¾	¾

And this is very satisfactory, because, as the table shows, the *second* half of the year has, owing to the low value of money, not been favourable to banking. Still there is an improvement on the year. And if our industry had not been retarded by the war on the continent, our progress would certainly have been much more considerable.

THE POSITION OF THE MINISTRY.

There is a diffused impression that the Ministry is not so strong as it was; that it will meet the coming Session under different circumstances from those under which it met the last; that the political world, if not ripe for change, yet contains or may contain the seeds of change. And as such impressions tend to fulfil themselves, it is not unimportant to examine how far this one is well or ill-founded.

This Ministry began its career with several special advantages, which have rarely happened, even singly, to any Ministry, and all of which were never probably together accumulated on any one. *First*,—there was an unexampled and unprecedented trust by the nation in the Premier. The last election was a vote of confidence by the constituencies in Mr Gladstone, and for two whole Sessions Members of Parliament have been afraid to oppose him, even in trifles and

minutiæ, lest it might be said in their borough or their county that they were fickle in their allegiance, and were thwarting the chief whom they were elected to serve and aid. Now it would be most false to say that the nation has withdrawn its confidence from Mr Gladstone. On the contrary, any member who spoke treason of Mr Gladstone in his constituency would still risk grave odium, and incur heavy suspicion. But nevertheless it would be uncandid not to admit that there is a change. There is not the same incessant profession of allegiance to Mr Gladstone in the speeches of Liberal members; there is not the same idea that if they praised Mr Gladstone and said they would follow him, they had done all which their constituents wished, and need not think of anything else. In truth, though public confidence has not been seriously withdrawn from Mr Gladstone, public attention has been greatly *diverted* from him. For months past the English people have been reading little and thinking of little but of the wonderful history of the great war between France and Germany. Their minds have been full not of domestic matters, but of the defeat of the French, the capitulation of Sedan, the fall of the Empire, and the siege of Paris. And with the war Mr Gladstone has nothing to do. Hardly any Minister would have been able to express the sort of feeling with which we watch the great duel. A Minister speaks with so great a responsibility that in such a crisis his tongue is almost frozen, and his words, from a sense of duty, are trite, such as no one can object to, and therefore such as few will much care for. Nor is Mr Gladstone the sort of Minister to like such a theme, and to make the most of it. He is emphatically a man of peace, bred in a school of peace. He has every sort of complex eloquence; he excels in elaborate exposition, and in effectual refutation; but in the simple, wonderful words which make more of a great topic than any one else can make of it, he does not abound. Some great orators on such a topic as the war could say something which everyone would make their own—which everyone would remember—which everyone would wish to have said. But Mr Gladstone, among his many wonderful gifts, does not reckon that of such magical and memorable, though in their sentiment common, words. In consequence he has not ruled the public thought upon the war, and our attention has been a little withdrawn from him.

It must be added too that Mr Gladstone's genius is essentially suited rather to great things than to small things, and yet that, as if perversely, he is rather fond of small things. He has written many things this recess, no one of which is very faulty, and yet no one of which is very excellent, and each one of which hurts the feelings of some section of his miscellaneous followers. Not having the gift of treating the main subject with special excellence, he has not had the gift of silence on minor matters; and though he treated them needlessly, he has not treated them very well.

Secondly,—the Ministry came into power with a list of subjects, which they were known to be singularly suited to treat, and three of these of the first magnitude—the Education Bill, the Irish Land Bill, and the Irish Church Bill—they have treated admirably well. But now, in consequence of the war, a whole crop of half-discussed questions may arise, and have arisen. And on these there is not the same confidence in the Government. Mr Gladstone is a true pupil of Sir Robert Peel, and has always attended much more willingly and much more fully to interior than to foreign questions. Lord Granville has written admirable dispatches, and the best and closest observers have the most confidence in him. Still he was suddenly summoned to deal with new questions, on which there was little precedent, and no established opinion. Some of these are still pending, and it would be premature in the nation to express or feel approval when the result to be approved of is as yet incomplete and unarrived at.

Some persons think that there are great dangers close ahead to the Ministry arising out of these foreign questions. And we admit that foreign questions, when of magnitude, are, above all others, dangerous to a Government. They are very apt to divide its followers. A Member of Parliament may have the best confidence in a Government on a set of familiar and known subjects; but if, on a sudden, some strange and unfamiliar foreign question arises, he may, without blame or inconsistency, be dubious or oppose. And the constituencies may and will do the same. In this shifting world a Ministry elected upon one set of questions is apt to be instantaneously weakened if another set is suddenly substituted. But though this be the unfavourable general doctrine, we do not for ourselves in this case much fear any especial danger. We have much confidence in Lord Granville, and even more confidence in the tendency of the world. To turn out a very strong Government, the critical issue must be of immense importance—must affect peace or war, national honour or national dishonour. Now the principal Power in the present political world is Prussia, and Prussia *must* want present peace—temporary rest. She will not seek to quarrel with us, and without her consent and instigation no one else will. And therefore, though prophecies are rash, we expect and believe that no foreign question will destroy the Ministry, but rather that their adroit and sound dealing with foreign affairs will support and strengthen them.

But the new foreign questions are not the only new ones. The war has on a sudden changed "army reform" from a future possibility to a present necessity. And the subject is in a most singular state. The present generation of Englishmen are very ignorant of military matters; they have scarcely thought of them; they have never had the opportunities and the means of thinking effectually about them. Not being a military nation, we have no traditions to guide us. And yet we have an ancient fame to support, and a legacy of engagements which may require prompt action. We have, in a word, to make "bricks without straw." We know that we ought to obtain a better army than we now have, but we do not accurately or sufficiently know in what it should be better, or how we should begin to make it better. Naturally therefore we look to the Ministry, and we look in vain. Both Mr Gladstone and Mr Cardwell are followers of Peel, and therefore, as we have said, men who think much of peace and of hardly anything save peace. Neither of them would pretend to have studied the structure of armies or the details of war during the main part of their lives. What they have learnt they have learnt recently, and learnt for this emergency. And therefore, though they may perchance propose what is right, they will not be able to speak as having authority, and to induce those who are unable to judge for themselves to accept their plans with just confidence. On military matters we have a *crammed* Minister speaking to an ignorant nation, and this is very dangerous. Very likely the defect will not shake the Government. The professed army reformers are wholly disagreed, and we may have to accept what Mr Cardwell gives us, though we distrust it, because we do not at all know how to get better. Yet such grudging acceptance is almost as fatal to the prestige of a Ministry as a defeat itself.

Thirdly,—the Ministry began with a full Exchequer, and with money to give away, and this year they will have an empty Exchequer, and must have new money. This is no way Mr Lowe's fault. His calculations have been cautious and sound, and not so good as the result. But the new changes in the army—whatever they are—must cost money. The necessity of new taxation in such a case will of course not ruin a strong Government, but it tends to weaken it, and deprives it of the source of strength which pleasant Budgets and remitted taxation always give.

Fourthly,—the Government started with an absolutely united party. All sections of Liberals had sworn a common allegiance to Mr Gladstone, and had sworn it equally, or almost equally, and there is no real split yet. But there is in many constituencies the beginning of a feud—in some an actual feud—between the Liberals of the working class among the new electors added by the Reform Bill, and the Liberals of the middle class, who before had the suffrage. The working men hate the old "committee" who used to manage the party tactics; and the old voters will not be ruled or let those tactics be managed by a new committee of artisans. And probably this division, in many localities, may in Parliament take another form. Many members may now complain that since Mr Bright's retirement, the ultra-Radicals are not represented enough in the Cabinet, who would not have said so had there not been a new Radical section in the constituency to win and please. "Straight voting" has as yet been the peculiar pride of the Liberals in this Parliament, but perhaps to the same degree it will no longer be so.

Fifthly,—the Ministry started without a *competitor*. The great strategy of Mr Disraeli had landed his party in a "slough of despond." They had the reproach of having

passed a Radical Reform Bill, and the pain of having only helped Radicals and Liberals by it. They did not pretend to try to turn out the Government, or to be able to substitute a more acceptable one for it. And this advantage, almost undiminished, they still retain. The Liberals may have lost, but the Conservatives have not gained. Mr Disraeli's voice has not been heard for months on any vital matter. He has not said anything about the war which anyone remembers, and as to army reform, we know he objects to "bloated armaments," and we know nothing else. He and his followers cannot fairly claim to treat the new subjects better than Mr Gladstone and his followers treat them. And on this ground we believe the Ministry will stand firm. If they had only a majority of ten—if they were watched by an active and enterprising Opposition, believing in itself and trusting its leaders—if these leaders could make a Cabinet better for the impending problems than the existing Cabinet—we should think a change probable, or at least not improbable. But a strong Ministry with a weak Opposition is an army without an enemy, and till there is an enemy it cannot be overthrown or conquered.

THE FINANCES OF THE CITY OF LONDON.

In another part of our impression we present our readers with a document, which we may venture to say possesses a good deal of novelty and interest—an abstract of the accounts of the "Corporation of London" for two years, 1868 and 1869, which are the last for which the accounts are made up. The accounts for the City of London, notwithstanding its position as the chief municipality in the country, have not before been made public in any popular and complete shape. The accounts of the City Chamberlain themselves are regularly printed and circulated; portions of them are from time to time made public, and we have ourselves more than once made comments upon them; some of the accounts are also presented annually to Parliament, in consequence of special Acts, such as those relating to the coal and wine duties; but no attempt has been made to give a complete view of the accounts of any one year, so as to show at a glance what the income and expenditure of the City have been. One reason of this perhaps is that the accounts are both numerous and complicated, not adapted to show the broad result which would be of so much interest. We hope, however, the deficiency will now be in part supplied by the abstract which we publish, and which may perhaps be useful to members of the Common Council themselves, who often complain of the difficulty of understanding the accounts.

Before commenting on the figures, it may be useful to explain one or two points connected with these accounts. As they appear in the printed copy before us they are *forty* in number, occupying about eighty folio pages, and as they are not summarised, we can well understand the difficulty of understanding them. But to construct a summary, showing the receipts and expenditure of each year, and which shall be substantially accurate, is perhaps not so difficult as it looks. Some of the accounts when examined are found to be capital accounts—at least not dealing with the receipts and expenditure of the year—or subordinate, only showing in detail the items of some other account; a few, so far as the year's transactions are concerned, contain nothing but items transferred from other accounts, and may therefore be disregarded; and there is a third class, relating to charities, where the Corporation only acts as trustee, and the accounts are thus not strictly the accounts of the Corporation in its public capacity as representing the City of London.* Disregarding these, we find it necessary to deal only with the items in twenty-six accounts out of the forty, and in many of them the items of receipts and expenditure which are not mere transfers from other accounts are sometimes few or none. It is likely enough that in such voluminous accounts we have mistaken some items; but we feel confident there is no serious error—that the abstract contains on the one side every receipt by the City of London Chamberlain *from* the public and every payment *to* the public in the years in question.

The importance of the Corporation is shown by the totals of the accounts. The City of London receives and spends about two millions sterling a year, having actually received and spent—

	Receipts.		Expenditure.
	£		£
In 1868	1,879,825	.....	1,844,049
In 1869	2,156,649	.....	2,171,626

These are very large amounts to deal with, and some curiosity may well be entertained as to how the amounts are made up. And, *first*—with regard to the receipts, the most important element appears to be the new *loans* of the City, on account of Holborn Valley and other improvements. The following is an account of the loans in the two years:—

	1868.		1869.
	£		£
City's Estate account	105,000	.....	60,000
Rebuilding Blackfriars Bridge	...	.....	50,000
Metropolitan Meat and Poultry Market—site and approaches	...	.....	234,000
Ditto ditto—Western approach	...	.....	201,000
Holborn Valley Improvement	550,000	.....	700,000
Commissioners of Sewers	80,000	.....	...
	735,000		1,245,000

Deducting these amounts from the above totals of the receipts, we find that the City received in 1868, from other sources than borrowing, 1,144,825*l*, and in 1869 911,649*l*. This appears at first sight a diminution of income to the extent of 200,000*l* in 1869 as compared with 1868; but the receipts include a great many miscellaneous items, and the opinion that the City's real income is diminishing ought not to be hastily formed. That this is a danger of the City's finance we believe, and have more than once endeavoured to show; and the accounts themselves, when farther examined, may throw some light on the point.

Next in importance to the loans is the amount of *taxation* dealt with by the Corporation. It appears to be as follows:—

	1868.		1869.
(1) Rates:—	£		£
Consolidated Sewers rate	104,179	.....	127,369
Sewers rate (No. 2 account)	34,597	.....	28,336
Metropolis Main Drainage	35,552	.....	32,036
Police	50,992	.....	45,310
Ward rates	4,904	.....	4,906
Total rates	230,224	.....	237,957
(2) Coal and Wine Duties:—			
The 4d coal duty	79,466	.....	80,259
The wine duty and 9d coal duty	195,854	.....	197,707
Drawback on coals retained	2,780	.....	2,718
Total coal and wine duties	278,100	.....	280,684
(3) Market Charges, Court Fees, &c.:—			
In City's Estate. Markets	53,058	.....	79,352
In City's Estate. Metage and other duties	17,936	.....	18,852
In City's Estate. Brokers' rents, &c.	6,343	.....	6,318
In City's Estate. Mayor's Court and other fees	9,382	.....	10,055
Billingsgate Market (additional)	...	.....	193
Metropolitan Meat and Poultry Market tolls	...	.....	14,850
Sewers' licences for Hoards, &c.	9,770	.....	11,094
Fees from Registrar of City Court	7,702	.....	9,028
Chamberlain's fees	42	.....	41
Town Clerk's fees	18	.....	18
Total tolls and fees	104,251	.....	149,801
Total taxation	612,575	.....	668,442

It may be doubted whether it is quite accurate to classify all the items under "tolls and fees" as taxation. The income from the markets especially might with some propriety be considered as rent—the return upon capital invested in the construction and maintenance of the markets. But this doubt constantly arises in municipal accounts, and the custom is to consider such charges as taxation. The reason is that markets are established and administered for the advantage of the whole community, and any direct revenue derived from them diminishes the indirect gain of the community, in which view the source of revenue is really a tax. According to this account, the principal ordinary receipts in the City accounts are from taxes. The balance of receipts, deducting loans, as we have seen, amounted to 1,144,825*l* in 1868 and to 911,649*l* in 1869; and deducting farther the above sums of 612,575*l* and 668,442*l* for taxation, we have only to account for in other ways the sum of 532,250*l* in 1868 and 243,207*l*

* The amount of these accounts is:—

	£
Gresham Estate	8,000
City of London School	8,000
Scholarships	850
Freemen's Orphan School	4,929
Admiral Duff's Legacy	35
	21,814

in 1869. Considering the market charges, &c., as income in the nature of rent, there would still remain about half-a-million for rates and taxes in each year. Some of the taxes, however, viz., the coal duties, are paid not by the citizens of London exclusively, but by the whole Metropolis.

How is the balance of receipts made up? To answer this question thoroughly, a minute comparison of a great many items would require to be made, but practically the only remaining item is the City's income from property. The great excess of 1868 over 1869 arises mainly from the former year, including two unusual items:—

	£
Sale of securities in City's Estate account	106,696
Sale of Exchequer bills, &c., in Bridge-house Estates account	196,964
	303,660

—which are only represented in 1869 by a sum of 1,290*l*; so that in reality, as respects ordinary income, we have only to compare 228,590*l* received in 1868 with about 241,917*l* received in 1869. Of these amounts what may be considered the estates of the Corporation yielded:—

	1868. £	1869. £
(1) The City's Estate:—		
Rents and quit-rents	76,885	75,171
Renewing fines	5,829	3,687
Interest on Government securities	704	3,360
Interest on temporary investments	2,255	...
	85,664	82,218
(2) The Bridge-house Estates:—		
Rents and quit-rents	41,416	43,562
Dividends on Government securities	3,083	713
	44,499	44,275
(3) Interest on investments in reserve fund	...	292
(4) Rebuilding Blackfriars Bridge—rent	100	107
(5) City Police Superannuation—Interest on investments and Government securities	3,073	2,570
(6) Rent of offices at Coal Market	2,351	2,295
(7) Dividend on Consols—City of London Court	249	343
(8) Chamberlain's India 5 per Cents	2,065	2,062
(9) Chamberlain's profit on floating balances	21,462	16,020
Total	159,463	150,182

In addition there are some items such as "rent and old "materials" in the Holborn Valley Improvement account, which obviously include receipts from property of some kind; but the above are the only items which we can clearly distinguish. It would certainly appear from this that the City's estate was less profitable in 1869 than in 1868, yielding about 9,000*l* less, and there being a diminution in almost every account. One of the sources of receipt however—that of the "employment at interest of floating balances in Chamber"—must be of a fluctuating character, and the falling off in it from 21,462*l* to 16,020*l* accounts for 5,442*l* of the diminution of income. But what can be the use of such large floating balances to be a source of income at all? When the City has to borrow so much, will not the whole operation be a source of loss?

Deducting these sums of 159,463*l* and 150,182*l* from the balances of receipts, the miscellaneous income of 1868 and 1869 would be 372,787*l* and 93,025*l* respectively—the former amount however including 303,000*l* for the sale of securities, as above stated, against 1,290*l* in the latter The miscellaneous income, as will be seen, consists mainly of reimbursements on various accounts to the Commissioners of Sewers and Police, sale of old materials in the Improvement accounts, and other casual receipts, of which the details need not here be given.

Altogether the receipts of the Corporation may be summarised thus:—

RECEIPTS.

	1868. £	1869. £
Rates	230,224	237,957
Coal and wine duties	278,100	280,684
Tolls and fees	104,251	149,801
TAXES	612,575	668,442
LOANS	735,000	1,245,000
INCOME from ESTATES	159,463	150,182
SALES of SECURITIES	303,660	1,290
MISCELLANEOUS	69,127	91,935
TOTAL	1,879,825	2,156,649

Such are the resources of the Corporation, and we have now to show how the sums of 1,844,049*l* and 2,171,626*l* it has administered in 1868 and 1869 have been spent. Certain large items may at once be separated from the others, viz.:—

	1868. £	1869. £
In City's Estate:—		
Purchase of property	1,240	19,816
Loans discharged	20,000	60,000
In Reserve Fund:—		
Purchase of India securities	...	128,008
In City's 4d Coal Duty:—		
Purchase of securities	...	11,288
Loans discharged	50,000	50,000
In Bridge-house Estates:—		
Annuities for rebuilding London Bridge	14,050	9,150
Purchase of 3 per Cents	...	100
In Holborn Valley Improvement:—		
Loan repaid	...	250,000
In Commissioners of Sewers, No 1:—		
Loan repaid	11,250	42,500
In City of London Court:—		
Purchase of Consols	2,000	2,000
In Sewers, No. 2:—		
Contributed to Board of Works	19,667	25,266
In Sewers, No. 3 (Metropolis Main Drainage):		
Contributed to Board of Works	53,286	27,315
In Coal and Wine Duties:—		
Paid Treasury for Thames Embankment	191,253	193,855
	362,746	819,298

Most of these items are repayments of loans or purchases of income-producing property, which have a similar financial effect to the repayments of loans, and they ought perhaps to be dealt with in the capital account of the Corporation—a corresponding deduction being made from the receipts of borrowed money on the other side. The items of this sort amount in 1868 to 98,540*l*, and in 1869 to 572,862*l*, and deducting these from the loans of the year above specified, it would appear that the actual addition to the indebtedness of the Corporation in each year was:—

	£
In 1868	636,460
In 1869	672,138

The other items, being the last three, amounting to 264,206*l* in 1868 and 246,436*l* in 1869, are not payments by the Corporation on its own account, but the restitution of taxes which it merely collects for others. Deducting them from the amount of taxation on the other side, it would appear that the actual taxation wholly administered by the Corporation, both as regards receipts and expenditure, was 348,369*l* in 1868 and 422,006*l* in 1869. Deducting both totals from the gross expenditure, there remain to be accounted for as the proper outlay of the Corporation 1,481,303*l* in 1868, and 1,352,328*l* in 1869.

According to a classification, which we subjoin, of the numerous detailed items, these sums would appear to have been spent as follows:—

EXPENDITURE.

	1868. £	1869. £
(1) Managing property	12,082	11,827
(2) Administering markets and duties	66,072	103,024
(3) Interest on permanent loans	84,300	90,998
(4) Improvements (including about 30,000*l* for interest)	979,036	844,132
(5) Expenses of magistracy	8,425	7,687
(6) Police*	72,0 1	72,580
(7) Prisons, administration of justice, &c.	32,936	29,153
(8) Civil government of City	37,250	36,743
(9) Entertainments, donations, and miscellaneous expenditure of City's Estate	48,378	25,446
(10) Lighting bridges, &c.	2,094	10,472
(11) Reparing pavements, sewers, &c.	120,995	97,739
(12) Ward rates	3,979	5,088
(13) City of London Court	5,539	6,952
(14) Paid Chamberlain	2,000	4,634
(15) Expenses of Chamberlain's office	6,156	5,853
Total	1,481,303	1,352,328
Add— Repayments of loans, payments to Board of Works, &c.	362,746	819,298
Gross expenditure, as above	1,844,049	2,171,626

* Including watching of bridges, about 680*l*.

It would appear from this that the most considerable item of expenditure is for "improvements." Deducting these

items, the remaining expenditure would amount in 1868 to 502,267*l*, and in 1869 to 508,196*l*—these being the sums, apart from improvements, which the Corporation has actually expended. But half-a-million a year is still an enormous amount to go through the hands of a single municipality, governing the mere nucleus of a vast city. It is something to know that the local administration of so narrow an area is so costly. *How* it is so costly we shall not at present inquire. It is obvious, however, that there are several items, especially the vague one of the civil government of the City, and the miscellaneous expenditure on entertaiments and the like, amounting to nearly 100,000*l* of the expenditure, which are peculiarly open to suspicion. The Corporation has no business to waste so much, when taxes require to be imposed for police and other purposes. In all probability besides, the expenses of managing the property and the markets, and of the various improvements, include innumerable establishment charges, which are so many sources of waste. Anyone who looks at the accounts narrowly will see that numerous officers are paid by contributions from more than one account, just as the higher officers in the army have two or three different salaries. All such arrangements are necessarily wasteful, and financial reform in the City must commence with amalgamation.

The question of the City accounts, however, is really part of a much wider one—the local taxation and expenditure of the Metropolis. One of the chief sources of confusion has been the mystery about the finances of the Corporation. Wanting correct information here, no one has been able to tell the present cost of our local government, or show all the reasons and advantages of centralising our local authorities. We hope the figures we now publish will facilitate the labours of reformers. It should, at any rate, be possible now to exhibit the financial condition of the Metropolis as a whole, and point out the sources of waste and expense which exist in the division of authority, the multiplication of officials, and the concealment and complexity of the accounts.

CLASSIFICATION of the EXPENDITURE of the CORPORATION of LONDON.

	1868. £		1869. £
(1) Managing Property*:—			
In City's Estate	8,744	.....	6,908
In Bridge-house Estates	3,338	.....	4,919
	12,082	.....	11,827
(2) Administering Markets and Duties:—			
In City's Estate—Markets	48,372	.....	83,352

(12) Ward rates	3,979	.....	5,088
(13) City of London Court	5,539	.....	6,952
(14) Paid Chamberlain	2,000	.....	4,634
(15) Expenses of Chamberlain's office	6,156	.....	5,853
Total	1,481,303	.....	1,352,328
Add—			
Repayments of loans, payments to Board of Works, &c.	362,746	.....	819,298
Gross expenditure	1,844,049	.....	2,171,626

* Including payment of quit-rents.

† See following note.

‡ Including about 30,000*l* for interest. It would perhaps have been most correct to put all the interest together, but the interest on loans for improvements in course of construction may fairly be included as part of the expense of construction.

MARSHAL PRIM.

THE want of interest felt by the general public of Europe in the details of the assassination of Marshal Prim is a very remarkable, and, as far as we know, an unprecedented fact. His death was of course telegraphed all over Europe, and was regarded in some ways as an event of the first importance; but there was little or no curiosity to learn the details of the catastrophe,—none of those long telegrams, full of nothing, which would have followed any other crime of the same kind, and extraordinarily little sympathy expressed, except for King Amadeus who had not been shot. Europe apparently cared only about the results of the event, and but little about the event itself—a sure proof that it was but little interested in the personality of the sufferer. And Europe, as is usually the case, was right, for apart from his position, there was very little to interest mankind in Marshal Prim. That position was without doubt exceptional. Marshal Prim was probably the only perfect example of the Interrex, of the King who is not King and never means to be King, ever seen in the modern world. He ruled a very great country with an unbroken success as Dictator for two years, and yet he never regarded himself as one of the possible candidates for the permanent Sovereignty. For two years there has practically been in Spain no law but Marshal Prim's will; throughout that period he has objected to any *régime* except the Royal, and yet it seems clear that he had no intention of putting the Crown upon his own head, that he honestly regarded himself as a mere Dictator *ad interim*, bound to carry out a specific change in the destinies of his country. That is a strange position, and it is not rendered less strange by the entire absence of genius in the man who occupied it. We desire to speak kindly of Marshal Prim, for his murder was a disgrace to the party which either organised or allowed it; but it is probable that no man so entirely an ordinary man, no man so completely without a following created by himself, ever occupied so lofty a position. It is of course difficult, if not impossible, thoroughly to estimate a man whose secret history has yet to be written; but Marshal Prim appears to us to have been merely a good officer, a trustworthy General of Division, distinguished from other good officers mainly by this—an exact and somewhat unusual comprehension of his own capacities. His earlier life was passed as an officer believed to be of ability, who shifted from party to party as a new party rose to power, but who was so little of a partisan that in shifting he lost no respect, and none of the military confidence of his subordinates. In the short and not very important war between Spain and Morocco he behaved remarkably well, finding, during a momentary confusion, an opportunity for the display of his most exceptional faculty—one, however, which he shares with many soldiers—bravery of the kind which increases as the danger grows more imminent. Mankind in general, not being brave, values bravery very highly; and

there is no doubt Marshal Prim possessed the quality in its supreme degree,—the degree in which it is exceptional—that he was brave to the point at which a man is more of a great man in extreme danger than he is when quietly seated in a room. In the intrigues which followed this war Prim displayed no especial quality, except that of commanding the confidence of soldiers; nor in the Revolution or in the Interregnum, was he ever more than the good General of Division; but then he was the good General of Division, and not the indifferent one. Having driven out his mistress—whom he hated as, on the whole, a discreditable Head for the Spanish Army—his idea was to maintain military order until a new Sovereign or Commander-in-Chief could be discovered, and he never interested himself much about any other point. No Revolutionary Government was ever quite so wanting in originality. General Serrano and Admiral Topete had assisted him, so General Serrano and Admiral Topete were to have great offices—any offices, in fact, they liked, provided they left the Army in the hands of Prim. Civil appointments were given pretty much as it happened. Foreign affairs took their chance, except in so far as they involved military considerations, in which case the Marshal took them into his own hands. As for internal Government he regarded it as most officers regard internal Government. A King was usual and necessary, so he sought for a King. Cortes were usual, so Cortes were elected. Freedom was popular, so, as far as was consistent with the Marshal's notions of order, freedom was allowed. As we understand, he never interfered much with any manifestation of opinion until opposition showed itself in the form he understood—in insurrection in the streets of some city, and then he put it down, with shot and steel if he could, if not, with shell, differing from other officers only in this—that he would go any length, would actually batter down any city of Spain rather than not secure the victory. As he was a really good officer, thoroughly trained and full of experience, and opposed to untrained men, he always succeeded; and when he had succeeded, he went quietly on again without any additional bitterness. The true grievances of Spain seem never to have struck him. The true wants of Spain never particularly moved him. There was to be order till the historic system was rebuilt, and at any sacrifice he obtained the order he recommended. He did not originate anything, or make any experiments, or engage in any desperate intrigues, but just went on as a good general officer would, intent on his idea of maintaining the tranquillity of his district. That he succeeded is due to the fact that he *was* a good officer, that he could secure ordinary military obedience, and that, this secured, his force was adequate to its work.

There are but two original points in Marshal Prim which lift him out of the ruck of continental second-rate generals. The first was a certain indifference to anything out of the range of his ideas, which enabled him to leave a good deal of power to men whom most military Dictators would have interfered with, such as his civilian colleagues; and the second, as we have said, was a clear idea of the ultimate limit of his own pretensions. He was competent to be a chief administrator under a King, but he was not competent to be King himself. Most men in his position would have sought the Crown, but he did not; on the contrary, he, being a Spanish officer at heart, most probably thought himself unworthy of it. It is clear from his ultimate action that the rather ridiculous speech, in which he described his resistance to his wife's importunities urging him to be King, was only over frank, that his efforts to find a Sovereign were genuine enough, that he really thought he could *make* a King, and ought to make one out of the right wood, and in the regular well-understood way. He was vastly ambitious, but his ambition was only to be supreme under the King—the regular ambition of every Englishman, modified by the history of the country, by the fact that in Spain the road to power lies through revolutions, and not through Parliamentary votes.

The third and last peculiarity of Prim's mind was in one way a special, in another a very common, one. Such of our readers as have come in contact with soldiers or sailors of experience have probably noticed their remarkable proclivity to a kind of political speculation wholly apart from their usual lines of thought. The grim Admiral, whom nobody may oppress, is often an outrageous Tory; the steady General, full of the ideas of the service, is often an earnest Radical. Neither would bear genuine ultra-Toryism or full-grown Radicalism, but the speculative side of their minds tends towards absolute conclusions on one side or the other. Prim was a man of that kind. He laboured to rebuild the Throne, but he earnestly thought and openly said that some day or other the Throne would be condemned as surplusage; that Republicanism was the creed of the future; that some day or other, "when there were Republicans in Spain," the Republic would be established there. His belief was quite honest, though it had, except as a speculative theory, next to no meaning, and its expression gave rise to a vague idea spread throughout Europe, that Marshal Prim had ideas which might bear fruit, that he was not quite understood, that he might yet take a course very much at variance with anything expected of him. That belief gave a certain piquancy and impression of uncertainty to his actions; but he had all the while no ideas of the kind, no more intention of establishing a Republic than Sir De Lacy Evans, who in theory was heartily on that side, but in practice would have fought for Her Majesty like a zealot. Marshal Prim accepted the Republic for a century or two hence, and meanwhile intended Monarchy; and the contrast between his belief and his single speculative doubt probably produced the disappointment and eagerness for revenge which led to his lamentable end. The Republicans thought of him as a Statesman who had cheated them, whereas he was only a very good officer, who thought that at present things should go on as usual, but fancied that some hundreds of years hence it might be possible and advisable to do without a King.

BUSINESS NOTES.

The Military Movements in Eastern France.—The statement that the Germans have raised the siege of Langres, coupled with the announcement last week of the evacuation of Dijon and the retreat of the Germans in that quarter, is by far the most important military news of the week. It is not only another sign that the new French attempt to raise the siege of Paris has actually begun, but it shows that the attempt will be made in such a way as to try the German arrangements for maintaining the siege most strongly. The programme seems to be to send a great army from central France against some point in the German line of communications between Paris and their frontier, simultaneously with attacks from the north, west, and south-west on the covering armies—the Parisians of course equally attempting a powerful sortie. Such a movement, however it may issue, cannot but test the Germans most severely if the French troops fight no better than they did at Meung and Beaugency, or than they have done in the north under General Faidherbe. There is a good deal of speculation as to the objective point of the army which is to attack the German communications from the south. The report is put about that the most extreme eastern point will be attacked, viz., on the side of Belfort, with a view to raise Alsace and advance into Baden, a movement which might possibly prove so dangerous for the German armies in France as to compel them to raise the Paris siege. We should rather expect however that the starting point of this eastern army will be Langres, and its object will be to fall on the southern German line of communications at Vitry, which is only two or three days' march from Langres—Vitry itself being only a day's march from Chalons, possession of which would give the French two out of the three lines by which they now communicate with their rear. The temptation to the French to attack here, and not farther eastward, is the probability that the German line must here be weakest, equi-distant as it is from the German frontier, and from the centre of their advanced force around Paris. By attacking at this point the French will most perplex their enemy, compelling him, if they gain any success whatever, to fear danger for *all* his lines of retreat, while the attack will also be at once too far from Germany for the Germans to be reinforced from home, and too far from Paris to be met by the army there, without the siege being raised for a fortnight, which would be its complete ruin. We only point this out however to show the nature of the operations now in hand. The fact that the French lines are now so near the German lines of communication is itself a proof of German audacity in continuing the siege of Paris, and of contempt for their enemies. They

are most likely to win this round, but it is also on the cards that they may pay dear for their temerity.

THE ITALIAN GOVERNMENT AND THE BONDS OF 1861.—The Italian Government have adopted a most unwise course in paying the coupons on the obligations of 1861 at the exchange of 26f, instead of the former rate of 25f 30c. Even if they are under no direct obligation to the holders of bonds in England, it is most imprudent of them, for their own credit, to tamper with the customary payments to these bondholders. A Government which agrees to pay abroad the coupons of its bonds which are held there must intend to attract foreign capital, and so set free for other purposes the limited home capital. This is probably the object of the Italian Government, and at least would be its object if its finance ministers were wise. But the attraction of the foreign bondholder is at once diminished if the amount of interest he receives is both diminished and made uncertain—the uncertainty being perhaps the greater evil of the two. Italian credit at once falls in the foreign market, or an improvement which would otherwise take place is checked. No doubt the Italian Government will say that the coupons are not payable abroad, except at its own discretion, and that the old rate of exchange gave the foreign holder an advantage compared with holders at home, as indeed the new rate still does, the par of exchange on Italy being 26f 60c; but this is hardly to the point. The par of exchange is only 26f 60c because of the depreciated paper currency of Italy—the existence of such a currency being in fact one of the dangers which a borrower in the position of the Italian Government seeks to avoid by paying its bondholders abroad. It pays abroad for no other reason than that they may not be concerned with the depreciation. It would be wise to pay the home-bondholder in gold too, but it is sheer folly not to pay the foreigner in the fixed international currency of bullion instead of the fluctuating paper at home. Having fixed the exchange at 26f, the Italian Government, so far as the dishonesty and imprudence of the transaction are concerned, might as well have fixed it at any figure not exceeding the depreciation of paper at home.

RAILWAY RATE FOR COAL TO LONDON.—The question of the conveyance of coal from Yorkshire and Derbyshire to London still continues a matter of no small interest to the shareholders of the Great Northern and Midland Companies, as well as to the colliery proprietors who make use of their lines. As we stated some time ago, the agreement between the Midland and Great Northern Companies has been lately broken; but, from the report of an interview between the South Yorkshire coal-owners and the Great Northern directors, on Wednesday, it would seem that the immediate effect will not be a complete equalisation of the coal rates between the two districts named and London. This equalisation was strongly urged by the South Yorkshire coal-owners, who represented that they could easily make good any loss of business caused by the Great Northern traffic from South Derbyshire falling off; but the latter company has only consented to reduce the difference of rate to 8d. The rate from Derbyshire is now 1s 4d, and from South Yorkshire it will be 2s. The South Yorkshire coal-owners intimated that they must submit; but, even as it is, the public have gained by the breach of the old agreement. The difference of rate can hardly be so great as to extinguish the South Yorkshire competition. Meantime, the continuance of the differential rate by the Great Northern may perhaps prevent an outbreak of *guerre à outrance* with the Midland; and the longer any such contest can be avoided, the better for the shareholders of both companies.

MR WELLS ON FREE-TRADE.—In a speech delivered at a recent Free-trade banquet at Boston, Mr Wells gave a striking instance of the injury which protection does to more than one American manufacture. He said :—

I hold in my hand a table-knife; let us see what abuses have been perpetrated in regard to it. Here is an ivory handle. Well, we don't grow any elephants in this country, though I don't know what we may do in the future. Well, we have got a tariff of 20 per cent. on the ivory. We do make some steel here, so that is protected by a tariff of 60 or 70 per cent. One of the last things I did previous to my visit to Europe was to go through the cutlery manufactories of this country, and see how they were doing their business; for it seemed to me, with a tax of 20 per cent. on the ivory and of 60 per cent. on steel, it was wonderful that they could hold their own against British cutlery, because the duty on the British knife is only 35 per cent. I found on entering the manufactories that the ivory was brought in and cut by machinery into pieces of the right length to form the handle; then by another ingenious arrangement of little saws these blocks were cut into elongated pieces; machinery drilled the holes in the handle to receive the shank; and then the handle was ready to be fitted with the blade. Then I found that the steel was cut into thin slips by machinery; and the blade and handle stamped into form by dies; and the whole work being thus done by mechanical arrangements, all the parts of every knife fitted every other knife, like the parts of a Springfield musket. Well, now I went into the manufactories in Sheffield soon after I arrived in England, and then I immediately learned the secret how and why the American manufacturer was able to hold his own market in spite of the tariff. All the bits of ivory for the handle of the knife were sawn and drilled by hand; labour was cheaper there; all the blades and shanks of the knives, instead of being stamped, as with us, were formed by hammering by hand. I saw that, in consequence of the American manufacturer having taken advantage of machinery, we were enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own under the present system, what could the manufacturer do if he had everything free?

Another instance, he added, was that of the manufacture of hats :—

Take an ordinary felt hat; it is made of coney-fur and cotton. Well, we are not so poor that we are compelled to breed rabbits for their fur; so we import them under a duty of 10 cents per pound. Then the hat is lined with silk, and trimmed with a silk ribbon; that pays 60 per cent. Then there is the leather sweat-band; that pays a duty of 45 per cent.; but foreign manufactured hats are admitted under a duty of 35 per cent. We have invented the most ingenious machinery to make hats. There is a machine that blows the mixture of fur and cotton round the model, and other machinery for finishing it; and yet while we exported before the war one seventh of all the hats we produced, to-day we hardly export a hat; while the price has so much increased that we have ceased to manufacture as many hats as we did before the war. It seems to me that the true protection of American industry would be simply to remove all these taxes.

These are among the most telling *sort* of arguments on the Free-trade side, and may be trusted to make their way in the United States. What with the loss of shipbuilding, shoemaking, and other trades, the Americans must soon perceive that a system of protection is fatal—is only a means of diverting capital into less profitable manufactures or employments than it would naturally take to, the diversion being also effected at great expense to the whole community. The speech from which we take the above remarks is unusually interesting, Mr Wells describing his conversion from Protectionist theories to Free-trade. The process was a very natural one—intercourse in his official capacity with self-seeking manufacturers, the comparison of manufacturers in free with manufacturers in protected countries, and the spectacle of the injury done by protection to trades which would otherwise prosper. We hope the new Congress, as a step to its revenue reforms, will secure the reappointment of Mr Wells, either to his old office, or to some office where the Congress can have the benefit of his official advice.

HOW SHOULD NEW CAPITAL FOR RAILWAYS BE RAISED?—A shareholder of the Midland Railway Company is reported to have objected at the meeting this week to raising the new capital by preference shares. He would have preferred raising it by ordinary stock instead. The point is a very important one in railway management, but the objections of the Midland shareholder, which will be sympathised with by a great many, do not appear to us well founded. The notion seems to be that ordinary shareholders suffer so much by their dividends being intercepted for preference shares and debentures, that the process must be put a stop to at all hazards. But this is to apply a wrong remedy. Where the ordinary shareholders will suffer no new capital should be raised at all, and the fact that their dividends are diminished is a proof that the new capital was a mistake. Where a company really wants new capital, the cheapest course for the shareholders is obviously to borrow, which is really done by preference shares as well as debentures. By giving a lien upon the undertaking, they burden themselves less than if they were to invite new partners, and they retain any increase of profit for themselves. That this truth is now well understood, is proved by the favour of the public towards the division of ordinary stock into "A" and "B." This is nothing but a means of diminishing the capital interested in the fluctuations of the undertaking, and therefore intensifying the effect of new profits as well as of losses. And, on the whole, it is better that the dividend on ordinary shares should be a little risky—that there should be a body of shareholders deeply interested in the prosperity of the line, and not that these should be so numerous as to make a

serious loss or profit in amount have almost no perceptible effect on the dividend.

THE SUEZ CANAL.—The Suez Canal has now been a twelvemonth working, and it is officially stated that the receipts average about 20,000*l* a month, or about 240,000*l* a year. The head-quarters of the company being in Paris, the war and siege have prevented the usual official report being made, which should have given information regarding the net as well as the gross revenue; but the statement as to the gross traffic affords some material for a retrospective glance at the anticipations of traffic and profit which were indulged in a twelvemonth since, and which we showed to be exaggerated. The promoters of the enterprise, it will be remembered, did not shrink from calculating on a traffic of two or three million tons of shipping per annum, and this immediately; and no doubt if the Canal had such a traffic, it would pay very well. But we pointed out that the data of the calculation were imaginary; that the annual tonnage of the existing carrying trade which the Canal would serve is at the outside about three million tons—this being a certain figure; and that, as the trade would not change all at once, and the Canal offered no advantages to give a great and sudden stimulus to new trade, it was unreasonable to look forward to the traffic so confidently reckoned on very soon. The Canal would do very well, we said, if at first one or two million tons of shipping annually made use of it. The statistics now published show that the average traffic has not yet reached the figure of one million tons—receipts of 240,000*l* per annum at 10 francs per ton only implying a trade of about 600,000 tons per annum. In point of fact, now that we have experience to guide us, the Canal has had unexpected luck in obtaining even this traffic. The screw-steamers which use it almost exclusively are of a kind which did not exist a very few years ago; and it is certain the promoters could not have foreseen that when the Canal was inaugurated, not only would such steamers be in existance, but a number of them laid up, or about to be laid up, for want of business, would be suddenly available for a new venture. But for the remarkable progress of mechanical invention since the Canal was commenced, it must have been a stupendous failure; and but for the singular conditions of the shipping trade at the time of its inauguration, its start, though far short of the promoters' anticipations, could not have been so good as it is. The practical question now is how the Canal is to be kept open; and the gross return will perhaps be sufficiently good for this purpose, though we do not know yet what the working expenses have been. It will be ludicrously insufficient even to pay the debenture-holders, whose annual claim is double the amount of the gross receipts; but if there is only a surplus of any sort to be dealt with, there will be some possibility of a new organisation of the company, or the purchase of its undertaking by the Egyptian Government.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and Dec. 31, 1870:—

Increase	...	8,415	...
Decrease	1,330,582	...	1,322,167

The other receipts were *nil*, and the other payments 80,397*l*.

ABSTRACT OF THE ACCOUNTS OF THE "CORPORATION OF LONDON" FOR 1868 AND 1869.

[In this statement the numerous accounts contained in the annual volume submitted by the City of London Chamberlain are embodied in one account so as to show the receipts and expenditure of each year. Items which are merely transfers from one account to another are omitted. The numbers affixed to each account are the numbers in the volume referred to. There are a good many subordinate accounts to which it is unnecessary to make any reference for the purpose of this abstract, and also one or two "trust" accounts—of very small aggregate amount—which it is likewise thought proper to omit, the City of London having only to do with them as trustee.]

RECEIPTS.

RECEIPTS.	1868.	1869.
	£	£
1. *The City's Estate Account:*—		
Rents and quit-rents	76,885	75,171

THE ACCEPTANCE OF A COMPOSITION.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Our client, Mr Newton Wilson, has just called our attention to the paragraph in your issueof the 24th of December, under the above title, which appears to impute to him participation in "a most iniquitous procedure." We trust, therefore, you will allow us space in your next number to remark that your reasoning appears to be founded upon an assumption which, we regret to say, is unfounded, and on an oversight we we were not prepared to find in your columns.

You assume that a newspaper report of counsel's argument in the Bankruptcy Court is sufficient to be relied upon to justify your statement that in this case the committee of creditors reported, "that the estate would probably pay 12s "per £"—the fact being that the report only said that, after certain deductions, the figures showed upon paper 12s in the £; and at the second meeting of creditors, two out of the three members of the committee stated their conviction that if the estate were taken out of Mr Wilson's hands and realised by forced sales, it would not produce anything like so much as 10s in the £, which was the offer then before the meeting, and which they accordingly advised the creditors to accept.

The oversight to which we referred is the immense difference, which is the universal experience of those practically engaged in realising insolvent estates, between even the most careful valuation on paper and the amount of cash obtained by the expensive and wasteful process of a forced realisation. We apprehend that very few creditors would hesitate to accept 10s in the £ upon an estate which showed on paper not more than 12s in the £, rather than run the risk of the very much smaller dividend which they probably would obtain if the estate were wound up hostilely, whether under Bankruptcy or Assignment.

The real question in this case was, and in all similar cases is, not one between the debtor and his creditors, but between the general body of creditors and a small discontented minority—in the case before you, consisting of only a single creditor out of a body of upwards of fifty; and it is a point of the utmost importance to the commercial public, whether or not the policy of the law is a sound one which declares that, in such cases, the opinion of the statutory majority of the creditors shall prevail. Upon this question we venture to express the opinion that, if the dissent of one creditor, founded upon such considerations as were in this case presented to the Court, had been permitted to override the opinion of the overwhelming majority, both in number and value, it would have been indeed a case for declaring that the law had authorised "a most iniquitous procedure."—We are, Sir, yours obediently,

SHAEN, ROSCOE, AND MASSEY.

8 Bedford row, London, Jan. 4th, 1871.

[We have much pleasure in inserting the explanation of our correspondents. Our comments had reference mainly to the remark of the Registrar, that he would not make the amount of a composition a reason for not sanctioning it. It would have been beyond our province to say anything to imply any judgment of our own on the particular facts of this case. But we must still maintain the injustice of the law which enables any number of creditors, however large, to release a debtor from the debts due to other people as well as to themselves. Such a power should be stringently controlled by the Courts, and to support this was the sole purpose of our remarks.]

PUBLIC COMPANIES.

RAILWAY COMPANIES.

Alabama and Chattanooga Railroad Bonds.—The coupon due in the United States on the 1st instant has not been provided for by the company. The State of Alabama, however, guarantees the loan, and the delay, it is anticipated, will not be prolonged.

Buenos Ayres Great Southern Railway.—The directors of the Buenos Ayres Great Southern Railway have decided to call up the 2*l* per share on the Solado Extension.

East Indian.—At the meeting, the extra dividend of 5s 9d per cent. was declared. The chairman said that the improvement in traffic during the second half of the year was sufficient, if the line were worked at 40 per cent., to cover the whole of the guarantee. The Chord line, which opens up the Indian coal-fields, was now completed. The capital account was nearly closed.

Metropolitan Railway.—The numbers of passengers over the Metropolitan, the Metropolitan District, the Metropolitan and St John's Wood, and the Hammersmith and City railways, during the Christmas holiday week (December 23 to 29th, inclusive), and on Boxing-day of 1870, were as follows:—Christmas week—1870, 1,034,861; 1869, 894,176—increase in 1870, 140,685: Boxing-day—1870, 184,465; 1869, 173,096—increase in 1870, 11,369.

Midland.—At the meeting it was decided to issue 2,922,000*l* in 5 per cent. preference shares of 20*l* each. The chairman thought it would not be necessary to make another issue prior to 1873.

Ottoman Railway.—The sixth drawing of 1863 debentures has taken place, and the numbers are published of the 86 bonds so drawn.

BANKS.

Bank of South Australia.—A dividend at the rate of 10 per cent. per annum has been announced.

Colonial.—At the meeting the net profit for the half-year was stated at 44,184*l*, out of which an ordinary dividend of 6, and an extraordinary dividend of 2 per cent.—being at the rate of 16 per cent. per annum—were declared. Of the balance amounting to 6,832*l*, including the sum brought forward, it was decided to add 5,000*l* to the reserve fund, increasing it to 153,000*l*, and to carry forward 1,832*l*.

London Joint Stock.—The usual dividend and a bonus of 8s 9d per share are announced, making in all a distribution at the rate of 18½ per cent. per annum for the half-year. The total distribution for 1870 has thus been increased to 16*l* 8s 4d.

London and Westminster.—A half-year's dividend at the rate of 18 per cent. has been announced upon the paid-up capital of 2,000,000*l*. The corresponding dividend was at the rate of 17 per cent.

Oriental Commercial Bank.—A dividend of 1s in the pound is payable to the creditors. This makes 15s paid in all.

South Hampshire Bank.—A further call of 12*l* 10s per share has been agreed to by the contributories, they receiving a discharge in full of all liabilities.

Union Bank of Liverpool.—A dividend at the rate of 10 per cent. per annum is announced.

Union Bank of London.—A dividend at the rate of 15 per cent. per annum will be forthcoming at the meeting to be held on the 11th instant.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Joint Stock Discount.—The liquidators notify that, "unless some unforeseen circumstances occur, we shall be in a position during March next, without having realised any of our securities of importance, to satisfy all admitted claims against the company. Our undivided attention can then be given to the collection of the balance of outstanding debts and the careful nursing of our large railway interests, upon the favourable realisation of which the return to the shareholders mainly depends."

National Discount.—A dividend is announced at the rate of 17 per cent. per annum, as compared with 16½ per cent. this time last year.

ASSURANCE COMPANIES.

Equity and Law Life Assurance.—A dividend of 12s per share has been declared for the past year.

MISCELLANEOUS COMPANIES.

Brazilian 5 per Cent. Loan, 1865.—Bonds, representing 42,000*l*, have been drawn for redemption at par on the 1st March.

Chilian 6 per Cent. Loan, 1867.—The fourth drawing of bonds, representing 47,600*l*, has been made, and the redemption at par takes place on the 18th inst.

Colombian 5 per Cent. Loan, 1868.—At the fifth half-yearly drawing 40 bonds were drawn for redemption at par.

Egyptian 7 per Cent. Loan, 1862—*(First and Second Issues)*.—Bonds, representing 20,000*l* of the first issue and 10,000*l* of the second issue, have been drawn for redemption at par on the 1st March.

Honduras 10 per Cent. Loan, 1867.—449 bonds, amounting in all to 33,000*l*, have been drawn for repayment at par on the 9th inst.

Honduras 10 per Cent. Loan, 1870.—750 bonds, representing 75,000*l*, have been drawn for repayment at par on the 9th inst.

Peruvian 5 per Cent. Loan, 1865.—The numbers are published of 1,458 bonds, representing 328,000*l*, which have been drawn for redemption on the 1st April.

Royal Hotel of Great Yarmouth.—Mr R. Everett is now appointed official liquidator.

South Australian Company.—A half-year's dividend at the rate of 8 per cent. per annum, free of income tax, is recommended.

St James's Hotel.—The usual interim dividend at the rate of 5 per cent. per annum is announced.

Turkish 6 per Cent. Loan, 1860.—Under present circumstances the Turkish Government has instructed the Imperial Ottoman Bank in London to pay coupons, due 1st inst., of the above loan, usually payable in Paris only.

Turkish 5 per Cent. General Debt.—The Imperial Ottoman Bank announce that those who wish to receive the payment of their coupons in London or Paris must send in a notification to that effect between the 13th and 23rd inst.

Italian State Domain Loan.—The Anglo-Italian Bank announce the drawing of "Serie D" for payment at par on the 1st April.

MINING COMPANIES.

Van.—A dividend of 15s per share was made payable on the 6th instant.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, JAN. 4.

M. Michel Chevalier has contributed to one of the Havre newspapers an article on "What the policy of inaction may bring on England." He thinks it quite admissible to assume that Prussia, supposing her triumph over France to be complete, may procure herself a fleet equal to that of England. Indeed, to do so is only a question of money; and from the extent of coasts she would have under her domination, she would have no difficulty in manning it, especially as steam has rendered thorough seamen less necessary than they used to be in the sailing days. With such a fleet Prussia would only have to wait until England should be engaged in some difficulty with the United States, and might then declare war on her with the suddenness which characterises her resolutions. Although, says M. Michel Chevalier, some persons consider a descent into England perfectly chimerical, the Duke of Wellington and Lord Palmerston held one to be possible, and urged that preparations should be made against it. Therefore, with a numerous steam fleet, Prussia might be able to throw a large army into England. An invasion of the country would be popular among the Germans, especially as plunder possesses great charms in their eyes, and England would be a magnificent field for pillage. In case then France, which is the only ally of the first class England can have, should be crushed, the latter will be obliged to take precautions against the humiliating and disastrous eventuality that presents itself to her. She must for example maintain permanently at home 350,000 to 400,000 trained soldiers, for Prussia has 1,200,000; she must throw up new fortifications round her arsenals; have entrenched camps and impregnable forts to protect her capital, and must remodel her fleet. The result will be that whilst "Mr Lowe, the Chancellor of the Exchequer, may have conceived the hope of presenting a reduced Budget for 1871, he will have to decide the problem how to prevent one of 60 and odd millions from growing into one exceeding 100 millions." In conclusion M. Michel Chevalier says—"There is no exaggeration in affirming that in the tragic drama now being played in Europe, the interests of England, whether she will or no, are almost as much engaged as those of France. How is it that the men of superior intelligence who govern her are so long in seeing that?"

Since the commencement of the war England has been full of iniquity in French eyes, because she has not made war for France. (Would, *par parenthese*, the French have helped us if we had been in their scrape?) And every day new evil deeds on her part are brought to light. A Havre journal, the *Courier*, has just revealed two—1st, that the English have bought from the Prussians the chassepots delivered by the French at Sedan and Metz, have effaced the French marks on them, and are now selling them at a very high price to France; 2ndly, that the English bought from the Prussians the woollen and other fabrics pillaged at Sedan, Rheims, and towns of the departments of the Meuse and the Marne, and are now selling them in France with a profit of 15 per cent. At such doings the Havre journal is greatly scandalised. But are they true? And supposing them to be so, of what can the French complain? They would not buy the muskets, the cloth, and the other things if they did not want them.

Another Havre newspaper has the following:—"The Prussians, being very much tormented by the workmen of the manufacturing districts of Normandy, are seeking by all possible means to give work to unoccupied hands. At Caudebec these profound gentlemen have established a commission, which has ordered that any one who pleases may be employed in extracting and breaking stones. The work is perfectly unnecessary, but is to be paid by the town. The Prussians have also established diligencies and waggons to carry cotton, purchased in England, from Dieppe to Rouen, to supply the factories in the latter city." The Havre journal thinks this very wrong; but it is evident that if the enemy did not set the poor people to work the localities to which they belong would have to keep them from starving.

The Government at Bordeaux has issued a decree, which shows a desire to do good, but at the same time reveals that its pecuniary resources are very scant. "Considering," it says, "that inscribed seamen have, since the war, given proofs of courage, patriotism, and abnegation, and considering also that the industry of the men is suffering, 2,000,000 oysters shall be dredged in the beds belonging to the State at Arcachon, and be sold by auction, the proceeds to be employed for the relief of the families of such men killed or wounded in combating for the country."

The delegation of the Ministry of Finance at Bordeaux has reminded subscribers to the loans of 750,000,000f (that of the Empire) and of 250,000,000f (that of London), that the third instalment of the former fell due on the 21st December, and of the latter on 1st January, and that interest will be charged if payment be delayed; also that it has the right, without notice, to sell the titles on which calls are not duly paid.

The Bank of France at Paris announced, on the 26th ult., that the dividend of the second half of 1870 had been fixed at 30f, and would be paid from the second January. The representation of the bank, which was at Tours, and is now at Bordeaux, has not yet instructed the branches to make a similar announcement. It was, of course, to be expected that the dividend for the last six months of 1870 would be a poor one, but it was not imagined that it would be so low as 30f. Apropos to the bank, complaints continue to be made by the commercial community, that it does not publish any account of its operations in the country. Whether it has ceased to issue weekly reports at Paris we know not, but balloons bring none.

The latest quotations of the Paris Bourse received in these parts are as follows:—

	Dec. 26. f c		Dec. 29. f c
Threes—cash	52 50	.....	51 80
End of month	52 55	.....	51 70
New loan (Empire)—cash	53 50	.....	52 80
End of month	53 65	.....	52 80

A "financial review" of the 26th ult. says:—"A coupon of 75c has been detached from the Threes, and the payment of a new call on the loan has been demanded. Offers continue to be very rare, and there are no speculating operations. The sales for cash that are made are limited in quantity and unimportant in amount, but demands are always superior to offers. In railways there will assuredly be a somewhat important reduction in receipts, but that does not shake the confidence of shareholders. The Orleans, the Lyons, the Southern, the Northern, the Western, and even the Eastern, though the latter is almost entirely in the power of the enemy, are maintained at prices relatively high. It is expected that the Northern will, in the course of January, give 8f, and the Southern 10f, on account of dividend. It is not yet known what the Austrian railways will do. Italian Fives are suffering a little, because an adjournment of the payment of the dividends due in January is thought possible. For the same reason Turkish and Egyptian securities are heavy, and there is difficulty in realising them. The United States funds are in a very different situation. The more affairs become complicated in Europe, the more do the prosperity and credit of the great Republic augment. The Five-Twenties are quoted at 106½. On a great many French and foreign securities it is feared that no dividend or interest will be paid in January."

A letter of the 30th ult. states that the aforesaid expectation that the Northern Railway would pay 8f had been realised, an official announcement to that effect having been made. It adds that the following companies had also announced payments on shares:—Magasins Generaux, 12f 50c; Omnibus, 12f 50c; North-Eastern Railway, 10f; Compagnie Générale des Marchés, 10f; Marchés du Temple et St Honoré, 10f.

The Credit Foncier of Austria—which was a French creation, and is chiefly in French hands—announces the payment, at Vienna, of 10f, as interest on shares due 1st January, and expresses great regret that it is not able to make it at Paris, as heretofore.

The French Transatlantic Steam Navigation Company announces that it will pay at St Nazaire or at Bordeaux 12f 50c as half-year's interest on bonds falling due 1st January. The principal station of this company was Havre; but since the town was menaced by the Prussians it has sent away all its steamships, and its next departure for New York is to take place from Southampton.

The Credit Foncier (French) had in Paris, on the 22nd, drawings of its 1853 and 1863 loans. To the former lots of from 5,000f to 100,000f are attached. In transmitting to the country, by balloon, the numbers drawn, it notifies that "the coupons of obligations falling due 1st November had been paid at Paris from 25th October, and that payment of these would be made in the departments as soon as communications should be opened." In last letter the remark was made that the previous omission of such an announcement by the Foncier and other companies had been noticed by shareholders and bondholders in the provinces.

"Necessity is the mother of invention," and it has driven the Parisians to manufacture mill-stones of steel, they not having a sufficient number of ordinary *meules* to grind their corn. The mill-stones of France are, I believe, the best in the world, and foreign countries, even as far distant as America, buy them. But if steel blocks answer as well, they can be made in either places, and France will lose the monopoly of a trade which is not without a certain degree of importance. All that has to be done to the blocks is to give them a rough surface similar to that of a file. Another invention is reported from Paris—that of turning to account for food the fresh bones of animals slaughtered by butchers. This invention having been adopted by private industry, the Government has decreed that it will no longer requisition such bones, but will allow free trade in them.

The siege of Paris will give rise to some curious legal questions, the like of which are recorded in no law books.

Among them is this one—Whether a tenant is bound to accept from a landlord a notice to quit carried to Paris by a pigeon?

As the Republican principle is that members of the National Assembly must be paid, in order that poor men may be able to sit therein, the idea has been started that municipal councillors ought to be paid also, and for the same reason. Nothing can be more just in a Republican point of view, and so we may expect that payment will be made, especially as the vast majority of councillors are of a class who think the advantage of being paid for public services more to be esteemed than the honour of rendering them gratis. But as every village in France, as well as every town, has a municipality with a greater or less number of such men, the outlay will be disquietingly large.

The municipal council of Marseilles, in spite of the heavy charges thrown on the town by the war, and of the necessity of giving relief to a large part of the population, either in work or in alms, has seen fit to grant 100,000f as a mark of political sympathy to Garibaldi, to be employed by him on his army. Some councillors wanted to accord 200,000f, and to consider that sum only as a first donation.

The town of Havre, as you were informed, resolved some time back to raise a new loan of 700,000f, but afterwards thought that one-half of it, which was subscribed very readily, would suffice. In the municipal council, however, on the 29th ult., it was represented that that half had been almost entirely disbursed, chiefly in expenses for the National Guard, and that the other was needed. Accordingly, the issue of the second moiety was authorised, and subscriptions are now being received for it. A member of the council remarked that, in the course of a few days, the pay of the National Guard had absorbed no less than 100,000f and that it was not possible to continue such a rate of expenditure. A committee was charged to examine into and report on the matter. If we take into consideration that almost every town and village in the country, is, like Havre, spending more than it can afford over the National Guard, we see that a fearful load of embarrassment will long weigh on them. And in addition to the expenditure under this head, extraordinary grants have had to be made for the relief of people who are reduced to want from the suspension of employment, for increasing the resources of the *bureaux de bienfaisance*, for the redemption of small pledges in the Mont de Piété, and so on.

According to a commercial (not official) return, the import of cotton into Havre in 1870 was 467,989 bales, more than half from the United States, and the stock at the end of the year was 45,790. In 1869, the import was 522,042 bales, and the stock on 31st Dec. 62,310. The import of coffee in 1870 was 525,324 sacks and 10,453 casks, and the stock on 31st Dec. was 65,967 and 2,579. In 1869 the import was 601,298 of the former, and 10,689 of the latter, the quantity on hand at end of the year being 266,885 and 3,379. The quotations of cotton, and of most sorts of coffee, were lower on 31st Dec., 1870, than at the same date of the year preceding.

At Havre, in the week ending Friday, 297 bales of cotton were sold, and the quotations on that day were fixed by brokers at 107f the 50 kilogs New Orleans very ordinary, and 85f Oomrawuttee good ordinary. Since Friday some petty sales have been made. Some small sales of coffee have also been effected. In sugar, French West India has been taken at 68f the 50 kilogs on sample, and 52f, bonne quatrieme. At Marseilles the week before last, there was an active demand for sugar, and the same was the case at Nantes; but in the former place, in the week ending the 31st, sales were limited, stocks being low and prices firm. Havana was at 40f for No. 12. At Bordeaux, coffee has been in demand, but none has been taken at Marseilles.

COMMERCIAL AND MISCELLANEOUS NEWS.

It is stated that the organisation of the Institute of Accountants in London is being proceeded with, and the council will issue for general information the rules and regulations so soon as they have been definitively settled under legal advice. In the mean time it may be stated the council will have power up to the 1st of July, 1871, to admit as fellows such professional accountants as were in practice on the 1st of January, 1866; after that date fellows will be elected only on the conditions set forth in the rules. Provision is made for the admission of associates, subject to the passing of an examination. The entrance fee payable by fellows admitted before the 1st of July, 1871, will be 31/ 10s, after that date the entrance fee will be 52/ 10s, the annual subscription being 5/ 5s.

We give the following on the authority of the *Eastern Budget*:—A Russian paper announces that an important change is about to take place in the tea trade of Russia with China. Hitherto tea has been conveyed by Russia either by sea, via Suez, London, and Konigsberg, or by land through Siberia. The sea route occupies four months, the land route a year; and it is now proposed to send the tea in future direct from Suez to Odessa, so as to avoid the necessity of employing English agents. Negotiations have been entered into for this purpose with the Odessa Steam Navigation Company, and the Russian merchants in China have already established agents in that town who are to despatch the tea to its purchasers on receipt of two-thirds of its value. As no less than 25,000,000 lbs of tea were sent to Russia last year through English agents, it is expected that the new plan, which does away with their intervention altogether, will bring considerable profits to the merchants in question.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fourth week of December, 1870, and of the corresponding week in 1869:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	4th week Dec., 1870.	Corresp'nding Total in 1869.
West district	5,855	9,053	6,030	21,538	23,529
North district	6,696	13,077	10,352	30,125*	28,742

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Jan. 4, 1871.	Week ending Dec. 28, 1870.	Week ending Jan. 5, 1870.
	£	£	£
Thursday	10,301,000	9,583,000	24,097,000
Friday	23,030,000	11,859,000	15,359,000
Saturday	15,520,000	10,209,000	11,895,000
Monday	15,719,000	6,831,000	13,798,000
Tuesday	13,288,000	9,742,000	13,575,000
Wednesday	15,183,000	9,854,000	11,319,000
Total	93,041,000	58,135,000	92,243,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, Jan. 5, 1870.

The total since the 1st of January, 1870, is 3,997,884,000*l*, compared with 3,693,959,000*l* for the corresponding period last year, showing an increase of 303,925,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date. as well as ten years back, viz. :—

At corresponding dates with the present week.	Jan. 9, 1861.	Jan. 8, 1868.	Jan. 6, 1869.	Jan. 5, 1870.	Jan. 4, 1871
Circulation, including bank post bills.....	£ 21.116.633	£ 24.878.991	£ 24.447.433	£ 24.341.577	£ 24.942.962

Clearing-house return..	...	(65,353,000)	76,022,000	92,243,000	93,031,000

In 1861, the Bank rate was suddenly raised from 6 to 7 per cent., consequent on the continuance of adverse exchanges with America and the withdrawal of bullion for the Bank of France, which had now been going on for some weeks. The Bank of France also raised its rate this week from 5½ to 7 per cent.

In 1868, the depression following on the 1866 panic continued. The re-organisation of the French army, to meet the changes caused by the war of 1866, was much discussed.

In 1869, money was easy at 3 per cent., but a period of comparative activity was looked forward to. A Conference was being held on the dispute between Turkey and Greece respecting Crete.

In 1870, there was the customary ease at the beginning of the year, but considerable demands were anticipated in the spring. In foreign affairs the prospects of the new Ollivier Ministry still afforded subject for discussion.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 6,022,341*l*; in 1868, an excess of 5,115,703*l*; in 1869, a deficiency of 1,150,691*l*; and in 1870, a deficiency of 1,965,506*l*. In 1870, there is an excess of 1,380,970*l*.

Discount and Money Market.—As was expected, the money market this week has become a great deal easier with the opening of the new year, and the rate for the best Bank paper is ¼ lower at 2¼. The latter figure, however, is not very strongly sustained, and is still a little higher than it was three weeks ago, before the usual pressure at the close of the year set in. Now that this pressure is removed, and the money seeking employment is farther increased by the payments of the dividends, it is natural to expect that the state of things which existed towards the close of the year should return for a time—at least in the absence of any great political change. There is a very general impression, however, that the present suspense will either terminate soon, or will not be long patiently endured; and there is some reluctance to make long engagements at the present low rates. This disposition has been encouraged by the reports of the approaching capitulation of Paris, and the expectation that peace would ensue; but apart from these rumours, it is certain that many new schemes are waiting a favourable moment for being launched, and will come on the market if it is seen that there will be no sudden termination of the war. The rates charged by the bill brokers for long-dated trade bills are accordingly rather higher than they were last week, although the rate for six months' Bank paper is nominally less.

At the Bank this week there has been very little demand. The changes in the Bank return—a decrease of 1,815,062*l* in public deposits, and of 1,418,272*l* in the reserve, with a corresponding increase in the circulation—are only usual at this period, and do not affect the great strength of the Bank's position, which must be still farther improved in the course of the month, in consequence of the receipt of the income and assessed taxes.

We subjoin our usual quotations for mercantile paper having various periods to run :—

2 and 3 months Bank bills	2¼	per cent.
4 — —	2⅜	per cent.
6 — —	3	per cent.
3 months—Trade bills	2⅝ @ ¾	per cent.
4 — —	2⅞ @ 3	per cent.
6 — —	3¼ @ ⅜	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call.....	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1¾ per cent.
Do fourteen days	1¼ per cent.

The discount quotations current in the chief continental cities are as follows :—

Vienna	5½ 6	per cent.
Berlin.....	4½ 5	per cent.
Frankfort	4¾ ½	per cent.
Amsterdam	3½ 4	per cent.
Antwerp	3½ 4	per cent.
Hamburg	4	per cent.
St Petersburg	7 8	per cent.

English Government Stocks.—The stock markets have been firm and even buoyant this week, with the exception of foreign securities, in which there have been several depressing influences at work, especially the great political uncertainty, coupled with the high prices which this speculative class of securities has reached. In all other departments, though the political uncertainty counts for something, yet the abundance of money, the possibility, if not likelihood, of the suspense continuing long enough to permit the completion of some transactions, and other special causes, such as the very favourable traffic returns of home railways, continue to strengthen the market. The present period of the year, when the January dividends are paid, is of course favourable to an upward movement in most departments, if other circumstances permit. In English Government securities the upward tendency has been strongly felt, and Consols on Wednesday were at 92⅛ ¼, a rise of ⅜ from the closing point of last week. The state of the account at the settlement also assisted this improvement, a scarcity of stock, which has for some time been a strong feature of this market, being once more felt; and though more stock, it was stated, came forward on Thursday than was anticipated in some quarters, and there was a slight reaction, the market is likely enough to be affected by this cause for some time to come. Not only will there be a million of purchases for the sinking fund during the quarter, as we stated some weeks since, but in the present state of the money market, and the longer the suspense continues, there cannot fail to be a gradual preponderance of purchases.

To-day there was a recovery from a reaction to 92⅛ which had taken place on Thursday, and Consols close at 92 ⅛ for money, and 92⅛ ¼ for the account.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills March.	June.
Saturday	91⅛	92	91⅞	92	10s pm	18s pm
Monday.....	Stock Exchange closed.					
Tuesday.....	92	92⅛	92	92⅛	10s pm	15s pm
Wednesday	92	92⅛	92	92⅛	10s pm	14s pm
Thursday	92	92⅛	92	92⅛	10s pm	15s pm
Friday	92	92⅛	92⅛	92⅛	10s pm	16s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	91 11/16 13/16	92 ⅛	+ 1/16
Ditto account, 2 February	91 13/16 15/16	92 ⅛	+ 1/16
Reduced 3 %	91 9/16 11/16	92 ⅛	+ 1/16
New 3 %	91 9/16 11/16	92 ⅛	+ 1/16

Ditto 5 %, red. at par, July 5, 1880	110 ½	110 ½	... ...

Exchequer Bills.—10s to 15s pm.

Colonial Government Securities.—As usual at any time when there are funds seeking investment, these securities have been sensibly affected, and there are several improvements to note for the week, viz. :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %.....	106½ 7½	104½ 4½ xd...	...
Ditto 5 %.....	99 100	97 8 xd	+ ½
New Zealand 5 % Consolidated Bonds.....	99½ 100½	100 1	+ ½
New South Wales 5 % Bonds, 1888 to 1890	102½ 3½	100 1 xd	... ...
Nova Scotia 6 % Bonds, 1875.....	101 5	101 2 xd	... ...
Queensland Government 6 % Bonds, 1884-5	109½ 10½	107 8 xd	+ ½
Victoria 6 %.....	111½ 12½	111½ 1½	... ...
Ditto New 5 %	101½ ½	101 2 xd	... ...

Foreign Government Securities.—As we have stated, this market has been rather weak, if not almost in a shaky state. On Wednesday there was more firmness, caused partly by the reaction from the previous depression, partly by a combination of telegrams, which seemed all to point to an early capitulation of Paris and a termination of the war, and partly by good continental prices, chiefly from Berlin, based on the expectation of these events. The improvement, however, was only temporary, and the general tone of the market has been weak, although there have again been better prices to-day. The principal special cause of depression was the confirmation on Saturday of the news of

Marshal Prim's assassination and death, which at once produced a fall of 1¼ in Spanish 3 per Cents. These are now quoted ex div., and on Saturday, while the opening quotation was 29⅝ ¾, the lowest price of the day was 28⅜ ½, though there was subsequently an improvement of ⅛. The reaction towards a higher value continued on Tuesday and Wednesday, and there was a sharp recovery on the latter day to 29 7-16 9-16, a fraction higher than the opening point of the week, which was followed on Thursday by another improvement of ¼. Turkish securities have likewise been unsteady, and there were a good many fluctuations, ranging between ½ and ¾ in the 5 per Cents of 1865. There are still most unfavourable financial reports from Constantinople. In Italians of 1861 there was a fall on Tuesday of 5-16 on the announcement of Messrs N. M. Rothschild and Sons that they will pay the dividend only at the exchange of 26 francs, besides deducting the Italian income tax; and, though this fall was recovered later in the week, the effect was to assist the weakness of the market. The main cause of the unsteadiness here, however, is simply the state of the market, and the suspense which make it peculiarly sensitive to the slightest influence. In the event of any serious new event, there would almost certainly ensue a grave panic, which could not but affect other departments. To-day prices have, on the whole, been rather better than they were earlier in the week, and the closing prices are firm.

The special settlement in North German scrip was completed on Wednesday, and it is now admitted to official quotation. On Wednesday it was 1 to 1⅛ prem., improving on Thursday to 1⅝ ⅞; the French loan, on the other hand, having been flat at 1½ ¼ dis.

South American securities have been a good deal dealt in, and have hardly shared the weakness of the rest of this department.

The following show the changes for the week, quoting the latest unofficial prices:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

With regard to the announcement of the Italian Government respecting the coupons of its 1861 obligations, we have made some remarks in another part of our impression, but may here notice the great discontent it has occasioned among the creditors of Italy. A correspondence that has taken place between the Secretary of the Foreign Bondholders' Committee and Messrs Rothschilds has elicited from the latter the information that they know nothing of the reasons of the Italian Government in taking this step, and it is difficult to imagine any reason; but there are great apprehensions that the Italian Government will yet fix the exchange at a more favourable figure for itself, and thus in effect impose an additional tax upon its coupons. The proceeding of the Italian Government is in effect equivalent to a repudiation. A Government which takes advantage of the depreciation of its own "promises to pay" by paying its creditors with them, in reality repudiates, though the bond may not speak of payment in gold. It defrauds its subjects by not supporting its paper promises at their full value, and then commits a farther fraud by paying its own debts with inferior money.

English Railway Stocks.—The market has again been steady, and, as will be seen below, there are a good many improvements for the week. The purchases in anticipation of the dividend have evidently commenced, and the reactions from the greatest improvement of each day are very narrow—a sign that the speculation is strongly supported. The traffic returns of the half-year are now completed, and the general result is that the improvement is greater in amount and as great in proportion as the improvement in the first half of 1870. The percentage of increase on the principal railways in the first half-year on the corresponding period of 1869 was 4·84 per cent., and in the second half-year it was 4.5 per cent. The war has consequently had almost no visible effect in checking the business of the country; and the improvement is the more striking, because traffic returns had already begun to improve considerably in the second half-year of 1869, with which the comparison is now made. Possibly there would have been a greater improvement had there been no war; but it is certainly satisfactory that we have continued the rate of improvement which was manifest before the war. Generally, therefore, it may be safe to anticipate an addition to the half-year's dividends equal to the addition made in the first half of the year.

To-day the improvement, which has been steady during the whole week, continued with little variation.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

London, Chatham, and Dover arbitration debenture stock is quoted at 90 91 ex div., which shows an improvement of 2¼ from the quotation which ruled prior to the announcement that the dividend would be paid in January.

The traffic returns of eighteen railways in the United Kingdom, of which a list is subjoined (including the principal railways), for the week ending December 31, the closing week of the half-year, amounted to 658,507*l*, being an increase of 23,523*l* on the corresponding week of the previous year. The aggregate for the half-year amounts to 19,066,968*l*, an increase of 816,438*l* on the corresponding period of the previous year. It will be understood that in the case of the Caledonian, Great Western, Glasgow, and South-Western, North British and South-Eastern, which make up accounts to 31st January, the return is only for 22 weeks. In the case of one or two companies it is for 27 weeks, but the increase stated will nevertheless be near the mark for the half-year. The principal increases for the week are again in Midland and North-Eastern, but Great Western show an unusual falling off of 4,789*l*. The following are details of the increase or decrease in each case for the week, and for the whole period:—

It has been intimated, with regard to the late arrival of several of the London and North-Western Company's trains, especially the fast ones, that the delays have been occasioned by the precautionary measures taken, during the intensity of the frost, for the safety of the traffic, comprising a reduction in the speed of the fast passenger trains, and more frequent stoppages for the examination of the carriage wheels, &c.

FOREIGN AND COLONIAL RAILWAYS.—We subjoin our usual list of the changes in this department, which call for no special remark :—

Some further correspondence has taken place this week regarding the payment of the interest on the Roumanian State Railway obligations. An official advertisement has appeared in the Berlin newspapers, signed by the contractor and concessionaire of the lines, Dr Strousberg, and by the agent of the Roumanian Government, to the effect that owing, to the war, a section of the line was not completed at the time fixed, but that the interest would nevertheless be paid on the 31st of March, 1871, the Roumanian Government admitting its liability under the guarantee. This is so far satisfactory, and the Roumanian Government may be excused for some delay till the matter is inquired into; but a more explicit announcement should be issued as soon as possible. The other obligations of the Roumanian Government have not been affected, but it should lose no time in setting itself right with the public.

We are requested to state that, owing to a slight technical informality in connection with the Brazilian law, which has been made in the prospectus of the Porto Alegre Brazilian Railway Company. but which does not in any way affect the value of the enterprise, the Board of Directors have determined to return the deposits at once, and to offer the preference capital for subscription again in the course of a few days.

AMERICAN SECURITIES.—The following shows the changes for the week in the most important stocks of this department :—

BANKS.—The dividends of three of the London Joint Stock Banks have been announced this week, and are all good, considering the difficulty of employing money which has been felt during the last half year. The London Joint Stock Bank especially shows a great improvement in its profits—the dividend announced being at the rate of 18⅓ per cent. per annum, the dividend for the corresponding period of 1869 being at the rate of 15⅓ per cent. per annum. The dividend altogether for 1870 is 16*l* 8s 4d per cent. against 14 per cent. in 1869. The London and Westminster dividend, at the rate of 18 per cent., has also improved, compared with the dividend for the corresponding half-year of 1869, which was at the rate of 17 per cent., while the improvement for the whole of 1870 is 1½ per cent.—being 18 per cent. as compared with 16½ in 1869. The dividend of the Union Bank, 15 per cent., is the same as for the corresponding half-year of 1869, and the dividend for the whole year is also the same. In consequence of these announcements, the shares of the London and Westminster and London Joint Stock Banks have both advanced, the advance in the case of the London Joint Stock being from 34 to 35 on Thursday to 35½ to 36½ to-day. The position of the London Joint Stock is considered additionally favourable from the statement that the dividend does not include any commission for the North German loan, which will doubtless amount to a very considerable sum. In other respects the market for bank shares has been dull. The changes on the week are as follow :—An advance of ¼ in Anglo-Egyptian and Metropolitan; ½ in English Bank of Rio; ¾ in Imperial Ottoman; 1 in Bank of Egypt, British North America, Chartered of India, London of Mexico, London and Westminster, and Oriental. London Joint Stock shares have advanced 2.

The directors of the Union Bank of Australia have resolved upon a dividend of 1*l* 10s per share, being at the rate of 12s per cent. per annum.

TELEGRAPH SHARES.—Among the changes in this department are—a recovery of 5 in Anglo-Mediterranean, and of 1 in Anglo-American. British India Submarine and Falmouth and Gibraltar show a rise of ¾, and China Submarine and Cuba of ¼.

MINES.—Some important movements have taken place in the quotations for British mining shares. The business transacted has been on a somewhat extensive scale, and the purchases effected have been more important than for some time past. The general tendency of prices has accordingly been upwards. Devon Great Consols shares have improved 5 on the week; East Lovell, 3; Tin Croft, 2½; Van and Wheal Mary Anne, 1½; Grenville, 1¼; Margaret, Uny Lelant, 1; Great Wheal Vor, ¾; East Grenville and South Condurrow, ½; Marke Valley and Tan-yr-Allt, ¼. East Caradon and Wheal Buller, however, have declined ½.

The leading feature in the market for foreign mines is the continued demand for Sweetland Creek shares, which are becoming scarce, and have advanced ¼. Don Pedro, Pacific, and Taquaril close ⅛ better on the week.

MISCELLANEOUS.—A steady business has been transacted in this market, but the changes, which have been mostly favourable, call for no especial remark. Credit shares show symptoms of farther recovery, Credit Foncier, General Credit, and International Financial having advanced ⅛, and London Financial 1½. Anglo-Austrian certificates closed at a rise of ½; Commercial Union shares ¾; Fore Street Warehouse, Madras Irrigation, Peninsular and Oriental and Royal Mail Steam 1; National Discount are ½, and Silver's India Rubber 1½ better on the week.

EXCHANGES.—The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 370,000*l*, and to Bombay, 30,000*l*. The minimum price was fixed, as before, at 1s 10d on all Presidencies, and tenders on Calcutta at 1s 10¼d will receive about 61 per cent., and on Bombay at that price in full. These results show a diminished demand for means of remittance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The large amount by the overland mail has been delivered this week, and, as we anticipated, has all been sold for the continent. The other arrivals have been small, comprising only 16,000*l* per Mary Shepherd, from Auckland, and 2,000*l* per Mediterranean Land from Africa; these have also been taken for export, and the demand still exists, although we think not to such a great extent as in the early part of the week. The transactions at the Bank consist only of an influx of 40,000*l* and a withdrawal of 10,000*l* sovereigns, sent part to Egypt, and part to the West Indies.

Silver continues in good demand, but without any rise in price, which remains at 60¼d to 60⅝d per oz standard. We have received about 50,000*l* from New York and about 190,000*l* from India and China; this latter sum consisted of Doré silver and was placed at 61 1/16d per oz standard, but transactions have since taken place at 61d per oz standard. The Elbe has taken 5,000*l* to the West Indies.

Mexican dollars continue in fair demand, but are taken chiefly for refining purposes, the orders for China being but very small. The price remains at 58⅞d and 58¾d per oz for the Old and New Coinages respectively.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10¼d to 1s 10⅜d per rupee. Tenders for the India Council bills were received yesterday. The amounts allotted were—to Calcutta, 370,000*l*, and to Bombay, 30,000*l*. Applications on the former place at 1s 10¼d received 61 per cent., and on the latter at the same rate in full.

India Government loan notes are somewhat lower in price. We quote the 4 per Cents., 89½ to 90⅛; the 5 per Cents., 98½ to 99½; and the 5½ per Cents., 105½ to 106½.

Quotations for bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11½d per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0½d to 5s 0⅝d per oz std, last price; ditto, containing 5 grains gold, 5s 1d per oz std, last price; Mexican dollars, 4s 10⅞d to 4s 10⅞d per oz, last price. Quicksilver, 11*l* to 12*l* per bottle; discount, 3 per cent.

There were no bullion operations at the Bank of England to-day.

BUSINESS CHANGES.—The following are among the changes in city firms at the commencement of the year:—

Messrs J. Henry Schröder and Co. have admitted Mr H. F. Tiarks and Mr O. von der Meden into partnership on the retirement of Mr A. Schlüsser. Messrs Coulon and Co. have announced the retirement of Mr Albert Coulon, and that the business will be carried on by Mr Alfred de Coulon and Mr Alphonse Berthoud, under the style of Coulon, Berthoud, and Co., Mr John Reeves being authorised to sign by procuration. Messrs Irving, Ebsworth, and Holmes, in consequence of the retirement of Mr Irving and Mr Holmes, will henceforth carry on their business as Ebsworth, Sons, and Co. Messrs Churchill and Sim have admitted Mr Charles Neck into partnership. Messrs Grant, Hodgson, and Co. will henceforth adopt the style of Grant, Chambers, and Co. Messrs Sheppards, Pelly, and Allcard have admitted Mr John Masterman Sheppard. Messrs R. M. Holborn and Sons, whose firm has been almost limited to the direct descendants of Robert Holborn, by whom it was founded in 1775, have admitted Mr A. M. Snell and Mr J. F. Godsmark. The *Credit Lyonnais*, of Lyons, has established an agency in London, to be carried on at 5 Austinfriars, under the management of Mr Joseph Rabino. The partnership of Bradbury and Cook, wool brokers, in London and Liverpool, has been dissolved by mutual consent, Mr George Cock having retired from the business, which will be carried on in future by the new firm of Thomas and Cook.

FAILURES AND EMBARRASSMENTS.—The following are announced:—

Messrs Vivian and Mansell, of 110 Wood street, City, wholesale hosiers.

Messrs Rautmann and Co., of London and Paris, foreign warehousemen. Liabilities, 30,290*l*. Estimated assets, 11,898*l*.

The *Glasgow Herald* reports the failure of Messrs T. J. Biggs and Co., commission merchants, Cincinnati. Liabilities, 200,000 dols; and assets inconsiderable.

Information has been received from the French Post Office that the mails passing through France are at present liable to considerable delay, and that it is necessary, therefore, to despatch from London some days in advance of the usual time all correspondence intended for conveyance by French packet from Marseilles, Bordeaux, or St Nazaire. Under these circumstances the public are recommended to post, at least a week in advance of the usual time, all letters for Mauritius, China, Brazil, Mexico, Cuba, &c., intended for conveyance by the French packets. The mail for Mauritius will, this month, be made up in London on the evening of Saturday, the 14th January, instead of on the 18th, so as to ensure as far as possible, its arrival at Marseilles in time for the packet. During the present uncertain state of the route through France, no correspondence, excepting that for Mauritius, will be forwarded by French packet, unless specially addressed to be so sent.

The next mails for Australia will be despatched from London—via Southampton, on the morning of Saturday, the 21st January; via Brindisi, on the evening of Friday, the 27th January.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The public are reminded that letters may be forwarded to Bordeaux by the mail packets of the Pacific Steam Navigation Company which leave Liverpool for Brazil on the 13th and 29th of each month (or on the 12th or 28th, when the 13th or 29th fall on Sunday), and call at Bordeaux. There are also frequent opportunities of sending letters to Bordeaux, by private steamers sailing from Liverpool or from London. Letters, &c., intended to be sent in either manner should bear a special address indicating such intention. They will be liable to the usual rates of postage on correspondence for France.

The following table shows the dates on which the mails for New Zealand will be made up in this country during the present year, for transmission to San Francisco. Three despatches will be made in each month; but, although it may reasonably be expected that mails sent by the latest despatch will reach San Francisco before the departure of the packet, which takes place on the 15th of the month, the public are recommended to post their correspondence in time to be forwarded by one of the previous despatches:—

Month.	Dates of Despatch from London.			Port of Embarkation.
January	Saturday, 21st...	Tuesday, 24th ...	Thursday, 26th...	Queenstown.
February	Saturday, 18th...	Tuesday, 21st ...	Thursday, 23rd...	
March	Tuesday, 21st ...	Thursday, 23rd...	Saturday, 25th...	
April	Thursday, 20th...	Saturday, 22nd...	Tuesday, 25th ...	
May	Saturday, 20th...	Tuesday, 23rd ...	Thursday, 25th...	
June	Tuesday, 20th ...	Thursday, 22nd..	Saturday, 24th...	
July	Thursday, 20th...	Saturday, 22nd...	Tuesday, 25th ...	
August	Tuesday, 2nd...	Thursday, 24th...	Saturday, 26th...	
September	Tuesday, 19th ...	Thursday, 21st...	Saturday, 23rd...	
October	Saturday, 21st ...	Tuesday, 24th ...	Thursday, 26th...	
November	Tuesday, 21st ...	Thursday, 23rd...	Saturday, 25th...	
December	Tuesday, 19th ...	Thursday, 21st....	Saturday, 23rd...	

N.B.—Mails will be made up at Liverpool on the same day as in London, and at Dublin on the following day.

All correspondence for New Zealand will, as a rule, be forwarded via San Francisco, in the absence of any special indication to the contrary.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Trade at Mark lane to-day was very quiet, and the transactions were of quite a retail character in both English and foreign wheat. Prices were unaltered, however, the recent advance being fairly maintained. Flour sold slowly at late rates, and no change took place in any kind of spring corn. Oats and maize were steady in value; while beans and peas were held at extreme currencies. Barley was inactive, but full prices were asked for grinding descriptions. This week's imports of foreign and colonial produce have amounted to 12,230 quarters of wheat, 15,180 oats, 1,430 barley, 6,050 maize, and 29,390 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled quiet, and values were without material change.

The Liverpool cotton market has been very quiet during the past week, and American descriptions have receded $\frac{1}{16}$d to $\frac{1}{8}$d per lb, East Indian $\frac{1}{16}$d to $\frac{1}{8}$d per lb, and Bengals $\frac{1}{16}$d per since last Friday. The total sales for the week (of four days only) are 49,650 bales, of which the trade have taken 41,630 bales, speculators and exporters, 8,020 bales. The imports have been very heavy, amounting to 182,583 bales. The actual exports are 7,242 bales, and to-day's stock is estimated at 519,680 bales. To-day the market closes dull. Sales 10,000 bales. Americans $\frac{1}{4}$d per lb lower.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended January 5, 1871:—

	Imported.	Exported.
American.....bales	130,089	2,183
Brazilian	8,791	100
East Indian	35,880	5,407
Egyptian	8,305	50
Miscellaneous	3,596	...
Total	186,661	7,740

At New York, on January 4, middling Upland cotton was quoted at 15$\frac{1}{2}$ cents per lb. Bombay telegram to Jan. 3 report the market quiet at 192 rupees for Dhollerah fair.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, December 10:—We are unable to advise any movements worth specifying in our market. Business opened with a small but steady inquiry, and though unfavourable advices from home were then in hand, purchasers were unable to break down prices. On the following day no change was observable either in values or demand, but on Wednesday the apparently more pacific appearance of matters as regards the Black Sea question restored confidence to a great extent, and exporters seemed more disposed to extend their operations. Thursday brought a great many buyers into the market, and a business aggregating upwards of 900 candies was recorded before the day closed, but without causing any advance in rates to take place. Yesterday there was not much doing, but the market closed firm at the

quotations which we give below. The purchases recorded sum up to a total of 2,700 candies, and are composed of about 800 candies Sawginned at 207 rs to 208 rs; 300 candies Bhownuggur at 203 rs to 207 rs; 270 candies Dhollerah at 203 rs; 250 candies Veravul at 177 to 186 rs; 250 candies Ahmedabad at 181 rs to 186 rs; 150 candies Joriah at 173 rs to 191 rs, and the remainder of Broach, Oomra, Khandeish, Vingoria, &c., at prices varying according to quality. Several small lots of new Oomrawuttee have arrived on the green, and they show a better selection than the earlier parcels. The price demanded is very extravagant, however—220 rs per candy—and no firms are likely to pay it, unless for a few docras for sample purposes. A small lot of new Khandeish of very indifferent quality was sold on Thursday at 209¼ rs per candy. We have seen a sample of the first pickings from Akote, which is very satisfactory. The accounts received this week regarding the crops are favourable from all the districts excepting Broach, where our correspondent informed us the cloudy and humid weather experienced has injured the more advanced portion of the crop. We believe, however, that the damage will be comparatively insignificant should a recurrence of favourable weather take place forthwith. The selection of old cotton available on the spot at present does not improve, and, for the small good lots obtainable, high prices continue to be paid. Most of the Bhownuggur and Dhollerah is being taken by local spinners. Very few contracts for future delivery have so far been made either on European or native account. The majority of the dealers have been nearly ruined by the depreciation which has taken place in the staple, and do not appear inclined to venture into operations even at present rates, while Europeans also are unwilling to incur the risk attendant upon forward delivery. From Tinnevelly we have a telegram dated yesterday quoting 6⅞d per lb.

Actual exports since last mail left. 12,762 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated December 23:—Our last cotton report was dated 16/17th. A slight further concession on the part of holders has led to an active business, and yesterday's market closed with a decidedly upward tendency. This morning little or nothing was done, owing to the commencement of the native holidays, which last until Tuesday next; the small operations concluded were, however, at still hardening rates, and we scarcely anticipate that actual quotations will be practicable when business is resumed next week. Quotations:—Fair, 8 5/16d to 8⅜d per lb, f.o.b.; good fair, 8⅜d to 8⅝d per lb, f.o.b.; good to fine (gallin), 10d to 12½d per lb, f.o.b. Freight about 5/16d per lb for steam-pressed bales.

The colonial produce markets opened with considerable animation this week. The demand for sugar has been active, and both new and refined goods have tended upwards in value. Stocks of refined sugars are small. Native Ceylon coffee has been in request, both on the spot and afloat, at fully late rates. Rice and tea are unaltered in value.

The annexed is dated Rangoon, November 28:—The last rice vessel of the season for Europe—the Vigilant—cleared on the 24th instant, and since then almost all demand for our staple has ceased. A small native vessel is taking some rice as ballast to the Straits, but there is no inquiry for any other quarter. Prices have declined to 109 rs per 100 baskets, 5 parts, for all qualities—equal to 5s per cwt, f.o.b., at the current rate of exchange. Supplies are next to nothing; only now and then a boat-load arrives. Exports during the last four years average as follows:—

Our Crops—The weather during the month has been very beneficial to the paddy crops. No more moisture is required; and as soon as the north-east monsoon has fairly set in, the harvesting operations will be commenced with.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Dec. 6:—The first public sale of the season was held on the 1st, and was followed by others on the 3rd and 5th current, and 1,450 chests were so disposed of. The demand for all descriptions has been good, and the sales have passed off with good spirit at prices which show some improvement on the bulk of the sales previously effected by private contract, more particularly on good sound shipping qualities and Oudes. Compared with the average rates of last season, we consider prices to be about as follows, viz.—good and fine sound shipping, 20 rs to 25 rs lower; good and fine consuming, rs 27-8 to rs 32-8 lower; and inferior kinds of consumers and Oudes, 35 rs to 40 rs lower. Compared with the prices of the London October sales, our rates, taking exchange of the day, 1s 11d per rupee, are about par, but occasionally a shade higher on low qualities. About 23,000 maunds of the crop have now been disposed of, exclusive of this day's sale, against 15,000 maunds at corresponding date last year. Exports of indigo, from 1st November, 1870, to 5th instant:—To Great Britain, 719 chests; to France, 17; to Trieste, 308; to foreign Europe, 10; to America, 92; to Gulphs and Levant, 4—total, 1,150 bales.

Mr. L. Th. van Houten thus reviews the Dutch tin trad during December:—We have to report a very animated market for tin throughout the whole month, and a large and extensive business has been done at advancing prices. The demand for consumption was very regular, as the large deliveries again fully illustrate, and a good deal of speculative business also took place, especially for parcels for delivery ex the trading company's next spring sale. Banca tin was sold in the beginning of the month at 73½ fl, and gradually advanced to 76 fl. This rise was caused, however, not only by the fulfilment of foreign orders from consumers, but also by the forced buying of some parties for contracts due at the last sales' prompt. The general demand continues, and the market closes very steady with buyers at 76½ fl, which is now the closing quotation. Billiton tin was in very good request throughout the

month, but as it continued very scarce, not only spot, but also floating parcels, the transactions were not very numerous. The former was sold from 73 fl to 76 fl, and the latter from 73 fl to 74½ fl. The deliveries of tin have again been very extensive, and amount to 16,939 slabs Banca, and 3,300 ditto Billiton, and would have reached a higher figure but for the very severe frost of the last ten days, which greatly impedes regular exportations. The following statement shows the position of Banca tin in Holland on the 30th December from the official returns published by the Dutch Trading Company:—

	1870.	1869.	1868.

Quotation Dec. 30 ... Banca	77d	64d	64d
Billiton	76d	63d	63d

The quantity of Banca tin now afloat for the Dutch Trading Company is 16,650 peculs, equal to 1,041 tons, against 23,600 peculs, equal to 1,475 tons last year. The estimated quantity of Billiton tin now afloat is 9,411 peculs, equal to 988 tons, against 7,373 peculs, equal to 460 tons last year.

The annexed is dated New York, Dec. 23:—The dry goods market has been in a state of extreme quietude since our last report, the demand for almost all kinds of goods having been extremely light. What little inquiry has prevailed has been mostly for prints, which have ruled steady in value, though some sales of the common grades have been effected at rather lower figures. Brown and bleached sheetings and shirtings, drills, ticks, &c., have ruled heavy, though prices are not quotably lower. Woollen goods have been more sought after, the demand having been stimulated by cooler weather, but the market closes quiet for all kinds; no change has occurred in prices. There is but little business in progress in foreign goods, the demand being light as usual at this season of the year. There was a more active demand for money to-day, and early in the afternoon borrowers paid seven per cent. gold interest quite readily, while some exceptional transactions were reported at the legal rate, and a consideration of a thirty-second per cent. additional. The Government dealers were accommodated at as low as six per cent. There is little more doing in commercial paper, but prime names are still quoted 7 to 8½ per cent. discount. Foreign exchange was strong on the improved quotations of yesterday evening.

THE COTTON TRADE.

LIVERPOOL.—January 5.

The cotton market has been dull, with prices in favour of the buyer, particularly in American, and quotations generally have been reduced. The demand for Sea Island continues to be chiefly for the better qualities, which command full prices. American has given way fully ¼d per lb under the influence of the heavy import, which is placed freely upon the market as landed. New York advices to the 4th instant quote middling Upland 15½ cents, costing to sell in Liverpool 8¼d per lb by steamer. In Brazil the sales have been moderate, and prices are on the whole rather lower. Egyptian has been in fair request, but being freely offered has declined ¼d per lb. In East Indian the business has been comparatively limited; useful sorts have been dealt in at unchanged prices, and the better qualities of Oomrawuttee and Dhollerah fully maintain last week's currency.

In cotton to arrive prices continue to fall. The latest quotations are:—American, basis of middling, from any port, December-January shipment, 7⅛d; January-February shipment, 7⅛d; January-February, 7⅛d; New Orleans, shipment, 8d; Texas, shipment, 8d; Oomrawuttee, fair merchantable, January shipment, Coral, 6¾d per lb.

The sales of the week (four days, including forwarded, amount to 12,650 bales, of which 1,400 are on speculation, and 6,720 bales for export, leaving 41,630 bales for the trade.

The actual export this week amounts to 7,342 bales, consisting of 1,567 American, 2,275 Brazil, 238 Egyptian, 17 West India, and 2,245 East India, which is not included in the stock, as it was all landed at the dock to-day on the 3rd, above.

January 6.—The sales to-day will probably amount to about 7,000 bales, prices of American still in favour of buyers.

PRICES CURRENT.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	121,270
A decrease of quantity taken for consumption of	6,480
An increase of stock of	167,750

In speculation there is a decrease of 6,280 bales. The imports this week have amounted to 182,583 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to December 31) is 28,000 bales.

LONDON—January 5.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market has been dull and inactive during the past week, and the latest transactions show a general decline of ⅛d per lb, both on the spot and for arrival.

NEW YORK.—DEC. 23.

The demand for cotton has been very fair, and at the opening the feeling was quite firm, with some sales made at ⅛c advance, but subsequently there was a loss of strength, and the close was rather tame at former figures. No decided cause can be assigned for the reaction, though the absence of foreign advices has a tendency to induce greater caution on the part of buyers, particularly exporters. The supply on sale does not appear to be excessive, but still there is plenty of stock available, and a more general and better assortment than yesterday. We learn of nothing particularly interesting from the points of production beyond a falling off in the receipts, as compared with last week. We quote as follows:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	12⅝ @ ...	13¼ @ ...	13⅜ @ ...	13⅜ @ ...

Middling	15½ ...	15½ ...	16 ...	16¼ ...
Good middling	16¼ ...	16½ ...	16¾ ...	17 ...

For future delivery the market has been higher, but there was a subsequent reaction, and the close is a little feverish and uncertain, though without remarkable strength on any month. Receipts at New York since Friday night, 34,922 bales; total receipts since September 1, 1870, 449,361 bales; total receipts for the same time of 1869-70, 297,669 bales. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports:—New Orleans, 444,421 bales; Mobile, 162,189; Charleston, 184,099; Savannah, 361,689; Memphis, 76,904; Galveston, 68,681; Wilmington, 43,455; Norfolk, 113,987; other ports, 17,787—total, 1,473,212 bales. Foreign exports at Southern ports and New York:—New Orleans, 262,723 bales; Mobile, 75,455; Charleston, 58,127; Savannah, 158,384; Galveston, 22,705; New York, 250,922; other ports, 9,601—total, 837,917 bales. Stocks at principal ports:—New Orleans, 171,980 bales; Mobile, 59,361; Charleston, 34,074; Savanah, 78,476; Galveston, 39,212; Norfolk, 9,523; New York, 70,000; Boston, 6,000—total, 468,626 bales.

NEW YORK, Dec. 31.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 125,000 bales, and since the 1st of September, 1,625,000 bales. Shipments to England, 64,000 bales; to France, none; and to the continent, 12,000 bales. Total since the 1st of September, 910,000 bales; stock at all ports, 530,000 bales.

NEW YORK, Jan. 3.—The receipts of cotton during the last four days have been 65,000 bales. Export to Great Britain, 15,000 bales; to France and the continent, none.

NEW YORK, Jan. 4.—To-day's receipts of cotton at all United States' ports amount to 23,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Jan. 5.—Our market has remained very inactive throughout the week, chiefly in consequence of the holidays, and the absence of any cause to induce buyers to operate to better advantage now than they were likely to do by waiting. Notwithstanding the very meagre business done of late, prices have continued very steady, though the tendency now is in favour of buyers, owing to the quiet tone of the cotton market, and producers are thereby encouraged to sell more readily than they did ten days ago, seeing cotton is tending downwards. None of the buyers for China and India have bought, except very sparingly. Printing cloths have also been in little request, while the home-trade houses have been out of the market as usual at this period of the year. Shipping yarns are very quiet but moderately steady, and for home-trade use, manufacturers have just bought enough to supply present wants. The market closes very quiet, and prices barely steady.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—The heavy receipts of cotton are causing buyers to withhold orders, and very little business is doing. Tuesday's quotations are unchanged, but the tendency is in favour of the buyers.

LEEDS.—There was only a thin attendance of buyers in the cloth-halls, who showed no disposition to make any but the most trifling purchases. A few parcels of grey and fancy tweeds, thick meltons, and ordinary white broads were made up; but the aggregate quantity of cloth which left the halls at the close of the markets was much below an average. There was no change to note in prices.

ROCHDALE.—The flannel market was thinly attended by buyers, and their operations were very limited. The prices of both plain and fancy flannels were well maintained. Low Yorkshire goods sold to a moderate extent, and prices were firm, with a slightly upward tendency. No change can be reported in the prices of wool.

NOTTINGHAM.—Business in the lace trade has been rather quiet, many of the manufacturers being engaged in stock-taking. The demand for raw silk is limited, but good qualities maintain their value. On the whole the prospect of the lace trade is encouraging. There is no material change to report in the hosiery trade. Prices of hosiery yarns are unaltered.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 23.—There has been less doing in the market for Western and State flour, but prices remain firm. All shipping grades were held at about yesterday's figures, though to meet the views of buyers, some concessions were necessary, with no inclination on the part of sellers to make them. Southern and St Louis in only moderate demand. The general market closed dull. The wheat market was very quiet, the advanced views of holders checking business. The demand was confined to small lots. Sales: 17,000 bushels at $1.39½ to $1.40 for No. 2 spring afloat; $1.40 in store or $1.42 afloat for No. 1 spring; $1.60 for white Genesee; closing firm but dull, buyers generally holding off, and sellers not pressing sales. The corn market opened firmer, with some inquiry, but closed tame. Sales: 34,600 bushels at 76½c for choice new Western yellow; 72c to 72½c on the track, and 74c to 75c for Western new mixed afloat, including parcels choice high mixed at 76c; 83c for new Southern white, by the boat load; old Western, 82c bid and held 83c to 85c; kiln dried brought 80c afloat.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The corn trade has ruled quiet throughout the week, and the general tendency of prices has been downwards. The break-up of the frost has removed the obstacle to marketing the produce, and supplies, though still moderate, have been more liberal. The attendance of millers at Mark lane has been small, and the transactions in all kinds of grain have been on a restricted scale. Nevertheless, the export demand has continued, and the fact that the stocks at the leading outports have proved to be considerably less than was anticipated has prevented the undue depression of the quotations. To-day purchases of wheat could be effected on slightly easier terms, and the same features characterised both the Liverpool

and Wakefield markets. Factors, however, showed no disposition to force sales, and the business passing was accordingly very limited. The stock of wheat at Liverpool is much less than it was believed to be, the return showing 363,304 quarters, against 816,784 last year. At Leith there are 55,000 quarters in granary, against 80,000; at Glasgow, 272,746, against 189,576; andat Hull, 50,000 quarters, against 85,000 on December 31, 1869. It will be perceived that the only increase, but that a considerable one, is in the case of Glasgow. There has been a large demand for barrel flour, which may be quoted 6d dearer. Foreign and country sacks are unchanged in price.

Spring corn shows no alteration in value since our last report, though maize and oats are rather weaker. Beans and peas have continued firm, and there has been some demand for barley.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last se'nnight 25 grain and seed-laden vessels have been reported arrived at ports-of-call, viz.:—6 wheat, 1 rapeseed, 1 valonea, and 17 sundries. The floating grain trade has at first been firm in tone; later the thaw somewhat weakened the market, but returning frost restored firmness. Wheat, with a reduced quantity offering, business has been inactive. Maize, for the few cargoes offering, buyers demurred to pay late prices. Barley, for the few cargoes on sale, last week's prices have been barely maintained. Rye slow sale, at about late rates. The reported sales are as follows:—Wheat—21 arrived cargoes: Ghirka Odessa, 49s to 50s 3d; new ditto, 49s to 50s; Ghirka Taganrog, 47s 6d to 48s; Don ditto, 46s; Ghirka Nicolaieff, 49s to 50s; Ghirka Berdianski, 49s 6d; Galatz, 49s 6d; Nicolaieff Ghirka Marseilles, 49s 9d; soft Berdianski, 50s; Bessarabian Galatz, 51s; Marianopoli, 48s 6d to 49s; soft Ghirka Marianopoli, 48s 9d per 492 lbs. Polish Odessa, 49s 3d; No. 1 spring New York, 54s 3d per 480 lbs. On passage, 11 cargoes: Ghirka Odessa, 49s 9d to 50s 6d; new ditto, 50s; Nicopol Ghirka, 50s; Marianopoli, 50s per 492 lbs. Peas and wheat—1 arrived cargo Canadian peas, 39s 6d per 500 lbs; and prime spring Montreal wheat, 51s 6d per 480 lbs. Maize—3 arrived cargoes: Odessa, 33s per 492 lbs; Kustendji Constantinople, 32s 3d per 480 lbs. Barley—1 arrived cargo Odessa, at 26s per 400 lbs. On passage, 1 cargo new Taganrog Kerch, at 26s 6d per 400 lbs. Rye—3 arrived cargoes: Nicolaieff, 34s 6d; Marianopoli, 33s 6d; Azow, 33s per 480 lbs. Linseed steady, but not active. 400 tons E.I. and Calcutta at 59s 6d per 410 lbs, and a cargo Sicilian Trapani at 58s 7½d per 420 lbs. Rapeseed unaltered in price, and quiet. On passage, 100 tons ordinary brown Calcutta at 67s per 416 lbs, and a cargo wild Azow Berdianski at 36s per 400 lbs. Shipped or to be shipped, 700 tons ordinary brown Calcutta, at 66s 6d to 67s 9d per 416 lbs, and a cargo wild Azow at 34s per 424 lbs. Cotton-seed steady, at about late prices. 450 tons Egyptian arrived at 9*l* 7s 6d; and 1,100 tons ditto at 9*l* 1s 3d to 9*l* 5s. Shipped or to be shipped, 500 tons Egyptian, at 9*l* per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand has been active at 6d to 1s, and in some few cases at a greater advance. Some speculative business is reported in Manila, and the transactions include a floating cargo of Mauritius of the new crop for France. Further sales of refined have been effected for the same destination at enhanced quotations. The supply of West India sugar is so much reduced, that importers have in many cases obtained 1s to 1s 6d per cwt more than previous to the holidays. 1,003 casks sold to yesterday, including crystallised Demerara at 35s 6d to 37s per cwt. The home deliveries for London increased during the past year by 17,000 tons. The official returns for the Kingdom will probably show an increase in the entries for home use of over 80,000 tons. From this, however, must be deducted a very large quantity of English refined exported. The total stock in the United Kingdom on the 1st inst. was about 20,000 tons in excess of last year.

Mauritius.—By private contract 3,700 bags sold, chiefly grainy yellow and white, at 34s to 38s, and some good soft brown at 29s. A floating cargo of the new crop sold at an outport for France, viz., 900 tons, about No. 13½, at 32s.

Bengal.—4,700 bags are reported sold: brown, 19s to 22s 6d; Gurpatta, 28s 6d to 32s.

Madras.—6,448 bags Jaggery sold at and after the sale, chiefly at 19s to 19s 6d.

Manila.—The sales on the spot may be estimated at 70,000 to 75,000 bags: clayed, 24s to 26s; Ilo Ilo, 24s 9d; fine dry ditto, 27s 6d. 800 tons Taal, to arrive, at 22s.

Other Foreign.—18,500 bags low brown Java have sold at 18s 6d to 19s 6d. 800 bags Egyptian at 32s 6d, and 1,100 boxes Havana at 32s 6d to 36s 6d per cwt, and other parcels.

Refined.—For the diminished supply now available the trade have paid higher rates: common to good Titlers, &c., 46s to 48s per cwt. Pieces, &c., are also dearer.

MOLASSES.—80 puncheons Antigna have sold at 12s, and 250 puncheons St Vincent at 11s.

RUM.—The sales have been small, including some Jamaica at former rates. Leewards sold at 1s 9d; Demerara, 2s 2d per proof gallon.

COCOA.—There is a continuance of the demand for Guayquil, with further sales at 46s to 47s, and superior at 53s. 285 bags Grenada were taken in above the value. 515 bags Trinidad about half sold at 63s to 87s per cwt for middling to good quality.

TEA.—The market is unaltered, but there have been some further arrivals which will lead to an increased supply. Since last Friday the business has been moderate, chiefly in common to fair grades of Congou at full rates.

COFFEE.—The chief feature in this market has been the speculative demand for native Ceylon, the business including 5,000 to 6,000 bags to arrive at 53s 6d to 54s 6d. On the spot very good ordinary sold at 54s. 33 casks 569 bags by auction withdrawn. 188 casks 10 barrels and bags plantation found buyers at irregular prices for small parcels in second hands. 80 casks 596 barrels and bags Jamaica sold as follows:—Good ordinary to fine ordinary, 53s to 57s; low middling to good middling, 58s 6d to 75s 6d. 2,319 bags Brazil part sold at 55s 6d to 61s for washed Rio. The export deliveries in London for the year have increased to the extent of 4,385 tons, and those for home use about 900 tons. In the total stock there is an increase of a few hundred tons over the previous seasons. The deliveries by the Netherland Trading Company last year were 884,480 bags, against 694,500 bags in 1869.

RICE.—The chief feature has been the large business done in soft grain for spring shipment, at 10s to 10s 6d for London and Liverpool, according to conditions. On the spot transactions have been moderate in extent, including Field Siam at 8s 6d to 8s 9d; low Bengal at 9s 6d; and Ballam at 9s 6d per cwt, ex quay; Bassein siftings at 7s 7½d per cwt, and several parcels of damaged rice.

SAGO.—473 bags part sold at 18s to 19s for bold grain. Small taken in at 17s per cwt.

SAGO FLOUR.—A parcel sold to arrive at 15s 1½d per cwt.

SPICES.—A few sales have been effected in Penang pepper to arrive at 5¼d to 5 5/16d, and on the spot at 5½d. 686 bags by auction were taken in at 5½d. 729 bags Singapore part sold at 6d. White firmer. 92 bags Singapore by auction part sold at 6⅞d; one lot 7d. 409 bags Penang part sold at 6⅝d to 6¾d. Privately 6¼d paid for Singapore. 25 cases Penang nutmegs were taken in, and the market is without change. 275 cases wild Cassia from Hong Kong were taken in at 45s. 114 bags African ginger sold at 29s 6d per cwt.

METALS.—Prices have shown rather an improving tendency this week. Tin has further advanced. Straits, 134*l* to 135s; afloat at 130*l* to 134*l*. Banca, 135*l*; and the smelters have raised the value of British 8*l*, viz., 137*l* to 138*l* for common qualities. Deliveries by the Netherlands Trading Company last year, 150,600 slabs, against 145,300 in 1869, and 159,144 in 1868. Copper meets a steady demand: Chili, 64*l* to 65*l* on the spot or near at hand; spelter continues firm; Silesian, 17*l* 12s 6d to 17*l* 15s, and other sorts in proportion. The stock in Great Britain on the 1st instant was 4,160 tons, against 4,120 tons in the previous year. Scotch pig iron has fluctuated a little, but the market closes quiet at 51s 6d cash, 3d per ton more for a month's prompt.

PRICES of METALS at the close of the last Five Years.

HEMP.—Small sales of Manila have been effected on former terms, including low to good quality at 48*l* to 55*l* per ton. There has been another arrival.

JUTE.—The market is very firm. Sales have been made to arrive at 18*l* 5s to 23*l* 10s per ton, and a few parcels on the spot sold at full prices.

OILS.—Business has been done in English brown rape at easier rates, viz., 46*l* 10s to 46*l* 15s; last four months, 44s to 44s 10d. Refined at about last week's quotations. Linseed oil is steady at 30*l* 5s. No change can be quoted in cocoa-nut. Cochin, 44*l* to 45*l* 10s; Ceylon, 38*l* 10s. The business in fish oils has been chiefly limited to seal. There is a better demand for sperm. Olive steady. Gallipoli, 49*l* per tun, and other kinds in proportion. A cargo of Levant has sold at 44*l* 10s per tun.

PETROLEUM.—American refined, 1s 6½d to 1s 7d per gallon.

TALLOW.—There was a steady demand at the commencement, but the settlements for the year being concluded, and the public sales of Australian, &c., declared for to-day very large, the market latterly showed weakness. The decline is, however, trifling. This morning's quotations are as follows:—Petersburg, 45s 3d; January to March, 45s to 45s 3d; March, 45s 6d; last three months, 46s to 46s 6d per cwt.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market continues firm. Sales of West India for the week 1,143 casks. Crystalised Demerara by auction sold at 37s to 38s 6d for good to very fine. 690 bags Bengal sold at 19s 6d to 21s for brown Dulloah. 280 casks 32 barrels Porto Rico were disposed of at 32s 6d to 35s 6d for low middling to good yellow. Further large sales reported in Manila. Unclayed, 22s to 23s 9d; clayed, 25s. Several parcels brown Mauritius at 25s to 26s 6d, and a floating cargo of Trinidad at 26s for the United Kingdom.

COFFEE.—57 casks 50 barrels and bags plantation Ceylon sold at steady prices for small lots. 563 bags washed Rio were chiefly taken in. A few lots sold at previous quotations. 617 bags ordinary to good ordinary Rio sold at 51s to 54s. 188 bags Singapore at 50s 6d, and 70 bags African at 49s 6d to 50s per cwt.

SALTPETRE.—50 tons Bengal to arrive at 30s, and 50 tons fine on the spot, 30s 6d to 31s per cwt.

OIL.—554 casks palm part sold at 32s 6d to 35s 6d.

TALLOW.—At auction to-day, 2,424 casks part sold. Sheep, 43s 6d to 45s 3d; beef, 36s to 42s 6d. 252 casks South American part sold: beef, 44s 6d; sheep, 42s 6d to 43s 6d per cwt. Town melted, and Petersburg unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined closes 2s higher for the week, owing to the continued strong demand for export. The Dutch market closes also dearer, 35s 6d now asked for February delivery.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states, that oranges are in better demand, and prices improved in consequence of change of weather. Lemons without alteration. Black Spanish and Barcelona nuts in demand. Brazil in request. Almeria grapes reduced to a small stock.

DRY FRUIT.—Currants show a steady advance during the week and much business has been done, caused by the shortness of stock. Appearances are healthy; dealers are all out of stock. Raisins are firm with an upward tendency.

ENGLISH WOOL.—Market quiet and firm.

COLONIAL WOOL.—Market firm, fair inquiry.

FLAX.—Market steady,

HEMP.—Market very dull and little business doing.

SILK.—Market very firm, but not much doing.

SEEDS.—The seed trade rules inactive, but quotations are fairly maintained.

TOBACCO.—Throughout the market there has been but little doing in North American tobacco, and the only sales effected have consisted of the imports of both leaf and strips, for which ruling prices were obtained, the stock of which is now very small. Buyers continue disinclined to deal with the last importation, and only trifling sales have yet been made. In other growths there has been a fair business done.

METALS.—We have hardly commenced business this year yet, and consequently have little to report. Copper is pretty firm at quotations. Iron is a shade easier. Tin has been advancing almost daily, and is now fully 50s per ton dearer since last week's report. Spelter is quiet. Lead in steady demand. Tin plates have been a little checked in demand by the advance in tin.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	46	6
Fat by ditto	2	2
Yellow Russian ditto	46	6
Melted stuff	33	0
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 2,496 casks.

PROVISIONS.

Bacon maintains its price for sizeable, being comparatively scarce with a good demand. Heavy has fallen 1s. Owing to the frost we have had no Dutch boats this week, causing a great run on Irish and inferior foreign. Lard a dull sale.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 2.—The total imports of foreign stock into London last week amounted to 4,514 head. In the corresponding week in 1870 we received 5,059; in 1869, 1,617; in 1868, 6,116; and in 1867 4,027 head.

Owing to the cold weather there has been a firm feeling prevalent in the cattle trade, and the value of all qualities has been well maintained. The show of beasts has been short, the foreign arrivals being detained by stress of weather. Although not active, the demand has been firm, and full rates have been realised for all breeds, the best Scots and crosses selling at 5s 10d to 6s per 8lbs. As regards sheep, the show has been limited. The trade has not been brisk, but prices have ruled firm, and the best Downs and half-breds have been disposed of at 6s 2d to 6s 4d per 8lbs. Calves and pigs have been quite a nominal market.

SUPPLIES OF SALE.

	Jan. 3, 1870.	Jan. 2, 1871
Beasts	3,830	2,540
Sheep	17,810	15,230
Calves	83	7
Pigs	100	65

Veal	4	10	5	2	Small pork	4	8	5	0

HOP MARKET.

BOROUGH, Friday, Jan. 6.—Business in the hop market has been on a moderate scale to-day. The supplies of produce have been tolerably good. Prime qualities have realised full prices, with a healthy inquiry. Otherwise the market has been quiet. Mid and East Kent, 35s to 140s; Weald of Kent, 35s to 60s; Sussex, 30s to 70s; Farnham and country, 75s to 126s; Mid. 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Jan. 6.—The supplies of potatoes are not excessive. The trade is firm, and prices are steady:—English regents, 60s to 90s; Scotch regents, 60s to 85s; rocks, 60s to 70s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 6.—Very little business has been done this week, attributable partly to the holidays and partly to the want of choice our market at present offers of any useful low kinds of foreign wool.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 6.—This market opens very quiet to-day, and sellers in some cases appear inclined to press business at a slight reduction from Tuesday's rates for wheat. Maize 6d cheaper, and dull.

WAKEFIELD, Friday, Jan. 6.—The wheat trade is very quiet at this market to-day, owing to the change in the weather. Prices are in favour of buyers. Fine barley steady.

The Gazette.

TUESDAY, January 3.

BANKRUPTS.

James Lawrence Smith jun., Manchester, warehouseman.

C. Wilson, Francis street, Gower street, manager to a bit and spur maker.

O. Barker, Todmorden, Yorkshire, and Todmorden, Lancashire, cotton spinner.

W. P. Jones, Liskeard, auctioneer.

E. P. Chambers, York road, Forest hill, late Secretary of the North of England Coal and Iron Company (Limited).

R. Thompson, Accrington, Lancashire, grocer.

A. E. L. Wood, Yarmouth, Isle of Wight, cattle dealer.

SCOTCH SEQUESTRATIONS.

"By a thorough knowledge of the natural laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr Epps has provided our breakfast-tables with a delicately-flavoured beverage, which may save us many heavy doctors' bills."—*Civil Service Gazette.*

GRATEFUL—COMFORTING

EPPS'S

(BREAKFAST)

COCOA.

JAMES EPPS and CO., Homœopathic Chemists.

DRUGGISTS, GROCERS, & DRYSALTERS.

IMPORTANT TO THE TRADE.

THE GREAT SUCCESS OF THE

"PATENT REVOLVING MIXER,"

and the TESTIMONIALS received from the most important houses in the trade, is the best recommendation that can be offered.

NO DRUGGIST, GROCER, OR DRYSALTER SHOULD BE WITHOUT ONE.

It completely mixes Tea, Sugar, Spices, Coffee, Grain, Seeds, Flour, and all dry substances. So perfectly is it done that any sample is equal to bulk, and

NOW IN USE ALL OVER THE KINGDOM.

SOLD IN THREE SIZES, £8 10s, £10 15s, and £14 10s.

ESTIMATES FURNISHED FOR MACHINES TO MIX UP TO 10,000 POUNDS.

800 lbs of TEA Mixed in 3 Minutes, and not Half an Ounce lost!

Patentees and Sole Manufacturers, WM. and P. THOMPSON, 85 Lower Gardiner street, Dublin.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

H. J. NICOLL'S WINTER DRESS

FOR BOYS at home for the holidays:—

Knickerbocker suits from	.....	21s 6d
Morning —	.....	25s 6d

THE PERFECT SUBSTITUTE FOR SILVER.—The Real Nickel Silver, introduced more than thirty years ago by WILLIAM S. BURTON, when tested by the patent process of Messrs Elkington and Co., is beyond all doubt the best article next to sterling silver that can be used as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

	Fiddle, or Old Silver.			Bead.			Thread			King's, or Shell.		
	£	s	d	£	s	d	£	s	d	£	s	d
Tbl. Frks or Spns. p.doz	1	13	–	2	1	–	2	2	–	2	5	–
Dessert — —	1	2	–	1	7	–	1	10	–	1	11	–
Tea Spoons		14	–		19	–	1	1	–	1	2	–

These are all as strongly plated, and are in every respect as fast wear as those other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern—

Table Spoons and Forks ..... £1 2s per dozen
Dessert ditto, do. per doz.: Tea Spoons 10s —

Tea and Coffee sets, from £5 15s to £21 16s; Dish Covers, from £9 9s to £29; and Corner Dishes, from £7 10s to £18 18s the set of four. Cruet and Liquor Frames, &c., at proportionate prices.

The largest stock in existence of Plated Dessert Knives and Forks, Fish-eating Knives and Forks, and Carvers.

All kinds of re-plating done by the patent process.

WILLIAM S. BURTON, Furnishing Ironmonger, by appointment, to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled stock, with lists of prices and plans of the 20 large show rooms, post free. 39 Oxford street, W.; 1, 1A, 2, 3, and 4 Newman street; 4, 5 and 6 Perry's place, and 1 Newman yard, London. The cost of delivering goods to the most distant parts of the United Kingdom by Railway is trifling. WILLIAM S. BURTON will always undertake delivery at a small fixed rate.

TO SHIPPERS AND EXPORTERS.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES, CHESTS, STRONG ROOMS AND DOORS, with all their Latest Improvements.—The strongest and (quality considered) the cheapest safe-guards against fire and the modern burglar. UNIVERSITY PLATE CHESTS.—Gentlemen proceeding to the Universities should write for MAPPIN and WEBB'S ILLUSTRATED LIST of their SERVICES of PLATE and CUTLERY, in oak chests, for one, two, or more persons, at five, ten, 12, and 16 guineas. Mappin and Webb, silversmiths and electro-platers, 71 and 72 Cornhill, and 76, 77, and 78 Oxford street, London.

HOLLOWAY'S OINTMENT AND PILLS.—Cold Weather.—The sudden severity of the weather has sadly deranged the general health. Affections of the throat and chest are now found in every household, and the quickest means of cure are Holloway's renowned remedies. The prevent congestion, inflammation, bronchitis, hoarseness, and cough. This soothing ointment only requires to be well rubbed twice-a-day on the external skin covering the affected part to effect an immediate and mark d improvement in all the symptoms of disease. Both ointment and pills are devoid of danger. Both are compounds of the finest balsams intimately allied by nature, and accurately combined by art. They conduce to rest ration, and cure with unfailing certainty.

"DR LOCOCK'S WAFERS, TO MY knowledge, is the best remedy for coughs, colds, and influenza. (Signed) J. N. Horsfield, druggist, Sweet street, Leeds." They instantly relieve and rapidly cure asthma, consumption, coughs, and all disorders of the breath and lungs. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. Prices 1s 1½d per box. Sold by all druggists.

THE LONDON AND SOUTH AFRICAN BANK.

DEPOSITS received for fixed periods on the following terms, viz.:—

At 5 per cent. per annum, subject to 12 months' notice of withdrawal.
At 4 per cent. per annum, subject to 6 months' notice of withdrawal.
At 3 per cent. per annum, subject to 3 months' notice of withdrawal.

BILLS issued at the current exchange of the day on any of the branches of the bank free of extra charge; and approved bills purchased or sent for collection.

SALES AND PURCHASES effected in British and foreign securities, in East India stock and loans, and the safe custody of the same undertaken.

Interest drawn, and army, navy, and civil pay and pensions realised

Every other description of banking business and money agency British and Indian, transacted.

J. THOMSON, Chairman

BANK OF CALIFORNIA.—THE ORIENTAL BANK CORPORATION are prepared to issue Drafts at sight on the Bank of California San Francisco, the terms for which may be ascertained at their office.

Threadneedle street. April. 18

THE ANGLO-ITALIAN BANK (Limited),

as Bankers to the Italian Land Company (Limited), are instructed to notify that the "Serie" of the Italian State Domain Five per Cent Loan (1865) drawn for payment on 1st April next is Letter D.

WILLIAM COLES, Secretary.

No 16 Leadenhall street, London, E.C.,
January 5, 1871.

LONDON CHARTERED BANK OF AUSTRALIA.

(Incorporated by Royal Charter.)
Paid-up capital, One Million.
Reserve fund, £120,000.
Offices—88 Cannon street, E.C.

This Bank conducts banking business of every description with the Australian Colonies upon current terms. Bills are sent for collection, and letters of credit granted upon the Bank's branches in Victoria and New South Wales.

WILLIAM MARTIN YOUNG, Secretary.

NORTH AND SOUTH WALES BANK.

SIXTY-FOURTH DIVIDEND.

Notice is hereby given, that a Dividend of Ten Shillings per share (being at the rate of Ten per cent. per annum), for the half-year ended 31st ultimo, on the Capital Stock of the Company, and a Bonus of Five Shillings per share, will be paid to the proprietors, free of income tax, on and after the 12th instant, at the head office and the respective branches.

The Transfer Books will be Closed from this date to the 12th instant inclusive.—By order of the Directors,

RICHARD JONES, Liverpool Manager.

Liverpool, 5th January, 1871.

THE BANK OF BRITISH NORTH AMERICA—Incorporated by Royal Charter; Paid-up Captal, One Million Sterling—GRANTS LETTERS of CREDIT on its Branches in Canada, Nova Scotia, and New Brunswick; on its Branch in Victoria, Vancouver's Island; and its Agents in New York and San Francisco, payable on presentation, free of charge.

Also purchases or forwards for collection Bills on America and Coupons for dividends on American Stocks, and undertakes the purchase and sale of stock and other money business in the British provinces and the United States.—By order of the Court,

R. W. BRADFORD, Secretary.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

Incorporated by Royal Charter.
Head Office—65 Old Broad street, London, E.C.

COURT OF DIRECTORS.

George Gordon Nicol, Esq., Chairman.

Donald Larnach, Esq.	Edward James Daniell Esq.
James J. MacKenzie, Esq.	
James M. Robertson, Esq.	David T. Robertson, Esq.,
Claudius J. Erskine, Esq.	Chief Manager (ex officio).

BANKERS.

Bank of England. London Joint Stock Bank.

Branches and Agencies in India, Ceylon, Straits Settlements, China, and Japan.

The Bank transacts the usual Banking business in connection with the East, on terms to be had on application.

IMPERIAL OTTOMAN BANK.

GENERAL DEBT OF THE OTTOMAN EMPIRE.

The Imperial Ottoman Government hereby give notice to the bearers of Bonds of the General Debt (5 %) of the Ottoman Empire, who intend to receive in Europe the current half-yearly Interest, that they must declare such intention at the Agencies of the Imperial Ottoman Bank in London or Paris, or at its correspondents in Frankfort and Amsterdam, between the 13th and the 23rd January, 1871, inclusive.

This declaration must be accompanied by a list of the numbers of the Coupons intended to be deposited, but not by the Coupons themselves.

After the 23rd January, the Coupons of which the lists have been sent in, in accordance with the above directions, are to be deposited for verification, together with a duplicate list, at the Agencies of the Imperial Ottoman Bank in London or Paris (in London daily, Saturdays excepted, between the hours of 11 and 3), or at its correspondents in Frankfort and Amsterdam, when they will be exchanged for a receipt payable at ten days' date.

Those Coupons which, although declared as above, shall not have been presented for payment at the places indicated before the 13th April, 1871, will, after that date, be payable at Constantinople only.

Coupons declared after the 23rd January, 1871, will be payable one month after presentation, but in any case they will only be admitted for verification up to the 13th February following, after which they also will be payable at Constantinople only. These Coupons will likewise have to be accompanied by duplicate lists.

The necessary forms can be obtained on application at the offices of the Imperial Ottoman Bank, 4 Bank buildings, Lothbury.

N.B.—Cheques can be sent by post only at the written request and risk of the holder of the Bonds.

DINNEFORD'S FLUID MAGNESIA.

—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

THE TRUST AND LOAN COMPANY OF UPPER CANADA.

Incorporated by Royal Charter.
Established 1851.

Capital, £1,000,000; Paid-up, £250,000; Uncalled, £750,000; Reserved Fund, £79,547.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

Charles Morrison, Esq., Deputy-Chairman.

James Hutchinson, Esq.	W. Gordon Thomson, Esq.
The Hon. Ashley Carr Glyn.	T. M. Wegueiin, Esq., M.P.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

This Company was the first established in England for the purpose of receiving, upon the security of a large subscribed capital, money on deposit at a fixed rate of interest, and lending the same, together with the paid-up capital, on mortgages of real estate in Canada.

The Company has been successful operation since 1851.

The Directors are now issuing Debentures for three years and upwards. Any information required can be obtained on application to

F. FEARON, Secretary.

7 Great Winchester street buildings, London.

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.

Laboratory, 35 Long Acre, and all Druggists.

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—The Principal, Herr THOMAS, prepares Gentlemen's Sons for the Army, Civil Service, and Mercantile pursuits. German and French are constantly spken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Bon-on-the-Rhine.—Frequent escorts

EDUCATION.—"ONE YEAR'S

Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

ROYAL PRINCESS'S THEATRE.

Sole Lessee—Benjamin Webster.
Managers—B. Webster and F. B. Chatterton.

Every evening at 7, PEEP-O-DAY, by Edmund Falconer (terminating with the celebrated Quarry Scene). Messrs W. Rignold, Edgar, Rayner, S. Barry, Vollaire, Marshall, Crellin, J. Reynolds, Westland, and J. Morris; Mesdames R. Leclercq, L. Grey, R. Power, Addie, Hubert, and J. Lovell. After which will be produced an entirely new grand spectacular extravaganza, entitled LITTLE GIL BLAS, AND HOW HE PLAYED THE SPANISH DUCE. Written by H. B. Farnie. The magnificent scenery by F. Lloyds and assistants. Mrs Howard Paul, Mesdames May Holt, Minnie Sydney, Lennox Grey, L. Russell, A. Merton, R. Power, O'Hara, Lydia Maitland, &c.; Messrs S. Barry, G. Linton, Wilmot, H. Clive, W. Vernon, C. F. Marshall, &c., and a magnificent Corps de Ballet. Conclude with HE'S A LUNATIC. Mr J. Clayton.

ADELPHI THEATRE ROYAL.

Sole Proprietor—Mr Benjamin Webster.
Managers—Mr B. Webster and Mr F. B. Chatterton.

Immense hit of the new balladic burlesque of THE MISTLETOE BOUGH; or, Lord Lovel, Lady Nancy, and the Milk-white Steed. Written by Mr H. B. Farnie; and the new serio-comic drama SMOKE. Written by Mr B. Webster, jun.

Monday and during the week at 7, SMOKE. Messrs Billington, Ashley, C. H. Stephenson; Mrs Billington and Miss Furtado. After which, THE MISTLETOE BOUGH. Mrs A. Mellon, Miss Elize Holt, Mdlle Debreux, Mdlle Camille Dubois, Miss Bellew, Miss and Mrs M. Cooper, and Miss Bella Moore; Mr Brittain Wright, Mr J. Rouse, Mr Ashley, Mr Odell, &c. And THE MILLINERS' HOLIDAY, Mr J. Rouse. In rehearsal a new drama by Mr F. C. Burnand; new scenery by Mr F. Lloyds. Stage manager—Mr Billington.

TEETH.—MR WEBB (MANY

years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1870. *As part of an early number of the* Economist, *we shall, in continuation of the Series commenced with* 1863, *issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the Year, &c.; the object of the Supplement being to place in possession of our readers a Commercial History of* 1870 *worthy of preservation and adapted for reference.*

THE OPERATION OF THE NEW STAMP ACT ON FOREIGN SECURITIES.

The operation of the new Stamp Act on foreign securities is one of the neatest "messes" on a small scale that has happened in recent legislation. By the old law, any bond of a foreign or colonial government "made, issued, delivered, assigned, transferred, or negotiated within the United Kingdom" was made liable to the same duty as a bond made in this country, but subject to this important proviso:—"The above charge not "to extend to any instrument *bonâ fide* made and issued out of "the kingdom as a security for money raised or procured on "loan in foreign parts and not lent or advanced by any person "resident in the United Kingdom and the interest whereon "shall not be paid within the United Kingdom—25 Vict. c. "22, 1862;" which in fact exempts many of the most important foreign securities, such as American Five-Twenties, as their interest is not payable in England, but only in the foreign country whose securities they are.

A more absurd distinction can hardly be imagined. There are arguments against taxing all foreign bonds, on the ground that they restrict the operations of the English money market, and prevent Englishmen from gaining a commission from the foreigner upon such securities. But if *any* foreign bonds are to be taxed *all* should be taxed, and taxed equally. There is no reason why foreign securities, of which the interest is expressed to be payable in England, should be taxed, and those in which it is not so expressed should be exempted; yet this was the state of the old law.

But in the new Act there is no such provision. The clause runs:—

"113. The term 'foreign security' means and includes "every security for money by or on behalf of any foreign "or colonial state, government, municipal body, corporation, "or company, bearing date or signed after the third day of "June one thousand eight hundred and sixty-two (except an "instrument chargeable with duty as a bill of exchange or "promissory note),

"(1.) Which is made or issued in the United Kingdom;

"(2.) Upon which any interest is payable in the United Kingdom;

"(3.(Which is assigned, transferred, or in any manner negotiated in the United Kingdom."

All foreign securities therefore now without exemption are to be taxed, and all taxed equally.

If the new Stamp Act had been an ordinary Act of Parliament, the change would have been an improvement as respects all future issues of foreign securities. Some change was clearly requisite. Either all foreign bonds should have been taxed or no foreign bonds; and certainly the Chancellor of the Exchequer and the House of Commons probably would prefer the latter alternative. But the new Stamp Act is not an ordinary Act of Parliament. Mr Lowe in introducing it said, with great plainness and precision, that the Act was only a Consolidation Act, and that it was not a substantive change in the law. And yet the Act does tax (or is read to tax, for there is a doubt of which we will speak presently) the transfer of an important class of securities, the transfer of which bore no tax before.

The reply is that, though the Chancellor of the Exchequer did make this announcement in introducing the Bill, it was afterwards seen that some changes were necessary and had been made, and of these a list was given in Parliamentary Paper 366, bearing the name of Mr Stansfeld, who had a main part in carrying the Bill. This paper contains the following passage on the point before us:—"Clause 115th "contains a definition of the term 'foreign security,' instead "of that contained in the schedule to 25 Vict. c. 22, omitting "altogether the proviso by which the charge, as it now "stands, is rendered unintelligible. There is no reason why "the charge should not include all foreign securities which "are brought into the English market, without reference to "the residence of the lender, which is hardly ever apparent "upon the face of the instrument." And it is said that this was sufficient notice of the intended change to the House of Commons, the Stock Exchange, and the Parliament.

But we do not think it was. The paper says that the omitted proviso is unintelligible, whereas that proviso is very

clear, and implies that the proviso only relates to the residence of the lender, whereas it relates also to the securities, of which the interest is *not* payable in this country. No one would guess from the explanation in paper 366 that a larger and new class of foreign bonds was clearly to be taxed. We do not believe that the person who drew the paper thought they would be. He did not himself understand the proviso, and absurdly fancied that no one else could.

The position of the Government is therefore very awkward. The sufficient statement was made that the Bill was only a consolidating Bill, and only an insufficient counter statement that the Bill contained this change. In fact the "Stock "Exchange"—a keen enough body in general—were misled, and did not know it. No blame can indeed attach to Mr Lowe or to Mr Stansfeld. It was simply impossible, amid the immense labour of last Session, that they could personally follow all the effect of all these technicalities. But great blame attaches to the permanent officials who are paid to deal with these technicalities, and who are bound to instruct Parliamentary Ministers rightly upon them.

Some ingenious reasoners do indeed say that after all nothing has been done. They read the (1) (2) (3) of the new Act as connected with the word "*and.*" If they are right the present duty is only on bonds made or issued in the United Kingdom, on which interest is *also* payable in the United Kingdom and which are *also* assigned in the United Kingdom. But this certainly does not correspond with the intention of the Act as explained in paper 366; and we are informed that the best lawyers are against it, though in our judgment worse points go to the House of Lords.

On the whole, as there is this "mess," we should advise that the duty be not exacted till after the next Session of Parliament. It is most important that the clearest faith should be kept on the national money matters. It is most certain that the Act was understood to be only a Consolidation Act, that it was not understood to change this subject, and it is a question capable of debate whether it has changed it.

THE RAILWAY TRAFFIC OF LAST HALF-YEAR.

Last week, among other evidences from figures as to the prosperity of the country, we drew attention to the important increase in the last half-year of the traffic on the principal home railways. This fact has been familiar of course for some time to all who are specially interested in the subject; and the returns, as summarised in our pages, have shown how steadily the increase has been maintained all through the half-year. Still the evidence is so important that there is room for looking at it more minutely, and examining what the improvement in railway profits really comes to.

One of the most significant facts is the equality of improvement in the second half of the year as compared with the first. As we showed last week, the improvement on the principal railways in the first half of the year was 4·84 per cent., and in the second 4·5 per cent.—substantially no diminution of the rate of increase. An authentic statement has since been published of the gross traffic on all the railways, which brings out a similar result. The comparison is:—

	1870.	1869.	Inc. in 1870. Amount.	
	£	£	£	%
1st half-year's traffic	20,361,000	19,419,000	942,000	4·9
2nd half-year's traffic	23,265,000	22,176,000	1,089,000	4·9
	43,626,000	41,595,000	2,031,000	4·9

Nor is this improvement in the second half of the year due to the increase in the earlier weeks, during which it might be supposed the completion of transactions effected before the outbreak of the war was proceeding. While the traffic on the principal railways increased on the average at the rate of 4½ per cent. during the second half-year, it increased during the last nine weeks at the rate of 5½ per cent., viz.:—

Week ending—	Total Traffic. £	Increase. Amount.	%
Nov. 6.....	737,980	45,803	6·1
13.....	723,409	44,737	6·1
20.....	703,447	34,025	4·8
27.....	698,032	32,966	4·7
Dec. 4.....	710,671	53,991	7·5
11.....	700,622	43,575	6·1
18.....	701,766	24,870	3·6
25.....	762,032	46,057	6·0
Jan. 1.....	658,507	23,523	3·5
	6,396,466	349,547	5·5

It follows therefore that the business of the country had not ceased expanding in December at the average rate maintained during the year. As all the conditions of our home-trade, especially cheap food and cheap clothing, are still what they were, we should hardly anticipate any speedy stoppage of this expansion, notwithstanding the prolongation of the war. The closing years of the American war were among our most prosperous, and America is more fitted than ever to supply the void caused by the diminution of our European trade, just as France before supplied the void of the diminished American trade. Perhaps the immediate conditions are even more in our favour than they were during the war, because France and Germany are stronger manufacturing rivals than America was, and we gain *immediately* by their loss. It is an additional indication of the prosperity of the country that the improvement has occurred mainly in the *goods* traffic; and as will be noticed from the list of the principal railways, the improvement has usually been greatest on mixed lines—smallest on those where passenger traffic predominates.

As we have frequently pointed out, however, a better test of the improvement of railway property is furnished by comparing the traffic increase not with the gross traffic of the corresponding half of the previous year, but with the net revenue available for a dividend to the ordinary shareholders. There are one or two lines so unfortunate as not to pay the preference shareholders, but these are rare exceptions; and the property which is directly affected by railway prosperity, or the reverse, is that of the ordinary shareholders. It is they who supply the working capital of the business and receive the profit upon it, and there are perhaps few cases in which this working capital could not be profitably diminished by additions to the preference capital. Looking at the matter in this way, we find that the addition to the gross traffic compares as follows with the addition of the same amount to the net sum available for ordinary dividend. It will be understood of course that this latter calculation is only given to show the maximum of possible effect which an addition to the traffic should have upon the dividend. In reality, except in the rarest instances, there will be charges for new capital and working expenses to attenuate the effect of the increased receipts; but it is still useful to see what that increased receipt by itself would do:—

	Addition to Gross Traffic in Half-Year. Amount.	Per Cent.	Net Revenue, 2nd Half, 1869. Ordinary Dividend.	Rate of Divd. %	Percentage of Traffic Increase upon Net Revenue. Per Cent.
	£		£		
Bristol and Exeter.....	8,793	4·1	50,562	5	17
Great Eastern.....	36,472	3·3	44,751	1	81
Great Northern	52,461	4·5	298,219	7¾	17
Lancashire and Yorkshire ...	64,087	4·8	428,409	6¾	15
London and North-Western ...	164,924	4·8	1,061,267	7	16
London and South-Western ...	24,300	3·2	205,158	5¼	12
London and Brighton	11,582	1·6	34,199	1	34
Metropolitan	3,774	1·8	103,546	4	...
Metropolitan District.....	19,498	99·5	...	...	...
Midland	141,757	7·6	450,480	6½	31
North-Eastern	213,805	9·8	618,061	7¼	34
Caledonian	50,113	5·7	99,360	3¾	51
Glasgow and Sth.-W. (For 22 weeks.)	16,766	6·0	102,623	5¼	16
Great Western ..... (For 22 weeks.)	37,876	2.1	188,815	3¾	20
North British ..... (For 22 weeks.)	3,441	0·5	39,000	...	9

	Decrease of Gross Traffic in Half-Year.				Percentage of Traffic Decrease on Net Revenue.
London, Chatham, and Dover	9,612	2·6	173,495	...	5
Manchester and Sheffield	5,308	0·8	61,152	2½	8
South-Eastern (for 22 weeks)	18,901	3·0	152,729	4	12

Thus the percentage of the addition to the gross traffic is in many cases a very large one, and if there were no deductions to be made, the dividend, compared with that of last year, would be correspondingly increased. Nor is it always the case that this large percentage of increase upon the net revenue is due to the smallness of the ordinary dividend. To take only the dividends above 5 per cent. in the above list,

it will be observed that the increase varies between 12 and 34 per cent. :—

	Dividend.	Per Cent. of Increase.
Bristol and Exeter	5	17
Great Northern	7¾	17
Lancashire and Yorkshire	6¾	15
London and North-Western	7	16
London and South-Western	5½	12
Midland	6¾	31
North-Eastern	7¼	34
Glasgow and South-Western	5½	16

The majority of the principal railways, therefore, which pay good dividends, have received an accession of traffic which by itself would improve their position in the proportion stated. Some of these lines besides, like the London and North-Western, have a large ordinary capital, so that an addition of traffic equal to 16 or 17 per cent. on the sum divided last year is all the more remarkable.

This impression as to the great improvement in the position of railway property caused by the increased traffic is confirmed, if we inquire what the real addition to the dividends in each case may be. Of course it is not possible, without knowing the interior of each company, to estimate all the causes which may attenuate or increase the effect of the traffic improvement; but a good many of them may be accounted for, and a rough estimate formed. The two things to be considered are the probable charge for working expenses upon the increased traffic, and the burden caused by the charges for new capital since the corresponding dividend of 1869 was declared. The former is the most doubtful matter, as a company may have been increasing or diminishing its percentage of working expenses; but at the present epoch of railway management, when economy is the order of the day, it may be tolerably safe to assume that the percentage of working expenses has not increased since the corresponding half-year of 1869. With an increasing traffic they ought to have diminished, the establishments of most railways permitting an increase of receipts without an increase of work done; but we shall assume that the additional traffic has been earned at the same rate of expense as the whole traffic of the second half-year of 1869. With regard to the burden of new capital, it would seem to be sufficient to reckon in most cases the actual increase of preference and debenture charges apparent in a comparison of the accounts of the second half of 1869 and the first half of 1870, with an addition for the new capital received in the latter period, which will probably now be a charge for the whole half-year. After making these deductions, there would still remain the additions undernoted to the dividends declared in the corresponding half-year of 1869 :—

	Working Expenses on Increased Traffic.		Increase of Preference & Debenture Charges.	Total New Charges.	Probable Addition to Net Revenue.		Total Estimated Dividend.

* For the corresponding half-year there was an exceptional payment on account of [illegible] Deposit Bonds.

† Including use of [illegible] paid receipt of first half-year of 1870 carried over to this account.

‡ In the case of the [illegible] Railway, the corresponding dividend of 1869 was diminished by the payment of [illegible] for compensation, and if the preference charges had been paid for the whole of the first half of 1870 nearly all this additional account would have been absorbed, but there is a credit balance of [illegible] from the first half-year of 1870 and probably about [illegible] of extra compensation still to pay.

It is not at all unlikely that in several cases the improvements in the dividends will be greater than those here brought out, as we have given the unfavourable chances against the companies, and in the case of the last four companies the half-year is not yet completed, which will make a material difference at least in one instance; but the additional value given to railway property, implied by the above figures, is still very remarkable. And unless railway directors have been very remiss in regard to working expenses, the shareholders may fully expect to receive the improvement stated. Where the increase of traffic has been large, as in the case of the North-Eastern, the Midland, and the London and North-Western Companies, it would be reasonable in the shareholders to compute that the increased receipt has been earned without a proportionate addition to the working expenses of the corresponding half-year of 1869. They should, therefore, obtain even a larger dividend than the amount here stated.

GENERAL SCHENCK'S MISSION.

We explained recently our reasons for thinking it a dangerous and mischievous mistake to speak of America as the permanent enemy of England,—against whom, sooner or later, we should be compelled to fight. We wish now to urge the many reasons which exist for taking the very first feasible opportunity for putting those relations between England and America, which have been so long disturbed and unsatisfactory, on a new and thoroughly cordial footing, and to show that, from all we can gather of General Schenck's instructions, and the tone of feeling in America with regard to them, that opportunity may be close at hand.

In the first place, then, if we can by any legitimate concession restore a cordial understanding between England and America, there is no sort of end to be gained in our foreign policy so important and beneficial,—and this too, whatever view may be taken of the right foreign policy for England on the continent of Europe. Whether you may think that England's true position is that of a neutral State, standing aloof from the internal disputes of Europe, and careful only to provide for her own independence and peace; or whether, on the contrary, you hold that England ought to give her support to the cause of self-government and freedom, wherever it is endangered on the Continent,—in either case alike it cannot be denied that England gains immeasureably by being relieved from a chronic danger and menace in America. Indeed, the most earnest partisan of what is called a "spirited foreign policy" will admit that war with America, though it might possibly become a dreadful necessity, can never lead to any increase of the influence of England in Europe, and might lead to its extinction. And as for the neutralists, those who think that England can neither be fairly called upon to wield any great influence in Europe, nor is able to wield it if she would, it is surely evident enough that their case extends with infinitely greater force to the other side of the Atlantic, where we were in fact unable to hold our ground at a time when England was a great military power, and the revolted colonies opposed to us were in their infancy, and where, therefore, it is very far from likely that we could fight with any substantial advantage now that the United States are one of the greatest of military powers, and somewhat exceed in population the United Kingdom and British America put together. Whoever, therefore, wishes to see England quiet, and neutral, and devoted to her great commercial pursuits, will be even more anxious to deprecate a struggle with America than in Europe. And whoever holds that we should take our share in the conflicts of Europe, must, *à fortiori*, deprecate the fatal results of any embroilment with America, which could not fail of using up all our strength and absolutely paralysing us for serious action in Europe. But, besides the mere considerations of policy, surely nothing can be more miserable to contemplate than a quarrel between the United States and England on any of those questions which can alone cause a quarrel. For there is no conceivable issue on which we could quarrel in which England's power would be exerted for any end of lasting and first-rate value. If we quarrel about a few cod, or the construction of a Fisheries' Act, or about our liability for the damages of the Alabama, or about a boundary, or any other of the small unsettled questions which are always under discussion between us and America, no conceivable good could result from the victory of either party, for whichever way any of these questions are settled, they would not be worth the sacrifice of a single life to settle them one way rather than the other, were there not an absolute necessity that every great nation should refuse to yield to mere dictation and fight rather than lose her own self-respect by doing under threats what there is no case to justify. No doubt it is possible for any country to fight, and rightly fight, about what is nominally a mere trifle, simply in order to resist gratuitous aggression. But then the only possible gain is the defeat of the aggression, and not the material value of the encroachment resisted. And the war, even if it ends by the success of the juster cause, adds no

new triumph of freedom or civilisation—nothing but the history of a successfully resisted menace—to the history of the world. Indeed, it is more than probable that if ever we did get into a struggle with America, both parties would be so firmly convinced that they were fighting for the defeat of an aggression on the side of the other, that the defeated party would suffer ever after from the sense of an undeserved calamity, till the time came to revenge it. No war in which we can engage with the United States is ever likely to leave any of the people of the American continent more just, or happy, or free than they were when it began, unless, indeed, it should be waged for the resistance of a purely unprovoked invasion. Surely, then, if we are to have even a "spirited foreign policy," let it be undertaken for the purpose of preventing or redressing some great political oppression, and not for the sake of maintaining a doubtful interpretation of some confused engagement with a people at least as independent and free and a good deal happier than our own. If it be possible to settle the moot points between us and America, it is scarcely feasible to exaggerate the importance of doing so. It would make us far safer at home, if safety is what we want. It would make us far stronger abroad, if strength is what we want. It would establish a heartier feeling between two great branches of the same race. And it would prevent, or greatly postpone, the most inconceivably mischievous, hopeless, and murderous of all wars,—a war very nearly a civil war in character, but yet stimulated by all the jealousies of national rivalry.

And now, in General Schenck's mission, it would seem likely that we really are going to obtain a good opportunity of healing the old sore, and obtaining once more a cordial understanding with the United States. At least if we may trust all the reports which reach us from the other side of the Atlantic, General Schenck is instructed to abandon all the more grotesque and absurd of the American positions on the Alabama question, and to ask, if not precisely for what we can give, yet for what at least there is a reasonable pretext for asking. It seems to be believed on all sides that he is not to ask for what may be called "general damages"—*i.e.*, damages caused by the general comfort and encouragement given to the Confederate cause,—such as Mr Sumner desired to claim; nor is he apparently to demand any formal apology. He is at most to ask for compensation for the losses caused by the escape of the Alabama and the other Confederate cruisers, and for such an adjustment of the law for the future that these complications may become, if not impossible, at least much more difficult. Now, as far as we are concerned, we should see no difficulty in conceding at once the *special* damages caused by the escape of the Alabama, as distinguished from the other Confederate cruisers; nor in submitting to fair arbitration the question whether in the case of the other cruisers, the Georgia, Florida, Shanandoah, and the rest, we had really been guilty of the same sort of administrative negligence of which it is hardly possible to deny that, in the case of the Alabama, we were really guilty; nor, again, in earnestly and impartially discussing the question of any change in our municipal law and that of other countries, which might seem to promise relief from any such complications in future,—though we admit we are not very sanguine that any such change could be pointed out. And if only England can be persuaded to concede as much as, in our opinion, might be frankly conceded at once, we do not see why General Schenck should not solve the problem which has so long threatened to throw the two countries into war. Of course, we cannot and must not concede anything of the real justice of which we are not convinced. The practice of buying off an enemy is the most dangerous and fatal, as well as immoral, which can be proposed; and assuredly it will have no friends in this country. But we feel so sure that had we been at war,—and had an Alabama escaped from New York under the sort of circumstances under which this Alabama escaped from Liverpool,—England would never have ceased to denounce the gross negligence of America in the case, nor to believe it wilful, that there can be no real sacrifice of dignity in admitting at once the fault of which our administration was guilty. And as for the other cruisers, though no case of this kind has yet been produced, or as far as we know, can be produced, it is only fair that where two countries differ so widely as to the evidence, it should be submitted to the judgment of an impartial umpire. At all events, unless the accounts from many quarters as to General Schenck's instructions are utterly belied, the new American Ambassador will bring us quite *reasonable*, though not perhaps wholly admissible demands,—demands which we certainly ought to consider most gravely, and of which we should do well to yield frankly and freely all that we should ourselves feel called upon, in the same circumstances, to press. If we do so, General Schenck's mission may make England safer and stronger than she has ever been since the close of the Civil War in 1865, and will give her a reputation for moderation and candour as well.

ENGLISH PUBLIC OPINION ON THE WAR.

Some of the philosophers should turn their attention from the subject of spectroscopic investigations and the invention of electrometers, galvanometers, hygrometers, and so forth, to the far more difficult problem of inventing a mode of measuring the intensity and diffusion of political wishes and convictions. No task at present is more difficult for a Statesman than this. There are, indeed, all sorts of shades of difference between the character of really prevalent and preponderant public opinions, of which no man, however acute, ever forms more than a purely conjectural impression, and of which, nevertheless, any respectably-accurate measure would be a matter of the highest political importance. For instance, there is at times a public opinion on one side of a question which is very widely diffused, but of very slight intensity,—which, in fact, amounts to nothing more than a wish in a particular direction without a will, and still more without any intention of submitting to a considerable sacrifice rather than not carry out the will into action. Again, there is such a thing as a very active and intense public opinion, which would make very great sacrifices for the attainment of its end, which is by no means widely diffused, but limited to a very small section of active propagandists. And then, again, there is that enormous force which nobody can measure, because, like friction, it is a purely latent force until it is roused into activity by practical pressure,—the public opinion which is inert, not to say indifferent, so long as no sacrifices are asked for and no danger seems to be before it, but which becomes powerful and active the moment it sees a real danger of being thwarted.

Now, when we consider the significance of such a meeting as that held on Tuesday night in St James's Hall to express warm sympathy with France, and urge our Government, first, to ascertain the real demands of Germany, and then—in case those demands involve territorial confiscations, as we all know that they do—to interfere with active support of France against those demands, we shou'd bear in mind all these kinds and degrees of public opinion. We have, as we have just said, no real means of measuring either the diffusion or the intensity of the English sympathy with France; but we suspect that if we had, we should find the result to be something of this kind. There would be a very widely-diffused and somewhat feeble, because far from sanguine, wish that France might make a good head against the invader and succeed in driving him out from the country, without any recovery so complete as to threaten further aggression. There would be a very small and excited party, chiefly limited to the propagandist Republicans and the lovers of political sensations generally, with an infusion of the friends of a "spirited foreign policy" and the alarmists as to the growing power of Prussia, willing to make a very great sacrifice indeed to help France in thus expelling the invader. And there would, on the other hand, be another no doubt much smaller and rather less excited party of Germanisers, who would regard, with Mr Carlyle, the present calamities France is undergoing as the legitimate and wholesome consequence of her sensuality, luxury, boastfulness, and habits of self-deceit. And, finally, there would be a very large number indeed, probably consisting of at least nine-tenths of the population of Great Britain,—Ireland, no doubt, is almost entirely and actively pro-French, as every one will admit,—and including all but the propogandist Gallicists mentioned above, who, whatever their sympathies, wishes, and auguries as to the result of the present war, would protest very warmly indeed against involving England in responsibility for a most dangerous and doubtful contest without a very direct and even urgent claim on English honour and English interests.

Such—speaking of course with perfect impartiality and without reference whatever to our own views on the question at issue—is our reading of the symptoms of English feeling on the war at the present moment, and we are quite sure that the meeting at St James's Hall is in no degree to be regarded as indicative of the wishes of the great majority of the English people. Nobody could think for a moment that Professor Beesly, and Mr Frederick Harrison, and Mr Congreve are in any sense exponents of a large section of English society. So far as we have any knowledge of the English middle-class, we should say that these gentlemen's sympathies are often a very fair measure of the antipathies of the greater portion of that class. When Professor Beesly spoke on the trade outrages at Sheffield, in language which, though he himself maintained that it was not apologetic for them, was by the great mass of the middle-class supposed to be apologetic for them, that class expressed its unmeasured horror in no ambiguous terms. And as far as we can judge, the very fact that these gentlemen head a movement is calculated to alienate the influential leaders of opinion. Though not the exponents of middle-class opinion, these gentlemen may no doubt be regarded as better exponents of the agitators among the trades unions and of the *political* section of the working-classes. But then we must not forget that the last election proved this section of the working-class to be a very small section indeed, and to have no such power over the working-class at large, as was supposed. Not one of the candidates nominated by the working-class agitators succeeded in getting into the House of Commons, and Mr Odger, the most near success of any of them, after a succession of hopeless attempts, remains still a candidate. Note, too, that Mr Lucraft, whose influence amongst the genuine working-class is so far real that he *alone* of all the working-class candidates for the Metropolitan School Board, succeeded in obtaining a seat on the Metropolitan Board, *resisted* the motion for intervention at St James's Hall on Tuesday night, and took the more prudent and reticent line. Mr Osborn, another of the same school, though not so popular among his class as Mr Lucraft, followed in the same line. Altogether, we can hardly observe any one man who can be said to represent fairly the soberer and more moderate of the artizans, except Mr Lloyd Jones, who advocated active intervention. All our political experience hitherto leads us to the conclusion that the working-class and middle-class are of the same general tone of thinking on political questions, and that no ordinary movement which is not at least strongly supported by the soberer members of the middle-class has any great chance with the working-class. It is quite true, of course, that there may be a great difference in the numerical *proportions* of the adherents of any view in the two classes. Doubtless during the American civil war the proportional number of working men who sided with the North was far larger than the proportional number of middle-class men who did so. There was perhaps even a majority of the middle-class in favour of the Southern States, while in the working-class the number of those who were Southerners was a perfectly insignificant minority. Still we regard it as nearly certain that no movement will really carry the working-class, which does not find many influential representatives among the sober, quiet, wealthy members of the middle-class. Now, where were the men of this character at the St James's Hall Meeting? That meeting was, in fact, not even a union of the agitating sections of both classes; for the average middle-class radicals—the class of men whom our superfine critics call "the Philistines,"—a type which by no means abstains from agitation so long as the agitation is in a pacific and definite field, where the consequences of success can be foreseen without any great stretch of imagination,—were not represented there at all. There was no sign of such men as Mr Beales, Mr T. B. Potter, M.P., Mr Alderman Lawrence, M.P., and the like. Now, in default of any really accurate measure of public opinion, we take leave to say that the absence of the class represented by such men as these,—men who really delight in heading a *safe* Radical movement,—is very ominous of failure. England does not move till her heavy sense and sagacity begin to move. The mass of opinion in all classes is a little inert. What it fears most is the restlessness of "dangerous" men. When even Radical Members of Parliament religiously abstain from joining a movement, let no man rashly believe that the movement has the real support of the working-classes; and let us be quite sure it will have very little to hope from the middle-classes. On the whole, and in the absence of any scientific measure of public opinion (any doxometer, as it might be called), we take leave to believe that, judging quite impartially, and without any wish to decide for one side rather than the other, the meeting of Tuesday night at St James's Hall represented one of the smaller eddies in public opinion, and something very far, indeed, from the chief stream of English public opinion itself.

AMPLE BUT UNEXPLORED MEANS FOR FURTHERING TECHNICAL AND HIGHER EDUCATION.

THE LONDON LIVERY COMPANIES.

We have already shown (Economist, 17 Dec.) that the principle of the London Livery Companies in their original formation and down to the seventeenth century, was the furtherance of the "art and mystery," as it was called, of the several trades represented by them—or, in modern language, the furtherance of the Technical and Higher Education of the artisan and middle-classes. We have also shown that the earlier Charters never lost sight of this principle, but carefully prescribed that—by means of a popular government of the Guild or Company, by means of its functions of teaching and inspection, and by means of its privileges and property—"the "greater good and profit of the people" should be accomplished. We have also shown that the present condition of the Companies is at total variance with these purposes and intentions. The Companies have so entirely departed from their real design that they do not even pretend to represent, even in the faintest degree, any trade or industry. They have become close Corporations, of the most secret, respectable, and obscure description, intent only on keeping their property in their own hands, for their own uses, and to the most absolute exclusion of every external claim or interest.

In the absence of any official account of the Companies, it is even difficult to say how many of them there are. Large and small, probably seventy or eighty. But the diversities of wealth and numbers among them are extreme. First in order and resources come what are called the Twelve Great Companies, including the Mercers, Drapers, Grocers, Goldsmiths, Skinners, Merchant Tailors, Salters, Fishmongers, Ironmongers, Haberdashers, Stationers, and Clothworkers. There are then some twenty or thirty Companies, of inferior wealth and dignity, but still mostly possessing Halls or places of meeting, and also possessing revenues of increasing amount. Beyond these are numerous Companies not possessing Halls, and almost destitute of fixed incomes, but depending upon the annual voluntary payments of members. The wealth of the opulent Companies is chiefly in that most valuable and progressive of all forms—the freehold of premises in the best parts of the City of London, and the freehold of suburban and other estates. A few of the Companies, the Salters for example, have very large estates in the North of Ireland, derived to them for their participation in the well-known Scheme of Plantation under James I. We have already explained that the Companies are subject to specific charges for Schools, Exhibitions to the Universities, Almshouses, &c., prescribed by the donors of the original estates. But in nearly all cases these charges are fixed money payments, and of course while these payments have remained stationary, the annual rents of the estates and premises go on increasing year by year, leaving a constantly and rapidly increasing sum at the disposal and discretion of the secret managing Committee or Court;—we say secret, because in no instance, we believe, are accounts rendered by any of these Courts, even to their own constituents—the general body of the members or Livery—much less to the public. It is these vast and growing Surplus Revenues which constitute the ample and unexplored fund for promoting Technical and Higher Education. What may be the annual sum they amount to it is at present quite impossible to state with any accuracy. It is undeniably very large, and it is undeniably augmenting at a very rapid rate. After taking some pains to form a moderate opinion, we have arrived at the conclusion that these Surplus Revenues of the London Companies cannot be less than *One Hundred Thousand Pounds Sterling per annum*, and in all probability are very much more. In twenty or thirty years from this time, considering the rising value of ground rents in the City and Suburbs of London, the amount may be increased by one-half or two-thirds.

Here, then, is probably the most compact progressive mass of real property held by irresponsible and secret Corporations in any part of the world—remembering that the great ecclesiastical endowments of Germany, Austria, Italy, and Spain have been broken up. Here, also, is a mass of real Estate which, by virtue of the perpetual character of the Charters of the Companies, escapes all probate and succession duties—an exemption from taxation which of itself constitutes in effect a considerable annual subsidy out of the public purse, and for purposes which not even the Prime Minister can venture to say that he either understands or has the means of understanding. The case is manifestly one for speedy inquiry and investigation, and for several reasons so obvious that a mere statement of them is sufficient. For example—first, because the Companies have wholly fallen away and departed from the fundamental conditions of their Charters—that is to say, as technical and teaching bodies "for the greater good and profit of the "people;" second, because they have become Corporations wholly secret, self-elected, and irresponsible; thirdly, because, by virtue of their quality of perpetual succession, they in effect derive from the State, by exemption from taxation, a large annual subsidy; fourthly, because, as freeholders of extensive building properties in the City of London and elsewhere, their wealth is rapidly increasing, and there is no adequate supervision of the manner in which they conduct the administration of their property; fifth, because, as in the case of the Cathedral Chapters, the Universities, the Public Schools, and Charities generally, it is fit and necessary that Parliament should have the opportunity of considering, in the light of modern knowledge and experience, the application of vast and increasing funds bequeathed by former generations for public purposes.

The London School Board are about entering on the reorganisation of the educational appliances of the Metropolis. It is perfectly certain that the earliest and most urgent result of their inquiries will be the discovery that considerable outlay must be provided by new taxes or by other means. We shall be among the first to support any reasonable measure of increased rates for such an object; but always subject to the preliminary condition that the School Board have diligently ascertained how far existing resources can be brought in relief of the new imposts. To increase the local assessments of the Metropolis is, under present circumstances, a most severe financial measure, not to be entertained except after the most careful scrutiny,—and we are fully satisfied that such a scrutiny applied to the Livery Companies and to the analogous cases of charitable and other endowments to be found in the Metropolitan area, will bring to light financial resources which will most materially modify the additional rates required by the Board.

We urge, therefore, that at an early date the London School Board shall apply to the Government to issue a Commission of Inquiry into the present condition, management, revenues, and policy of the Livery Companies, and all analogous endowments within the limits of the Metropolitan area, with power to make suggestions for improved application, &c. The day is quite gone by for speaking of such a Commission as arbitrary, illegal, or unusual. The history of the Livery Companies is full of such cases of investigation by the State, and at periods when the Companies had not fallen away, as at present, from their active and artificer functions.

When a State inquiry is suggested, it need scarcely be said that it is not intended in any sense of confiscation of the legally acquired rights of existing persons; nor with any desire to remove or injure the noble and comely Halls which have come down to the present time from former centuries. These buildings belong to the monuments and pride of the City of London, and are things to be upheld and beautified for the benefit and delight of distant ages. Nor is it desired to see changes introduced which will not admit of reasonable and fitting festivities on suitable occasions in these ancient places of good-fellowship. But a conservatism of this description may be amply accomplished, and still leave at the disposal of an enlightened and open administration of the vast revenues of the Companies an annual fund of great and yearly-increasing amount,—and it is precisely on this circumstance of the *yearly-increasing* revenue that we desire to fix especial attention.

The London School Board are the party who are most obviously bound to apply for inquiry; but if they are unable to acquiesce in this view of their policy and duty, it may be regarded as certain that in other and not less powerful quarters the subject will be taken in hand.

BUSINESS NOTES.

Mr Lefevre's Retirement from the Board of Trade.—The most important of the minor changes in the Goverment is in itself much to be regretted. Mr Lefevre gains a step in promotion by becoming Under-Secretary for the Home Department, and there is no place where more work has to be done or where more good help is wanted. But the public will be very sorry to lose Mr Lefevre from the Board of Trade. The work of the department has (owing Mr Bright's illness and absence from Parliament) rested on him in a most unusual manner, and he transacted it both in the House and out of it with much discretion and ability. He personally took a most laborious part in the revisal of the "Trade "Statistics," and his report deals with the matter most thoroughly, and better than the late alterations. And there are several Bills to be ressumed next Session—such as the Meschant Shipping Act and the Compulsory Pilotage Act, to which Mr Lefevre has paid the greatest attention, and which his successors, especially as their opportunity is short, will find it difficult to master equally well.

English Manufactures and the War.—A fact, to which we have already drawn attention in our columns, respecting one of the effects of the war upon our home manufactures, has been brought out at the last meeting of the Halifax Chamber of Commerce. We refer to the orders for coarse woollen stuffs especially, which have come to this country in consequence of the check to manufacturing on the continent, partly through the withdrawal of workmen for soldiering, and partly through large manufacturing districts becoming the seat of war. The chairman, Mr Akroyd, M.P., referred chiefly to the large demand for army cloths and articles of warm clothing, especially blankets; but we understand the demand is by no means exclusively on army account, but for general use as well. It appears in fact that the war has caused a run upon this country for clothing "necessaries," which our neighbours manufacture less for themselves, and which they need more than ever, and which nothing but very great impoverishment would keep them from buying. Mr Akroyd also referred to certain other branches of trade, especially furniture goods, such as damask and lastings, which had benefited by the war, through the stoppage of the close competition formerly maintained by Germany. This was one of the consequences which we pointed out from the beginning as likely to result from the war. It had occurred at a time when the European manufacturer was beginning to run us very close, and it would throw him back a good many years. But the most important effects of the war in this respect have probably yet to appear. The competition is not only checked meanwhile, but markets which it had taken years to acquire are lost, great manufacturing establishments which require above all things continuity are disarranged, and along with a heavier burden of taxation there is less capital of every kind available. If the war lasts much longer it will take many years for continental manufacturers to recover that relative position to our own which they had gained in 1870.

The Profits of the London Joint Stock Banks.—In comparing last week the half-year's dividends of the London and Westminster, London Joint Stock and Union Banks, with the dividends for the corresponding half-year of 1869, it appeared that while the dividend of the two former had increased, that of the Union was the same as on the former occasion. We learn however from the report of the Union Bank, which has just been published, that it has shared equally with the others in the increased prosperity of banking during the half-year. The dividend declared was only for the first half of the Bank's financial year, and was at the usual rate; but there is a much larger balance carried over than for the corresponding half-year of 1869. The profit earned during the half-year was 116,000*l*, which, with a small balance from last year, enables the company to divide 90,000*l* now, and carry over 30,000*l*. At the same period of last year however the amount carried over, after paying the same dividend, was 24,000*l*, the profit actually earned in the half-year being 98,000*l*. As compared with 1868, there was also an improvement the profit then earned having been 102,000*l*. The report of the Union Bank thus confirms the inference from the improved dividends of the other banks, which appropriate fully what has been earned at the

end of every half-year, or terminate their financial year in December instead of June.

A Minor Evil of the Stamps on Foreign Securities.—We discuss elsewhere the complaints of the Stock Exchange respecting the new charge on certain foreign securities made by the Stamps Consolidation Act; but there is a minor grievance which it would also be expedient to remedy. That grievance is the scale of the stamp duty on foreign securities. The rate is 2s 6d per cent., but the lowest charge is 8d for each bond under 25*l*, and as there are many foreign bonds of 20*l*, these become liable to a stamp duty of 3s 4d per cent. The tax is therefore an unequal one to an extent quite appreciable in Stock Exchange dealings; and it would be quite simple to remedy this grievance by making the scale begin at 6d for 20*l* instead of at 8d for 25*l*.

The American Cotton Crop.—We have already noticed a telegraphic statement as to the last estimate made by the United States Agricultural Bureau of the present American cotton crop. The mail has now brought more detailed accounts. The estimate, which is based upon returns made up to the 1st of December, is, as we stated, 3,800,000 bales, a very large excess—about half-a-million bales—over the crop of last year, and about a million bales in excess of the corresponding estimate of last year's crop, which was in reality exceeded. The estimate is equal to 1,767,000,000 lbs, which is 82 per cent. of the crop of 1859, the heaviest crop yet recorded, when the yield was 2,154,820,000 lbs. The following is the detailed crop estimate of each State compared with 1869:—

States.	Acres.	Bales.	Crop.	Compared with 1869, the Percentage of Yield per Acre.
North Carolina...	451,714	170,000	118	175
South Carolina...	601,764	220,000	124	170
Georgia	1,330,991	495,000	122	173
Florida	140,909	50,000	126	165
Alabama	1,437,272	510,000	112	165
Mississippi	1,644,512	725,000	110	205
Louisiana	920,700	495,000	115	250
Texas.....	900,937	465,000	132	240
Arkansas	711,734	375,000	124	245
Tennessee.....	626,184	215,000	114	190
Other States.....	218,823	80,000	...	170

Bank Dividends and Bonuses.—We think it would be expedient for joint stock banks as well as other limited liability companies to abandon, once for all, the practice of describing a portion or the whole of the dividends which they pay as a bonus of so much per share, instead of simply stating the rate per cent. per annum. The practice unfortunately has the sanction of some of our largest joint stock banks; but it is very objectionable. No doubt the shareholders in each particular company understand the phraseology well enough, and the difference of phrase answers to a distinction between "ordinary" and "extraordinary" profits which some prudent boards of directors like to make—the "dividend" being a regular annual appropriation and the bonus an occasional division; but these are no sufficient reasons to maintain the custom. The distinction referred to has long since lost all practical meaning, so that some companies have a dividend and bonus every year and half-year; and even where the bonus is more occasional, it is still, after all, only an addition to the dividend, which would be equally manifest by a statement of the rate per cent. As to the shareholders understanding the phraseology well enough, the reply is that sometimes they do not, as they are inclined to consider the bonus as occasional, and estimate the value of their property according to the dividend only; but in any case it is not merely existing but possible shareholders and the credit of the business which a company should think of, and any complexity about the dividend affects them unfavourably. In the case of large companies the evil is reduced to a minimum by the keenness of Stock Exchange dealers, and the expertness with which the roundabout phraseology is translated into the established formula of so much per cent. per annum; but enough inconvenience remains to make the matter worth attending to, and there must be many small companies whose shares are appreciably less saleable in consequence of this perverse mode of declaring the dividends. In all cases the phraseology is a trap for statistical mistakes, especially in showing the progress of a company from one year to another; and in this respect the shareholders of an improving company are apt to suffer most, the bonuses being mistaken or overlooked. Could not directors, who may still be wedded to their own formula of "dividends" and "bonuses," at least compute the dividend in an alternative form, according to the customary formula, and thus save the public and their shareholders a world of trouble, and prevent not a few mistakes?

Shipowning in the North of England.—We extract from the *Times* the following interesting statement as to the recent progress of the shipping trade in the North of England, which shows, in another field, what has lately attracted some notice in connection with the Suez Canal—the rapidity with which screw steamers are gaining upon sailing ships in the carrying trade of the world:—

> The most remarkable circumstance in connection with the iron steam-shipbuilding trade of 1870 in the North is the extraordinary increase in the number of steamers that have been built for local owners. The vessels are mostly held by partnerships, each share being of the value of between 200*l* and 300*l*. North Shields, which had scarcely a ton of iron steam-shipping five years ago, will have steam-shipping property worth a million sterling, it is anticipated, by the end of 1871. There has been a very great increase in the number of iron steamers owned by Newcastle in 1870; and Sunderland and South Shields are going extensively into iron steam-shipping property. If the trade developes at the rate it has done during the past year, sailing ships on the Northern rivers in ten years time will be as rare as stage coaches in the streets of London. The steam-shipping of the North did well in 1870. Some of the steamers returned as much as 40 per cent. to their owners, and very few of the new vessels made less than 25 per cent.

One of the reasons why steamers are so rapidly displacing sailing ships is no doubt the greater effectiveness of the same tonnage—a steamer, though a far more expensive article, doing several times the work of a sailing ship of similar capacity. Hence a single steamer of large size may easily cut out a whole fleet of sailing ships. The statement as to the profits of the new steamers is very remarkable, and there must be some special circumstances in the Northern trade to account for such large profits, when shipowning generally has been unprofitable.

Settlements in Bankruptcy.—The Chief Judge in Bankruptcy—*re* Rigden—has just decided a question as to the validity of a settlement in favour of an intended wife made by a bankrupt on the eve of his marriage. The validity of the settlement was disputed by the trustee in bankruptcy, and it was stated for him that the deed was executed in September, 1869, the marriage celebrated in November following, and the bankruptcy declared in January, 1870—the bankrupt having been insolvent all the while. It was also stated that the settlement was voluntary, and the wife gave evidence to the effect that she did not hear of its existence till some time after its execution. The Chief Judge, in giving judgment, said that "it could not be "doubted for a moment that the bankrupt was in a state "of hopeless insolvency at the time of the settlement." He also enumerated some of the facts above stated, and concluded by a declaration that the settlement was void against the trustee in bankruptcy. Ought it to have made any difference if the settlement had not been voluntary but part of a contract of marriage? The disposition of lawyers would probably be to support such a settlement if made before the period which the retrospective effect of an act of bankruptcy covers, and if after that period, to make the trustees of the settlement creditors entitled to rank on the estate for the amount secured to them. But it may be doubted whether any good end would be served by such leniency to settlements before marriage. By the necessity of the case, the husband must share in the benefit derived from them, which is the objection to settlements after marriage; and although it may be hard on a lady who stipulates for a settlement with an apparently solvent suitor to deprive her of its benefit, yet the opening to fraud is such that the wisest course would seem to be to place settlements before and after marriage on exactly the same footing. Creditors would thus be protected, and, as regards the wife and her trustees, the effect of the rule would be to put them more strictly to inquire as to the character and position of the intended husband, so that a case of hardship could hardly ever arise.

THE CASE OF LAFITTE AND CO.—The Master of the Rolls has given a decision as to the claim of M. Lafitte to rank on the estate of Messrs Charles Lafitte and Co. (Limited) for 50,000*l* agreed to be paid by the promoters for the business and for the delivery of a certain number of 10*l* paid shares, which were also part of the consideration. The case is raised by the official liquidator at the instance of the National Bank, who are liable under a compromise to pay all the claims which can be substantiated against Charles Lafitte and Co. (Limited.) The decision is against the validity of the claim on two grounds urged — first, that no proper computation of the value of the business had ever been made; and next that it had never been transferred, as it in fact could not be according to French law, except with the observance of certain forms, which had not been observed. At the same time his Lordship exonerated M. Charles Lafitte in the fullest manner from the charges of fraud.

THE PROMOTION OF COMPANIES.—Vice-Chancellor Stuart —*re* the Empire Assurance Corporation, Limited, Admiral Sir Henry Leeke's case—has just had before him one of the strangest stories yet recorded in connection with the promotion of public companies. The executors of the Admiral contended, that though his name had appeared in the prospectus as chairman of the company, yet he had never agreed to be chairman, or even to be a shareholder, and they applied to have his name removed from the list of contributories! The circumstances, as stated in the report, were that Sir Henry Leeke had been a director in the British Union Insurance Company, whose business in 1865 was transferred to the Empire Corporation; that, after the incorporation of the latter, the articles of association were altered so as to adopt an agreement by which Mr "George Bailey" was to be paid 10,000*l* for preliminary expenses; and that this sum was paid with cheques, which were immediately used to pay for the paid-up shares held by the directors. George Bailey was in fact an "alias" for the promoter, as admitted by him in the proceedings, and the object of the arrangement was to enable him to constitute a board. The Admiral was one of the promoter's nominees; but he had taken a small part in the proceedings, and had, it was stated, frequently complained of the use made of his name in the prospectus. It appeared, however, that he had attended an extraordinary meeting, when a resolution to wind up was agreed upon, and had apologised, on the ground of ill-health, for not taking a more active part in the company's affairs. On this and other grounds the Vice-Chancellor held that the executors of the Admiral were liable to be placed on the list of contributories, and he also held that the shares should be treated as not paid up, no real payment having been made. As to the cheques in favour of "George Bailey" which were immediately paid back to the Company, he remarked that—"The facility for fraud would be intolerable if, "by any agreement among the shareholders themselves, the "creditor could be deprived even of his limited right and of "the absolute right to the limited amount of money capital. "An agreement among the shareholders to contribute their "capital not in money, but in any commodity, with no "criterion of value but the agreement of the shareholders, "would make the subscribed capital a mere delusion. If "such an agreement was legal, the commodity, however worthless, might by agreement among the "shareholders, be taken as representing the whole or any "amount of the capital which the Act of Parliament, in order "to secure the creditor at least to the limited amount, has "made a speciality debt to an amount certain in money." The case is another illustration of the easy way with which outsiders with handles to their names were induced to be directors in the period of expansion which preceded 1866. Whatever is doubtful in the present case, it is at least certain that Admiral Leeke had no business in the City.

Agriculture.

GAME LAWS AS TRESPASS LAWS.

IN the recent discussion on the Game Laws at the Herts Chamber of Agriculture, Mr Brandram, one of the apologists for the Game Laws, put forth the very common fallacy that the Game Laws serve to protect landed property against trespassers, apart from those who trespass for the sake of game. He said "he would much rather see the present Game Laws moderately reformed than a severe law of trespass enacted. He believed that if the Game Laws were repealed they would have no end of trespassers over their fields." To this one of the farmers present very naturally asked—"What would they trespass after?" Thereupon Mr Brandram returned to his figment, saying—"Mr McGeachy had quoted Mr Pusey, who said that after he had given up preserving game he had no trouble with trespassers. But after Mr Pusey gave up preserving game the Game Laws were still in force. If these laws were repealed.....the farmers would have their hedges broken and their fields trodden over." Here we have the distinct assertion that the Game Laws operate to protect the occupiers of land from the petty trespasses by which (apart from game trespasses) such occupiers are occasionally annoyed. We have had some experience as to such trespasses, and they may be very briefly enumerated. Perhaps the most serious of such trespasses is where people, for the purpose of a short cut or otherwise, persist in going across land where there is no right of way. Now the remedy for this is a summons for wilful damage where hedges are broken, or anything else amounting to appreciable damage can be proved, or an action for trespass, after notice, either in any of the Courts of Law at Westminster, or the County Court, which will soon put an end to the nuisance. Then, in spring, there are small boys birds'-nesting, and in the autumn men, women, and boys picking up acorns or mushrooms. In some places a few old men or women trespass for the sake of dead wood, and occasionally pull out of the hedges stakes and wattles to the unquestionable damage of the fences. But all these trespasses may be speedily stopped by the slightest show of resolution on the part of the occupier of the land and his servants, and are, after all, so trifling as to form no more than a passing or temporary inconvenience. But in what way does the Game Law assist in the prevention or punishment of such trespasses? Would anyone but a gamekeeper swear that such trespassers were trespassing in search or pursuit of game? Would even a gamekeeper be able to make out any such case to be one of game-trespass under the slightest cross-examination question? In truth, there are no trespasses which require to be repressed by any other than the existing law of trespass, and whosoever talks of a new trespass law as needed, should the Game Laws be repealed, really means a Game Law in disguise.

The Lord-Advocate of Scotland, in his recent address to the "Scottish Society for Promoting the Amendment of the Law," after speaking against entails, made a most jesuitical defence of the Game Laws—altogether unworthy of the law officer of a Liberal Administration. He, however, admitted that the Game Laws "are simply Trespass Acts to restrain trespassers of the class called poachers, *for whose restraint the Criminal Law was thought too severe*, and the common law of trespass esteemed insufficient." It is, then, to enable landowners to preserve wild animals—animals which can neither be restrained nor identified—that these special laws, really *more severe* than the Criminal Law, are to be maintained,—to the destruction of agricultural products, and operating as a moral pestilence amongst the labouring classes.

A GAME LAW PARABLE.

WHEN the unjust steward called his master's tenants together and told them to write down their debts to their master at less than the real amounts, the act was done with the canny notion of receiving aid from the debtors so dishonestly befriended when the steward himself should be dismissed from his place. A curious instance of the influence of public opinion, even upon the most inveterate and incorrigible game-preservers, lately came under our attention. We all know the vast numbers of game animals slaughtered, which are enumerated as the results of battues, when royal and noble personages assemble to partake of the effete sport of battu-shooting. Local editors chronicle these results, some with pride at the prowess (?) of the battu-shooters, others with shame at recording such abuses of the rights (?) of property. But a change appears to be coming over the spirit of the game-preservers' dreams. Possibly they see in their minds' eye visions of Mr McGeachy stimulating the Chambers of Agriculture to damaging discussion on repeal of the Game Laws. Perchance Mr Peter Taylor's short and comprehensive Bill for total and immediate repeal of all statutes concerning game—brought in Session after Session to the discomfort of shifty Liberal county members—sits like the nightmare on the hearts of noble gamekeepers. Whatever the moving cause, it seems that the great game-slaughterers are now under-stating the result of their battues. Not long since a very notorious preserver of game had one of his grand days, when about one thousand pheasants were butchered, but the gamekeepers were directed to report to the outside world the number of the slain at seven hundred! Clearly it is not only those who *do good* by stealth who "blush to find it fame."

THE REVENUE.

I.—An Abstract of the Gross Produce of the Revenue of the United Kingdom in the undermentioned periods, ended December 31, 1870, compared with the corresponding periods of the preceding year :—

	Quarters Ended—				Year Ended Dec. 31, 1870.	Quarters Ended—				Year Ended Dec. 31, 1869.

The following are the Receipts on account of Revenue during the week ending Jan. 7 :—

	Receipts of Week Ending Jan. 7.
	£
Customs	333,000
Excise	190,000
Stamps	157,000
Taxes	nil.
Income tax	81,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	28,642
Total	789,642

The total receipts of the previous week were 1,074,752*l.*

The Exchequer issues of the week on account of expenditure were 5,309,057*l*, viz. :—

	£
Interest of debt	5,035,622
Other charges on Consolidated fund	53,435
Supply services	190,000
Telegraph services	30,000
	5,309,057

During the week the cash balances have decreased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Dec. 31, 1870	2,688,255	1,070,734	3,758,989
— Jan. 7, 1871	909,292	879,403	1,788,695
Decrease	1,778,963	191,331	1,970,294

The other receipts were 2,549,121*l*, and the other payments *nil.*

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, JAN. 11.

In a new and, like all he writes, very brilliant article, contributed to the *Journal du Havre*, M. Michel Chevalier again treats of the neutrality of England in the war, and comes to the conclusion that if persisted in it is calculated to lower her standing among the nations. He shows that the first Napoleon, feeling the necessity of having a powerful ally to maintain the Empire he had won, sought one in Russia, and by the Treaty of Tilsit of 1807, and the conferences that followed it, consented to let her make territorial aggrandisements at the expense of Turkey. But Russia wanted Constantinople, and Napoleon would never permit her to take that city, because he was convinced it would give her the empire of the world. The alliance accordingly came to nought. Prussia is now in the situation in which the France of Napoleon then was—seeking to obtain the domination of Europe, and like her needs the co-operation of Russia. To obtain that co-operation Prussia has, M. Michel Chevalier doubts not, consented to what France refused—the taking of Constantinople. Except on such understanding between the two Powers, it is, he thinks, very difficult to explain Prince Gortschakoff's repudiation of the Treaty of 1856 on the Black Sea. For the execution of the scheme, the destruction of the power of France is necessary, and to obtain that destruction Count Bismarck and the King of Prussia are continuing the war. With it Continental Europe will be placed under a yoke, and England will be lowered and menaced. The other States of Europe can do nothing without her, but with her they can secure safety, and she has strong personal reasons for moving. The alliance of Prussia and Russia is more menacing to her than was that of 1807, which, however, she opposed with great energy. Since then her Indian Empire has increased, and has become more precious to her; and the preservation of it demands that Constantinople shall not be in Russian hands. All her policy indeed has always been directed against such an eventuality. Is it conceivable that she can now accept it, especially when the doing so will be accompanied by the crushing of France—her faithful and devoted ally in all the recent crises of European policy? "Such a change of conduct," M. Chevalier, considers, "is only possible in the event of England ceasing to be a European power." He holds, however, that "she cannot cease to be so even if she would. By latitude and longitude she is attached to the Continent, and it is forbidden to her to shake off her duty as a member of the community of Europe. She must have a European policy. Let it then be foreseeing, honourable, courageous, and firm. That is the safest, and it is the only one worthy of a nation so great, and worthy of the capacity of her statesmen."

Citizen Gambetta's dissolution of the Councils General of Departments might have been submitted to with little complaint if he had ordered new ones to be elected without delay. But instead of that, he has decreed that they shall be replaced by commissions nominated by the Prefects, charged among other things to fix expenditure and raise receipts. Thus the French people, already deprived of all control over, or part, in national affairs, are not allowed to arrange in their own way their petty local matters, and have to pay money they do not vote, not only for the Government, but for departments also. This is assuredly a singular *regime* for a Republic. There are indications that it will soon encounter strong resistance, and one nobleman, a large landowner, has published a declaration that he will not pay any tax these commissions may impose, and will not allow any to be levied by force on his estates. If the French have not lost all public spirit, they will rally round this new Hampden.

The subjoined appeal to "our fellow citizens" has been issued by the Bordeaux Government:—"The collection of the direct taxes for 1871 is about to commence. They are only due from month to month, in twelve instalments. The Government, however, requests taxpayers to aid the public Treasury. It is necessary to provide for our soldiers in arms, for our wounded in battle, for our sick in ambulances. The army demands from us millions every day. Old and young soldiers are rivalling each other's courage, and their devotedness to the country must find compensation in our ardour to protect them. Let the rich who can advance all their annual tax pay immediately the whole of it; let every citizen according to his means pay the half or the third of the tax of 1871. At this moment to aid the Treasury is to act as a good citizen. The Government, which sees and admires the efforts of each day, knows that it may count on the co-operation it demands from your patriotism." Notwithstanding the confidence thus expressed, we may doubt that this appeal will have much effect. The "rich" in France have had their fortunes greatly reduced by the war, fear that they are menaced in the future; and, on the whole, are, from political principle, very much indisposed to aid a Republican Government, whilst as to the great bulk of the community it has not the means, even if it had the will, to make advances, especially as it foresees that when the war ends there will be a heavy addition to taxation, and terrible financial and commercial embarrassments. Even if the demand had been certain to obtain a ready response, the making of it is regarded as indiscreet, inasmuch as it is equivalent to a public confession that the Treasury is in sore straits. Nobody of course imagined it to be otherwise; but these are things, which, though whispered by all, had best not be proclaimed from the house tops. Moreover, the apprehension is entertained that the solicitations to pay taxes in advance is preliminary to a decree enacting that they shall be so paid; and, if once that system be commenced, there is no saying where it will stop—Spain and Italy to wit.

The Government of Bordeaux, in virtue of its dictatorship, has seen fit to decree that M. O'Quin, Treasurer-General of the Department of the Basses Pyrénées, shall be sub-governor of the Bank of France, and shall possess all the power which the law of 1806 accords to the Governor: also, that all the attributions of the Board of Directors shall be exercised by such directors and auditors, whatever their number, as may be able to go to Bordeaux. Having thus fashioned the direction of the Bank in its guise, we must wait to see what the Government will require it to do. Is it by chance contemplating making it a machine for an issue of paper money, not on its own, but on the national account? The appointment of M. O'Quin is represented to have taken place because M. Cuvier, one of the sub-governors delegated, "has demanded leave of absence for three months on account of ill-health."

Once again is the legislation on bills modified. A new decree of the Government at Bordeaux enacts: "The falling due (*echeance*) of commercial bills subscribed before the 15th August, 1870, remains prorogued for five months; that of bills subscribed from 15th August to 14th October remains prorogued for three months; nevertheless, if among the latter there are any of which the falling due prorogued for three months, is anterior to the 15th January, they are prorogued to the said 15th January; bills subscribed since the 14th October remain subject to the enactment of the code of commerce."

Other decrees from Bordeaux permit the import free of duty to the end of the war of gunpowder, ammunition, and projectiles, and forbid, from 31st December, any purchase in England of portable arms for the Government of the National Defence, except through the Commission of Armament, presided over by M. Le Cesne. By another decree, the discount on calls paid in advance of the 750,000,000f (Empire) loan is raised from 6 to 8 per cent. on those remaining due, provided they be paid all at once and before the 1st February.

At Paris the tax imposed on the "absent"—that is, people who left the city just before the investment—has created such clamour that the Government has had to modify it in favour of those who are away on the public service, who have left

relations or friends to do duty for them, or who are, like old men and women, "useless mouths." No mention, however, is made of foreign residents, and yet assuredly they are better entitled to exemption from the impost than anyone, for they owed no public duty in Paris beyond payment of taxes, and they left because they were ordered to do so. It seems that numerous difficulties have arisen between landlords and tenants, notwithstanding the decree suspending the payment of the September quarter's rent, and that the courts have been called on to decide many of them. At the last dates it was expected that a decree postponing the payment of the rent of the December quarter would be issued, tenants in Paris not having earned the wherewithal to pay it, and tenants out of Paris not having the means of sending their money in.

Paris advices to the 4th have been received, but the only Bourse quotations contained in them are these:—

	Dec. 30.	Dec. 31.	Jan. 2.
	f c	f c	f c
Threes—cash	51 80	51 65	51 0
End of month	...	...	51 25
New Loan (Empire)—cash	52 80	52 70	52 0
End of month	...	...	52 25
Four-and-a-Half	...	78 0	...
Italian	52 25	53 75	...
South Austrian Lombard Railway	350 0	...	...
Bank of France	...	2350 0	...

No explanation is given of the advance in the Italian, and the probability is that the figures are erroneous.

M. de Lesseps, who has not quitted Paris, has written to newspapers in that city to affirm, in contradiction of reports that were current, that he has no intention of selling the Suez Canal.

Out of evil good comes, and out of her present misfortunes it is not impossible that France may obtain the great advantage of freeing herself from the octroi (municipal) dues on food, fuel, and other articles of absolute necessity—dues which weigh most unjustly on the poorer classes, check both production and consumption, and require a cumbersome and expensive machinery to collect. At Marseilles it is proposed to replace these odious taxes by one on incomes; at Lyons by one on house-rent, graduated according to the amount. Each scheme has strong recommendations of its own, and perhaps there would be no great injustice in applying both. If these two towns should make such reforms, the present system of octroi could not stand. *En attendant*, comes news from Paris that the Government there, "considering existing circumstances, and the increase of charges the town has to support," has decreed that all the octroi taxes of the city, with the exception of those on wines, cider, beer, and meat, shall, during the year 1871, continue to be charged with the extra sum of 10 centimes per franc established in 1848 and 1851.

Some sugar refiners of Havre having been reproached with sending sugar to Dieppe, "where it was morally certain to be sold to the Prussians," write to one of the local newspapers to say that the Prussians have got by payment or otherwise 50,000 tons of sugar, and have consequently no need to buy any at Dieppe; that besides if they did buy, they would, as duty has been paid on the article, be contributing about 50f the 100 kilogs to the French treasury. The refiners add that the enemy in the neighbourhood of Rouen have taken possession of several large refineries, notably those of Etrepagny, Les Andelys, and Auffray. Some weeks back, you may remember, it was stated that they had devoted special care to the *usines* of the Oise, and other northern departments. Why, however, they regard sugar more tenderly than any other product is not explained.

It is stated here that the French military forces have, within the last few days, prevented the carrying of cotton from Dieppe to Havre, which was tolerated or even undertaken by the Prussians in order to let factories be set to work, and men be occupied. The prevention is represented to be necessary under the "inexorable laws of war, which have no regard for private interests;" but surely the French might suspend the operation of such laws when the object is to let their own countrymen earn bread by honest work.

Some of the branches of the Bank of France have commenced paying the dividend of 30f fixed at Paris.

The payment for the 15th inst. of the coupons due on Government stock is announced by several receivers of taxes.

The provincial agencies of the Société Générale of Paris are calling for payment of the fourth instalment of 75f of the Peruvian 6 per Cent. Loan of 1870, and for one of 25f on Turkey railway obligations due from 15th September.

It will be remembered that some time ago an arrangement was made with the Bey of Tunis, chiefly under the direction of the French Government, for the consolidation and payment of loans contracted by him in France and among French, English, and Italian residents in his country. The Ministry of Finance at Bordeaux has just announced that, in virtue of this arrangement, the coupon of January is now being paid, but, strange to say, it does not state where. The announcement principally concerns the bondholders of the 1863 and 1865 loans.

The coupon of 7f 50c of the South of Austria and Lombardy Railways is being paid at Marseilles by the Company of Stock-brokers.

The Lyons and Mediterranean Railway Company informs bondholders that "on account of existing circumstances, the payment of coupons will only take place a week after the deposit of bonds in its offices."

The Company of the Docks and Entrepots of Marseilles is now paying in that city 7f 50c as half a year's interest on bonds.

The Italian Consulates at Marseilles and Lyons announce that "for the time only" they are authorised to *viser* the coupons of Italian stock to be paid at London by Messrs de Rothschild.

Although the commerce of Marseilles has been less injured by the war than that of any other port in France, it has still suffered severely. The Company Marseillaise de Navigation à Vapeur, headed by Messrs Fraissinet, one of the most important of the steam navigation companies of the port, makes known that "the payment of interest on shares due 31st December is postponed to a date to be fixed by the general meeting of shareholders."

A commercial report from Bordeaux says:—"The wine trade, which is the most important one of this town, is suffering greatly at this moment. The markets of Paris and of the Northern and Eastern departments are closed, and the expeditions to Germany, which in ordinary times are considerable, have ceased."

The following return of cotton for all France (including of course the figures of Havre, given last week) has been published, but it is not official, and is probably not perfectly correct:—

	1870.	1869.	1868.
	bales.	bales.	bales.
Imports	582,141	701,035	747,046
Sales	593,794	712,543	725,309
Stock, 31st December	53,890	66,774	80,207

The sales and stock of each year exceed the imports, because each commenced with a quantity in hand.

Business has been resumed in the Havre market, but thus far it has been very unimportant.—

COTTON.—The sales in the week ending Friday were 332 bales, and the imports 469. The closing quotations on that day were fixed by the brokers—New Orleans very ordinary, 104f the 50 kilogs; Oomrawuttee good ordinary, 83f; Tinnevelly ditto, 80f; Madras ditto, 80f. Since Friday 95 bales have been sold.

COFFEE.—500 sacks Hayti, indifferent quality, and 600 Santos, prices not stated; 120 Rio, 95f the 50 kilogs; 100 Hayti, 98f; 1,200 Mysore, 105f 50c.

SUGAR.—Some lots of French West India at the advanced price of 52f and 53f the 50 kilogs for bonne quatrieme; 68f to 73f for usine, and ditto by auction 55f to 70f. 1,300 casks Havana, 38f, No. 12.

HIDES.—580 Buenos Ayres dry ox and cow, 110f the 50 kilogs; 130 Rio Janeiro salted ox, prices not stated.

TALLOW.—100 pipes Monte Video ox, 55f to 57f the 50 kilogs; 20 demi-pipes La Plata sheep, 52f; 140 tons ditto, for delivery, 53f.

At Marseilles the sales for the week ending the 7th were—In coffee, 5,309 sacks Rio, 65f to 70f. In sugar, nothing done, but prices firm.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a despatch from Her Majesty's Minister at Lisbon, enclosing a copy of a decree, dated 27th December, 1870, which has been issued by the Portuguese Government, making certain alterations in the import duty hitherto levied upon the undermentioned articles, these alterations to come into force on the 1st January, 1871:—Sugar, coffee, tea, cotton tissues, silk kerchiefs, butter, rice, cheese, vegetable and other alimentary substances, articles used in the construction and the equipment of vessels, brandy and alcohol, treacle and honey, unwrought marble. This decree, and the schedule of duties attached thereto, may be inspected upon application at the Board of Trade (Commercial Department), Whitehall gardens.

The annual return prepared by Mr Robert Hunt, Keeper of Mining Records, shows that there were in the year 1869 245 ironworks in operation in Great Britain, with 6,243 puddling furnaces; the number of rolling mills returned is 859. This shows two fewer ironworks than in 1868, but 340 more puddling furnaces than in that year, and 28 more rolling mills. In South Staffordshire there were at work in 1869 110 works, 1,700 puddling furnaces, and 382 rolling mills; being an increase of 5 puddling furnaces and 2 rolling mills over the numbers returned in 1868. In North Staffordshire there were at work in 1869 8 works, 414 puddling furnaces, and 46 rolling mills; an increase of 25 puddling furnaces and 8 rolling mills. In Yorkshire 33 works, 1,098 puddling furnaces, and 167 rolling mills; an increase of 115 furnaces and 16 rolling mills. In Durham 19 works, 925 puddling furnaces, and 58 rolling mills; an increase of 199 furnaces and 7 rolling mills. In Glamorganshire 17 works, 555 puddling furnaces, and 88 rolling mills; a decrease of 2 furnaces and 6 mills. In Monmouthshire 12 works, 482 puddling furnaces, and 52 rolling mills; a decrease of 58 furnaces and an increase of 2 rolling mills. In Shropshire 9 works, 208 puddling furnaces, and 39 rolling mills; a decrease of 6 furnaces and 1 rolling mill. In Lancashire 8 works, 170 puddling furnaces, and 36 rolling mills; an increase of 29 furnaces and 3 rolling mills. In Derbyshire 5 works, 91 puddling furnaces, and 18 rolling mills; the same return as

in 1868. In Scotland 14 works, 338 puddling furnaces, and 44 rolling mills; an increase of 29 furnaces and a decrease of 2 rolling mills. Eighteen works in Great Britain have Bessemer converters. The mills and forges at work in Northumberland, Cumberland, Somerset, Brecknock, and North Wales, are fewer than in the districts above named, the return showing none of the five with so many as 100 puddling furnaces at work.

The official returns of the principal imports into Spain in the first half of the year 1870 show a large increase in the quantity of manufactures imported, compared with the quantity in the first half of 1869, the import of woollen manufactures increasing from 179,498 kilos in 1869 to 339,187 kilos in 1870; cottons, from 153,347 kilos to 410,045 kilos; silks, from 18,371 kilos to 34,562 kilos; linens, from 133,225 kilos to 168,993 kilos. The import of cotton yarn increased from 53,603 kilos to 98,040 kilos; linen and hemp, from 2,445,236 kilos to 3,553,591 kilos. The import of raw cotton advanced from 12,374,718 kilos of the value of 16,288,525 pesetas, in the first half of 1869 to 20,638,835 kilos, stated to be of the value of 51,597,087 pesetas, in the first half of 1870. The imports of metals also show an increase; copper, from 883,108 kilos to 1,250,031 kilos; steel, from 316,897 kilos to 647,443 kilos; tin plates, from 663,881 kilos to 851,615 kilos; iron wares, from a value of 2,617,283 pesetas to 4,218,980 pesetas. Machinery shows an increase from a value of 1,330,677 pesetas to 2,175,035 pesetas; coal, from 179,411 tonn of the value of 4,866,533 pesetas to 272,569 tonn, of the value of 10,221,337 pesetas. The import of wheat declined from 127,814,843 kilos to 26,876,449 kilos, and of wheat flour from 37,408,563 kilos to 8,602,957 kilos. Of cod fish from 14,032,468 kilos to 11,649,147 kilos. The import of animals increased from 36,551 to 74,815 in number, or more than double. The import of salt amounted to 20,131,977 kilos, and the import of sugar a little exceeded that quantity. Chemical products imported amounted to 14,343,847 kilos; leather, 3,071,285 kilos. Spirits show an increase to 76,768 hectolitres; coffee and cocoa a decline. The list of imports includes 23 ships, of 8,809 tons of 1,000 kilos, and of the value of 2,420,703 pesetas. The total value of principal articles imported in the first half of the year was 161,147,250 pesetas in 1869, and 165,360,053 pesetas in 1870; the import of wheat stands for nearly 60,000,000 pesetas less in 1870 than in 1869.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the first week of January, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	1st week Jan., 1871.	Corresp'nding Total in 1870.
West district	5,934	9,020	6,094	21,648	23,640
North district	6,996	13,626	11,255	31,550	29 288
Central district	6,905	8,196	6,847	21,948	22,229
East district	7,690	11,513	10,488	29,691	31,909
South district	9,258	18,764	17,517	45,539	47,406
Total of the Metropolis	36,456	61,119	52,801	150,376	154,472

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,802,000.

Number of Paupers.	Indoor.	Outdoor.	Total.
First week of January, 1871	36,456	113.920	150,376
— — 1870	36,950	117,522	154,472
— — 1869	36,804	108,502	145,306
— — 1868	37,119	118,224	155,343

Vagrants relieved in the Metropolis on the last day of the first week of Jan., 1871.

Men.	Women.	Children under 16.	Total.
774	195	60	1,029

The total shipments of wines from Oporto for the past year was 42,696 pipes, of which 31,654 were taken by Great Britain and the colonies. The corresponding totals for the year 1869 were 40,833 pipes and 29,070 pipes. The principal shippers were:—Sandeman and Co., 3,781; Cockburn and Co., 3,022; Martinez and Co., 2,173; Offley and Co., 2,027; Graham and Co., 1,905; R. J. T. de Carvalho, 1,891; Silva and Cosens, 1,557; Hooper Brothers, 1,555; A. F. Meneres, 1,516; Clode and Baker, 1,450; Executors Baron de Seixo, 1,329; D. M. Feuerheerd, jun., and Co., 1,278; Dow and Co., 1,040.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during December, 1870:—

IMPORTS.

By Sea.	Ships.	Tons.
Newcastle	2,630	1,512,073
Seaham	410	197.793
Sunderland	1,490	769,243
Middlesborough	168	73,830
Hartlepool	1,233	409,754
Blyth	9	3,562
Scotch	122	39,002
Welsh	85	25,937
Yorkshire	295	40,966
Liverpool	4	802
Small coal	21	3,432
Cinders	70	6,962
Culm	2	444
Total	6,539	2,993,710
Imports during year '69	6,624	2,873,688

By Railway and Canal.	Tons.	cwt.
London and North-Western	835.231	6
Great Northern	978,049	0
Great Western	470.852	13
Midland	923,660	0
Great Eastern	507,344	9
South-Western	27,560	7
London, Chatham, and Dover	4,572	1
London, Tilbury, & Southend	262	0
South-Eastern	10,482	2
London, Brighton, and South Coast	25	14
Grand Junction Canal	7,301	12
River Lea	...	
Total	3,765,391	4
Imports during year 1869	3,348,527	5

COMPARATIVE STATEMENT, 1869 and 1870.

	Ships.	Tons.
By Sea.—Jan. 1 to Dec. 31, 1870	6,539	2,993.710
— — 31, 1869	6,624	2,873,688
Decrease in the present year	85	Inc... 120,022

	Tons.	cwt.
By Railway and Canal.—Jan. 1 to Dec. 31, 1870	3.765.391	4

Increase in the present year	416,863	19

Export list, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during December, 1870:—

EXPORTS.

1. Railway-borne coal passing "in transitu" through district	tons	455,723
2. Sea-borne coal exported to British Possessions, or to foreign parts, or to the coast	tons 413.664	
Ditto sent beyond limits by railway	110.682	
Ditto by canal and inland navigation	39.429	
		563,775
3. Railway-borne coal exported to British Possessions, or to foreign parts, or to the coast	151,454	
Ditto by rail beyond district	246	
Ditto by canal and inland navigation	2,052	
		153,752
4. Sea-borne coal brought into port and exported in same ship		6,180
Total quantity of coal conveyed beyond limits of coal duty district during 1870		1,179,438
Ditto, 1869		1,088,540

Crystal Palace—Return of admissions for six days ending Friday, Jan 6th, 1871:—Number admitted, including season ticket holders, 36,037

The total export of sherry from Cadiz for 1870 appears to have been 70,961 butts, against 74,152 in 1869. The principal exporters were:—From Jerez—Gonsalez, Byass, and Co., 5,550 butts; M. Misa, 5,079; P. Garvey, 4,157; F. W. Cosens and Co., 3,267; M'Kenzie and Co., 2,766; P. Domecq, 2,643; J. Haurie Nephews, 2,034; Wisdom and Warter, 1,932; Stenacker Brothers, 1,741; Julian Pemartin, 1,527; B. Vergara, 1,453; Matthieson, Furlong, and Co., 1,378; R. C. Ivison, 1,340; Adolfo Capdepon, 1,030; Ysasi and Co., 1,005; R. Davies, 1,002. From Port St Mary—Duff, Gordon, and Co., 2,812; Widow Harmony and Co., 2,636; F. W. Cosens and Co., 2,166; M. and F. Tozar, 1,830; M. Moreno de Mora, 1,518; C. S. Campbell and Co 1,269; and J. C. Burdon, 1,168.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 11th day of January, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,446,980	Government Debt	11,015,100
		Other Securities	3,984,900

Thursday	12,627,000	10,301,000	14,950,000
Friday	13,026,000	23,030,000	12,696,000
Saturday	11,916,000	15,520,000	13,098,000
Monday	10,888,000	15,719,000	10,419,000
Tuesday	11,730,000	13,288,000	11,896,000
Wednesday	11,291,000	15,183,000	9,740,000
Total	71,478,000	93,041,000	72,799,000

JOHN C. POCOCK, Deputy-Inspector.

Bankers' Clearing-house, Jan. 12, 1870.

The total since the 1st of January, 1871, is 164,519,000*l*, compared with 165,840,000*l* for the corresponding period last year, showing a decrease of 1,321,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week.	Jan. 16, 1861.	Jan. 15, 1868.	Jan. 13, 1869.	Jan. 12, 1870.	Jan. 11, 1871.
Circulation, including bank post bills.....	£ 21,089,206	£ 25,005,461	£ 24,625,229	£ 24,092,928	£ 24,759,007

In 1861, the general causes operating on the market and producing dear money were still, as they had been for some weeks, a drain of gold to France, and the secession of the Southern half of the United States causing a great monetary disturbance and a drain of gold to America. The latter difficulty at this date still appeared to be increasing; but for the moment there was an actual abundance of money in the market at the high rate.

In 1868, there was still little appearance of a change from the depression which followed 1866.

In 1869, the usual ease in the money market after the payment of the dividends prevailed.

In 1870, the money market was easy. The probable effect of the large collection of the revenue in the quarter of the year which had commenced, under Mr Lowe's new arrangements, was being discussed. A new commercial treaty with China, negotiated by Sir Rutherford Alcock, had excited great discontent among merchants, and Government was strongly memorialised not to sanction it.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 6,689,622*l*; in 1868, an excess of 5,603,614*l*; in 1869, an excess of 3,410,892*l*; and in 1870, an excess of 1,830,458*l*. In 1870, there is an excess of 6,125,315*l*.

Discount and Money Market.—The money market is a good deal easier this week, and on all sides there are complaints of the difficulty of employing money. Both in the banks and at the bill brokers there is an unprecedented accumulation with little inquiry or demand; and as we anticipated last week, there are already signs that even while the suspense continues, attempts will be made to take advantage of the public impatience of the present low rates. One or two new calls for money are announced this week, and it is understood that there are more to follow. The rate for short Bank bills is now quoted 2⅛ to 2¼; but the best paper is readily taken at the lower figure, and the price tends downwards, as it becomes daily more difficult to employ the present accumulation. The military news of the week has had comparatively little impression on the money market, there being great uncertainty as to the *time* when Paris will have to capitulate and peace become a certainty, even if no new effort for relief should ever be possible to the defeated French armies. Meantime the suspense and the abundance of money are quite sufficient to account for the present low rates.

We subjoin our usual quotations for mercantile paper having various periods to run :—

2 to 3 months Bank bills	2⅛ 2¼	per cent.
4 — —	2¼	per cent.
6 — —	2⅜ 3	per cent.
2 to 3 months Trade bills	2¼ 2½	per cent.
4 — —	2½	per cent.
6 — —	3 3½	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call.....	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1½ per cent.
Do fourteen days	1½ per cent.

This week an announcement has been made by several of the principal bill brokers, who had till now allowed 2 per cent. for money on 10 to 14 day's notice, that they will in future allow only the current rate of 1½ per cent.

The discount quotations current in the chief continental cities are as follows :—

Vienna	5½ 6	per cent.
Berlin.....	4½ 5	per cent.
Frankfort	3	per cent.
Amsterdam	3¾ 4	per cent.
Hamburg	4½	per cent.
St Petersburg	7 8	per cent.

English Government Stocks.—There has not yet been much dealing in the stock markets since the commencement of the year; but, as we anticipated, the abundance of money and the continuance of the suspense about the war have helped to strengthen prices. In almost all the departments this week there has been a material improvement, notwithstanding the small amount of business done. This upward tendency has also been promoted by the news of General Chanzy's defeat at Le Mans, which is perhaps the most disastrous sustained by the French since Sedan in its immediate results, the prospect of raising the siege of Paris being indefinitely adjourned, while there is apparently little likelihood of Paris holding out, or of the siege being raised from within. The favourable traffic returns of the English home railways and hopeful reports of the dividends, coupled with the excellent dividends of the joint stock banks and other companies, have also contributed to improve the general tone of the markets.

In English Government securities the advance was steady from the closing point of last week. Consols, which were at 92⅛ ¼ for the account, advanced on Wednesday to 92⅛ ⅝, and remained strong on Thursday at that figure. To-day they have been at 91⅝ ¾, and they finally close firm at 91⅛ ⅝. New and Reduced, with a quarter's dividend accrued, are at 92⅝ ¾.

It is quite likely that in the present circumstances Consols will rise a little higher, the abundance of money, and the continuance of the suspense, if not the prospects of peace, coupled with a slight preponderance of purchases by the Government broker and others, all tending to support the market. The fear that a new element might be introduced by a real French success has also been removed by the defeat of General Chanzy, though it remains to be seen whether fresh hope will be given to France by a rally similar to the one which followed the collapse at Orleans.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March.	June.
Saturday	92	92¼	92⅛	92¼	10s pm	15s pm
Monday	92⅛	92¼	92⅛	92⅜	10s pm	15s pm
Tuesday.....	92¼	92⅛	92⅛	92⅛	10s pm	14s pm
Wednesday	92⅜	92½	92¼	92½	10s pm	14s pm
Thursday	92⅜	92⅜	92¼	92⅜	10s pm	14s pm
Friday	92⅛	92¼	92⅛	92⅜	10s pm	15s pm

Foreign Government Stocks.—We note below the changes which have taken place here, but it will be understood that the general remark we have made as to the absence of business on the Stock Exchange applies more especially to foreign stocks. Speculation has been paralysed by the long-continued suspense; and although the news of General Chanzy's defeat has assisted in making prices better, there is some disposition to wait for fuller accounts of the events of the week. Very much will depend on the greater or less completeness of the French General's losses, the length to which the victorious Germans can follow him, and the interval which will probably elapse before he can return to the charge. In the absence of any special causes affecting particular securities, a rather exciting event—which has also affected the market for foreign railway shares and obligations—has been the action of the Stock Exchange Committee upon the new Stamp Act. They have discovered that under that Act, which was supposed to be merely a consolidation statute, certain foreign securities, which were formerly exempt, will now be charged with a duty of 2s 6d per cent. The old law was that securities *bona fide* issued abroad, and with the interest payable there, were not

affected with duty, although negotiated in this country; but this exemption is omitted in the new Act, and such securities, if issued subsequent to the 3rd of June, 1862, cannot now be negotiated in this country without a stamp. The Stock Exchange Committee accordingly directed that foreign bonds, subsequent to 3rd June, 1862, were not to be accepted in settlement of bargains made after a certain date, if unstamped. Hence there has been no little confusion and perplexity. The difference of $\frac{1}{8}$ is obviously a very important matter in many dealings; while the confusion is increased by the uncertainty as to the new rule itself. As at first drawn up it was to apply to all bargains made after the 9th inst.; then the 10th inst. was substituted; then, we believe, a later date was mentioned, till it is hardly known what the rule is; while there are grave objections to its form—the contention being that the Committee should only have given a direction as to whether the buyer or seller before a certain date should pay the stamp, and not have attempted to override the law by compelling the completion of dealings in unstamped and consequently illegal bonds. The original cause of confusion however is undoubtedly the blunder of some Government official in doing the mechanical work of consolidation, and it is a very serious one. The Government could not have been more deeply pledged than they were not to make any changes in the law other than one or two which were specified, and this change, which was not popularly known, is most mischievous. We discuss the subject in its various aspects elsewhere; but there can be no doubt a great mistake has been made. To-day the firm tendency of the markets throughout the week has been maintained, Spanish, Egyptian, and Turkish being all a little better.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Argentine 6 %	90⅝ 1½ xd	91½ ¾	+ ⅛

It is stated that Spanish 3 per Cents. have risen in Madrid to a price which would be equal to 31⅜ ex div. in London.

The French loan was on Monday at 2¾ dis., but subsequently improved a little, in sympathy with the general improvement in the market. The fall was connected with the report of another appeal for money on the part of the Government of the National Defence, which has not been confirmed—a German telegram from Versailles also affirming that the French Government has failed in its recent efforts to negotiate a loan. There is no doubt that some time ago the French Government was endeavouring to find money, but we have not heard of any recent efforts. The temptation to carry on anyhow in the hope of a great victory has been so great that possibly a good opportunity has been missed. The way in which the war has been conducted hitherto with so little borrowing will afterwards form a curious chapter in finance. France has in fact supported with little borrowing a very large part of the expense of *two* immense armies—the German as well as its own; and the Germans have borrowed little because they have lived upon France.

It is now stated that the remaining half of the war credit of 100,000,000 thalers, lately authorised by the North German Confederation, will shortly be issued. It has however been taken at a higher rate, in consequence of the favour with which the last issue was received in Germany—the loan having been at 2¾ pm.

English Railway Stocks.—As we have stated, this has been the most active department during the week. Now that the traffic returns of the half-year can be looked at as a whole the impression produced is most favourable, and there are sanguine reports as to coming dividends. The greatest advance for the week, as will be seen from our usual table of weekly changes, is in Great Eastern, on the rumour, which seems to have good warrant from the published accounts of the company, that the dividend will be 2 per cent. London and Brighton have also improved on the expectation of a 1½ per cent. dividend. Manchester and Sheffield have been good on the announcement of a dividend of 2½ per cent., which is the same as at this date last year, being rather better than was expected after the recent accident, which it is feared may not have been sufficiently allowed for in the last half-year's accounts. A marked advance has also taken place in North-Eastern, which, in spite of the great advance that has already occurred, will almost certainly pay the investor better than other leading railway stock at existing prices. The market however has been influenced by reports of 8½ per cent., or even a higher rate, as the probable dividend, which would make the present discrepancy between the dividend paid and the price of the stocks still greater. Almost the only chance against good dividends appears to be an unexpected increase of working expenses, and much disappointment will undoubtedly be occasioned if directors prove not to have been so careful as shareholders and speculators calculate. To-day the firmness which has been manifest throughout the week continued, and prices close firm. Under the combined influences of good trade, improving traffic returns, and abundance of money, whether peace comes soon or not, there is no doubt but what railway property is likely for some time to stand very high.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	87½ ½	88 ¼	+ ¾
Great Eastern	39¼ ½	41½ ⅜	+ 2
Great Northern	125 26	124½ 5½	— ½
Ditto A	135¾ 6¼	136 7	+ ¼
Great Western	72 ¼	72⅝ 3¼	+ ¾
Lancashire and Yorkshire	134½ 5	135 ½	+ ¼
London and Brighton	41⅜ ⅝	42⅜ ⅝	... ...
London, Chatham, and Dover	14¼ ⅜	13⅞ 14½	— ½

North-Eastern—Consols	145⅝ 6	147½ ⅝	+ 1½
South-Eastern	76½ ½	76⅝ ⅝	— ⅛
Ditto Preferred	111 12	111 12	... ...
Ditto Deferred	40⅜ 1½	40 ½	— ⅜

The traffic receipts on eighteen railways in the United Kingdom, of which a list is subjoined (including the principal railways), for the week ending January 7, amounted to 636,396*l*, being an increase of 15,197*l* on the corresponding week of the previous year. This being the first week of a new half-year in the case of a majority of the companies, while there are others which do not close their accounts till the end of January, the total aggregate receipt cannot be stated. The table shows the increase or decrease in each case. The improvement for the week is very small, and a larger number of companies than has been the case for some time show a decrease; but the difference arises from the new year's holidays, and a week or two must elapse before it is seen whether there is to be any falling off this year in the rate of increase of the traffic.

* The companies thus marked do not close their accounts till the end of January, and the aggregate is computed from the 1st of August, 1870.

Subscriptions are invited for 150,000*l* in 15,000 deferred shares of 10*l* each of the Bedford and Northampton Railway, being the balance of 20,000 deferred shares of the Company, of which 5,000 have been taken up by applicants for the preferred shares of the company. Interest at 5 per cent per annum is guaranteed by the contractors during construction, and for five years thereafter by the deposit of 65,000*l* in Consols in the name of trustees, whose certificate to that effect is contained in the prospectus. The Midland Company is to stock and work the line for 50 per cent. of the gross receipts, and it is calculated that, with a receipt of 50*l* per mile per week, which is confidently reckoned on, the Company will have a net receipt of 26,000*l* per annum, which will be sufficient to pay all preferences charges, and 5 per cent. upon the deferred shares. During the period of five years the Midland Company will have the option of leasing the line, on payment of a perpetual dividend of 5 per cent. to the deferred shareholders. The shares are issued in 1,500 certificates of ten shares each, equal to 100*l* stock, at the price of 82*l* 10s, at which rate the yield to the investor, at the price of subscription, is 6*l* 3s per annum. The quotation to-day is 2¼ ¾ prem.

Foreign and Colonial Railways.—In the foreign department, attention has been chiefly given to the effect of the change in the Stamp Act, which we notice at length in connection with foreign Government securities. As a practical question, the change is even more important as respects foreign railway shares and obligations than the securities of foreign Governments, with the exception of American. There are several foreign issues of railway companies and Governments which are largely dealt in, and the change is most perplexing. In the meantime, as we have stated, it will be disregarded by common consent until some official announcement is made. We subjoin our usual list of the changes in this department, which call for no special remark:—

There has been additional correspondence this week respecting the Roumanian State railway obligations, but the matter is still in the position we explained last week.

American Securities.—The following shows the changes for the week in the most important stocks of this department:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 %, 5-20 Bonds, exchng. 4/6	89¾ ½	.....	90¼ ¾	+	¼
Ditto 1867 Issue	89¼ ¼	.....	89½ ¾	+	¼
Ditto 1867 Is ue	88¾ ¼	.....	88¾ ½	+	¼

Virginia 6 %, Bonds	56 7	.....	56 7	...	...
Ditto 6 %, Sterling Bonds	55 8	.....	55 8	...	...

Generally the market for American securities has been good this week, the circumstances of the market favouring investment, and the safety of America from European complications being a special temptation. Illinois shares have specially improved, on the announcement of a gold dividend of 5 per cent. for the half-year. This is another of the departments in which the change in the Stamp Act respecting foreign securities has had a michievous effect.

Subscriptions are invited by Messrs Clews, Habicht, and Co., for 1,000,000 dollars 7 per cent. bonds to bearer of the State of Georgia, of 1,000 dollars each bond, the interest payable in gold quarterly and the capital at par on the 1st of October, 1890. The prospectus states that the price of issue here will be 175*l* 10s sterling each bond, and the principal and interest will be payable either in America, or Frankfort, or in London at the office of Messrs Clews, Habicht, and Co. It is stated that the surplus revenues of the State of Georgia for 1869 amounted to 471,461 dollars, after paying all Government expenditure and interest on State debt; while the gross revenue of 1870 is estimated at 1,345,000 dollars, and the expenditure at 490,000 dollars. It is stated to be the intention to apply the proceeds of this issue to pay off the existing debt, so that the indebtedness of the State will not be increased.

Joint Stock Banks.—Owing to the generally favourable dividends declared for the past half-year there has been an increased demand for joint-stock bank shares for investment, and the tendency of prices has been in favour of sellers. Speculation in this department is still very limited. The principal changes are a rise of ½ in Alliance, Anglo-Egyptian, and Oriental. Standard of British South Africa shares have improved 1, and English Bank of Rio ¼; but London and Westminster shares have declined ½ on the week.

Mr Andrew Cassels (late partner of Messrs John Peel and Co., Manchester, and of Messrs Peel, Cassels, and Co., Bombay) has joined the board of the Chartered Bank of India, Australia, and China, in the place of Mr John Allan, who has resigned on account of ill-health.

Telegraph Shares.—The dealings in this market are still restricted within very moderate limits, nevertheless an important tone has been apparent throughout the week. Anglo-American shares have advanced 2; British Indian Extension, Great Northern, China, &c., Extension, and Marseilles and Algiers ¼. On the other hand, Anglo-Mediterranean shares have declined 1, and French Cables ⅛.

Mines.—In this department there has been little doing; still the firmness which prevails in the metal market has given a further stimulus to the quotations. Most of the movements have been upwards. Devon Great Consols and New Seton shares have advanced 5; East Lovell, 2½; South Wheal Frances and Tin Croft, 1; Great Wheal Vor, ½; Penrhyn and Prince of Wales, ⅛. West Chiverton however have declined 2. In the quotations for foreign mining shares there is no change worthy of notice.

Miscellaneous.—The changes in this department have not been numerous, but generally favourable. There has been some demand for Anglo-Austrian Bondholders' Committee's Certificates, which have improved 1½; Crystal Palace stock is 1 better; while Fore Street Warehouse shares have advanced ½; Hudson's Bay ½, and Royal Mail Steam 1. Telegraph Construction shares show a decline of ¼, and Italian Irrigation 6 per Cent. Bonds of 1 on the week.

Exchanges.—The rates on Hamburg are rather lower, otherwise there is no change worthy of remark.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—We have no arrivals to report this week, and as the demand for abroad still exists, withdrawals have taken place from the Bank to the extent of about 138,000*l*. These will probably continue, as we do not look for gold to any extent until about the 29th instant, when the overland mail is due with 550,000*l* on English account. The Ceylon has taken 50,240*l* in sovereigns to Alexandria, and the Celt 5,000*l* to St Helena.

Silver continues in good demand for the continent, but prices remain without alteration as the amounts to hand to be dealt with are but small. The Russia has brought 9,000*l* from New York, and the Massilia 55,960*l* from India.

Mexican dollars.—The Ceylon has taken 21,710*l* to China. The demand for that quarter is, however, exceptional, and arrivals are taken for refining purposes.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11¼d to 1s 11⅜d on all three presidencies.

India Government loan notes show no alteration from our last quotations, prices being 89½ to 90½ for the 4 per Cents; 98½ to 99½ for the 5 per Cents; and 105½ to 106½ for the 5½ per Cents.

PUBLIC COMPANIES.

STOCKS.

Buenos Ayres 3 per Cent. Loan.—Bonds, representing 17,800*l*, have been purchased and cancelled.

Buenos Ayres 6 per Cent. Loan.—Bonds, representing 6,300*l*, have been purchased and cancelled.

Chilian 6 per Cent., 1867.—The fourth drawing has taken place, and the numbers of 151 bonds, representing 47,600*l*, have been published.

Danubian 7 per Cent. Loan 1864.—153 bonds, representing 25,700*l*, have been drawn for redemption on the 1st March.

Georgia (United States) 7 per Cent. Bonds.—An issue of $1,000,000 in $1,000 bonds, bearing 7 per cent. interest, payable quarterly, on 1st April, 1st July, 1st October, and 1st January, has been brought out here through the agency of Messrs Clews, Habicht, and Co. The interest is payable in New York in gold, or in London at the current rate of exchange. The issue price is 175*l* 10s per $1,000 bond (78 per cent. at 4s 6d per $), and the principal is repayable at par (say 4s 2d per $) on the 1st October, 1890. The surplus revenue of Georgia is stated in 1869 to have amounted to $471,461; and as "it is intended that the proceeds of this issue shall be applied in payment of the existing debt," the present issue "will not materially increase" its amount.

Montevidean 6 per Cent., 1864.—Messrs Maua and Co. state that they are prepared to purchase bonds to the amount of 28,492*l* at the market price on the 17th instant, on account of the 1 per cent. accumulative sinking fund.

New Granada Bonds.—Messrs Baring Brothers announce that 3,580*l* has been set apart for the redemption of the New Granada foreign debt, of which 2,386*l* is for the Active and 1,193*l* for the Deferred, and that tenders for the redemption will be received until the 26th inst.

RAILWAY COMPANIES.

Alabama and Chattanooga Bonds.—The State of Alabama will at once appoint a receiver for the defaulting company, and "will take possession and complete the road, assuming the bonded indebtedness."

Buenos Ayres—Great Southern.—The final call of 2*l* per share upon the Salado Extension capital is payable on the 17th March.

Illinois Central.—A gold dividend of 5 per cent. for the half-year has been announced by the agents, Messrs Robt. Benson and Co.

London, Brighton, and South Coast.—The half-yearly meeting is called for the 1st February.

Madras.—The North-West line has received an addition of 75 miles by the opening of the line to Cossapoor on the Toongabudra river.

Manchester, Sheffield, and Lincolnshire.—A dividend of 2½ per cent. is announced for last half-year.

Panama Railroad.—A dividend of 3 per cent. for the half-year is announced.

Porto Alegre (Brazilian) Railway.—Owing to a "slight technical informality in connection with the Brazilian law" which has appeared in the prospectus, deposits will be returned at

once, and the capital is to be offered again in the course of a few days.

Roumanian Railway Bonds.—It is stated that the funds for the payment of the January coupons will be ready in March.

Victoria Station and Pimlico.—The usual 9 per cent. per annum dividend is announced for the half-year. The claim against the Chatham and Dover Company has been settled by the award.

BANKS.

Bank of Liverpool.—Dividend declared at the rate of 10 per cent. per annum.

City.—A dividend has been announced at the rate of 7 per cent. per annum, free of income tax.

Commercial Bank of Liverpool.—Dividend announced at the rate of 10 per cent. per annum.

Consolidated, Limited.—The directors recommend a dividend at the rate of 7 per cent. per annum out of the net profits for the half-year of 31,667*l*. The reserve fund will be increased to 55,000*l*, and 5,537*l* will be carried forward.

London and Brazilian.—A net profit for the half-year is shown of 18,769*l*, which, added to the 3,219*l* brought forward, makes a total of 21,988*l*. This, however, includes 7,424*l*, representing interest on the capital locked up at Rio, and the directors have determined to carry any future interest to the credit of "interest in suspense."

Midland Banking Company.—The balance-sheet shows a gross profit of 32,992*l* for last half-year, and after paying expenses, &c., a dividend at the rate of 6 per cent. per annum is recommended—6,000*l* being appropriated to the purchase of a business account, and 3,309*l* carried forward.

North and South Wales.—A dividend at the rate of 10 per cent. per annum and a bonus of 5s per share, both free of tax, have been announced.

Nottingham Joint Stock.—Year's net profits 8,665*l*, including 644*l* brought forward. A dividend of 5 per cent. is declared; 4,000*l* is added to reserve (thus raised to 14,000*l*), and 710*l* is carried forward.

Union Bank of Australia.—Half-year's net profit 79,329*l*, inclusive of the sum of 3,714, brought into the account. A dividend of 30s per share, or at the rate of 12 per cent. per annum, was declared, free of income tax, absorbing 75,000*l*. Mercantile affairs continue dull.

Union Bank of London.—The adopted report stated the half-year's net profits, after payment of all charges (including the sum of 73,462*l* for interest to customers, and making provision for all debts were, 115,888*l*, which, with 4,237*l* brought forward from 30th June last, amounted to 120,125*l*. The directors declared a dividend for the last six months at the rate of 15 per cent. per annum, clear of income tax. After payment of the dividend, amounting to 90,000*l*, there remained an unappropriated balance of 30,125*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

English and Foreign Credit.—A half-year's dividend at the rate of 6½ per cent. per annum absorbs 2,999*l*, leaving 1,155*l* to suspense, and 41*l* as balance.

International Financial Society.—The net profits for 1870 amounted to 42,778*l*, out of which a dividend is recommended of 5 per cent., free of income tax, of which 2½ per cent. was paid *ad interim* last July. The surplus will be 5,278*l*.

ASSURANCE COMPANIES.

British and Foreign Marine.—A half-year's dividend of 4s per share, together with a bonus of 6s per share, both free of income tax, is notified by the directors, making, with the 4s per share paid in July, 17½ per cent. for 1870. 35,000*l* is carried to reserve.

Imperial Fire Office.—A dividend of 7*l* per share has been declared, making with the 4*l* in July, 5*l* per share for the year.

Lancashire Insurance.—A dividend has been declared at the rate of 10 per cent. per annum, together with a bonus of 1s per share.

London and Provincial Marine.—A half-year's distribution, at the rate of 10 per cent. per annum, has been resolved upon, and 15,000*l* is to be added to reserve—then 60,000*l*.

Ocean Marine.—The board announce the payment of a dividend of 5s per share and a bonus of 20s per share, making, with the 5s paid last July, 50 per cent. for the year. The reserve will at the same time be raised to 90,000*l* by the addition of 15,000*l*.

Thames and Mersey Marine.—A dividend of 2s per share, equal to 10 per cent. per annum, is declared for the half-year ending 31st December last.

Union Marine.—The directors will recommend a payment of 10s per share, making, with the interim dividend of July last, a distribution at the rate of 15 per cent. for the year. Also they will further propose an addition of 20,000*l* to the reserve fund.

MISCELLANEOUS COMPANIES.

Bangpawah Tea Estates of Assam, Limited.—The liquidators request creditors to send in particulars of claims by the 20th February.

Colonial Company.—An interim dividend at the rate of 5 per cent. per annum was declared payable on the 19th instant.

Cornish Granite, Limited.—Mr James Thomas Snell has been appointed official liquidator, and creditors are required to send in particulars of claims by the 13th February, the 24th of that month being appointed for the adjudication.

Fore Street Warehouse.—The half-year's report states:—

The net profits of the business during that period, after payment of interest, income tax, and every other expense, amounted to 46,229*l*, which, with the balance brought from 30th June, 15,381*l*, make a total of 61,611*l*, which it is recommended shall be appropriated as under:—To the payment of a dividend (free of income tax) at the rate of 12½ per cent. per annum on the paid-up capital, 24,250*l*; to the payment of a bonus (free of income tax) of 3s 9d per share, making, with the dividend, a total payment of 20s per share, 5,750*l*; interest at the rate of 5 per cent. per annum on capital paid in anticipation of calls, 70*l*; to an addition of 6s 8d per share to the sum of 13*l* already paid-up on each share, making a total paid-up capital of 400,000*l* in 30,000 shares of 13*l* 6s 8d each, 10,000*l*; to carry towards the formation of a reserve fund, 10,000*l*; to carry forward to next account, 11,541*l*. The foregoing figures cannot fail to be highly satisfactory to the shareholders. They show that, with the profits of the previous half-year (36,600*l*) the total net profits of the company during 1870 have reached the sum of 82,830*l*. The extinction of the goodwill has enabled the directors to recommend the payment of what they hope may be a permanently higher rate of dividend.

London and St Katharine's Docks.—The directors recommend to the meeting on the 26th instant a dividend of 1½ per cent., free of income tax, for the half-year; carrying to the reserve fund the sum of 15,695*l* 2s 3d. The dividend for the corresponding half-year of 1869 was 1¼ per cent.

London, Belgium, Brazil, and River Plate Royal Mail Steam Ship, Limited.—Creditors are required to send in particulars of claims by the 17th April, the 27th April being appointed for adjudicating upon them.

Westminster Brewery.—A dividend has been declared at the rate of 5 per cent.

MINING COMPANIES.

Mining Company of Ireland.—At the half-yearly meeting no dividend has been declared.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

In addition to the three packets now conveying mails direct to Lisbon every month from ports in the United Kingdom, arrangements have been made with the Liverpool, Brazil, and River Plate Steam Navigation Company for their packets leaving Liverpool on the 2nd and 20th of each month also to call at Lisbon, for the purpose of landing mails, during the present interrupted state of the route through France. There will thus be five opportunities in each month for sending correspondence for Portugal direct by packet, viz.:—On the 2nd, from Liverpool; on the 9th, from Southampton; on the 13th, from Liverpool; on the 20th, from Liverpool; on the 29th, from Liverpool. Letters, &c., for Portugal, posted in or reaching London on the 8th or on the morning of the 9th of the month, or reaching Liverpool on the days above stated, or (in each case) on the previous day, will, as a rule, be forwarded by the direct packet; on all other days they will be sent by the ordinary land route, via France.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Jan. 7, 1871:—

	Quantities Sold.		Average Price.
	qrs	bush	s d
Wheat.....	49,799	0	52 6
Barley	49,751	4	34 11
Oats	4096	6	23 0

THE AVERAGE PRICE OF CORN, per quarter (Imperial measure), in England and Wales, for the quarter ended Christmas, 1870:—

Wheat.	Barley.	Oats.
50s 1d	36s 1d	23s 0d

RETURN, stating what has been, during seven years ending on the Thursday next before Christmas Day, 1870, the average price of an Imperial bushel of British wheat, barley, and oats, computed from the weekly averages of corn returns. Published pursuant to an Act, passed in the 6th and 7th years of the reign of King William the Fourth, intituled "An Act for the Commutation of Tithes in England and Wales":—

Wheat.	Barley.	Oats.
6s 4d	4s 6¼d	3s 0¼d

TITHE COMMUTATION.

Each 100*l* of Tithe rent-charge will, for the year 1871, amount to 104*l* 15s 1d, or nearly ¾ per cent. more than last year. The following shows the worth of 100*l* Tithe rent-charge for the last seven years:—

	£ s d
For the year 1865	98 15 10½
— 1866	97 7 9¼
— 1867	98 13 3
— 1868	100 13 8
— 1869	103 5 8½
— 1870	104 1 0½
— 1871	104 15 1

The average value of 100*l* Tithe rent-charge for the 35 years elapsed since the passing of the Tithe Commutation Act is 101*l* 1s 7¾d.

CORN IMPORTED AND EXPORTED.

The following is an account showing the quantities of the several kinds of Corn and Meal imported into each division of the United Kingdom; and the quantities of British and foreign Corn and Meal, of the same kinds, exported from the United Kingdom, in the week ended Jan. 7, 1871:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The wheat trade ruled quiet to-day, but, owing to the frozen condition of the roads, considerable firmness prevailed in regard to prices. Supplies were short, and the business transacted was very limited. Oats were the turn dearer, but no change took place in the value of barley, beans, or peas. The flour trade was inanimate, but the quotations were unaltered for all descriptions. The demand for barrel flour on French account continues. This week's imports of foreign and colonial produce into London have amounted to 15,210 quarters of wheat, 9,550 barley, 11,660 oats, 14,310 maize, 1,340 beans, and 11,380 barrels of flour.

At Liverpool the wheat trade ruled firm, and sales were effected on rather higher terms; but the Wakefield ruled dull at drooping currencies.

The Liverpool cotton market has been quiet throughout the week, and prices have receded about ⅛d per lb. The total sales are 79,340 bales, of which the trade have taken 64,690 bales, speculators and exporters 14,650 bales. The imports for the week are 99,340 bales, the actual exports 5,393 bales, and to-day's stock is estimated at 550,090 bales. Quotations for American descriptions have declined ⅛d per per lb., East Indian $\frac{1}{16}$d to ⅛d per lb, and Bengals remain unchanged since last Friday. To-day the market closes rather firmer. Sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended January 12, 1871:—

	Imported.		Exported.
American.....bales	70,262	.....	4,212
Brazilian	5,921	.....	126
East Indian	9,310	.....	3,839
Egyptian	15,118	.....	17
Miscellaneous	5,009	.....	50
Total.....	105,620	.....	8,244

At New York, on January 12, middling Upland cotton was quoted at 15¼c per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Dec. 17:—The past week has been rather an unsatisfactory one in this cotton market owing to the tardy manner in which home telegrams have been coming forward, and a restless feeling of uncertainty has prevailed regarding European politics which rendered business transactions the reverse of pleasant in negotiating. Our latest message from London is dated 14th instant, and quotes fair Dhollerah at 6¾d per lb. On the greem a somewhat restricted business has been done at very variable rates, generally a trifle lower than the relative range of those quoted in our last circular. The selections have been notably subject to variations in quality, and for a moderate parcel the exception has been to find a run sufficiently even to allow of its being passed without the seller submitting to some abatement from the price originally agreed upon. Sawginned Dharwar attracted the greatest share of attention at an average of 210 rs per candy for ready cotton, and 15 to 20 days' delivery. Trieste and one or two others of the Mediterranean ports would appear to be the contemplated destination of the bulk of the purchases recorded. In Veerumgaum and Ahmedabad descriptions a moderate amount of business has been done at prices varying from 178 rs to 194 rs according to quality. We are unable to advise any improvement in the inquiry for new cotton. European and native merchants generally continue to view present quotations with distrust, while the un-country shroffs, who have speculated in or advanced upon the growing staple, do not evince any inclination to meet current opinions as to opening prices. Some few transactions are reported in Oomrawuttee for January delivery at 215 rs to 208 rs per candy, and we dare say a few small lots might now be contracted for at 2 rs or 3 rs cheaper. We have nothing of importance to report from the districts. Broach is now enjoying favourable weather, and the danger to which we made reference in our last issue may now be considered as quite averted. Arrivals of both new and old cotton do not keep pace with the exports entries passed through the Custom House, and our stock is becoming reduced. From Tinnevelly we have a telegram dated 15th inst., quoting 125 rs per candy.

EXPORT of COTTON from BOMBAY to Dec. 16.

	1870.		1869.

Actual exports since last mail left. 2,848 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated December 30:—Our last report was dated 23rd instant. As we anticipated, our cotton market

reopened after the holidays at a decided improvement, a very extensive business having been done at ⅛d to ¼d per lb over last week's closing prices. To-day, however, this advance has not been maintained, and despite a continued active demand, quotations are again the same as by our last mail's report, with the exception of good fair qualities, which are a shade dearer. Gallin descriptions continue extremely scarce, and their value at the moment is almost nominal from the small supply offering. We quote:—Fair, 8 1/16d to 8⅛d per lb, f.o.b.; good fair, 8¼d to 8⅜d per lb, ditto; good to fine (Gallin), 10d to 12½d per lb, ditto. Freight about ⅜d per lb for steam-pressed bales.

— 1864	60,776	12,434	73,210

The colonial produce markets have shown considerable firmness this week. Sugar opened with activity at rising currencies, and, though the market closed quietly to-night, the week's advance has been well maintained. Supplies of coffee have been extensive, but the demand has ruled steady at about late rates. Tea has sold on rather easier terms. Rum and other spirits are unaltered in value. The rice market is without material change.

Mr Helmuth Schwartze reports: The arrivals for the first series of London sales of colonial wool, which is to commence on the 2nd February, comprise up to date—Port Phillip, 9,008; Sydney, 8,720; New Zealand, 2,201; Van Diemen's Land, 251; Cape, 14,983—total, 35,163 bales—which quantity may be further increased to about 80,000 bales should the winds be favourable; thus making the probable total of old and new wools to be offered about 120,000 to 130,000 bales. The tone in the market continues brisk, there is a good inquiry, and sales are frequent. It will probably not be overstating the case to say that since the close of last series from 4,000 to 5,000 bales have changed hands, a considerable quantity if the time of the year be taken into consideration. The prices paid in these transactions came up fully to November closing quotations, and in not unfrequent cases exceed them. The prospects for the ensuing series may, under these circumstances, be considered favourable, especially as the quantity to be offered is but moderate.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, December 13:—Since our last report four public sales have been held, at which 2,800 chests were disposed of. The demand has continued good with an upward tendency in the prices of fine indigo and Oudes. By private contract there have been no transactions. We are glad to observe that native proprietors are selling more freely than they used to do, having learnt from experience that it is more to their advantage to meet the market fairly as Europeans do, than to buy in their indigo above its value, a proceeding which almost invariably ends in sales at lower prices than could have been at first obtained, and always in loss in weight and interest of money. About 35,000 maunds of the crop are now sold exclusive of the sale to be held this day. Exports of indigo from 1st November, 1870, to 12th instant:—To Great Britain, 2,018 chests; France, 26; Trieste, 555; foreign Europe, 10; America, 233; Gulphs and Levante, 4—total, 2,846 chests.

The annexed is dated New York, December 28:—The general merchandise and produce markets present the usual dulness incident to the close of the year. The money market continues close, but borrowers in good standing appear to have little or no difficulty in obtaining accommodation at the current rate of 7 per cent. on call. Time loans are decidedly slow. A stringent market is likely to continue until after the first week of the new year, when a return to comparative ease may be expected, with plain sailing for business men, and an encouraging revival of trade. It is hardly probable, however, with the gradual closing up of the gap between gold and currency, that we shall witness any general recovery of merchandise prices, even if the spring trade should prove equal to the most sanguine expectations. Gold is weak, owing to a light demand and liberal supply, which latter will be further increased by the January disbursements in the shape of interest on public securities. Foreign exchange has advanced, the accumulated supply having been considerably reduced, while but a small amount of new paper is coming upon the market.

THE COTTON TRADE.

LIVERPOOL.—JANUARY 12.

The cotton market was dull on Friday, but on Saturday became steadier, and on Monday was active, with some hardening in prices. The influence of heavy imports was again evident on Tuesday and Wednesday, holders offering their stocks freely, and though to-day the business has been considerable, the week closes with quotations generally reduced. Sea Island continues in good demand for all grades except common, at somewhat dearer prices. American has been in good request, but after some little fluctuation quoted partially ⅛d per lb lower. New York advices to 11th instant quote middling Upland 15¼ cents, costing to sell in Liverpool 8½d per lb, by steamer. In Brazil the business has been moderate, and prices are generally ⅛d per lb lower. Egyptian has been in extensive request, but being freely offered prices have again declined ⅛d per lb. For East Indian the demand continues restricted, although it has increased during the last two days; prices are rather lower in the medium and higher qualities.

For cotton to arrive the latest quotations are—American, basis of middling, from New Orleans, January-February shipment, not below good ordinary, 8d; any port, February-March shipment, with deposits, 7⅞d; Oomrawuttee, fair new merchants, February shipment, canal, 6¼d per lb.

The sales of the week, including forwarded, amount to 79,340 bales, of which 4,010 are on speculation, and 10,640 declared for export, leaving 64,690 bales to the trade.

* The actual export this week amounts to 5,393 bales, consisting of 3,013 American, 25 Brazil, 22 Egyptian, and 2,333 East India, which is not deducted from the stock as it was not included in the stock declared on the 30th ultimo. It is also

not included in this year's returns, as it was added to the export in the annual circular.

JANUARY 13.—The sales to-day will probably amount to about 12,000 bales, with a steady market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	148,970
An increase of quantity taken for consumption of	12,300
A decrease of actual export	2 269
An increase of stock of	184.060

In speculation there is a decrease of 10,660 bales. The imports this week have amounted to 95,107 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to January 7) is 290,000 bales, against 58,000 bales last year. The actual exports have been 5,393 bales.

Return showing the quantities of cotton in stock, the quantities imported, exported, and forwarded inland for consumption:—

* Pickings.

LONDON—JANUARY 12.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

During the past week only a small business on the spot has been transacted, and for most descriptions prices are ⅛d, and for Australian ⅜d per lb lower. For arrival, there has been more doing. Bengal, after slight fluctuations, closes at about last week's rates, while other kinds are ⅛ d to ⅛d easier.

PRESENT QUOTATIONS.

NEW YORK.—DECEMBER 28.

The business doing in cotton has been fair, but the movement lacked animation, and after a rather doubtful tone, the market closes ⅛c easier, and pretty dull. The accounts of the Liverpool market are on the whole not unfavourable, but the arrivals at that point have been large, and shippers seem disposed to operate with caution, and to confine themselves closely to actual orders or the capacity of freight-room already engaged. The supply on sale to-day has been large and very

well assorted, and this has added to the feeling of depression, though some holders display but little anxiety, in view of the fact that the bulk of the offering is uncompressed, and embraces the accumulation of two or three days, many parcels of which receivers would prefer selling at a slight concession rather than undergo the expense of storage. We quote as follows, a little nominally:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	12¾ @ ...	13 @ ...	13¼ @ ...	13⅛ @ ...
Good ordinary	14⅛ ...	14¼ ...	15⅛ ...	15⅜ ...
Low middling	15 ...	15⅛ ...	15⅜ ...	15⅝ ...
Middling	15⅜ ...	15⅝ ...	15⅞ ...	16⅛ ...
Good middling.....	16⅛ ...	16⅜ ...	16⅝ ...	16⅞ ...

For future delivery the demand has been moderate, and prices are easier, closing somewhat weak and unsettled, without any decided cause for the depression given, except that cotton generally appears to be pretty plenty. Sales as follows, on basis of low middling, unless otherwise noted:—December, 300 at 15⅛c; January, 400 at 15⅛c; February, 300 at 15⅜c, 100 at 15⅛c; February and March, 100 each at 15⅜c; March, 100 at 15⅛c, 200 at 15 7/16c, 200 at 15⅛c; March 100 and April 200 at 15⅛c, together; February, March, and April, 100 each at 15⅜c. To-day:—December, 800 at 15c; January, 300 at 15⅛c, 700 at 15 3/16c, 1,100 at 15⅛c; January, 200 at 15⅛c; February, 200 at 15 5/16c, March, 200 at 15⅛c, together; February, 100 at 15 5/16c; March, 300 at 15⅛c. Total receipts since Sept. 1, 1870, 463,884 bales; ditto for same time of 1869-70 309,368 bales. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports:—New Orleans, 464,855 bales; Mobile, 167,697; Charleston, 188,273; Savannah, 367,701; Memphis, 84,946; Galveston, 72,591; Wilmington, 45,280; Norfolk, 116,615; other ports, 18,261—total, 1,526,129 bales. Foreign exports at Southern ports and New York:—New Orleans, 278,712 bales; Mobile, 72,771; Charleston, 61,118; Savannah, 161,083; Galveston, 20,917; New York, 244,578; other ports, 10,987—total, 850,166 bales. Stocks at principal ports:—New Orleans, 183,266 bales; Mobile, 63,024; Charleston, 34,547; Savanah, 72,248; Galveston, 39,369; Norfolk, 9,523; New York, 80,000; Boston, 5,500—total, 487,477 bales.

NEW YORK, Jan. 6.—According to Messrs Moffat, Davidis, and Co.'s report, the receipts of cotton at all ports during the last four days have been 140,000 bales, and since the 1st of September, 1,770,000 bales. Shipments to England, 82,000 bales; to France, none; and to the continent, 6,000 bales. Total since the 1st of September, 995,000 bales; stock at all ports, 575,000 bales. Midland Uplands, 7⅛d, cost and freight, per steamer.

NEW YORK, Jan. 10.—The receipts of cotton at American ports during the last four days have been 63,000 bales. Exports to Great Britain, 24,000 bales; to France, none; to the continent, 14,000 bales. Middling Upland, cost and freight per steamer, 7 1/16d.

NEW YORK, Jan. 11.—To-day's receipts of cotton at all American ports amount to 18,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Jan. 12.—The business of the week has been considerable, and would have been greater if spinners and manufacturers would yield a little in price, which buyers looked for owing to the reduction in the values of cotton. Prices have been firmly adhered to, and a fair business has been done. No stocks are allowed to accumulate, and orders for distant delivery have also been placed. A few failures have occurred here during the week, the bulk of the loss falling upon our yarn and grey cloth agents; these have imparted a rather quieter tone, and the market closes steady, but demand rather limited.

Messrs Alex. Collie and Co. received the following telegram yesterday:—Owing to heavy engagements, producers are demanding full rates, which is checking. Business to some extent.

BRADFORD.—A very cheerful tone prevails in the wool market. Considerable inquiry is apparent in wool, and there is more disposition to purchase. The demand is still quite of a consumptive character, without any tendency to speculation. Good wethers are most in demand, but middle hogs are also in fair request. Prices are very firmly maintained, and if any concession on present quotations could be made much more business might be done. Noils and brokes are in fair request, and firm in price. There is rather more animation in the yarn market, and considerable inquiry in both single and two-fold yarns. The piece market is quiet. Prices are steady.

ROCHDALE.—During the past week business was very slack at the warehouses. Yorkshire goods keep in fair request. Wools are bought sparingly, but prices keep steady, as do also those of flannels and Yorkshire goods.

LEEDS.—The markets in the cloth-halls were fairly attended. At the close of the markets, a few moderate selections, including thin fancy coatings, light meltons, tweeds, and ordinary plain cloths had been made, and the markets may be pronounced to have been as active as could be expected, the prices of wool and raw materials used in the manufacture of woollen cloth all keeping firm; those of cloth, as a consequence, also keep steady.

NOTTINGHAM.—There is no material change to report in the lace trade. An improved feeling pervades the lace-yarn market, and prices are firm. Raw silk sells slowly at its former value. The hosiery trade remains in much the same state as last week.

DUNDEE.—Our flax market has lately assumed a decided upward tendency, in consequence of the increasing firmness of the foreign markets, and the probability that the supply from last year's crop will fall greatly short of that of 1869; and although buyers yield to the advanced rates with great reluctance, some considerable transactions have lately taken place. Tows of medium quality continue in good demand, and as stocks of such are very light, prices are well maintained. Jute continues very firm, and as the consumption continues on a very large scale, while many consumers are now but lightly stocked, the market continues very buoyant. The yarn market continues firm. Flax yarns are rather quiet, but tow kinds continue in good demand, at steady prices. Jute yarns are very stiff, and have lately had an upward tendency. The demand for linens continues active, and in jute goods a very large business is doing, so that manufacturers are at present well employed.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 28.—A considerable quantity of flour was taken for export, and the market generally had a firmer tone on shipping grades in wiew of the more encouraging advices from Liverpool. Trade and family brands sold a little more easily; but did not greatly improve in price. Southern flour was more active. Rye flour held with great confidence. Corn meal firm for barrel lots. City sacked firmer and higher, and quoted: coarse, $1.48; fine, $1.53; sifted, $1.58; bolted yellow, $1.70; bolted white, $1.75 per 100 lbs. On the more encouraging advices from abroad the wheat market was higher and quite firm, though the difficulty experienced in obtaining freight room rather restricted operations. Sales at $1 32 for old spring in store; $1.40 to $1.41 for No. 2 Chicago spring afloat; $1.41 to $1.42 for No. 2 Milwaukee spring afloat; $1.50 for white Michigan; $1.47½ to $1.50 for good to choice amber winter; $1.42 for Racine spring, closing firmly held at $1.42 for choice No. 2, and $1.43 to $1.44 for good to choice No. 1 new spring. Corn was a trifle less active, but higher and very firm up to the close, though buyers were not very anxious to operate after the most positive orders were filled. Sales 76c to 77c for mixed to 77½c to 78c for high mixed, 78c to 80c for yellow Western, 76½c to 78c for new white Western; held at 84c to 85c for white Southern, and 85c to 87c for old Western. Oats were about 1c higher and pretty firmly held, but without much activity. Sales at 59c to 61c for Western mixed to white, and 61c to 62½c for mixed to white Ohio, Pennsylvania and State; 59c to 61c for Jersey, on pier and delivered.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the publication of the actual stocks of grain showed that the holding of wheat at the principal outports was much less than had been anticipated—being probably half-a-million quarters less than at the close of the preceding twelve months,—the wheat trade has ruled very dull during the past week, and the tendency of the quotations has been downwards. On Monday last the attendance of millers at Mark lane was limited, and although the supply of English wheat was small and in better condition, it was diffi-

cult to effect sales even at a decline of 1s to 2s per quarter. Towards the close of the week more firmness prevailed owing to the return of frost, and to the state of the roads, but no improvement was apparent in the quotations. The number of cargoes afloat is large—there being nearly 200 wheat laden vessels on passage to the United Kingdom against, however, 430 at the corresponding period in 1870. Still this is a considerable quantity for the time of year, though looking at the probability of a heavy demand on French account, it is not at all likely to exceed our requirements. To-day the market closed with rather more firmness, but the business transacted was not extensive.

Spring corn ruled dull at the commencement of the week, and maize and oats gave way 6d per quarter; but to-day a partial recovery took place. Barley, beans, and peas, were also lower. In flour there has been some demand for barrels, which have sold at steady prices. Foreign and country sacks have ruled in favour of buyers.

Mr George Dornbusch thus reports the state of the floating-grain trade:—During the last eight days only 13 grain and seed-laden vessels have arrived at ports of call, viz., 7 wheat, 1 barley, and 5 oats. The floating-grain trade has been quiet, but steady in tone, and transactions have been unimportant. Wheat—the small quantity offering has necessarily restricted business; fine cargoes being scarce and in demand have commanded fully late prices. Maize also little on offer, and quotations are nearly nominal. Barley—prices remain nominal; for rye nothing doing. The reported sales are as follows:—Wheat—5 arrived cargoes: Marianopoli, 49s 6d; Berdianski, 49s per 492 lbs; Californian, 57s 6d per 500 lbs; Nos. 1 and 2 Chicago spring, and Canada red winter, Montreal, 52s 3d, and Danubian 46s per 480 lbs. To arrive, 1 cargo has been sold, Ghirka Odessa, 48s per 492 lbs. Maize—1 arrived cargo Kustendje, 33s per 480 lbs; to arrive, no business has been done. Barley—1 arrived cargo Berdianski and Marianopoli, 22s 6d per 400 lbs. Oats—3 arrived cargoes: Black Prince Edward's Island, 21s 6d to 22s 6d per 304 lbs. Linseed quiet, at about last week's prices. Sales are—arrived, 500 tons East India from Calcutta, 59s to 59s 3d per 410 lbs. On passage, 2 cargoes: Sicilian from Trapani, 59s to 60s per 416 lbs; Azow and Taganrog, 58s 3d per 424 lbs. Rapeseed—Slow sale at rather lower rates. Sales are—arrived, 100 tons ordinary brown Calcutta, 66s per 416 lbs. On passage, 100 tons ordinary brown Calcutta, 67s per 416 lbs. Shipped or to be shipped, 200 tons ordinary brown Calcutta, 67s 3d per 416 lbs. Poppyseed—Arrived, 50 tons East India Calcutta, 56s 6d per $4\frac{6}{10}$ maunds. On passage, 100 tons East India Calcutta, 57s 6d per $4\frac{6}{10}$ maunds. Shipped or to be shipped, 150 tons East India Calcutta, 57s 9d to 58s per $4\frac{6}{10}$ maunds. Cottonseed in improving demand at a slight decline. Arrived, 100 tons Egyptian and Alexandria, 9*l* 7s 6d per ton. On passage, 1,200 tons Egyptian from Alexandria, 9*l* 1s 3d to 9*l* 2s 6d per ton. Shipping or to be shipped, 1,100 tons Egyptian and Alexandria, 9*l* 1s 6d per ton. To be shipped, 1,400 tons Egyptian and Alexandria, 9*l* 7s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this Day's Markets see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The market has been active, with higher prices by 1s to 1s 6d per cwt, but yesterday the demand rather slackened. Further business has been done for France, and the latest sales of refined for immediate delivery show a more important rise than above quoted. Contracts have been made in Dutch sugars forward at low prices in proportion. It is now difficult to foresee the future course of the market. Many parcels of Manila have been taken, partly on speculative account, at 1s to 1s 6d over last Friday's rates, and other low sorts are quite 1s dearer. Grocery Porto Rico is held for very extreme prices. Sales of West India to yesterday 1,502 casks, including grainy Demerara up to 39s; and 50 casks soft Barbadoes by auction at 31s to 33s 6d per cwt. The stock has further decreased to 67,550 tons; against 77,000 tons last year and 72,250 tons in 1869.

Mauritius.—Small sales have been made from second hands at high prices. Yesterday a floating cargo of about 900 tons sold at 33s for France, No. 13½.

Bengal.—595 bags brown Dulloah sold by auction at 20s to 21s 6d. 350 casks low brown withdrawn and since sold at 20s. Privately business at above quotations, and Gurpatta at 32s to 32s 6d.

Madras.—2,000 brown native sold at 23s 6d, and about 8,000 bags Jaggery at 19s to 20s; most recently at 20s 6d. 934 bags soft brown by auction part sold at 22s.

Manila.—About 80,000 bags have changed hands on the spot: clayed, 25s to 27s, and 4s 9d duty at 28s; fine Ilo Ilo, 29s. 700 tons Taal to arrive at 22s.

Other Foreign.—About 2,200 casks have sold, including Cuba, at 32s to 34s, and Porto Rico, of which particulars do not transpire. By auction 11 casks 73 bags brown Guatemala sold at 30s to 32s 6d.

Refined.—Common dry goods have advanced 3s to 4s. Yesterday 51s 6d to 53s 6d was the nearest value of titlers, &c. Refined crystals have also obtained much higher rates.

Molasses.—The sales of West India amount to about 250 puncheons, at 11s 6d for St Kitts, Dominica, &c., and 12s 6d for Antigua.

Rum.—There has not been any change in the position of the market, and a few sales reported at steady rates. Demerara, 2s 2d to 2s 3d; Leewards, 1s 8d. Cuba in Liverpool has sold here at 1s 9d. 117 casks Mauritius sold by auction, "with all faults," obtained 1s 1½d to 1s 2d per proof gallon. Jamaica is in fair demand.

Cocoa.—At the public sales on Tuesday, 1,608 bags Trinidad went at steady prices, and partly sold: grey, 55s to 58s; mixed to fine, 59s to 95s; very fine, 120s. 200 bags ordinary St Lucia sold at 40s 6d to 41s 6d. 2,151 bays foreign partly sold: Guayaquil, chiefly damaged, at 45s to 45s 6d. Sound superior quality at 54s. A small quantity of Caraccas at 85s per cwt. Some business is also reported by private contract. The stocks are still large, especially of foreign, and the new crop of West India will soon arrive.

Tea.—The market is more freely supported, with a good business in black leaf Congous. Small public sales on Monday, "without reserve," went at about former rates for black leaf sorts. Indian teas have been in better demand. 7,879 packages by auction this week went off well for good qualities, but inferior declined in many instances. The imports of tea into the kingdom last year were 140,500,000 lbs, against 145,000,000 lbs in 1869. Home deliveries, 117,750,000 lbs, against 111,750,000 lbs; export, 30,750,000 lbs, against 34,500,000 lbs. Stock at the close, 79,750,000 lbs, against 87,750,000 lbs last year.

Coffee.—The public sales have gone off with fair spirit at full rates for plantation Ceylon, 1,503 casks 106 barrels 601 bags finding buyers: pale grey, 55s to 65s for small and mixed to bold; colory, low middling to middling, 60s to 67s; good middling to fine, 68s to 80s. There has been less business done in native. 50 casks, &c., 200 bags Triage, &c, by auction did not alter general quotations at all. 452 bales, half bales, &c., Mocha found buyers: short berry, pale mixed, 89s 6d to 94s 6d; long berry, 91s 6d to 95s. 400 bags native Cochin were taken in at 58s. 138 bags Singapore sold at 55s to 63s 6d for pale to bold. 106 casks 1,857 barrels and bags Jamaica partly found buyers: ordinary to low middling palish, 50s to 60s 6d. 3,350 bags Guatemala sold steadily at 57s to 64s 6d, and low to good ordinary at 48s 6d to 53s 6d. 746 bags Bahia were taken in at 52s to 59s. 504 bags La Guayra part sold at 59s to 60s. 813 bags washed Rio realised 59s to 66s 6d. 120 bags ordinary at 51s 6d to 53s. 574 bags African sold at 49s 6d to 50s. A floating cargo of St Domingo is reported at 51s per cwt for the Mediterranean. There were 870 tons landed last week, chiefly Ceylon and Brazil, and the deliveries were only 350 tons, owing to the frost restricting the shipments. The stock now amounts to 24,710 tons, against

23,460 tons and 18,480 tons at the same date on the two preceding years.

RICE.—The business on the spot is moderate in extent. 6,635 bags Rangoon by auction were taken in at 10s 6d. By private contract some parcels Rangoon sold at 9s 1½d to 9s 10½d, ex quay. 350 tons white Bengal to arrive at 10s 3d, landed. A floating cargo of Bassein is reported at 10s 1½d for the continent. One of Rangoon at 9s 9d, continental terms. 400 tons Askoolie to arrive at 10s 3d per cwt.

SAGO.—1,120 bags by auction were chiefly taken in. A few lots bold medium sold at 19s to 19s 6d.

PEARL TAPIOCA.—900 packages part sold at 17s 9d to 19s 6d per cwt, being easier rates.

TAPIOCA.—2,000 packages offered yesterday chiefly sold at 1½d to 2½d per lb for Singapore and Penang.

SPICES.—There has been a speculative demand for white pepper, and about 1,700 Singapore sold privately at 7d. 222 bags by auction sold at 6⅞d to 7d. Black is very firm. Sales have been made in Penang to arrive at 5 5/16d to 5 7/16d; on the spot at 5½d, including the sound portion of 837 bags by auction. 1,327 bags Singapore were withdrawn. 403 bags Tellicherry from Bordeaux were chiefly bought in, a few lots selling at 5¾d. 1 case very good Penang mace sold at 3s 8d. 15 cases brown nutmegs sold at steady rates: 130, 1s 11d; 94, 2s 3d; 83 to 81, 2s 6d to 2s 7d; 75, 2s 9d. 45 cases cloves from Padang taken in at 6½d. 2 cases from Tuticorin sold at 10¾d for good. 318 bags pimento partly sold at 1¾d to 2d per lb. Cassia lignea remains nominally unaltered. 60 cases cassia buds, just landed, were taken in at 9*l* 10s. 69 cases Japan cassia bought in at 45s. 156 cases Cochin ginger were chiefly taken in, a few lots ordinary rough selling at 38s to 39s per cwt. There have not been any public sales of Jamaica.

SALTPETRE.—Although the market remains firm, the sales on the spot have been limited. 436 bags Bengal by auction were chiefly bought in at 31s 6d for fine. About 350 tons are reported for arrival at 29s 3d to 30s 6d per cwt, usual conditions, according to dates of shipment.

DRYSALTERY GOODS.—Turmeric remains quiet. 1,697 bags Bengal by auction were taken at 21s. The stock of Gambier continues large. 322 bales block were taken in at 15s 6d. Some business has been done at 15s 4½d, ex ship. Cutch remains firm. 169 boxes fine were taken in at 23s. 257 bales Munjeet sold at 25s to 26s per cwt. 109 chests lac dye were chiefly bought in, a few lots fine selling at 2s 4d per lb.

SHELLAC.—The market is firm, and in some instances rather higher. 320 cases two-thirds sold: button, 125s to 127s 6d; liver and livery orange, 117s 6d to 120s per cwt; block in proportion.

METALS.—There has not been much animation in the markets this week. Tin is rather higher with a steady business: Straits, 135*l* cash; Banca, 135*l* to 135*l* 10s. The former has sold to arrive at 131*l* to 134*l*. English firm, with prices tending upward. There has not been any business of importance reported in spelter, and the prices are, nominally unaltered. Copper steady but quiet: Burra, &c., 72*l* to 73*l* 10s; Chili, 64*l* to 65*l*; English at about the fixed prices. The iron market continues unfavourably influenced by the state of continental affairs, but prices of rails, &c., are maintained. Scotch pig has slightly declined. Present value 51s 5d per ton, cash. English lead inactive. Soft Spanish has sold at 17*l* 10s per ton.

HEMP.—The sales in Manila have been upon a limited scale. Russian is steady. 55 tons Petersburg by auction part sold, including damaged; sound at 34*l* 15s per ton for clean rejected.

LINSEED.—The demand for cake has not improved, although the frost continues and linseed is quiet. Calcutta, 59s. Some Black Sea afloat reported at 58s 3d per quarter.

OILS.—A good business has been transacted in sperm at 78s, and higher rates now asked. Olive quiet on the spot. 50 tons Seville have sold at 42*l* 10s per tun, f.o.b. Linseed oil is rather weaker, selling at 30*l* on the spot. For delivery in this and three following months 31*l* accepted. English brown rape quiet. Present quotation 46*l* 15s to 47*l* on the spot or for early deliveries. For September to December, 44*l* 10s, sellers; refined, 49*l*. Foreign ditto, 50*l* to 50*l* 10s. Palm dull, at 38*l* 10s for fine Lagos, with inferior sorts in proportion. Cocoa-nut quiet, as the export demand is interfered with by the stoppage to navigation. Ceylon, 38*l* 10s; Cochin, 43*l* to 45*l* 10s per ton.

PETROLEUM is lower, with large amounts—viz., 1s 5¾d to 1s 6½d per gallon.

SPIRITS TURPENTINE firm at 34s to 35s per cwt for foreign.

JUTE continues firm. Several parcels have sold to arrive chiefly at 19*l* 10s to 23*l*. 2,756 bales were offered by auction on Wednesday, and the principal part sold, including some of the new crop, at full prices. Low to very good quality, 18*l* 10s to 24*l* 10s per ton. The stock at this port is smaller than for many years past, being 27,950 bales.

HIDES.—The public sales of East India to yesterday contained a large quantity, viz., 255,920 hides, &c., and the chief part sold at previous rates to a slight advance. Salted Cuba went ¼d to ½d; dry ½d to ¾d per lb dearer.

TALLOW.—The position of the market has not altered much. Prices receded slightly, and subsequently became firmer. This morning's quotations are as follows:—Petersburg, 45s 3d; March, 45s 9d; April to June, 45s 6d; last three months, 46s 6d to 47s per cwt. The public sales of Australian tallow to-day will contain above 2,000 casks.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market was inactive to-day. Low sugars dull. 2,395 bags brown Madras, 450 bags Jaggery, 3,700 mats Java, and 1,111 bags Bengal by auction were withdrawn or bought in. Growing kinds steady; several parcels sold by auction chiefly at 38s 6d to 40s 6d for Berbice and Demerara. 665 casks West India sold to-day, making 1,831 casks for the week.

COFFEE.—850 bags native Ceylon by auction were chiefly taken in. 531 casks 1,491 barrels and bags plantation by auction realized steady prices. 91 bags Singapore sold at 50s per cwt.

RICE.—4,781 bags Bengal part sold at 10s 3d to 11s for middling, rather broken to good middling white being rather cheaper. A floating cargo of new Rangoon reported for the continent at 10s 4½d per cwt.

BLACK PEPPER continues in demand. Sales to arrive at 5 5/16d to 5 7/16d per lb for Penang.

SALTPETRE dull.

OILS.—450 casks cocoa-nut by auction part sold at 38s 6d to 48s 6d. 365 casks palm part sold at 39s to 39s 3d per cwt for Congo oil. 70 tuns seal part sold at 35*l* 15s to 36*l* for tinged and pale; 34*l* to 35*l* per ton yellow and straw.

TALLOW.—Of 2,453 casks Australian by auction two-thirds sold at steady prices; beef, 35s to 43s 6d; mutton, 43s 6d to 45s 3d. 273 casks chiefly sold, including South American, at 42s 6d to 43s 6d per cwt. Town tallow, without change.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market, owing to the continued demand for refined sugar for France and Germany, has experienced a further advance this week of 4s and 5s per cent. In Dutch refined prices are also higher, and a large business done in superior and No. 1 loaves at 44s for delivery this month for superior, and at 38s for No. 1 loaves for Germany.

DRY FRUIT.—There has been a large trade in currants during the past fortnight, and prices have advanced 2s. The stock is 6,000 tons smaller than has been the case at this period of the year for many years, and the prospect of any increase is very scanty. Clearances are going on well, and the trade are sanguine of a good spring business. Raisins are very firm, and stocks are small. No perceptible advance has taken place in any description.

ENGLISH WOOL.—A fair demand for long wools; the low wool demand for blankets nearly over.

COLONIAL WOOL.—Prices very firm, with fair inquiry.

FLAX.—Market quiet.

HEMP.—Market dull for Russian. Manila firm, and good quality very scarce.

SEEDS.—The seed trade is quiet, but firm.

TOBACCO.—There has been but little inquiry for North American Island, and the sales are trifling; good Island of the 1865 crop is in demand at current rates, but buyers do not appear inclined to operate in the last import. In substitutes and other growths, there has been a good business done, at full prices.

LEATHER.—During the past week there has been a fair demand for most descriptions of leather. On Tuesday, at Leadenhall, there was a small supply of fresh goods, and only a limited amount of business was transacted. Prime light English butts, shaved hides, English and foreign bellies, calf skins of all weights, and English horse hides are scarce and in request, at full prices.

METALS.—This second week of the new year has, like the previous week, been very quiet in business. Copper is well maintained in prices, but selling very slowly. Iron is quiet on the whole, but the tone of the quarterly meeting last week was cheerful. Tin is still a little dearer. Lead is steady in demand, Spelter is still neglected. Tin plates are dearer, and in fair request.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	46	6
Fat by ditto	2	3
Yellow Russian ditto	46	6
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 2,727 casks.

PROVISIONS.

Bacon is a moderate sale at a decline of 2s on our last quotations. Prime sizeable Waterfords, 66s, f.o.b., with heavy at 61s; seconds ranging from 60s to 64s, landed; arrivals large. Butter is very scarce at an advance of from 6d to 1s. Lard trade dull at 2s less. In hams nothing is doing. American cheese fair.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 9.—The total imports of foreign stock into London last week amounted to 1,332 head. In the corresponding week in 1870 we received 6,648; in 1869, 3,864; in 1868, 6,312; and in 1867, 7,302 head.

The cattle trade has been characterised by quietness to-day, notwithstanding the shortness of the supplies, and less money has been accepted. The show of beasts has been short, owing to the absence of foreign receipts; nevertheless, there has been a want of animation in the inquiry, and some difficulty has been experienced in realising 5s 10d to 6s per 8 lbs for the best Scots and crosses. The market has been scantily supplied with sheep. Sales have progressed slowly, at 2d per 8 lbs less money. The best Downs and half-breds have been disposed of at 6s to 6s 2d per 8 lbs., the latter quotation being extreme. Calves have been dull at nominal currencies. Pigs have been depressed, and the top quotation has not exceeded 5s per 8 lbs.

SUPPLIES ON SALE.

	Jan. 10, 1870.	Jan. 9, 1871
Beasts	3,578	2,935
Sheep	16,770	16,400
Calves	40	10
Pigs	250	60

A movement was set on foot at the Metropolitan Cattle Market on Monday last, with the object of immediately removing the cordon round the metropolis. This has long caused the country trade very serious inconvenience, and has had, and still has, the effect of enhancing the price of meat in many localities. The reason assigned for the continuance of the cordon has hitherto been the presence in the Islington market of cattle imported from countries suspected of disease. The grounds of this reason, however, have ceased to exist, provision having been made at the waterside for the sale and slaughter of all animals arriving in the port of London from such countries. It was resolved to hold meetings at Croydon, Hastings, Reading, Maidstone, and other places specially concerned, and to ask the Government to receive a deputation on the subject. Letters from a large number of Members of Parliament, in reply to remonstrances addressed to them by butchers and others, were also read, expressing, with scarcely an exception, a warm concurrence in the efforts in question.

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d		s	d		s	d		s	d
Inferior beef	3	4	to	4	0	Inferior mutton	3	4	to	4	0
Middling ditto	4	0		4	8	Middling ditto	4	0		4	8
Prime large ditto	4	8		5	0	Prime ditto	4	8		5	0
Prime small ditto	5	0		5	4	Large pork	3	4		4	4
Veal	5	0		5	4	Small pork	4	8		5	0

HOP MARKET.

BOROUGH, Friday, Jan. 13.—Business in the hop market has been transacted on a more extensive scale. Colours and medium qualities of our own grain have been disposed of rapidly at firm quotations, whilst inferior grades attracted rather more attention, and full prices have been realised. Mid and East Kent, 35s to 140s; Weald of Kent, 35s to 70s; Sussex, 30s to 66s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Jan. 13.—These markets are only moderately supplied with potatoes. The trade has been quiet, at about late rates:—English Regents, 60s to 90s; Scotch Regents, 60s to 85s; and Rocks, 60s to 70s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 13.—The inquiry from the home trade is very fair, but our market offers very little choice at present; transactions are consequently of small extent. Our next series of East India sales are to open on the 24th inst., when the recent arrivals, amounting to about 8,000 bales, are to be brought forward.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 13.— A fair business was done in wheat at this market to-day at 1d per cental over Tuesday's rates. Flour brought extreme prices. Maize had a slow sale, at 1s per quarter advance.

WAKEFIELD, Friday, Jan. 13.—This market is remarkably quiet to-day, and corn millers complain bitterly of the flour trade, and therefore hold over buying wheat; but we cannot quote prices lower than Tuesday. Barley had a slow sale, without any alteration. Beans scarce and dear.

The Gazette.

TUESDAY, January 10.

BANKRUPTS.

George Edwards Bulmer, Acorn Wharf, Rotherhithe, timber merchant's clerk.
Abraham Combes, Tyndale place, Islington, builder.
Thomas Henderson, Paternoster row, City, silk merchant.
Walter Wiggins, Nag's Head court, City, licensed victualler.
Henry Beckwith, Liverpool, merchant.
Roger Dawson, Cheltenham, solicitor.
William Suffield, York, coal dealer.
Thomas Taylor Sykes, Slaithwaite, Yorkshire, woollen manufacturer.

SCOTCH SEQUESTRATIONS.

William Bell, Glasgow, wine merchant.
Peter Dey, Aberdeen, builder.
George Morrison, Bishopbriggs and Glasgow, builder.
William Meff, Aberdeen, game dealer.
George Maven, Glasgow, grocer.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

George William Wood, Elgin terrace, Kilburn, shoe dealer.
Harry Carr Curlewis, Albert street, Regent's park, commercial clerk.
Oscar Sheffield, Avon villa, Kelvin grove, Sydenham, china dealer.
William Ramsden, Henblas Cottage, Holywell, cement manufacturer.
David Graves, Yates street, Aston road, Birmingham, builder.
Henry Williams, Sedgley, firebrick manufacturer.
George Roots, Riverhead, near Sevenoaks, brickmaker and woodseller.
John Ruffle, Wroxall, commission agent.
Abraham Pickard, Bradford, grocer and beerseller.

SCOTCH SEQUESTRATION.

James Hogg, Tranent, grocer.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

USE ONLY THE

GLENFIELD

STARCH

THE QUEEN'S LAUNDRESS USES NO OTHER

MESSRS GABRIEL'S extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 562, improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with greater efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. ASTONISHING CHEAPNESS, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the operation being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossability.

MESSRS GABRIEL,
64 LUDGATE, CITY, and
56 HARLEY STREET, CAVENDISH SQUARE, } London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 5s.

FURNISHED APARTMENTS FOR GENTLEMEN—Beautifully situated. Omnibuses pass every 5 minutes. Terms moderate.—Mr Henry Wheeler, 24 Harrington square, N.W.

EDUCATION.—"ONE YEAR'S Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

---

MORE CURES OF COUGHS, COLDS, and Throat Affections by DR LOCOCK'S PULMONIC WAFERS.—From Mr Williamson:—"48 Hunslet road, Leeds—I believe them to be free from all deleterious ingredients, and the most safe remedy for coughs, colds, and throat affections."—They give instant relief to asthma, consumption, coughs, colds, and all disorders of the breath and lungs. They have a pleasant taste. Price 1s 1½d per box. Sold by all medicine vendors.

KINAHAN'S LL WHISKY.—This celebrated and most delicious old mellow spirit is the very

CREAM OF IRISH WHISKIES,

in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy. Note the red seal, pink label, and cork branded "Kinahan's LL Whisky."—New Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY, BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

ALLSOPP'S PALE OR BITTER ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers on "ALLSOPP'S PALE ALE" being specially ordered.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES (of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other rooberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

CUTLERY, WARRANTED.—THE most varied assortment of TABLE CUTLERY in the world, all warranted, is on SALE at WILLIAM S. BURTON'S, at prices that are remunerative only because of the largeness of the sales.

X. The Treaties of 1856, and 1867.

London: Longmans and Co. Edinburgh: A. and C. Black.

THE REV. ALEX. J. D. D'ORSEY,

B.D., late English Lecturer at Corpus Christi College, Cambridge, and Lecturer in Public Readings at King's College, London, will give the following Courses of Instruction to Members of Parliament, Barristers, and others, at 13 Prince's square, W., beginning 16th January:—

I. CRITICAL STUDY OF THE ENGLISH LANGUAGE. 5 p.m.
II. ENGLISH COMPOSITION, including Essays, Speeches, Poems, Précis, Dictation, Punctuation, Correspondence, and Official Forms. 6 p.m.
III. PUBLIC READING—Management of the Voice, Pronunciation, Distinct Utterance. Remedies for "Inaudibility." 8 p.m.
IV. PUBLIC SPEAKING. Improvisation, Sentence-Making, Delivery: Logic, Grammar, Expression; Voice, Gesture, &c. 9 p.m.

Lectures and Classes will be arranged for Students in Law, for "the systematic cultivation of English Composition, Public Reading and Speaking," at the Inns of Court, if desired.

DORNBUSCH'S MORNING LIST,

delivered in the City every morning, or sent by post, for FIVE POUNDS annually, containing lists of Arrivals, Clearances, and Sailings of Vessels calling for orders at Falmouth, Plymouth, Queenstown, Scilly, Cowes and other ports of call; describing names of ships, captains and consignees, ships tonnage and flags, description of cargoes (rice, coffee, sugar, timber, logwood, guano, oils, hides, guano, cutch, wool, petroleum), where shipped, and port of discharge.—Apply to Mr Dornbusch, South Sea House, London.

NOW READY.

CRACROFT'S INVESTORS'

RECORD OF PURCHASES AND SALES, WITH CALCULATION TABLES, adapted to every investment."

"The object of this Memorandum Book is to enable every investor to keep a Systematic Record, producible as a Course of Law, of every investment transaction entered into. No such record was in existence, and the want of it was often felt by Executors and Administrators."

By BERNARD CRACROFT, Sworn Broker.

London: Effingham Wilson, Publishers, Royal Exchange.

TO INVESTORS.

Now ready,

LAVINGTON AND PENNINGTON'S

MONTHLY RECORD of INVESTMENTS, containing an original review of the British and Foreign Stock and Share and Money Markets, &c., with an enumeration of safe Investments paying from 10 to 20 per cent. Price 6d per copy, or 5s annually.

G. Lavington and A. Pennington, 44 Threadneedle street, London, E.C.

THE

INVESTORS' MONTHLY MANUAL.

The Proprietors of the INVESTORS MONTHLY MANUAL, in order to render it thoroughly efficient, have decided upon giving a careful Summary of the Half-Yearly Reports of the Companies mentioned in the MANUAL.

They have also decided upon receiving for it a few pages of Advertisements; and, at the same time, beg to announce that it now commands a very extensive sale, and is a particularly valuable medium for Financial and Commercial Advertisements, because it differs from ordinary daily and weekly newspapers in being a work of constant reference for a WHOLE MONTH, and is used extensively by all MONIED CLASSES.

The INVESTORS' MONTHLY MANUAL will no longer be issued as a supplement to the ECONOMIST but will be published separately at 1s and 1s 6d.

OFFICE—340 STRAND.

Just published,

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1870. *As part of an early number of the* Economist, *we shall, in continuation of the Series commenced with* 1863, *issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the Year, &c.; the object of the Supplement being to place in possession of our readers a Commercial History of* 1870 *worthy of preservation and adapted for reference.*

THE INLAND REVENUE AND THE NEW STAMP DUTY ON FOREIGN SECURITIES.

We last week said that the permanent officials responsible for the Stamp Duties were much to blame in allowing the recent change in the law as to stamps on foreign securities to be made without clearer notice. The Act of last year was generally understood in the House of Commons to be a Consolidation Bill, except on certain points explained in a Parliamentary paper; and on this point of foreign securities the explanation in that paper was insufficient. It did not warn people that there was a new duty imposed on an important class of securities—for example, on "Five-Twenty bonds." On the contrary, the effect of that explanation—whether so meant or not—was to make people suppose that there was no change of importance. To this article of ours there was a reply in the *Times* of Thursday last, signed "Inland Revenue," of which the purport was very singular.

It says, if we understand it, that there has been no change in the laws, and that "Five-Twenties," and other similar securities, ought to have been stamped before. And the same line of argument was addressed by the solicitor of the Inland Revenue to the deputation which was received by Mr Lowe. The solicitor said, according to the report in the *Times*, that "though the Stamp Duty was not formerly exacted on "foreign bonds, yet that such bonds were liable under the "old law."

But then why was not the charge exacted? No doubt this plea, if made out, would exculpate the Inland Revenue from changing the Stamp Law without notice; but then it would prove them to be much more to blame for an opposite reason—for not exacting the duty which Parliament imposed, and which the Inland Revenue is paid to collect. The excuse for the alleged offence is a confession that they have been guilty of a long series of opposite offences.

And as respects the public, nothing can be worse than the sudden revival without notice of a neglected duty. All dealings in these bonds have been based on the idea that they were not taxed, and to begin to tax them upon the occasion of a new Act has the effect of new taxation without discussion, even if the tax be in theory old.

But we own we are sceptical as to the neglect of their duty by the Inland Revenue during so many years. It is not antecedently probable that so careful a department would be guilty of protracted neglect, and we do not believe that they have been guilty of it. The point is very plain. By the proviso we quoted last week, all instruments are exempted, under the *old* law, "the interest whereon is not paid in the "United Kingdom." But under the new law that exemption is struck out. Surely that is a great change.

"Inland Revenue," in the *Times*, says that the interest on "Five-Twenty bonds" is "received" in London. But it would not affect the principle if he could show that these particular securities did not come within it. There certainly are many other securities on which the interest is not paid in England, and these, whatever they may be, are now subject to stamp, and were not so subject before.

And it is of no use to prove that the interest is "*received*" in London. The question is, where it is *paid*? Every coupon of the debt of a solvent Government is saleable in London, and the holder of it "receives" it; but the coupon is not paid until the Government itself pays it. The purchase of coupons in the market is not a payment of those coupons; it is only a purchase of a right to demand that payment. Only a debtor or the agent of a debtor can pay a debt.

We think therefore that it is certain that the Act does impose a new tax; that the Inland Revenue did not, in the Parliamentary paper which it prepared, explain that it imposes that tax;—that indeed the Inland Revenue could not say so, for it did not think so, as it erroneously held that no such taxation was imposed. Upon the other points of the Act we will deal at an early opportunity; but this point is important enough, especially in its relation to the conduct of the Inland Revenue Department, to be discussed by itself.

In an article last week, we used rather too strong an expression as to Mr Lowe's speech on the Stamp Act. His

words were :—"The next head to which I come is that of "stamps.....This is to be mainly a Consolidation Act. It "does not profess to deal in any philosophic or scientific "manner with this most complicated and most difficult sub-"ject; but if the House will be satisfied to accept it as a "consolidation carefully executed of the existing law, and "will abstain—that most difficult abstention—from entering "into the merits of all the stamps which are in operation, it "may be possible to pass the measure in the course of the "next few months. It will make certain changes in the "Stamp Laws, which will be carefully explained to the "House when the Bill is under its consideration; and if the "House will only exercise a little forbearance, and allow it to "pass in this way, I do not despair, as I have just intimated, "of its becoming law before the close of the present Session. "In order to induce the House to exercise that forbearance, "several changes will be proposed in the Stamp Laws, one or "two of which I may mention. I cannot state them all on "the present occasion."

These expressions entirely bear out however the reasoning of our article, which was that as to the points on which no attention was called, either in the speech of persons having charge of the Bill, or in the Parliamentary paper explaining it, the public had no notice of alteration; and that on the particular point of the new tax on foreign securities, the explanation in the paper was misleading and insufficient.

THE RELATION OF CABINET MINISTERS TO THEIR CONSTITUENTS.

Constituencies which have the honour of returning Cabinet Ministers seem inclined just now to place them in a difficult dilemma. If the Minister Member does not deliver at least one speech a year to his constituents they resent his neglect as a kind of outrage; if he does they take him to task, not for his conduct as their Member—which is fair enough, though even on this point electors ought to be more considerate of the general weal of the community,—but for his conduct as Minister, for which he is responsible to Parliament alone. In both cases the Government suffers not at the hands of either House or of the country at large, but at the hands of separate constituencies, which may be influenced by merely personal annoyances and dislikes. The recent incident at Greenwich has been described as one of small importance, and so no doubt in one way it is; yet it does not strengthen a Government to make known that many of the Premier's constituents are very angry with him, and many more so much annoyed by what they think the repudiation of a just claim to consideration, that the seat is more or less unsafe. There can be little doubt that if Mr Gladstone had made a speech or two to his electors, his popularity would revive; but what encouragement is there to such a course in a scene like that at Bradford? Mr Forster is one of the most popular men in England, and specially liked and trusted in his own borough, and partly for that reason—partly because he really believes in the popular elements in English political life—he goes down every year to meet his constituents in public. What is the result? They will have him talk upon general politics; upon general topics he is so weighted with responsibility that he is compelled to be reticent, till it is difficult to follow the drift of his thought, and then they pass a vote of want of confidence in him, not as their member, but as Minister for education. We make little of the minor inconveniences of the position, of the questions hurled at a Member who, being also a Minister, cannot answer them,—of impertinences like the demand for Mr Forster's opinion about the marriage of the Princess Louise,—or dangerous interrogatories like that one as to the educational policy to be pursued in Ireland, and call attention only to this fact that a scene like that at Bradford does slightly and most unfairly weaken a Government. It does not weaken it much, but it does weaken it, does raise the impression which, if correct, ought to be raised in a very different way, that there is a reaction at hand. The impression may be just as injurious and just as unfair if the vote is the other way. The "Druids" of Oxford have no claim to represent the people of England; yet it is true, absurd as it seems, that the Druids' vote of confidence in Mr Cardwell—a purely local vote given for reasons of personal liking—faintly strengthened the likelihood that Mr Cardwell would remain War Minister, that is, it tended slightly to override the vote of the whole country.

Both Mr Gladstone and Mr Forster have met the local attacks on them wisely, Mr Gladstone with the faint scorn which was all his enemies in Greenwich deserved—they had put themselves out of court by demanding local benefits at the expense of the nation—Mr Forster, by a bold appeal to the justice of the constituency, which he has served so well and so long. If they intended to dismiss him, he said they must give him notice; but the policy they condemned he must maintain. But we are not sure we do not wish that Ministers would adopt a somewhat haughtier etiquette, regard themselves only as servants of the nation, and only explain themselves to their constituents at elections, confident that their most popular addresses are those directed to the whole people in Parliament. And we are quite sure that Mr Forster broached a most dangerous doctrine when he said that if Mr Turner and his friends had denounced a measure he was about to bring in, instead of a measure he had brought in, he should have appealed to the constituency. Government by men liable to annual elections is conceivable, though we should be sorry to risk it; but Government by men liable to resign when called on by a local constituency, with no opportunity for another one to reverse their verdict, would and must end in one of three things. Either Government would live from hand to mouth, that is, would exist without a policy, or the interests of the kingdom would be postponed to the necessity of securing local support; or the Executive must, as in America, be released from Parliamentary control,—in our judgment the worst method in which free institutions can be worked. Our long Parliamentary term, though not indispensable, perhaps, for members, is quite indispensable for Ministers if the business of the country is not to be carried on with a single eye to the gratification of the passion of the hour. No Minister ought to undergo a new election, even an informal test-ballot, at the bidding of a single constituency, or of anybody, except the Parliament which elected him to be one of the Governing Committee.

THE BILL OF ENTRY.

We beg to request particular attention to the following letter relating to the Bill of Entry :—

TO THE EDITOR OF THE ECONOMIST.

Sir,—My attention has been called to an article in your paper of the 24th ult. under the above heading, which for convenience I adopt. The reputation of the Economist for accuracy and impartiality stands too high to be obnoxious to the imputation of intentional misrepresentation or injustice; however strongly therefore you may "hold that the "main source of the present defects in the Board of Trade "Accounts is the existence of the Bill of Entry," and denounce it as "a rival publication," injurious "to the regular "official accounts," if I can show that these impressions—for which your informant is responsible—are not well founded, I am sure that you will find room in your journal for the refutation.

In the first place I would ask, how is it possible that the defects in a system of official returns, only devised and brought into use 25 years ago, can be attributable to the existence of an independent publication of 200 years' standing? Or how can the elder publication fairly be stigmatised as the injurious or aggressive rival of that which is its junior by 175 years?

It is admitted that the Bill of Entry "gives daily at the "principal ports of the country, the information which the "merchants require." Does it not therefore fulfil its vocation? And is not this the true source of a most indisputable popularity, which, judging from the lamentations of its opponents, it would appear "that the regular official returns" cannot boast? The failure of the latter to command the preference cannot be attributed to the clerks of the Bill of Entry which had no hand in framing them.

If the injury imputed is that the Bill of Entry finds greater favour with the commercial body than "the regular official "returns," the rational conclusion is, that the remedy would be found in assimilating them as far as possible in matter and form to the Bill of Entry, rather than in depreciating and accusing the latter of injustice.

But the imputation assumes a more serious aspect. It is not only alleged that the Bill of Entry is "a rival publication," but that it is carried on by the "clerks of the Customs on "their own account, and for their own benefit," and "that,

"rightly or wrongly, the merchants, in fact, believe that "the clerks favour it at the expense of the Government "Returns, which it is their duty to prepare." This is indeed a grave charge, but, happily for the much maligned clerks, it is untrue; and my confidence in your fairness and impartiality is such that I believe if I demonstrate its injustice you will willingly publish the refutation.

The Bill of Entry clerks who collate, prepare, and arrange for publication the information contained in the Bill of Entry, have nothing whatever to do with the preparation of the Board of Trade Returns, and therefore the more than insinuation, that they as the paid servants of the Crown, which they are not, "favour their own organ at the expense of the Returns "which the Government issue," and which it is erroneously alleged that "it is their duty to prepare," utterly falls to the ground. I have good reasons for knowing, too, that the majority of the mercantile public do not believe in so grievous an imputation on the respectable body of men thus thoughtlessly traduced.

Having been a director for more than 20 years of the Customs' Fund, to which the Bill of Entry belongs, above half of which period I have had the honour to fill the office of president, I may claim to speak with some authority; and I am sure that I am expressing the sentiments of my colleagues as well as my own, in saying that were the clerks of that department obnoxious to the charge of gross, systematic infidelity made against them, their tenure of office would not be worth an hour's purchase after the discovery of their culpability. As, however, the charge is inapplicable to the Bill of Entry clerks, the insinuation intended to be conveyed is probably directed more particularly against the clerks of those branches of the Customs' Establishment, from which is derived much of the information contained both in the Bill of Entry and the Board of Trade Returns.

By virtue of the Royal Letters Patent of the Bill of Entry, access is had to the documents in those branches for the speedy supply of information valuable to the mercantile body; but before it can be said that the clerks of those branches, in giving access to the papers, or furnishing the required information, neglect their duty to the Crown, to the detriment of the Board of Trade Returns, it must be proved that those Returns do not fulfil to the letter the directions of the Board of Trade, as to the form, matter, extent, time of preparation, and indeed every other requirement. Were the clerks to depart from the routine prescribed, they would be guilty of dereliction of duty, but this cannot be justly imputed to them; such being the case, it is obvious that these clerks are not responsible for the alleged imperfections of the Board of Trade Returns.

The whole subject resolves itself into this. The Bill of Entry was established for the purpose of supplying current commercial information which might be useful to the mercantile community. It has undergone many changes and improvements, and has been carefully adapted to meet the wants and wishes of that body—hence its popularity. It varies in form and matter with the requirements of the trade of the different localities at which it is published. The patent right, under which it was issued, was purchased by the directors at a cost of no less than 62,000*l*, with the laudable object of applying the proceeds to a benevolent fund.

The Board of Trade Returns are designed for a totally different purpose. Embracing the whole of the imports and exports of the United Kingdom, they are collated at each port on the same principle, regardless of special interests, or the commercial wants of the places of publication. National and statistical,—useful for general purposes, comparison of the accounts of one period with those of another, furnishing important bases for the regulation of fiscal or State policy,—they are doubtless of great value; but it is evident that they are not calculated to answer the same purpose as the Bill of Entry, which is local and mercantile, and containing that daily information which experience has shown to be necessary for the use of the subscribers.

Is it then, I would ask, just to attempt to destroy the Bill of Entry because it meets the wants of the mercantile body, and evidences its popularity by its growing circulation, whilst at the same time it aids a benevolent purpose in favour of a deserving because prudent class of men?

The one cannot serve the purposes of the other, and two publications so dissimilar in form and character surely cannot be injurious to each other; and I trust we shall hear no more of that narrowminded jealousy which would sacrifice the one because the other does not possess the same hold on public favour and sympathy.—I am, Sir, your obedient servant,

F. J. Hamel.

Custom House, London, January 11, 1871.

We have great pleasure in printing this letter, because it contains all which can be said in favour of the Bill of Entry, stated almost officially by a most qualified person, and in so concise a way that it is easy to reply to it.

Mr Hamel says that defects in official returns devised only 20 years, cannot possibly be due to an independent publication more than 200 years old. Why not? The excellence of many things is impaired by something older than themselves. Why should not the goodness of the Board of Trade returns be so too? Generally that what exists before and blocks the way, is exactly what does injure a publication. Why is it impossible that what happens so often should not happen here?

We believe it does happen. We say that at each port there ought to be issued daily (or frequently) an authentic official publication giving the particulars as to the trade of that port. In this document, as we believe, the mercantile public of that port would take a keen interest, they would read it, they would examine it; and if there was much gross error, would at once report it to the managers, and have it corrected. Now, no one can watch, correct, or examine the monthly Board of Trade Returns for the whole country. No one has any means of knowing the truth on the subject except from those returns. But at each port the mercantile public do know a great deal of what happens at that port. They do not like material mistakes being made as to it. Especially in a daily, or in any very frequent publication, they would soon see if there was much wrong, and soon correct it. We should then obtain a "unit of accuracy"—we should have a constant publication of tested correctness appearing at brief intervals in each locality. From the summation of these returns we should get others for longer periods, and for the whole kingdom; and those returns would be fairly correct, because they were made up from reasonably accurate data. The only difficulty is the first step—to obtain a constant local publication, to be heedfully watched by the persons who know the fact.

But here the "independent publication of 200 years' "standing" stops the way. This gives, in a half-official and half-surreptitious way, a part of the particulars as to the daily trade of each port; but it does not give them in such a form that they can be used as the basis of returns for a longer period, or for the whole country. As Mr Hamel says, it is "an independent publication." The clerks of the Bill of Entry "have no hand" in framing the national returns, and it would be absurd to have two documents issued from the Customs House of each port as to the trade of each port. At present we have a document which is not what we want, as a basis for accurate national returns. We cannot have what we want until we are rid of that document, and therefore it is true that the present document—the Bill of Entry—is, as we said, "the main source of the present "defects."

Mr Hamel says that he has been twenty years' a director of the fund to which the Bill of Entry belongs. But we hope he will not be offended with us if we say that if he was newer to the subject he would judge it better. Familiarity, as is common, has blunted his perception of the monstrosity. If it was now proposed in any office, say the Foreign Office, to give the clerks of it a property in the publication of official facts, would any one think of discussing the plan seriously? Every one would laugh at it. But it is no laughing matter where it exists. It inevitably brings on the clerks the calumnies which we mentioned. It will always be said that they prefer their semi-official publication to its real official rival; and, therefore, theirs is right, and the official wrong. We have no doubt Mr Hamel is right in saying that this cruel accusation is unfounded; but it has long been said, is said, and will be said while the present system lasts. It arises out of the essence of it.

The antiquity of the Bill of Entry is no warrant for its goodness. It began in the reign of Charles II., and is exactly like an institution of that time. In that reign there was never any money in the Treasury, and persons who had interest with the Crown, not being able to get money, had to take

the best substitute they could. Nothing was so common as to give a man "a light house"—that is, let him keep up the light house, take the light dues, and make what he could of it. Just so a private family with interest got the Government to give them the exclusive right of publishing the Custom house returns, and they made a property of it for a century and a half. It was then sold to the Customs fund, who have it now. But a worse origin cannot be found. It was a grant from a needy Treasury of a private monopoly in public information.

We learn from Mr Lefevre's report that the patent of the Bill of Entry has only nine years to run, and Mr Hamel may be sure that it will not be renewed. Now that the public know what it is, the thing will not bear discussion. The very able document which we have mentioned even recommends that the patent be bought by the public and the "Bill of Entry" abolished out of hand; and we much wish that this advice had been taken.

THE NEW EMPEROR OF GERMANY.

THERE can be little doubt, however this war may end, that William the First, Emperor of Germany, is at this moment the most prominent, perhaps the most powerful, personage in the world, and as little that he is one of the least understood. He does not appear to be understood even by his own subjects, who despised him in 1848 as a martinet prince just fit to command a regiment, fought him in Parliament as a mere despot from 1858 to 1864, doubted him in 1865, and from 1866 to 1871 have worshipped him as the "hero king," but who have never given the world any intelligible account of him. To observers abroad, he appears to be a complete puzzle. Frenchmen, and in a less degree Englishmen, fail to understand a monarch who is in his public capacity a conqueror and in his private one is, after an ancient orthodox fashion, a strong believer; who never gives any impression of capacity, yet never fails in any of his designs; who is a strong Legitimist but overthrows princes; who is personally not unkindly, but who can deliberately lay waste a great country rather than not enter its capital as a conqueror; who has selected feeble men for his civil Ministry, and yet has promoted men of genius in the army and the Foreign Office. So little is he understood, that although he is as completely master as any King in Europe, there is a disposition to overlook him, and to attribute every act of his Government to men like Count Bismarck, who are supposed to be more easy to comprehend. This ignorance is very natural in the case of a Sovereign whose immediate action on the Government is very carefully concealed; but we feel convinced that part of the ignorance arises from the disposition of observers to expect too much, to assume that any man who fulfils a great duty well must of necessity be in some way or other a great man—an opinion which is not necessarily true of kings.

King William of Prussia—we drop the new title for a moment—has always appeared to us, since 1848, to bear a close resemblance to our own Wellington,—not the Wellington of the Peninsular War, a man with decided military originality, and not the Wellington of most histories, a purely ideal figure, but the Wellington who was known among us during the long peace. In other words, the King of Prussia is, as a soldier, a most excellent German officer of his family type,—that is, an officer with no particular originality or even knowledge of war, but with a desire amounting to a passion for efficiency in his army, which he trains upon the single theory that it will be in action next week; and as a politician, a Conservative of a somewhat separate kind, a Conservative because the old system makes administration easy. As he is King, quite absolute in the army, and very unrelenting in his exaction of service, he secures efficiency, more especially in a department to which he has paid especial attention—the mobilisation of his great force,—a department of unusual importance in Prussia, where the object is to keep a great army with three-fourths of the men living in their own homes. Any good officer left to himself would secure this result for a regiment, and the King does but supervise the work in many regiments. For general organisation he selected an officer, General von Roon, who is a repetition of himself; and for strategy, General von Moltke, an excellent strategist, who, however, is, as the siege of Paris shows, capable of error, and who inclines to consider war as a science rather than an art, to rely on principles quite as much as on original expedients. Wellington in the King's position would have pursued much the same course, and have battled with the country for his system with much the same tenacity. Indeed he did battle for it, only not being King, and commanding in a constitutional country, he used evasion instead of resistance as his weapon. He understood his army, he said, and the country; and the only way to keep his army as he wished it was to hide it, to keep it unobtrusive so that the Commons never thought about it. The King, a man of the same type, was as little violent as was consistent with success, struck no *coup d'etat*, made no effort to conciliate, but with immovable obstinacy adhered to his notion, which was that a soldier to be at his best required three years' training and not only two. It was, as it proved, an accurate idea, but it is just the sort of idea a competent officer would form, and there is nothing original about it, except the scale on which it is applied. In action the King trusts his military staff entirely, does not interfere,—in one great action he was two miles from the commander-in-chief,—and only by asking for the plans, compels his generals to think them very carefully out. In his government of the conquered country, he displays just the same order of mind. Wellington was far from a cruel man, but he stormed Badajos, and though furious at the horrors which followed, was furious first of all at the breaches of discipline those horrors involved. About requisitions, he could be as stern as the King, and, like the King, sometimes overlooked outrages on property as evils difficult to prevent.

In the King's system of internal government the same similarity is observable. Wellington was in politics a narrow Conservative, mainly because he did not see how on other principles the "King's Government could be carried on," how the country could be administered,—and that is just King William's mental position. One of his few utterances which have been vividly remembered was that "the King must "remain the pivot of power," and he uttered it not from any fanatic idea of kingship, but from an inability to see how a group of professors, merchants, and the like, assembled in a Chamber, could do the work of administration. Wellington did not want the King to be despotic, but could not comprehend how, if the Government could not control the boroughs, the business of the country was to be got through. The Commons would control it, and the Commons could not do it. There is no desire for tyranny in King William, but an honest want of capacity to understand how, without an active, hardworking commander-in-chief, with a good deal of power, a State is to get along at all. That it could get along of itself he does not believe, and neither did Wellington; while both hated corruption, not as an immoral instrument of Government, but as a bad one—very troublesome, very wasteful, and sure, as Wellington wrote when in Ireland, to come to an end at last.

The action of such a mind in foreign politics, under circumstances like those of Prussia, is not very difficult to foresee. The King being a good officer, well acquainted with military matters, and fond of efficiency, would wish to round off his States, thus making them far more manageable; would desire position for his country, especially in Germany; and would be very reluctant to break with any great tradition of his people,—and that is what King William has been. He was delighted to acquire Schleswig-Holstein and with them a seaboard, and all the enclaves in his dominions, and to be rid of a perpetual obstacle like Austria, which interfered with the ascendancy of his State in Germany; but he did not particularly want a grand Germany, or to be Emperor, or to be anything but a successful military King of Prussia. No kind of alliance annoys him, whether with a State like Russia, or a State like Italy, provided it involves definite advantages—something visible and not a merely spiritual gain. The notion of having unwilling subjects neither attracts nor dismays him. If they are Germans so much the better; but he fought very hard with his counsellors to be allowed to take Bohemia, where the population would have been hostile to him. He minded that no more than Wellington minded having Portuguese in his army. They were not as good as Englishmen, and they were difficult to govern, but still they were an addition to his strength. Like Wellington, too, the King, while spending his life in war, dislikes it, would if he could get his way without

it avoid it; but still, the necessity arising, he could put cannon on a bridge to mow down unarmed men. He would not destroy Paris if he could help it, but he will have his provinces, and he tends to become harder in his demands, because the resistance he finds is not quite dangerous enough to excite his respect. He is in fact as we read him, a very efficient officer — not general — of Tory opinions, whose self-esteem has been a good deal raised by success, and who judges of policy by a narrow though honest code—the visible and immediate interest of the country he governs. If his people subsequently thwarted or attacked him he would think them rather ungrateful, keep up iron shutters perhaps while he lived, but would go on making the army as good as he could, and keep down the Commons as much as he could, quite convinced that he was doing his duty, and was saving his country from possible misfortunes.

BUSINESS NOTES.

THE TRADE OF LANCASHIRE.—The reports from Lancashire as to the prosperity of the manufacturers continue to be most favourable. The events of the war have undoubtedly disturbed the cotton trade, and we fear the export trade to India has lately been overdone; but the manufacturing department of Lancashire business is certainly for the present flourishing. As Lancashire had made little money for a good many years in consequence of the cotton famine, the effect of its new prosperity cannot but be felt widely throughout the whole trade of the country; and it is undoubtedly a principal cause of the activity of the home trade, which is everywhere manifested notwithstanding the war. As usual, the prosperity of the Lancashire manufacturers is visible in the steady fall of price in the raw material. The fall was precipitated by the war, which closed some continental marts for cotton, and contributed to ruin speculative movements for a rise; but unlike other falls of price caused by the war panic, there has been almost no reaction, and prices on the whole have remained at a low level, if they have not rather tended still farther downward. A comparison of some of the principal prices at Liverpool before and since the war shows the importance of the downward movement:—

	July 1, 1870.	July 30, 1870.	Oct. 14, 1870.	Dec. 17, 1870.	Jan 13, 1871.
	d	d	d	d	d
Sea Island—Ordinary	16	14	12	12	12
Do Middling	18	16	15	15	17
Upland—Ordinary	8½	6½	6½	7¾	7¼
New Orleans—Mid.	10⅜	8	8¾	8½	8⅝
Pernambuco—Ord.	10	7¾	8¼	8	7¾
Do good fair	10¾	9	8⅞	8⅞	8⅞
Dhollerah—Middling	7½	5½	4⅞	5⅛	5⅛
Do good fair	8½	6½	6⅛	6⅝	6¾

The difference between the first column, showing the price just before the war, and the last, which gives the price of last week, is very marked; while it will be observed, by comparing the column for 30th July with the last, that hardly any advance to speak of has taken place since the drop which the war occasioned, the figure in several cases being lower than the fall which was then established. That a great change in the level of cotton prices has taken place is still more apparent, if we compare the figure now with the corresponding period of last year, when the cotton industry on the whole had begun to be active. The comparison is:—

	Jan. 13, 1871.	Same time, 1870.	Fall—Amount.	Fall—%
	d	d	d	
Sea Island—Middling	17	21	4	19
Do fair	19	23	4	18
Upland—Middling	7⅛	11⅛	3⅛	33
New Orleans—Middling	8⅛	11⅝	3½	30
Pernambuco—Middling	8¼	11⅜	3⅛	27
Do fair	8⅞	11¾	3¼	27
Dhollerah—Middling	5⅛	8¼	3⅛	39
Do fair	6⅝	9⅝	3	33

So great a drop in a twelvemonth, with little irregular speculation for a rise, must have been the most favourable condition for great manufacturing profits. In any case the definite settlement of prices at a low level places the entire industry on a more stable footing, and its occurrence at a time when war interrupts the business of rivals who were lately thought to be threatening, is to a certain extent a piece of good luck for Lancashire, which will go far to establish more than ever its manufacturing supremacy.

THE LONDON JOINT-STOCK BANK.—At the meeting of this bank, on Thursday, the chairman, Mr F. Boykett, made the interesting statement that an unexpected sum of 20,000*l* would be carried to the profit and loss account. In 1866 the board had considered it prudent to transfer 40,000*l* to a reserve fund for contingent losses upon certain securities, but many of the companies had been liquidated, and at least 20,000*l* would remain as an asset, and be re-transferred to the profit and loss account. Coupled with the statement that the bank has not yet carried to the account of profit and loss any part of the gain upon the North German loan, the fact mentioned by the chairman holds out a good prospect for the next dividends of the company, if business is ordinarily good.

THE CLEARING-HOUSE RETURNS.—There is a noticeable change in these returns since the beginning of the year—the little increase over the corresponding period of the previous year, which was the characteristic of the close of last year, having given place to a slight decrease. The following is a comparison, day by day, for the two weeks over which the returns extend:—

	1871.	Corresponding day, 1870.
	£	£
January 5	12,627,000	14,950,000
6	13,026,000	12,696,000
7	11,916,000	13,098,000
9	10,888,000	10,419,000
10	11,730,000	11,896,000
11	11,291,000	9,740,000
Total 1st week	71,478,000	72,799,000
January 12	9,809,000	10,865,000
13	21,081,000	26,473,000
14	15,007,000	18,156,000
16	13,183,000	12,974,000
17	12,850,000	12,339,000
18	11,598,000	10,594,000
Total 2nd week	83,528,000	91,401,000

These figures show a decrease of 1,321,000*l* the first week, and of 7,873,000*l* the second, making a total of 9,194,000*l* to date, or about 5.6 per cent. on the aggregate clearing. A large part of the diminution arises from the paucity of business on the last Stock Exchange settling day, viz.:—

	£
January 14, 1870	26,473,000
January 13, 1871	21,081,000
Decrease	5,392,000

But there is a slight diminution on almost every other day as well. It will now be a problem whether this diminution will continue, as it must do if the volume of transactions is at length contracted a little in consequence of the war.

THE METROPOLITAN DISTRICT RAILWAY.—We have before us a most interesting pamphlet, by "E. C. P.," on the subject of the approaching completion and consequent prospects of the Metropolitan District Railway.* It is expected that the Cannon street station of the Company will be thrown open in May next, thus giving real access to the heart of the City from all the company's stations, in place of access only to the circumference of the City at Blackfriars. So great a change should have a far greater effect on the company's traffic than the similar extension of the Metropolitan Railway from Farringdon to Moorgate street. In the case of the Metropolitan Railway, a terminus at Farringdon street was almost as good for the company as a terminus at Moorgate street, for there was no competition; but now the Metropolitan District has undoubtedly fewer passengers Citywards, because people, at the cost of a slightly longer journey, can travel from its stations to Moorgate street—which of course is many times more convenient than Blackfriars. When the District line, however, has a station at Cannon street, the superiority of Moorgate street as a terminus for many passengers will disappear, and the shorter journey on the District line, even if the fare is not less, will cause Cannon street to be preferred. Another change besides will take place in June, when the District Company's notice to terminate the agreement for its working by the Metropolitan will take effect. These are quite sufficient reasons why the opportunity should be seized to estimate the future prospects of the line, and we can recommend the pamphlet

* The Metropolitan District Railway. Its Approaching Completion and Consequent Prospects. By "E. C. P." London: Mann, Nephews

both to those who look at the question in a business view, and to others who are anxious about the result of the second great experiment in Metropolitan railway enterprise. As to the author's general conclusion—that the District line must improve immensely—we think there can be no room for dissent. Notwithstanding what we must consider the disadvantage of its passing along the Embankment instead of underneath the Strand and Fleet street, the line accommodates as populous neighbourhoods as the Metropolitan, and the rapid increase of the traffic since the extension to Blackfriars shows what room there will be for development when good access to the heart of the City is added to the other local advantages of the line. The traffic interchanged between its stations and those of the Metropolitan, with the exception of the City stations of the latter, must also continue to increase; and as we have seen, the *District* line will not lose by its passengers ceasing to go over the Metropolitan to the City, because they go to Cannon street instead. The author perhaps introduces more doubtful matter when he anticipates that the Metropolitan District line will be as serviceable to several great main lines as the Metropolitan is to the Great Northern, Great Western, and Midland. The suburban traffic of the South-Western, he thinks, may find the numerous stations of the District line, with which it is connected by the West London Junction, more convenient than the single terminus of Waterloo, and will be largely increased. There are also suburban trains which the London and Brighton, London and North-Western, Great Western, and Midland, could advantageously run to and from the Metropolitan District; while the stations of the North London line could be connected with the Metropolitan District, as the stations of the Metropolitan are connected with the latter now. Somehow or other it seems difficult to get such arrangements in order, the South-Western, for instance, being able to make comparatively little use of the Cannon street station of the South-Eastern line; but the Metropolitan District, like the Metropolitan, must undoubtedly receive increasing gains from this source. The experiment may thus be looked forward to with very great interest, especially as the recent low dividends of the Metropolitan Railway, caused to so great an extent by the locking-up of capital in surplus lands, have perhaps created an exaggerated impression of the difficulty of making Metropolitan lines pay.

THE BRIGHTON RAILWAY DIVIDEND.—The dividend which has just been declared of 1½ per cent. per annum is certainly the most hopeful for this company since the discovery of its difficulties a few years ago, and the desperate and unavailing remedy which was tried of a wholesale increase of fares. The satisfactory feature of the company's position is not merely the payment of this dividend, but the payment of it after providing for 29,000*l* of arrears of preference charges, and 16,000*l* for compensation remaining from the New cross accident. But for the special arrears which have swept away the net revenue, the traffic of the half-year would have sufficed to pay 2½ per cent., if not more, and at least ½ per cent. would have been added by new traffic. The Brighton Railway has thus perhaps turned the corner at last, and is participating in the revived prosperity of the country, though the war must of course have specially helped it by keeping holiday-makers at home. It may be hoped that advantage will be taken of the improvement which has followed a reduction from the high point to which fares were carried to continue this policy of reduction. There is certainly no small cause for believing that the high fares have checked the residential traffic, and the company should be content with one such dangerous experiment. The report contains the following interesting table, showing how much new economy in working has had to do with producing a dividend:—

	Years.			
	1867.	1868.	1869.	1870.
Average miles of railway open...	329	346	364	369
Miles run by trains.....	4,097,409	3,999,620	4,211,507	4,509,182
Gross revenue	£1,223,610	£1,269,334	£1,266,661	£1,283,764
Working expenses and renewals, exclusive of compensations ...	£786,570	£654,661	£617,907	£614,059
Per cent. of revenue	64½	51½	49	48
Per train mile	3s 10d	3s 3½d	2s 11d	2s 8¾d
Compensations.....	£33,039	£10,006	£50,278	£39,706
Per cent. of revenue	2¾	¼	4	3
Per train mile	2d	½d	3d	2d
Total working expenses and renewals.....	£819,609	£664,667	£668,185	£653,765
Per cent. of revenue	67	52½	53	51
Per train mile	4s 0d	3s 3½d	3s 2d	2s 10¾d

There has been comparatively little diminution since the drop in 1868 from the extravagant figure of the previous year; but the directors deserve the more credit perhaps for these latter reductions than for the first. It is perseverance in economy which is most necessary and difficult, and the last slight improvements tell greatly upon the dividends.

DEFAULTING TRUSTEES.—The full Court of Appeal in Chancery has just had before it, in Middleton *v.* Chichester, what seems an unnecessary question as to the construction of the Debtors' Act, 1869, abolishing imprisonment for debt except in cases of default. One of the exceptions mentioned is that of "default by a trustee or person acting in a fiduciary capacity, and ordered to pay by a Court of Equity any sum in his possession or under his control." It was now contended by the trustee that the latter words did not apply to him, because the money in respect of which there was default was not "in his possession or under his control"—he having spent the money. The Lord Chancellor and the Lords Justices, however, have decided that the words are simply a mode of describing trust monies which a trustee has received, and which the law assumes to be in his possession or under his control until he accounts for them in a proper manner. To hold the contrary would involve the absurdity of exempting a trustee who had added the offence of spending trust money to that of misapplying it or keeping it back from any liability, whereas the intention of the Act was to punish such trustees, since ample means existed for compelling those who had money to fulfil the orders of the Court. Hitherto no one had thought of putting in his answer that the trust fund had been squandered; but "the intention of the Legislature was simply that "the order made by the Court should be regarded, and finding that the Court had ordered this defendant to pay 4,000*l* "admitted by his answer to have been sold by him, was it to "be said that he must be in the possession of the actual money "that was received by him in the same bank-notes or "sovereigns? Upon such a construction a man might evade "the process of the Court by making away with the trust "funds, although he was owner of a landed estate worth "100,000*l*; for no doubt the actual money would not in such "a case be in his actual possession." On technical grounds the order of the Court below was reversed, but on the main ground the trustee's argument was rejected.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, Jan. 18.

Owing to the recent fighting in the vicinity of Le Mans, mails have been prevented from arriving from Bordeaux. We consequently do not know whether or not the Government has begun to turn to account the new organisation of the Bank of France, which [see last letter] it has taken on itself to decree, and which, *par parenthèse*, is in violation of the law instituting that establishment. But the belief, however, is that if it has not already commenced making the bank satisfy its requirements it will do so very shortly. The belief also is that the result of these requirements will be a deluge of paper, either in the form of bank notes or otherwise. A report is, besides, spread that it is contemplating an issue of new coin, to be made of a metal of less value than silver, but to pass as silver. It is positively alarming to see the Bordeaux gentlemen meddle with the currency. They know nothing at all about the matter, and cannot touch it without doing incalculable mischief.

Another new loan has for some time past been spoken of, and it has even been alleged that London bankers have consented to raise one of considerable amount. Without placing much credit in what is said on this subject, it may be well to observe that the authority of the delegated Government to borrow having been questioned by many persons in the 10,000,000*l* affair, and having been not recognised, not to say repudiated, by the Minister of Finance at Paris, there would be imprudence in accepting it in a new negotiation; added to which there is the danger that any engagements that might be entered into with respect to payment of interest or redemption would be kept in paper, or in metal of more nominal than real value.

Incidents revealing serious embarrassments in the Treasury are fast occurring. In addition to those already mentioned, we now learn that not many days back it proposed to pay half in cash and half in bills for large quantities of grain purchased from Marseilles dealers; but these latter insisted on being paid entirely in cash, and after some little difficulty they were so. The Marseilles traders represented that they were under engagements to pay their sellers abroad in coin, and that if they did not keep them strictly, further supplies might be cut

off. And now that they have got their money they express the fear that the credit of their market will be shaken when it becomes known that the Government, which is likely to be for some time to come their principal customer, has already had to ask for time for part of its payments. Another incident is this:—The obligation for newspapers to deposit caution money was abolished by the Republic as one of its first acts; but the Government has not yet found it convenient to reimburse the amount, not inconsiderable, lodged in the Treasury; and we now learn that it is about to decree that it shall be retained to the 1st January, 1872, but that interest of 5 per cent. shall be paid on it; or that if the proprietors prefer, Treasury bills payable at the same date and bearing the same interest shall be given for it.

The Treasury is in the habit of accepting bills at long dates in payment of cuttings of timber and firewood in the State forests, and in certain cases of Customs' dues and indirect taxes. In consequence of the investment of Paris, it now notifies that the subscribers of such bills in the country "who are able to pay them" may deposit the amount in the hands of Receivers-Generals of taxes, who will give receipts, which will be hereafter exchanged for the bills themselves.

A "Commission of Armament" was some time back instituted to make purchases of arms and of cannon, which had previously been effected by the Ministry of War. A letter of the president of this commission, just published, states that it has obtained Chassepots for 100f for which 127f had been given; Remingtons for 95f instead of 115f; Sniders for 90f instead of 120f; Peabodys for 90f instead of 110f; and batteries of artillery for 36,000f in place of 75,000f. Here we see how shamefully the public money has been wasted.

A "review of the Bourse of Paris," dated the 8th, says:—"The liquidation of the end of December has produced a certain perturbation in our money market, which had previously energetically resisted the terrible shocks it has had to endure during the last few months. The Threes, which at the beginning of the year were as high as 75f, fell a few days back to about 50f, and other securities have fallen also. Certain persons have had to sell securities in order to live, and others have had to make money of theirs to meet their engagements of the end of the year, or in liquidation. These are the principal causes of the depreciation which the Threes and most other investments have undergone. The influence of a situation rendered gloomy by the terrible phase through which the siege of Paris is passing has also been felt on the Bourse. The man who has heretofore been firm, living from day to day without preparing for the morrow, may now without weakness think not of himself—he braves the perils to which duty calls him—but of those whom he may have to leave behind him, and he provides for them. In fact, in the situation in which we all are now, if astonishment can be felt at anything, it is that offers and sales have not been more numerous and depreciation greater."

The Bourse quotations received are as follow:—

To the towns of Rouen, Bordeaux, Havre, Limoges, and others that have on their own responsibilities issued notes for local circulation must now be added Belfort. That place has long been besieged by the Prussians, and its military governor, in concert with the French prefect of the Haut Rhin, who has sought refuge there, has decreed the issue of "siege notes" of 5f and 10f, which are to possess forced currency. As in other places, they are to be given against a deposit of Bank of France notes; but whilst elsewhere the deposit is made by private persons in want of small change, at Belfort it is to be effected by the public offices. The bank notes are to be put in a place of safety, and "if necessary annihilated," a register of them being first made by the local authorities. It would appear from this enactment that the commander is very anxious to prevent the notes from falling into the hands of the Prussians; but if they take the town and do not find any, they will, it is to be presumed, not hesitate to impose a contribution on the inhabitants.

A Havre newspaper gravely proposes, as one means of punishing Germany for the harm she has done and is doing France, that she shall in future be rigorously interdicted from trading with this country; and finding from Customs' returns that in 1868 she sent into France 270,000,000f worth of German products, whilst France only sold her 216,000,000f worth, it appears that "the loss to Germany" from the interdiction will be at least 54,000,000f per annum. One cannot help feeling surprise at finding such an argument in a journal of a great commercial town like Havre. It is a proof how sadly the study of political economy is neglected in France, and how little the great commercial reforms of Michel Chevalier have, notwithstanding the manifest good they have done, dissipated economic ignorance. A little reading and reflection would tell this sapient Havre editor that his proposition to stop trade between two conterminous countries is absurd, and that if such a thing were done France would be the loser—first, by closing the German market against herself, and next because she buys German products not to favour Germany, but because they are better or cheaper than she can obtain them elsewhere.

From Rouen, Elbœuf, Dieppe, and Fecamp, come the sad tidings that the working populations are suffering terrible distress. In Rouen we are told "misery is frightful," and at Elbœuf, that "it presents a horrible spectacle, the like of it never having been seen before." The streets of Dieppe are stated to have "a desolating aspect," as bands of women go about begging; and to Fecamp, the Government at Bordeaux, notwithstanding its pecuniary straits, has had to send 10,000f to silence the clamour raised by the wretched inhabitants. And these are all Norman towns. In other parts of France the situation is as bad. Unfortunately, too, there is a prospect of worse things still, inasmuch as the thousands of men who are now fed, clothed, and lodged at the public expense for soldiering, and the thousands of women who are employed in making uniforms for them (by which by the way they earn more money than in peace time) will before long be cast off, and will find little or no work to do. The Prussians on their part, instead of trying to relieve the distress as they at first did (at Rouen, for example, they set people to work at stone breaking, and tried to get in cotton for the factories), have within the last few days acted as if they wanted to increase the misery of the people as much as possible. At Bolbec, which is a few miles from this town, they have, for example, burned down a fine chateau, and farm buildings, and houses, though the destruction could answer no military purpose whatsoever; and a little beyond that place, at Merville, they have, in pure wantonness, partially blown up a viaduct of the railway, which was a very fine structure.

It may be remembered that when a few weeks after the investment of Paris railway companies were called on to pay interest on shares in accordance with their usual custom, they said they could not do so, because from the stoppage of traffic on part of the lines, and the diminution of it on others, they were not certain that, after paying working expenses, and providing for the interest and redemption of bonds, which, according to the statutes were obligatory, sufficient for a distribution to shares would remain. This announcement was unpleasant to shareholders, but left bondholders perfectly tranquil. In due time the Orleans and Mediterranean Companies made known that the interest on bonds would be paid at the stations of their lines not in occupation of the enemy. A similar announcement was expected by the bondholders of the Western Company; but none appearing, a committee of them, formed at Honfleur, wrote to the directors established at Rennes to ask for an explanation. They have received this answer:—"Our board some time back ordered, for the convenience of our bondholders, in conformity with Article 15 of our statutes, that coupons should be paid at the stations. But that cannot continue to be done, whilst communications with Paris, the seat of the company, are intercepted. It is then, in point of fact, that legal oppositions to the payment of coupons must be made, and the stations cannot be advised of them, the company accordingly, to its great regret, is under the necessity of suspending at stations the payment of the half-year's interest due on 1st and 6th January. But it will continue to be made at Paris, and as soon as communications with the capital shall be re-established, the company will hasten to render to its bondholders the facility of being paid at stations." Seeing that the main line of the company—that from Paris to Rouen and Havre—has from about the middle of September been closed to traffic, and even in part destroyed, and that the various extensions, never very profitable, have produced little, it is probable that the real reason for the non-payment at stations is the want of sufficient resources. But of course the directors could not admit such a thing, and so they have recourse to a pretext—a pretext which is perfectly legal, and under the circumstances justifiable.

The interest of 9f 50c, due 1st January, on the shares of the North-Eastern Railway is recent creation, and that of 7f 25c on the bonds of the Orleans to Rouen, are now being paid at Brussels. But it is notified that the payments in that city cannot hereafter be invoked as a precedent.

The Tribunal of Commerce of Havre has decided a question of some interest. In September great quantities of goods were sent from this port to England for safety. Among them was some tallow, bought by a trader in the town, which, at his request, had not been delivered to him, because the immediate payment of it was not convenient. Subsequently the tallow was brought back, and the seller demanded that the cost of the voyage to and fro should be added to the price agreed to be paid. But the buyer maintained that the expedition to England having been made without consulting him, he ought not to be compelled to pay for it. The Tribunal, however, held that it was "a conservative measure," which circumstances justified, and that he must bear the cost.

The commercial report of Havre records the following sales in the week ending Friday, the 13th:—

Cotton.—228 bales, on Friday: New Orleans very ordinary, 104f the 50 kilogs; Oomrawuttee good ordinary, 85f; Tinnevelly ditto, 80f; Madras ditto, 72f.

Coffee.—3,830 sacks Haiti, 94f to 104f the 50 kilogs; 600 Santos prices not stated; 1,200 Mysore, 105f 50c; also about 6,000 sacks different sorts not detailed.

Sugar.—457 hogsheads French West India at the advanced price of 53f, bonne quatrieme, the 50 kilogs, and 69f 50c to 73f, usine, duty paid; 1,300 casks Havana, 38f, No. 12.

Tallow.—140 tons Montevideo ox, 53f the 50 kilogs, and some few lots ditto, 53f to 55f; La Plata sheep, nominal, 51f to 52f.

Since Friday the sales have been:—

Cotton.—170 bales at 104f to 105f for very ordinary New Orleans, and 84f to 85f good ordinary Oomrawuttee.

Coffee.—243 sacks Rio washed, 110f the 50 kilogs, duty paid; 90 Porto Cabello, 121f, ditto; 292 Haiti, 102f 50c and 104f, duty paid.

Indigo.—5 chests New Granada prices not stated.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and Jan. 14, 1871:—

REVENUE AND OTHER RECEIPTS.

Bank of Ireland		600,903		295,637	
			1,227,617		1,020,740
Totals			60,709,941		62,237,032

The following are the Receipts on account of Revenue during the week ending Jan. 14:—

	Receipts of Week Ending Jan. 14.
	£
Customs	313,000
Excise	402,000
Stamps	211,000
Taxes	29,000
Income tax	264,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	53,098
Total	1,272,098

The total receipts of the previous week were 789,642*l*.

The Exchequer issues of the week on account of expenditure were 1,100,000*l*, viz.:—

	£
Interest of debt	700,000
Other charges on Consolidated fund	nil.
Supply services	400,000
Telegraph services	nil.
	1,100,000

During the week the cash balances have decreased as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Jan. 7	909,292	879,403	1,788,695
— — 14	626,714	600,903	1,227,617
Decrease	282,578	278,500	561,078

The other receipts to date were 645,676*l* less than last week. The other payments were 87,500*l*.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Board of Trade have received, through the Secretary of State for Foreign Affairs, a law regulating the tonnage and anchorage dues in the Ports of Portugal, and in the adjacent islands.

There were at the end of last year 1,975 miles of railway in Ireland, 151 of which belonged to the Belfast and Northern counties, 107 to the Dublin, Wicklow, and Wexford, 195 to the Irish North-Western, 437 to the Great Southern and Western of Ireland, 426 to the Midland Great Western of Ireland, and 122 to the Ulster Railway Company. The total expenditure on all lines during the year for maintenance of way, works, &c., was 259,873*l*; for locomotive power, 279,092*l*; for repairs and renewals of carriages and waggons, 68,491*l*; and for traffic expenses, 233,369*l*. General charges amounted to 58,829*l*, rates and taxes to 53,337*l*, compensation for personal injury to 9,245*l*, compensation for damage and loss of goods to 8,938*l*, legal and Parliamentary expenses to 10,942*l*, steamboat, canal, and harbour expenses to 4,203*l*, and miscellaneous working, not included in the foregoing, to 43,299*l*. The total working expenditure was 1,029,618*l*, and the total receipts, as given in the traffic returns, 2,025,911*l*, making a proportion of expenditure to total receipts of 51 per cent. The rolling stock consisted of 466 locomotives, 1,072 carriages for the conveyance of passengers only, 971 other vehicles attached to passenger trains, 6,835 waggons of all kinds used for the conveyance of live stock, minerals, or general merchandise, and 341 carriages of other descriptions, making a grand total of 9,685 vehicles, 1,639 of which are owned by the Midland Great Western of Ireland, 898 by the Ulster, 578 by the Waterford and Limerick, 913 by the Belfast and Northern Counties, and 2,445 by the Great Southern and Western of Ireland Company. The total authorised capital on Irish railways amounts to 32,828,218*l*, of which 25,113,610*l* may be raised by shares, and 7,714,608*l* by loans. The total stock and share capital received is 20,644,129*l*, 14,787,002*l* of which is ordinary, 206,825*l* guaranteed, and 5,650,302*l* preferential stock. The capital raised by loans and debenture stock amounts to 6,230,914*l*, and the subscriptions to other companies to 14,305,284*l*. An analysis of the passenger traffic shows that 13,308,677 passengers, as well as 12,007 season-ticket holders, were conveyed during the year, that the passenger trains travelled 5,625,278 and the goods and mineral trains 2,227,408 miles, and that the goods traffic consisted of 355,818 tons of minerals and 798,964 tons of general merchandise.

By a ukase, dated St Petersburg, the 8th December, all private persons and companies are prohibited from issuing documents to bearer, whether in the form of receipts, bonds, or certificates, or obligations, if containing the promise to pay either in money, goods, or other articles.

The rights of those companies, which by their statutes are specially authorised to issue bank notes, cheques, obligations, or deposit receipts, are not affected by this ukase, and the measure appears to be taken in order to protect the banks from competition by railway and other companies, which have of late issued their promises to pay in a shape too closely resembling banking documents.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of January, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresponding Total in 1870.
	Adults and Children	Adults.	Children under 16	2nd week Jan., 1871.	
West district	5,994	9,596	7,201	22,791*	23,994
North district	6,743	14,452	12,325	33,520	30,209
Central district	7,007	8,362	7,100	22,469*	22,484
East district	7,783	12,442	11,574	31,809	32,465
South district	9,431	20,266	19,533	49,113	47,702
Total of the Metropolis	36,851	65,118	57,733	159,702	156,854

* No returns have been received this week from St George's (West District) and Holborn (Central District).

Total Pauperism of Metropolis.—Population in 1861, 2,802,000.

Number of Paupers.	Indoor.	Outdoor.	Total.
Second week of January, 1871	36,851	122,851	159,702

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, Jan. 19, 1870.

The total since the 4th of January, 1871, is 155,006,000*l.*, compared with 164,200,000*l* for the corresponding period last year, showing a decrease of 9,194,000*l.*

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding dates with the present week.	Jan. 23, 1861.	Jan. 22, 1868.	Jan. 20, 1869.	Jan. 19, 1870.	Jan. 18, 1871.

In 1861, greater ease was looked forward to in the money market, the exchange at New York having risen greatly, the position of the Bank of France having improved, and the farmers who had obtained large advances from provincial bankers beginning to repay them. Speculations in cotton was however apprehended, in consequence of the threatened cutting off of the supply.

In 1868, money was plentiful at 2 per cent., with little prospect of change.

In 1869, the money market was stagnant, and the rates charged by bill brokers for the best paper were ½ below the Bank rate. The Conference on the Cretan difficulty had come to a close, with an agreement to lecture Greece on its international duties; and pending the approach of the Parliamentary Session there was a lack of interest in home politics. The new mode of trying election petitions was being discussed.

In 1870, money was in good demand, and an advance in the Bank rate was apprehended. There were numerous calls for new capital, chiefly for foreign loans and in connection with deep-sea telegraph companies. The Irish Land question, and the political changes in France connected with the advent of the Ollivier Ministry, were still the subjects of discussion.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 7,105,767*l.*; in 1868, an excess of 5,838,589*l.*; in 1869, an excess of 3,094,263*l.*; and in 1870, an excess of 1,049,323*l.* In 1871, there is an excess of 4,970,120*l.*

Discount and Money Market.—There is hardly any change to notice, the superabundance of money continuing, and brokers finding it difficult to employ their balances. The rate for short-dated Bank paper is still called 2½ ¼ per cent., but the best bills are readily taken at the lower figure, and the higher is all but nominal. Generally there is little business doing, though in one or two quarters there are reports of a moderate business. At the Bank the demand has been very slack all the week. As we anticipated, the continuance of the suspense and the great abundance of money have brought out several new undertakings and foreign loans, and more important demands are reported as imminent.

Among the features in the Bank return this week is a diminution of 181,000*l* in bullion, the requirements being understood to be chiefly for the continent, and 69,000*l* more have been withdrawn to-day. The Bank reserve, however, is still very strong.

We subjoin our usual quotations for mercantile paper having various periods to run:—

2 to 3 months Bank bills	2⅛	2¼	per cent.
4 — —	2¼		per cent.
6 — —	2⅜		per cent.

3 months Trade bills	2¼	2½ per cent.
4 — —	2⅝	3 per cent.
6 — —	3	3½ per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows:—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1¼ per cent.
Do with seven days' notice	1⅝ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows:—

Vienna	5½ 6	per cent.
Berlin	4½ 5	per cent.
Frankfort	3	per cent.
Amsterdam	3¾ 4	per cent.
Hamburg	4	per cent.
St Petersburg	7 8	per cent.

ENGLISH GOVERNMENT STOCKS.—Early in the week the stock markets generally were dull, and prices went lower, owing chiefly to the realisations consequent on the great advance of the previous week. Later in the week the depression was recovered from, and prices are now a shade better than they were last Friday; but there has been a remarkable absence of business. At no period since the war began has the suspense been greater than it is now. On the one hand, the defeat of Chanzy, and the retreat of Bourbaki from Belfort, have helped to strengthen the impression that peace must come soon; but, on the other hand, the disappointment of the last calculations that Paris could not hold out beyond the middle of January, and communications from trustworthy correspondents with the German army outside Paris, have produced a new feeling of uncertainty as to when Paris must capitulate if not relieved. The meeting of the Conference this week, the reported resignation of Mr Childers, and fears as to the coming Session of Parliament, have also given rise to vague apprehensions. Thus the suspense and accumulation of money continue, while purchases for investment are further checked by the high prices which have already been reached.

Consols, which were last Friday at 92½ ¾, receded on Monday and Tuesday to 92⅜ ½, recovering however on Wednesday and Thursday to 92½ ⅝. The market was weakened to a slight extent by the withdrawal of bullion for the continent, which appears to show that the demands for war expenditure are at last beginning to tell; but the withdrawals are as yet on too small a scale to count for much. New and Reduced, which closed last Friday at 92⅝ ¾, receded during the week to 92⅜ ½, but have since improved. To-day Consols close at 92 9/16 11/16, and New and Reduced at 92 11/16 13/16, the tone of the market being good but no business doing.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March.	June.
Saturday	92½	92⅝	92½	92⅝	10s pm	15s pm
Monday	92½	92⅝	92½	92⅝	10s pm	15s pm
Tuesday	92⅜	92½	92⅜	92½	10s pm	15s pm
Wednesday	92½	92⅝	92½	92⅝	10s pm	15s pm
Thursday	92½	92⅝	92½	92⅝	10s pm	15s pm
Friday	92½	92⅝	92½	92⅝	10s pm	15s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Ditto New 5 %	101 2	102 3	... ...

FOREIGN GOVERNMENT STOCKS.—In foreign stocks there has been no special feature beyond the slight fall at the beginning of the week, and the recovery which has since occurred. As will be seen from our subjoined list of the week's changes, there has on the whole been an improvement though a very slight one. Prices in this department are now in fact very high, so that there is little temptation to purchase in the present state of suspense; and very few are disposed to be sellers in consequence of the chance of immediate peace, and a probable great advance. It may be doubted whether the latter expectation is well founded, as the advance, which seems likely enough as the result of peace, may be retarded by the rush to realise, which can hardly fail to be most formidable, in consequence of the long suspense of dealings. The securities which have mainly advanced are Chilian, Mexican, Brazilian, and other American stocks, which, like the United States securities, have the advantage of not being exposed to the special danger of all European securities. The reports as to the material development of the South American States have also of late been more than usually promising. Among European securities, however, Spanish, Turkish, Egyptian, and Russian, have all advanced a little. To-day the market has been firm, but here, as in other departments, very little business doing.

The scrip of the French National Defence loan still tends downwards—the quotation this week having been at 3½ dis, though the final quotation is 3¼ 3. The North German loan has remained at a premium, the closing price being 1¼ ¾ pm.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Argentine 6 %	91½ ¾	91 ¼	− ½

The result of the deputation to Mr Lowe on Thursday, at which he stated that the Government considered they had given ample notice of the proposed change, and that the law would be enforced, has caused no little disappointment. It will probably do something to check transactions in foreign bonds until the meeting of Parliament, and in the majority of transactions which are not checked the law will be evaded. One peculiar hardship of the Act is that it is really retrospective, and imposes a tax upon people who are not intended to be struck at by the tax upon foreign securities. Such a tax is intended to fall upon the issue, and accordingly, in 1862, it was specially provided that the stamp was only to apply to *future* issues of foreign securities; but by this Consolidating Act issues since 1862, which have hitherto been exempt, are subject to duty, and the tax falls not upon the issue, but upon the last holder, who, to put an extreme case, is very likely a dealer, intending to hold the bonds only for a moment, and who is thus suddenly fined in the whole profit or more of the particular transaction. No House of Commons would ever have assented to such a tax with its eyes open, apart from the more important question whether it would have assented to the change by which future securities of the kind now in question were to be taxed. As an evidence of the wholly accidental nature of the change, a correspondent points out that the Inland Revenue Department only on the sudden discovered that there was no longer a necessity for the affidavit required under the Act of 1862 from persons who presented bonds issued abroad, and upon which interest was to be paid here, such as the Egyptian 7 per Cent. loan of 1868, the Turkish 6 per Cent. loan of 1865, and the 6 per Cent. loan of 1869, all issued upon foreign as well as upon our markets. Such "taxation by accident" is not creditable to the Inland Revenue Department or the Legislature; and the interruption and annoyance caused in the foreign market will certainly help to neutralise the special advantages which the

London Stock Exchange has recently enjoyed as a mart for foreign securities in consequence of the war. Whatever tax on such securities may be possible and expedient, the manner of this change has been most inexpedient and unjust, and specially injurious to a country like England, which has so much interest in increasing its importance as the international Clearing-house.

It is announced officially from Berlin that the subscription list for the remainder of the 50 millions of thalers of the Nortn German loan will be opened on the 26th and 27th instant, there and in London. The price of issue will be 96¼—the same price as for the first portion of the loan.

We are glad to see that the holders of the Roumanian State Railway bonds have agreed to address the Council of Foreign Bondholders to take the matter up. The case is a most suitable one for the interference of the association, and the Roumanian Government, we should suppose, has only to be properly dealt with to consent to satisfy their claims.

English Railways.—This market participated fully in the general dulness at the opening of the week—the disposition to realise being perhaps even more marked here than in any other department, in consequence of the improvement of the previous week having been greater. The traffic returns were also again unfavourable—the long continued severity of the weather having undoubtedly stopped business. There is no doubt besides that apparently prices have reached a very high point, and the market will be delicate until the declarations of the dividends have set speculation at rest. On Wednesday and Thursday, however, the depression of the early part of the week was partially recovered from—the announcement of the Brighton dividend of 1½ per cent., which was slightly better than the most cautious calculations, having produced a good effect. Brighton stock itself recovered about 1 per cent., and other stocks also improved. To-day the improvement which had been manifested on Wednesday and Thursday continued, but in the absence of business the changes in the quotations are slight and nominal.

As to the market for the next few days, everything will depend upon the forthcoming declarations, which will be made during the next ten days by almost all the principal railways. But there is comparatively little fear that the declarations will not be good.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	88 ½	.....	87½ ¾	— ¾

The traffic receipts of eighteen railways in the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending January 14 to 642,140*l*, being an increase of 4,679*l* on the corresponding week of the previous year. A good many companies show a decrease of receipts—among others, the Great Eastern, 2,351*l*; Manchester and Sheffield, 1,328*l*; North-Eastern, 1,295*l*; London and South-Western, 978*l*; and London and Brighton, 503*l*. The principal increases are Lancashire and Yorkshire, 3,115*l*; London and North-Western, 1,975*l*; Great Northern, 1,036*l*; Caledonian, 2,830*l*; and Great Western, 1,032*l*. The following shows the increase or decrease in each case, with the aggregate of the half-year to date, reckoning from the 1st of August last, in the case of companies who close their accounts on the 31st of January.

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half year to date. Amount.	Inc. or Dec. on Correspndg per. in '70.

Subscriptions are invited by the London and San Francisco Bank, Limited, for 3,000,000 dols 7 per cent. First Mortgage bonds of the Oregon and California Railroad Company. The issue forms part of a total of 10,950,000 dols, of which 4,150,000 dols were issued last year, and the remainder is yet to be issued, the whole repayable in 1890 at par, with principal and interest payable in New York in gold, and free of all United States Government tax. The railway is to extend about 360 miles from Portland, in Oregon, to the Californian frontier, where it will join the California and Oregon railway, at present in course of construction; it is partly finished, and the whole, it is expected, will be open for traffic by the end of 1872. The company is also the owner of adjacent lands, granted by the United States Government, and embraced in the present mortgage. The price of issue is 154*l* 2s 6d per bond of 1,000 dols, equivalent to 68½ per cent. of the nominal value.

Joint Stock Banks.—The reports of the banks, of which we give details below, continue to be favourable. In almost all cases there is an increase of profit, notwithstanding the difficulty which has lately been experienced in employing money. The profits of the London and Westminster in the half-year were 178,000*l*; City, 44,000*l*; Imperial, 30,000*l*; Alliance, 15,000*l*; and Metropolitan, 10,000*l*. There are also good reports from several provincial banks. Prices in this department have accordingly been well maintained, but with the general want of animation on the Stock Exchange, there is very little dealing. The following are the changes for the week:—Anglo-Egyptian have advanced ½; South Australian, 1; London of Mexico, 1; London and County, ½. On the

other hand, Anglo-Austrian and British North American shares are 1, and Chartered Mercantile of India ½ lower on the week.

A report has been issued by the liquidators of Overend, Gurney, and Co., stating that at the 31st of December, 1870, the indebtedness of the company had been reduced to 162,504*l*, including 158,000*l*, balance of a loan of 200,000*l*, which the liquidators had been authorised to obtain for the payment of outstanding claims. Against this indebtedness the liquidators estimate that they have 599,689*l* of assets, of which they reckon 232,926*l* as likely to be realised, while about the remainder "it is impossible to form an opinion "with any degree of certainty." The prospect of any return to the shareholders appears thus to be a very meagre one. From the statement of affairs submitted, it appears that the liabilities of the firm at their suspension were 18,727,916*l*, and that 351,106*l* of interest has since accrued, making a total liability of 19,079,021*l*. This amount has been met :—

	£
By realising securities applicable to particular creditors, &c.	14,162,683
By dividends to creditors	4,911,834
	19,074,517

leaving only 4,504*l* of "unclaimed balances and dividends." The total amount paid by contributories in respect of calls has been 2,042,061*l*, and it is probable that 5,000*l* more may be obtained. The shares were 91,677, and it is probable that in the result the calls will have been paid in full on 78,600.

The report of the Bank of Egypt, to be submitted to the shareholders on the 1st proximo states that the net profits, after providing for rebate on bills not yet due, income tax, &c., amount to 20,914*l*. This, added to 9,615*l* of undivided profits from the previous half-year, enables the directors to declare a dividend at the rate of 10 per cent. per annum for the half-year, absorbing 12,500*l*, with a bonus of 1*l* 10s per share, absorbing 15,000*l* (equal together to a dividend at the rate of 22 per cent. per annum), leaving 3,029*l* to be carried forward.

Telegraph Shares.—The reaction in this department has made further progress during the past week, and several important rises have taken place in values. China Submarine have advanced 1¼ ; Anglo-American and Anglo-Mediterranean, 1 ; British Australian and British Indian Extension, ½ ; Falmouth and Gibraltar, ¼ ; and French Cable, ⅛. The adverse movements have been a decline of ½ in Mediterranean Extension ; ¼ in British Indian Submarine and in Reuter's.

Mines.—Considerable firmness has been apparent in the quotations for British mines, which have been in improved request. Devon Great Consols are quoted nominally 5 higher ; Great Wheal Vor have advanced 2½ ; Wheal Mary Ann, 2 ; East Lovell, Great Laxey, Grenville, and North Wheal Crofty, ½ ; East Grenville, and Prince of Wales, ¼. Providence shares are 1½, and Tan-yr-allt ¼ lower. In the foreign market there is no change of importance to notice, but Sweetland Creek closed rather easier on realisations.

A prospectus has been issued of the Morro da Gloria Gold Mining Company, Limited ; capital, 75,000*l*, in 75,000 shares of 1*l* each. The company is formed to purchase from the proprietor the mine of Morra da Gloria and estate, situate in the district of Sabará, in Brazil. The property is stated to be within "between five and six miles from the long-celebrated estate of Morro Velho, belonging to the St John del Rey Mining Company, and thirty-five miles from Ouro Preto, the capital of the province ;" and it is also stated that there are six auriferous formations on the property, the principal of which are of a similar nature to the Morro Velho mine of the St John del Rey Company. The price of the mine and estate is 35,000*l*, of which 15,000*l* is to be paid in cash, and the remainder in paid-up shares. The terms of subscription are 2s 6d per share on application, and 7s 6d on allotment —subsequent calls to be at four months' intervals, and not to exceed 5s each.

A prospectus is issued of the West Polbreen Tin Mining Company ; capital 7,500*l*, in 2,500 shares of 3*l* each. The mine, which is situated in the parish of St Agnes, Cornwall, is said to be "in the very richest part of the St Agnes district," attention having been directed to it by the success of the adjacent Polbreen mine, which "is on the eve of declaring its first dividend after barely twelve months' working." The mine is constituted on the cost-book system, and favourable returns are expected from the present high price of tin.

Miscellaneous.—There was more animation in this market at the opening of the week ; and although at the close great quietness prevailed, the improved quotations were fairly maintained. Among the changes are :—A rise of 3 in Silver's India Rubber ; 1½ in Australian Agricultural ; 1 in Crystal Palace, Royal Mail Steam, and Tobacco Loan ; ¾ in Berlin Waterworks ; ½ in United Discount ; ¼ in National Discount and Rio Improvements. On the other hand, Fairbairn Engineering shares have declined ½ ; Hooper's Telegraph Construction, ½ ; Hudson's Bay, ⅜ ; and Peel River, 1.

Exchanges.—There is no variation worthy of notice in the rates this week.

The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amount allotted were—to Calcutta, 399,000*l*, and to Bombay 1,000*l*. The minimum price was fixed as before at 1s 10d on all the Presidencies, and tenders at 1s 10¼d will receive about 66 per cent. These results show a further slight diminution in the demand for means of remittance to the East.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week : —

Gold continues in good demand, and as we are without arrivals, excepting on a most limited scale, withdrawals to the amount of 332,000 in bars and sovereigns have taken place from the Bank. The Nubia has taken 5,260*l* to Alexandria. The Seine has brought 13,000*l* from the West Indies, and the Patagonia 48,000*l* from Valparaiso.

Silver.—The Seine has brought 18,000*l* from the West Indies ; the City of Brooklyn has brought 80,000*l* from New York ; the City of Brussels has brought 70,600*l* from New York ; the Parthia has brought 8,000*l* from New York ; the Pera has brought 130,000*l* from Bombay—total, 306,600*l*. The whole of this amount has been taken for Holland, and the demand still exists, although we do not consider the market quite so firm. The Neva has taken 8,200*l* to the West Indies.

Mexican dollars.—We have received about 18,000*l* of this coin during the week from New York and the West Indies. There is but a very small and exceptional demand for China, and arrivals are taken principally for refining.

Exchange on India for banks' drafts at 60 days' sight is 1s 10¼d to 1s 10⅜d on all Presidencies. The Council drafts on India were allotted yesterday, the minimum, as before, was 1s 10d per rupee ; applications at 1s 10¼d received 66 per cent. The amounts granted were, to Calcutta 399,100*l*, and to Bombay 1,000*l*.

India Government loan notes.—We quote prices for the 4 per Cents., 90 to 90¼ ; for the 5 per Cents., 98½ to 99 ; and for the 5½ per Cents., 106 to 106½.

Quotations for bullion.—Gold—Bar gold, 77s 9d per oz std ; ditto fine, 77s 9d per oz std ; ditto refinable, 77s 11½d per oz std ; South American doubloons, 73s 8d per oz ; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0 15/16d to 5s 0⅞d per oz std, last price ; ditto, containing 5 grains gold, 5s 1d to 5s 1 1/16d per oz std, last price ; Mexican dollars, 4s 10⅞d to 4s 10 15/16d per oz, last price. Quicksilver, 11*l* to 12*l* per bottle ; discount, 3 per cent.

The sum of 69,000*l* in bar gold was withdrawn from the Bank to-day.

According to the official return published in to-night's *Gazette*, the imports of the precious metals into the United, Kingdom during the week ended January 18 were—Gold, 49,403*l* ; silver, 31,303*l*. The exports were—Gold, 175,013*l* ; silver, 143,101*l*.

Messrs Pixley, Abell, and Langley have just issued a statement of the imports and exports of bullion during the year just past compared with those of 1869. The imports were as follow :—

Imports.	1870.		1869.
1st six months	£8,768,110	.....	£9,711,077
2nd six months	20,518,795	.....	11,051,162
	29,286,905		20,762,239

—which shows a very large increase in the import, especially in the last six months, principally from the United States, where the increase is from 2,012,670*l* to 7,746,000*l*, but including also 1,051,210*l* from Hong Kong, 391,600*l* from Yokohama, 985,130*l* from Bombay, and 101,000*l* from Calcutta, against which there are no receipts in 1869. These imports from the East have more than once been referred to in our columns, and undoubtedly are a signal indication of the change in the Eastern trade, caused mainly by the low price of cotton, which makes the Indian exports less valuable, and necessitates remittances in coin to pay its debts. The exports were :—

Exports.	1870.		1869.
1st six months	£6,629,298	.....	£8,437,331
2nd six months	14,697,383	.....	7,537,867
	20,966,681		15,975,198

Spain and Portugal	413,400	61,500	351,900
	10,250,730	858,917	9,391,813

There is also an increase of 741,260*l* in the shipments to Alexandria in the six months.

FAILURES AND EMBARRASSMENTS.—At the meeting of creditors of Mr George Triandafillidi, merchant, Manchester, the liabilities were stated at 25,212*l*, and assets at 25,831*l*. The *Manchester Courier* mentions the failure of Messrs Milbourne, Clarke, and Co., Manchester, commission merchants. Liabilities, 16,520*l*; assets, 17,227*l*. The same journal states :—"At an adjourned meeting of the creditors of Messrs Higson, West, and Co., this afternoon, several questions were asked respecting certain goods in the hands of dyers and others, the answers to which were not satisfactory, and eventually it was resolved to put into operation the penal clauses of the Bankruptcy Act to the utmost extent. It is understood that a petition has been filed against Messrs J. G. Peate, of Patricroft, sewing cotton manufacturers, and that a circular has been issued convening a meeting of the creditors for Friday at 3 o'clock. The liabilities are estimated at about 3,000*l*."

MEETINGS OF COMPANIES NEXT WEEK.

1871.

Jan. 23.—York Street Flax Spinning Company, Belfast.

24.—London and Brazilian Bank.
English and Foreign Credit.
North-Western Bank.

25.—National Discount, City Terminus Hotel.

26.—London and St Katharine's Docks, London Tavern.

JANUARY SETTLEMENTS.

Ticket Day—January 26th.
Account Day—January 27th.

PUBLIC COMPANIES.

STOCKS.

Peruvian 3 per Cent., 1853.—Bonds representing 12,200*l* have been cancelled.

Russian Anglo-Dutch Loan, 1864.—612 bonds representing 612,000 florins, and 247 bonds representing 24,700*l* (in all, say 76,570*l*) have been drawn for redemption on the 1st April.

Swedish 4½ per Cent., 1864.—Bonds representing 13,400*l* have been drawn for repayment at par.

RAILWAY COMPANIES.

London, Brighton, and South Coast.—Outline of the revenue accounts for the half-years ended 31st December, 1869 and 1870 :—

	1869. £	1870. £
Gross revenue	689,182	702,779
Working expenses	364,434	333,784
Net	324,748	368,995
Add previous balance	2,678	4,328
	327,426	373,323
Deduct preference charges	292,435	319,849
Available for ordinary dividend	35,201	53,474
—at the rate of 1 per cent. per annum	34,199	(1½ p.c. p.a) 51,298
Surplus	1,092	2,176

The charge under the head of compensation for the Newcross accident in the past half-year was 10,321*l*, and in the corresponding half of 1869, 45,000*l*. Apart from this exceptional cause the ordinary expenditure was 323,463*l* in the past half-year, and 319,434*l* in the corresponding half of 1869. All expenditure on account of the New cross accident is now at an end, and the total cost to the company has been 74,010*l*. Of this 28,907*l* has fallen upon the year 1870, so that, apart from this exceptional cause, the dividend upon the ordinary stock would be at the rate of 24s per cent. The agreements with neighbouring companies continue to work satisfactorily. That with the South-Western Company for the division of joint Portsmouth traffic has just been revised for ten years from the 1st of January, 1870, and the result of the arbitration has given this company 37 per cent. instead of 33⅓ per cent., as formerly, of the joint traffic. The capital account to the 31st December, 1870, showed that 17,863,767*l* had been expended, leaving a balance against the company of 99,698*l*. Expended during the half-year, 63,509*l*.

London, Brighton, and South Coast.—A dividend at the rate of 1½ per cent. per annum is announced.

Manchester, Sheffield, and Lincolnshire.—The usual half-yearly comparison of the revenue accounts is as follows :—

	1869. £		1870. £
Gross receipts	672,626		668,183
Working expenses	297,972		301,841
Net	374,654		366,342
Add previous balance	2,246		3,679
	376,900		370,021
Deduct interest, canal, and preference charges	£223,625		£220,880
South Yorkshire dividends	79,013		79,174
	302,638		300,054
Available for ordinary dividend	74,262		69,967
—at the rate of 2½ per cent. per annum	61,152	(2½p.c.p.a.)	66,327
Surplus	13,110		3,640

Capital Account.

	Expended. £	Received. £
To 30th June, 1870	12,662,725	12,155,410
During the half-year	120,089	856,357
Total, 31st December, 1870	12,782,814	13,011,767

Estimated capital outlay during the current half-year 192,900*l*. The report states that the traffic account would have shown improvement during the past half-year but for the part transfer of the Hyde and Hayfield line to the Midland. The differential rate for the carriage of coal to London upon the Midland and Great Northern, being 1s 4d per ton cheaper from the Derbyshire coal fields than from the South Yorkshire, is considered very disadvantageous to this company's interests; but the directors "deplore that all attempts at a fair and friendly solution of the question have hitherto been taken in vain."

Oregon and Californian Railroad 7 per Cent. Mortgage.—The London and San Francisco Bank, invite subscriptions for $3,000,000, in $1,000 bonds, of an issue of $10,950,000 first and only mortgage bonds of the Oregon and Californian Railroad, which is being constructed 360 miles from Portland (Oregon), to join the Californian and Oregon line running to San Francisco. The issue price is 154*l* 2s 6d per bond, and the principal is payable at par in gold in New York in 1890. The interest is payable in gold without deduction from United States tax. The share capital is $20,000,000; and the whole line is to be ready in 1872. $4,150,000 of these bonds have already been issued in Germany. The grants of land to the extent of 4,672,000 acres in all are reported very fertile, and are to be sold by the bondholders' trustees for the purpose of paying off the mortgages.

BANKS.

Alliance.—Half-year's net profits, 15,418*l*, which is increased to 18,975*l* by the previous surplus. A distribution at the rate of 3 per cent. per annum, free of income tax, requires 14,560*l*; 337*l* is written off premises, and the surplus is 4,079*l*.

Bank of Egypt.—For notice of dividend and report see Money Article.

Central Bank of London.—Half-year's gross revenue, 12,696*l*; net balance, 5,008*l*. A dividend at the rate of 5 per cent., free of income tax, is announced. Mr Thos. White has been elected chairman, in the place of Mr C. S. Butler, deceased.

City.—At the meeting the adopted report showed a half-year's gross profit of 44,282*l*. A dividend was declared at the rate of 7 per cent. per annum, leaving, after making provision for expenses and rebate, and adding 5,000*l* to the reserve (increasing it to 100,000*l*), the sum of 1,585*l* to the credit of the present half-year.

English and Swedish Bank, Limited.—The liquidators have issued a report announcing that the affairs of the company are now fully wound up, leaving an available balance of 13,973*l* for a final return to the shareholders. A return of 14s per share has been decided on.

Imperial.—The half-year's profit amounted to 30,694*l*, including 3,543*l* brought forward. After allowing for all expenses and provisions, there remained 17,178*l*, out of which a dividend at the rate of 6 per cent. per annum required 13,500*l*, leaving 3,678*l*.

London and Westminster.—The adopted report states that after making provision for all debts, paying the income tax, setting apart 2,000*l* toward the buildings of the bank, and presenting a gratuity of ten per cent. on salaries to officers, the net profits for the last half-year amount to 178,597*l*. This sum, added to 3,032*l*, the unappropriated balance of the preceding half-year, will amount to 181,630*l*. The directors declared a dividend at the rate of six per cent. per annum, and by way of further dividend out of the profits, a bonus of six per cent. upon the paid-up capital of 2,000,000*l*. After these payments are made there will remain 1,630*l*, which the directors have carried to profit and loss account for the current half-year.

Manchester and County.—Half-year's net profit 45,239*l*. 10,000*l* is added to reserve; a dividend at the rate of 10 per cent. per annum, free of income tax, requires 30,572*l*, and 1,500*l* is applied to property; surplus, 3,167*l*.

Metropolitan.—Half-year's net profits, 10,944*l*, after adding 4,005*l* brought into the account. A dividend at the rate of 5 per cent. per annum, free of income, is notified, 5,000*l* is placed to reserve, and 944*l* is carried forward.

National.—A dividend at the rate of 7 per cent., free of income tax, has been declared.

North-Western.—Year's net profits, 36,979*l*, including 874*l* brought into the account. The July dividend required 10,125*l*, and the income tax, 404*l*. A further distribution at the rate of 6 per cent. per annum, free of income tax, absorbs 12,150*l*, and 10,000*l* is added to reserve. The surplus is 2,301*l*.

Parr's Banking.—Inclusive of 6,979*l* brought into the account, the year's net returns have been 39,651*l*. The fifth instalment of the purchase money, 12,950*l*, bas been paid out of this to Messrs Parr, and an interim dividend at the rate of 8 per cent. per annum has absorbed 4,000*l*. 12,000*l* is now added to reserve (increased to 38,000*l*), and a further distribution at the rate of 8 per cent., free of income tax, is declared; surplus, 6,700*l*.

Union of Manchester.—A dividend at the rate of 8 per cent. per annum, and a bonus of 3s per share have been recommended.

Wilts and Dorset Banking.—The dividend now declared raises the distribution of the year to 22 per cent.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

National Discount.—The half-year's gross profits were 114,634*l*, and the available net profits 69,958*l*. The proposed dividend, at the rate of 17 per cent. per annum, free of income tax, leaves a surplus of 2,139*l*.

New Zealand Loan and Mercantile Agency.—The net profit of the year, including 1,585*l* brought forward was 14,187*l*, which the directors propose shall be apportioned as follows, viz.:—Dividend at 10 per cent. and interest on calls paid in advance, 6,505*l*; reserve fund, 6,000*l*; and carried forward, 1,682*l*.

United Discount Corporation.—A dividend is announced at the rate of 7 per cent. per annum, amounting to 4,841*l*, carrying forward 6,209*l*.

ASSURANCE COMPANIES.

British Foreign Marine Insurance.—The report recommends a dividend of 4s per share and bonus of 6s, making 17½ per cent. for the year, and leaving 34,919*l* to be added to reserve, which will then stand at 78,811*l*.

General Life and Fire Assurance.—Half-year's dividend proposed at the rate of 6 per cent. per annum.

Lancashire Insurance.—The half-yearly dividend, at the rate of 10*l* per cent. per annum, free from income tax, and a bonus of 1s per share, also free from income tax, will be paid on and after the 20th inst.

Maritime Insurance.—The payments in 1870 for losses, averages, returns, &c., on risks taken up to the close of 1869, amount to 120,846*l*, and for losses and averages on risks taken in 1870 to 67,813*l*. The few outstanding risks belonging to 1869 have been re-insured. The interest realised from the company's investments amounts to 10,887*l*, and there is a profit on the realisation of investments of 7,184*l*. An interim dividend for the first half of the year 1870, at the rate of 10 per cent. per annum, was declared on the 29th June; and the directors now propose a like dividend for the past half-year at the rate of 10 per cent. per annum, payable on the 3rd of February, 1871.

Universal Marine Insurance.—A dividend of 10 per cent. for 1870 has been announced, together with a bonus of 2s 6d per share.

MISCELLANEOUS COMPANIES.

East and West India Dock.—At the meeting a 3 per cenn dividend was declared, making 6 per cent. for 1870. At. increased tonnage had entered the dock. The new warehouses and sheds were completed.

John Crossley and Sons.—A dividend at the rate of 15s per annum is announced.

Peel River Land and Mineral.—Year's net revenue, 15,507*l*, out of which a dividend of 1½ per cent., free of income tax, is declared, making 2½ per cent. for the year.

MINING COMPANIES.

Atlanta Silver Mining, Limited.—Capital 250,000*l*, in 50,000 shares of 5*l* each. The Atlanta mine and other properties, which this company is started to purchase, are situated in the territory of Idaho, U.S. The purchase price is 200,000*l*, of which 25,000*l* is in shares; and very large profits are looked for.

Morro da Gloria Gold Mining, Limited.—Capital, 75,000*l*, in 1*l* shares. This gold mining property is situated in the province of Sabará, Brazil, near the Morro Velho mine of the St John del Rey, which has proved so productive. The purchase price is 35,000*l* (20,000*l* in shares), and works have already commenced. Six auriferous formations can be traced on the surface, and the formation is favourable for working by adit. Large profits are looked for.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

The undermentioned offices have been opened since the publication of the last list of Postal Telegraph offices, or will be opened for the transaction of telegraphic business on the 18th January, 1871:—

England.—Alderney (Channel Islands); Beaulieu, near Southampton; Brampton (Cumberland); Brimscombe, near Stroud, Glos.; Cwm Amman, near Aberdare; Downton, near Salisbury; Fawley, near Southampton; Ferryside, near Kidwelly; Hythe near Southampton; Kidwelly; Lyndhurst, near Lymington; Mountain Ash, near Aberdare; Stantonbury, near Stoney Stratford; Sutton-in-Ashfield, near Mansfield.

Scotland.—Auchmill, near Aberdeen; Dailly, near Maybole; Gourock, near Greenock; Old Aberdeen (Aberdeen); Wemyss Bay, near Greenock; Whitburn (Linlithgowshire); Woodside, near Aberdeen.

Ireland.—Ballincollig, near Cork; Ballymoney; Cookstown, near Dungannon; Ferns; Navan.

Metropolitan District.—Clapton road, Portland place, E.; Glocester road (near Queen's gate), W.; Lower Norwood, S.E.; Plumstead, Burrage Town, S.E.; Shooter's hill, S.E.; Stamford street (90), S.E.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was no feature of interest in the grain trade at Mark-lane to-day. The condition of the English wheat on offer was inferior, and the attendance of buyers was thin. Transactions were restricted within very narrow limits, but prices were unchanged for all descriptions of produce. This week's imports of foreign and colonial grain into London have amounted to 1,760 quarters of wheat, 2,370 oats, 120 sacks and 5,690 barrels of flour.

At Liverpool and Wakefield, this morning, the wheat trade ruled dull, and prices were maintained in the absence of important business.

A fair amount of business has been done in the Liverpool cotton market, but the tone has been quiet, and prices are without change since last Friday. The total sales are 88,520, of which the trade have taken 69,090 bales; speculators and exporters 19,430 bales. The imports for the week are 91,473 bales; the actual exports 7,045 bales; and to-day's stock is estimated at 571,490 bales. To-day the market closes steady; sales 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended January 19, 1871:—

	Imported.		Exported.
American	bales 74,696	.....	5,798
Brazilian	12,354	.....	...
East Indian	8,206	.....	7,982
Egyptian	1,807	.....	159
Miscellaneous	2,721	.....	295
Total	99,784	.....	14,234

At New York on January 19 middling Upland cotton was quoted at 15¾ cents. per lb. Bombay advices to January 15 quote the cotton market quiet at 188 rupees for fair Dhollerah. The shipments of the week had amounted to 40,500 bales.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Dec. 24:—In this market the absence of news has given rise to the customary bazaar rumours in reference to the course of prices, but rates have not been in any way affected by the various reports. The general tendency of the market has been downward even in the face of a very spirited demand for old and new cotton, and at the close yesterday, though quotations were firm at the range given below, the strength of position lay seemingly more in favour of purchaser than seller. The chief feature of the week has been the quantity of New Oomrawuttee contracted for by European houses for January and February delivery. Upwards of 1,400 candies were sold at rates varying from 203 rs per candy downward, but dealers are now beginning to fear that there will be some difficulty about delivery, and contracts for the next month cannot now be made unless at rates proportionate to the risk which it is considered attaches to the transaction Arrivals of new Oomrawuttee continue very light, not only on the Green, but in the up-country markets, and the average run of selections shows much black leaf stain, and is dull in colour. In a short time, however, a decided improvement is expected to be found. Small parcels of Hingunghat are arriving of a quality somewhat superior to the early pickings; the staple especially been very long and hardy. Crop accounts continue much in the same strain. Regarding the Dharwar crop the manager of the Carwar Company writes:—"We regret to record that it is anything but promising, the plants being very small both in height and body, and as the blossoming season is close at hand, there seems no ground for hoping that in these respects there will be any improvement. At present, however, the plants are healthy, and the weather favourable, and if this continues we may look for cotton of an average quality, but only a small yield, probably equal to that of 1868-9." From Tinnevelly we have a telegram dated 22nd instant, 120 rs per candy.

EXPORT of COTTON from BOMBAY to Dec. 23.

Grand total	1,068,379	.....	1,156,405

Actual exports since last mail left, 15,230 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated January 6:—Increased firmness on the part of holders of cotton has been the prevailing feature during the past week, and our quotations show an advance of $\frac{1}{16}$d to $\frac{1}{8}$d per lb. The unwillingness which sellers still evince to meet buyers by any concession reduces operations to a very limited scale, and judging from the present, there seems little prospect of any immediate change such as to induce an active business. It is worthy of remark that although our general stock is by no means small, the finer sorts are becoming increasingly scarce; this is especially the case in "Gallin" descriptions, nominal values of which we quote the same as by last mail. To-day's quotations are:—Fair, 8$\frac{3}{4}$d to 8$\frac{7}{16}$d; good fair, 8$\frac{3}{4}$d to 8$\frac{13}{16}$d; good to fine (Gallin), 10d to 12$\frac{1}{4}$d per lb, f.o.b. Freight about $\frac{5}{16}$d per lb for steam-pressed bales.

— 1864–65	66,285	.....	14,540	.....	80,825

The colonial produce markets have ruled less active this week, but the quotations have been fairly maintained. Tea has sold quietly, the demand having chiefly confined to good common and medium Congous. Sugar has closed with firm-

ness, though the demand has been less active than during last week. A moderate business has been concluded in coffee at about late rates. Rice is unaltered in value.

IMPORT, DELIVERY, and STOCK of TEA in LONDON.

Messrs J. D. Campbell and Co., of Mauritius, writing on December 15, remark:—For ten days after the departure of our last mail the sugar market was much excited, and very heavy purchases were made for Australia and Bombay. Prices rose daily, and the advance reached 40c to 50c. Since then the market has been quiet rather than flat, and no change in prices is observable. Holders, however, are quite firm, and a further rise, consequent on renewed activity, is quite possible. Taking last sales we quote white crystals, No. 20, at $7.50-60. For sugars above that sort, no higher price has been paid for important lots than $7.75; but there are a good many holders for $8. In yellows, about the same amount of advance has taken place. Large purchases have been made of marks (La Bourdonnais and Forbach Est.), just under the best, at $7.25; and for Esperance, the best, $7.50 is asked without buyers so far. Fine yellow counter is worth $6.80 to $7. Rations have advanced about 1s, but are not in so great proportionate demand as other descriptions of Australian sugars. In refining Vesou sugars, which are becoming very scarce, and of which no considerable quantity further can be expected, a considerable rise has taken place. No. 12 is quoted at $6.65-70, which (with freight at 1l and exchange at 3½ per cent. prem.) makes cost, f.o.b., 27s 6d to 27s 9d. As high as $6.95 has been paid for No. 14. Grey syrups continue much in the same condition as at our last advices. The low are neglected, and for the higher we quote—No. 11, $5.75 to $6; and for No. 20, $6 to $6.10, according to grain. We may add that prices asked are from 10c to 20c above our quotations, and it is not improbable that demands would be met were several purchasers to enter the market. Statement of sugar shipped from 16th November to 14th December, 1870:—To France, 1,185 tons; to the United Kingdom, 1,740; to Bombay, 2,669; to Melbourne, 1,188; to Adelaide, 527; to New Zealand, 350; to Cape colonies, 216; to other places, 2,388 tons.

The following report, dated December 12, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The preparation and shipment of produce have been proceeded with during the fortnight with unabated activity, the weather having been uninterruptedly fine. The clearances outwards since our last have been numerous, and the total exports of produce, especially of coffee, are now in excess of those at the same period last year. The following is the distribution of the coffee shipments to date as compared with those of 1869.

PLANTATION COFFEE.

NATIVE COFFEE.

To Great Britain	7,353	7,613
Foreign ports	1,618	2,388
Australia and India	560	245
	9,531	10,246

The arrivals of crops in parchment during the past two weeks, have been large, and Colombo godowns are so full that at the present moment shippers do not care to enter upon fresh contracts for early delivery. The transactions to date have been on a considerable scale at unchanged rates, but in most cases for middling and low grown descriptions, the quantity of mountain parchment in the market being comparatively small. There have been contracts for about 8,000 cwts native coffee, mostly picked and dried for shipment, for forward delivery, but to date the quantity brought in has been restricted.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Dec. 20:—The sales by auction since our last report have amounted to 2,700 chests. At the beginning of the week there was a slight rise in the rate of exchange, and the demand became less spirited, with a downward tendency in prices, more particularly noticeable on fine sound indigo, which has declined from 5 rs to 10 rs per maund. But this is probably better accounted for by the fact that after many of the orders for Russia had been executed, it was found that there was more fine indigo in the present crop than was expected. Kishnaghur, Jessore, and other districts of lower Bengal have done well in quality this year, notwithstanding the unfavourable circumstances under which much of the plant was grown and manufactured, and we consider the quality above the usual average. Tirhoot marks, so far as the first cuttings go, also turn out well. As regards the quality of the Benares and Oude indigo of this season, we are sorry we cannot report so favourably; it is certainly not so good as usual, nor could it have been expected from the plant drenched by constant rain and its leaves turned yellow. We are glad to observe, nevertheless, that the natives appear to have got up their indigo with rather more care than they used to do, and it is to be hoped they will be induced, by the readiness with which buyers have taken it this year, to pay still more attention to the getting up and packing of it in future. The only transaction by private contract during the week has been the following re-sale:—M.M.S. Mynanugger, Purneah, 200 maunds, at 262.8 rs per maund, sold to arrive at 250 rs. The quantity disposed of up to date is about 45,000 maunds. Export of indigo from 1st November, 1870, to 19th instant:—To Great Britain, 3,659 chests; France, 26; Trieste, 1,012; foreign Europe, 52; America, 482; Gulphs and Levante, 172; total, 5,403 chests.

The annexed is dated New York, Jan. 6:—Business in dry goods during the week under review has been confined to the filling of a few small orders from retailers in distant sections, and to supplying the wants of a small number of near-by dealers, who were in the City purchasing small assortments to replenish their stocks. The movements having been confined to such limited quantities as were required to supply the requirements of the current trade, the aggregate is very light, though the market cannot be considered unusually dull for this season of the year. In the money market the week opened with a slight relief from the excessive stringency of last week, and under apprehension of a renewal of the late "locking-up" operations, rates were paid on call loans much beyond the legal limit. Later, however, there being no symptoms of artificial manipulation, and the money disbursed in the payment of dividends having begun to return into the banks, there has been an easier feeling. To-day, at the close of business, there was no difficulty in borrowing on good collaterals at 6 to 7 per cent., from which it is concluded that the pressure has passed its climax. In discounts there has been a freer movement within the last two days. The banks appear to have concluded that the pressure from call borrowers is past, and are consequently buying paper freely at the current full rates, on the supposition that quotations may early decline. The following are the current rates for prime paper:—

		per cent.	
Commercial, first-class endorsed	60 days	7	7½
— — —	4 months	7½	8½

THE COTTON TRADE.

LIVERPOOL.—JANUARY 19.

The cotton market this week opened firmly, and on Saturday, with a considerable amount of business, some advance was obtained; but on Monday a dull tone re-appeared, and prices have since been in favour of the buyer. For Sea Island the demand has been active, embracing most grades. Prices show an advance of about 2d per lb during the past two weeks. American has continued in good request, and on Saturday advanced ⅛d to ¼d per lb, but has fallen back, and closes with little change from the quotations of last week. New York advices to the 18th instant quote middling Upland 15⅝ cents, costing to sell in Liverpool 8¼d per lb by steamer. In Brazil a moderate business has been done, and prices have given way about ⅛d per lb. Egyptian continues in good demand, and last week's prices are fully maintained. In East Indian the business is again rather limited, the trade buying only in small quantities, and prices are in many instances slightly lower.

For cotton to arrive the latest quotations are—American, basis of middling, from New Orleans, December shipment, 8⅛d; Savannah, January-February shipment, 7⅞d; Charleston, December shipment, 7 15-16d per lb.

The sales of the week, included forwarded, amount to 88,520 bales, of which 6,320 are on speculation, and 13,110 declared for export, leaving 69,090 bales to the trade.

The actual export this week amounts to 7,045 bales, consisting of 4,013 American, 275 Brazil, 20 Egyptian, and 2,737 East India, which is not deducted from the stock, as it was not included in the stock declared on the 30th ultimo. It is also not included in this year's returns, as it was added to the export in the annual circular.

JAN. 20.—The sales to-day will probably amount to about 12,000 bales, the market without change.

	bales.
An increase of import compared with the same date last year of	178,700
An increase of quantity taken for consumption of	8,290
An increase of stock of	231,200

In speculation there is a decrease of 21,700 bales. The imports this week have amounted to 91,473 bales, and the quantity of American cotton reported at sea for Great Britain is 285,000 bales. The actual exports have been 7,045 bales.

LONDON.—JANUARY 19.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

During the past week a fair business has been transacted on the spot, at unchanged prices. There is some demand for arrival, at last week's prices, more particularly for Bengals.

NEW YORK.—JANUARY 6.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Jan. 6. From the figures thus obtained it appears that the total receipts for the seven days have reached 139,631 bales, against 124,450 bales last week, 130,210 bales the previous week, and 155,717 bales three weeks since, making the total receipts since Sept. 1, 1870, 1,765,026 bales, against 1,442,474 bales for the same period of 1869, showing an increase since Sept. 1, this year, of 322,552 bales. The exports for the week ending this evening reach a total of 88,486 bales, of which 82,858 were to Great Britain and 5,628 to the continent, while the stocks at all the ports, as made up this evening, are now 555,868 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Jan. 6.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1869.	Stock. 1870.	Stock. 1869.
New Orleans	21458	3587	27045	14088	220807	140886
Mobile	18019	...	18019	3547	52111	63773
Charleston	5713	...	5713	500	32762	24489
Savannah	13654	1407	15361	5554	84579	72755
Texas	3716	...	3716	...	53667	47104
New York	17383	200	17583	9854	82000	56611
All other ports	615	434	1049	961	30000	25519
Total	82858	5628	88486	34524	555886	440040
Total since Sept. 1	851809	130926	988445	714611	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 53,962 bales, while the stocks to-night are 115,646 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Dec. 31, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

We have had a very quiet market the past week, the general demand having proved quite moderate. Holders have, however, offered their stock sparingly, though there are a good many receivers who have been obliged to sell, and this, with the heavy receipts at our ports, the unfavourable advices from Liverpool, and the moderate demand here, have resulted in a gradual decline in prices, the close being ¼c off from last Friday, middling Uplands being quoted to-night at 15c, against 15¼c a week ago. Saturday prices were unchanged and steady. Monday was a holiday. Tuesday quotations were the same as Saturday, but the close was weak. Wednesday prices favoured buyers, and were reduced ⅛c. Thursday the market was weak and irregular, but there was no change in the quotations. To-day prices are further off ¼c, and the close is weak for the lower grades, but firmer for the better grades. The light demand through the week arises from these two facts —that the decline at Liverpool has shut off to a very great extent export orders, and the continued low condition of the streams throughout the North and East, keep many of our spinners on short time. For forward delivery there has been the same downward tendency, and the close is about $\frac{5}{16}$c off from last Friday, the closing rates being, for January, $14\frac{9}{16}$c; February, $14\frac{13}{16}$c; March, $15\frac{1}{16}$c; April, 15⅜c. The total sales of this description for the week (including 2,100 bales free on board, but not including bales "exchanged") have been 47,500 bales. For immediate delivery the total sales foot up this week 17,382 bales, including 3,311 bales to arrive, of which 4,481 bales were taken by spinners, 223 bales on speculation, 11,428 for export, and 1,250 bales in transit. The following are the closing quotations :—

The exports of cotton this week from New York show an increase since last week, the total reaching 18,718 bales, against 16,914 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year :—

Nashville.....	2356	1989	5639	1385	1442	3217
	32286	36908	109235	19726	21461	102697

These totals show that the interior stocks have increased during the week 1,378 bales (being now 6,538 bales more than for the same period last year), while the aggregate receipts are 12,560 bales more, and the shipments 15,447 bales more than for the corresponding period of 1870. Count has been taken this week of the stock at Memphis, and 6,000 bales additional found which were added to the stock, making 38,908 bales.

The following are the receipts of cotton at New York, Boston, Philadelphia, and Baltimore, for the last week and since September 1, 1870 :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Jan. 14.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 133,000 bales, and since the 1st of September, 1,900,000 bales. Shipments to England, 75,000 bales; to France, none; and to the continent, 24,000 bales. Total since the 1st of September, 940,000 bales; stock at all ports, 550,000 bales. Middling Upland, 7⅞d, cost and freight, per steamer.

NEW YORK, Jan. 17.—The receipts of cotton at all American ports during the last four days have been 74,000 bales. Exports to Great Britain, 47,000 bales; and to the continent, 24,000 bales. Middling Upland, 7⅞d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Jan. 19.—The market has been very quiet during the week, and quite devoid of any animation. No large offers have been made, and the daily business has been of a retail character, but quite sufficient to prevent stocks from accumulating. Prices have remained remarkably firm considering the absence of demand and the large imports of cotton into Liverpool, which have caused that staple to decline in value a little. The latest telegrams from our large Eastern markets are not favourable for merchants entering into fresh contracts, and any offers they have made have been at a reduction in price, and more to test values; producers, however, adhere very firmly to their quotations, and show no anxiety to sell. The market closes quiet, but steady.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Market quiet; but, owing to the heavy engagements of producers, prices are well maintained for both yarns and cloth.

BRADFORD.—There is a rather quieter tone in the wool market, though there is a fair business doing in most classes of

wool at very firm rates. Prime wethers are still most in request. Good hogs are also in demand to some extent. Prices are very firm. In the yarn market there is a steady business doing at advanced rates. Spinners have orders in hand to keep them well employed, and show no disposition to make any concession. The piece market shows rather more activity. The home merchants are in the market, and have placed a few orders. There is evidently more disposition manifested to do business.

ROCHDALE.—The flannel market was rather dull, and few goods were sold. Prices were well maintained. Yorkshire goods were in fair demand, without any alteration in the quotations. Wools were sold to a fair extent, and late prices were well maintained.

LEEDS.—The markets in the cloth halls have been of a late average character. Moderately good selections of spring goods were made, and a fair business was also done in hairnets and other plain goods. The manufacturers are quite as well employed as for some time past, and there is a healthy tone throughout the trade.

NOTTINGHAM.—There is quite as much business doing in the lace trade this week as is usual at this time of the year. For some classes of cotton goods there is rather more inquiry. Lace yarns remain steady, and raw silk of good quality maintains its price, while inferior qualities are dull and have a downward tendency. Hosiery yarns maintain their value.

WOLVERHAMPTON. — The ironmasters, the colliery proprietors, and the agents mustered fairly, and reported with much satisfaction the result of the preliminary quarterly meetings, and of the current general miscellaneous demand, considering the period of the year and the state of Europe. The thaw has re-opened the canals, the recent frosts having been insufficient to close them again.

BELFAST.—Flax—Taking into account the season of the year, quantities presented in our market were not extensive. Buyers generally were numerous, and operated freely. Prices ruled firm; in some instances advanced rates were realised. Yarns—A slight improvement in the demand, as announced last week, gives symptoms of further progress. Linens (brown handloom)—Demand good for improved makes of almost all descriptions. Power loom—Demand, though not active, has been moderate for heavy linens, linen handkerchiefs, diapers, damasks, and cloth suitable for the foreign clothing trade. Prices unaltered. Linens (bleached and finished) — Home transactions have been to an increased amount. There is a slight reduction in stocks. Prices tend upward.

BIRMINGHAM.—Now that the results of quarter-day are fairly realised they would seem to have fallen a good deal short of the requirements, if not of the expectations, of the trade, and the tone of the market to-day was far from cheerful. Apart from the customary pig iron contracts for the current quarter, the transactions booked last week were not very large, and though a few good orders have since come to hand, the position and prospects of the trade at present are anything but satisfactory. Bars, hoops, rods, strips, and galvanising sheets command a steady sale for home purposes, and several inquiries for bridge and railway ironwork and boiler-plates are reported. For local manufacturing purposes, and especially tinplate work, tube making and war material, a brisk demand is expressed. Pig iron, as usual after quarter day, is very firm, and prices in all branches are consequently well upheld.

DUNDEE.—Our flax market has been very active, and consumers having shown more disposition to operate, numerous transactions have taken place, at gradually improving prices. Holders have been very firm, in consequence of the strong upward tendency of the foreign markets, and in some cases they refuse to effect farther sales, unless at a fresh advance. There has lately been increased inquiry for tows, and holders now refuse to sell unless at somewhat higher prices, the stocks remaining for sale in this market being already greatly reduced. The market for jute continues very stiff. In linens there continues to be a large business doing in many different fabrics, and although for some kinds of jute goods the demand is rather less urgent, there are numerous inquiries, and this important branch of our trade continues very active.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 6.—The market for breadstuffs the past week has generally shown strength without activity. The receipts of flour are materially reduced, and although reinforced by the increased production of local millers, are considerably less than the current wants of the market. The stock in store is, however, 122,000 bbls greater than last year, being reported on the 1st of January at 565,000 bbls, against 443000 bbls at the same date in 1870, with the gold price about 30 per cent. higher. Still, in view of the reduced stocks of wheat, the speculative firmness with which wheat is held, and the fact that flour is relatively lower than wheat, holders of flour have been disposed to advance prices. For some days, however, accounts from abroad have been dull, and freight room has been scarce; the export demand has consequently been limited, with the local trade purchasing only moderately, and prices show no decided improvement. To-day, with no cable advices, and a steady rain falling, the market was very quiet; good lines of extra State ruling nearly nominal at $6.25. Corn meal has been more active at $4.50 for Brandywine. Wheat has been dull; freight room has been scarce, with rates latterly showing a slight advance, and shippers have not been able to operate freely at the prices demanded; while the wants of millers have been filled by broken and irregular parcels. To-day the market was strong at $1.43 to $1.44 for new No. 2 spring, against $1.45 on Wednesday. The West has been excited over the reduced stocks, and No. 2 spring advanced in Chicago to $1.13 for the last half of January, but receding to-day to $1.09½. Corn has met with a slow sale for home use, mainly at 77c to 78c for Western mixed, and it is only at to-day's market that there was a little done for export. Rye has remained quiet. Barley has been less active, but very firm, with a revival of inquiry toward the close. Oats have been variable, but close a shade firmer, with sales of prime boat-loads of Western at 60c in store and 62c afloat. The stocks of grain in store and afloat at this market on the 1st of January for three years are reported as follows :—

	1868. bushels.	1869. bushels.	1870. bushels.
Wheat	4,028,065	4,466,369	3,700,008

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The British corn trade has been in a very quiet state during the past week, and the tendency has been downwards. The break up of the frost has enabled farmers to market their produce more freely, though the state of the roads still presents great obstacles to traffic. Supplies of English wheat on sale here have been more liberal, but the condition of the samples has fallen off greatly in consequence of the inclement weather. On Monday the attendance of millers was limited, and factors

were compelled to accept 1s per quarter less money to effect sales; and this reduction extended to foreign wheat, but there was little disposition shown on the part of holders to realise. Much interest is still evinced in the political situation, which will, it is believed, exert a very powerful influence before long upon the quotations of all kinds of cereal produce. Already heavy shipments have been made to France direct, and indirectly, through Belgium, and this movement will be largely increased on the removal of the present obstacles to trade. How long this may be delayed is a question of great moment; but it is evident that the exhaustion of the stock of breadstuffs in Paris and the North of France generally must be followed by heavy exports from this side. During the week some further large purchases of barrel flour have been made on French account, and this has caused an advance of 6d to 1s per barrel.

The demand for oats has rather slackened, and values have tended in favour of buyers. Off the coast a considerable business has been concluded at a slight concession. The transactions in maize have been on a retail scale, but the quotations are unchanged. Barley, beans, and peas have ruled dull at barely late rates.

Mr George Dornbusch thus reports the state of the floating grain trade:—The floating grain trade has been wanting in activity, but the tone has been steady. Wheat—The absence of arrivals and the small quantity remaining from previous arrivals, has necessarily confined operations within small dimensions. For the few cargoes offering, last week's prices have been asked. During the last few days the tone improved, and prices were paid which previously could not be obtained. Wheat—2 arrived cargoes: Marianopoli, 4,119 qrs, 50s per 492 lbs; Ghirka, 2,943 qrs, 48s 6d per 492 lbs. On passage, 1 cargo Ghirka, 3,100 qrs, 49s 6d per 492 lbs. Maize—For several days only one cargo was offered on sale off the coast, 1s dearer. Some inquiries have been made for spring shipment. Business is reported to have been done at 30s per 492 lbs, but generally higher prices are asked. The reported sales are as follows: Maize—1 arrived cargo Moldavian, 3,851 qrs, 32s 9d per 492 lbs. On passage, 2 cargoes: Odessa, 3,000 qrs, 32s per 492 lbs; Galatz, 3,000 qrs, 32s 3d per 492 lbs. To be shipped, 1 cargo: 10,000 qrs Galatz, 30s per 492 lbs. In barley business has been altogether at a standstill, there being no cargo off the coast offering, and no disposition shown to buy on passage or for spring shipment. Prices are nominal. Azow on passage, about 26s; Danubian, 26s 6d per 400 lbs, and for spring shipment a trifle less. In rye also the trade has, for several days, been in suspense, there being no cargo offering off the coast. A sale is reported, viz.:—Rye, on passage, 1 cargo. A cargo Danubian, 33s 6d per 480 lbs. Beans—Dealings in this article have been altogether interrupted. Egyptian Saide, 37s 6d to 38s per 480 lbs, with no buyers thereat. For oats the large quantity arrived a fortnight ago has been disposed of, and the only reported sale is as follows:—Oats—1 arrived cargo, black, 2,819 qrs, superior, 22s per 304 lbs, net. Flour—A further quantity of American barrels have been sold as follows:—Shipped or to be shipped, 1 cargo. Fair average quality extra State, a cargo, about 2,000 brls, 29s per brl, c, f, and i, net. To be shipped, 1 cargo, extra State, 3,000 brls, 27s 9d per brl for immediate shipment. In milletseed, nothing of interest has occurred.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market continues firm, but with rather a more quiet tone, as the speculative inquiry for the lower sorts has partly abated. Late advanced rates are maintained for Madras Jaggery and Manila. The moderate quantity of West India sold, viz., 1,366 casks in three days, has been at rather stiffer rates for refining kinds. A few parcels of crystalised barely former rates, viz., 38s 6d to 40s 6d for Demerara. 2,230 bags refined grocery Barbadoes sold at 30s 6d to 35s for yellow, including washed. Grocery Porto Rico is held for very high rates owing to its scarcity. No change can be quoted in other descriptions. The short crop of Mauritius will of course reduce the supply of grainy kinds. Dry refined is again dearer and still scarce. Several parcels of beet have sold for delivery here. The stock of sugar here has further decreased to 66,150 tons, against 76,800 tons last year, and 72,000 tons in the preceding one. Deliveries continue very large, being for the week 4,310 tons.

Mauritius.—2,066 bags brown qualities by auction were taken in above the value.

Madras.—2,370 bags brown sorts were taken in at 21s to 23s 6d 581 bags washed Jaggery sold at 19s. Privately 4,000 bags have sold at 20s 6d.

Penang.—300 bags soft brown by auction realised 25s 6d to 29s. Privately small sales at 33s 6d to 35s 6d.

Manila.—About 15,000 bags have changed hands: clayed, 25s 6d to 28s; Taal, 22s. The latter has sold afloat at 23s for 23,000 mats.

Other Foreign.—258 casks Porto Rico by auction were chiefly bought in. A few lots sold at 32s 6d to 37s 6d for low brown to good yellow. 105 casks Cuba were taken in. Privately 550 casks Porto Rico sold at 34s 6d.

Refined.—Since Friday dry goods have slightly advanced, but the market is now rather quiet. Titlers, &c., quoted 54s to 56s per cwt. Further export business has been done. Pieces, &c., which are dull, have not improved in proportion.

MOLASSES.—A cargo of Cuba is reported sold at 9s 3d per cwt for the Clyde.

COCOA.—There has been a limited business this week. 821 bags Trinidad by auction partly sold on former terms: grey red, 55s to 61s; 444 bags Guayaquil out. Fine quality of the latter last sold at 53s per cwt. The home deliveries are steady, but stocks keep relatively large, and the new crop of West India is beginning to arrive.

COFFEE.—The sales have been moderate in extent. There is an inquiry for native Ceylon, with sales to arrive at 55s to 56s to the extent of about 4,500 bags. On the spot transactions are limited by the high rates asked. Good ordinary has sold at 54s to 55s. 161 casks by auction sold at and afterwards: very good ordinary, 55s; bold, 57s 6d. Plantation has obtained firm prices, only 432 casks 17 barrels 26 bags being offered by auction: small berry and low middling 56s to 60s 6d; middling palish to colory, 61s to 67s; good middling to good and bold, 68s to 75s 6d. 159 bags pale and greenish Singapore at 52s to 54s. 126 bags other kinds. Madras, 51s 6d to 52s; Courtallam, 55s 6d to 57s. 311 bags ordinary Rio at 52s 6d to 53s; a few lots washed at 58s. 6d. 3,255 bags Costa Rica found buyers, at full prices to 2s advance; pale and mixed, 56s to 59s; fine ordinary to middling, 62s to 67s. During the week a floating cargo of St Domingo has sold at 54s for the Mediterranean, and one at 51s per cwt for a near port. Owing to the recent severe frost partially stopping navigation, the export deliveries have fallen off, and the stock is about 1,900 tons above that of last year at the same date.

TEA.—Arrivals have been large and the market is well supplied. A moderate business has been done in medium to fair grades of congou at about former rates. Public sales of 10,344 packages have been held, at which quotations showed little variation. Low Amoy congou went at 7½d. Black leaf teas just landed went steadily at from 1s 2d to 1s 6½d. 2,000 packages red leaf of old import at 10½d to 11½d per lb. Ping Suey and coarse Moyune green teas sold at a decided decline for the lower grades.

RICE.—The market is firmer, with a better demand. A floating cargo of Rangoon has sold at 10s 4½d for the continent. 350 to 400 tons cargo Bengal, to arrive, at 10s 1½d to 10s 3d, ex ship. 1,500 tons Moulmein just in at 10s to 10s 3d, ex ship. On the spot the reported sales

reach 45,000 bags; chiefly Rangoon, at 9s 9d to 10s 6d; with good to fine white Bengal at 11s 3d to 12s 3d; Dacca, 9s 4½d; and Madras at 9s 6d to 10s. 8,430 bags Bengal by auction, part sold at 10s for middling white rather broken, of old import. Old Ballam taken in at 10s 3d. 5,850 packages Garden Siam sold at 8s 6d per cwt.

SAGO.—1,405 bags by auction were bought in; for the sound portion: small, 16s 9d to 17s 6d; bold, 18s 6d. 460 boxes withdrawn. Damaged sold in proportion.

SAGO FLOUR.—837 bags Singapore part sold at 15s. The remainder taken in at 15s 6d per cwt.

TAPIOCA.—492 bags ordinary Singapore sold at 1½d to 1⅝d per lb. Some other small parcels taken in.

SPICES.—The demand for pepper continues active. A large business has been done in white, chiefly speculative, at ½d advance, closing quotations for Singapore being 7½d to 7⅝d on the spot. About 4,500 bags changed hands. Penang black has risen ⅛d. 3,935 bags by auction chiefly sold at, and afterwards at 5⅜d, sea damaged in proportion. 552 bags Singapore held for advanced rates, and bought in. Penang on the spot, or in course of landing, privately at 5⅜d, and that price now refused. Afloat sales at 5⅜d to 5 1/16d. 126 packages Penang nutmegs chiefly sold at full rates: 83's, 2s 6d; 96, 2s 2d to 2s 3d; 112 to 102's, 2s to 2s 2d; low and defective, 1s 7d to 1s 10d. Of 4 cases mace 1 case good sold at 3s 8d. Cloves are rather dearer for Zanzibar. 358 bags good part sold at 3d to 3⅛d per lb. There have not been any public sales of pimento. Market quiet. Cassia lignea is dull. 1,439 boxes chiefly unmarked were taken in and withdrawn, 87 bags African ginger were bought in at 31s per cwt.

SALTPETRE.—The market is firm, with a moderate business at full prices. About 3,000 bags Bengal sold on the spot: refraction 17 to 10, 28s 6d; 8¼ to 6¼, 30s; 4¾, 30s to 30s 6d. 25 tons in course of landing at 28s 9d, refraction 12, and 250 tons afloat at 29s 3d to 30s per cwt, customary terms. The stock is weaker than usual, being 2,450 tons against 4,500 tons last year, 3,840 tons in 1869, and 7,990 tons in 1868.

COCHINEAL.—The public sales on Wednesday opened without animation, but afterwards went off well at full rates to 1d advance. 1,400 bags Teneriffe: silvers, 2s 4d to 2s 6d; blacks, 2s 5d to 2s 10d; very good to fine, 2s 11d to 3s 6d. 105 bags Honduras: silver, 2s 4d to 2s 4d; black ordinary, 3s 1d. 33 bags Mexican: silver, 2s 4d; black, 2s 3d per lb. About 1,100 bags sold. The deliveries are rather large, but the stock of Teneriffe still keeps heavy, being 8,950 serons, &c.

SHELLAC.—A better demand has prevailed, and at rather higher prices. Business has been chiefly in Orange, at 5/ 15s to 6/ 15s for common to fine; good garnet, 5/ 17s 6d to 6/; button good, 6/ 2s 6d to 6/ 7s 6d per cwt, including 494 chests sold by auction.

OTHER DRYSALTERY GOODS.—Gambier is quiet on the spot. To arrive, 15s 3d paid, and 15s 6d in Liverpool. Stock still large. Cutch continues firm. 500 boxes by auction part sold at 22s 6d for fine. Turmeric has been quiet, with small sales of Bengal at 19s 3d to 20s 6d. There is not much inquiry for safflower. 215 bales Bengal by auction were chiefly bought in. A portion sold at 8/ to 13/ 12s 6d per cwt for ordinary to very good quality.

METALS.—The markets have experienced few changes, being generally steady and without activity. Quotations of iron are the same as quoted for some time past. Large orders are expected for railway bars both for home and foreign use. Scotch pig iron steady at 51s 5d cash. Tin has been less active at the advance lately established. Straits, 135/; to arrive, 132/ to 133/; Banca, 135/ to 136/. The market for copper is steady but well supplied. English remains without change. Sales of Chili at 64/ to 65/; Walaroo, 72/ 10s to 73/ 10s, according to terms. English lead has lost the recent improvement in price. Good English, 18/. Spelter quiet, and prices on the spot partly nominal. Silesian nominal at 18/.

JUTE.—There has been a good business for arrival at full prices, chiefly at 18/ 10s to 23/ 10s per ton, including some of the new crop, but a few parcels have sold on the spot at previous rates. The shipments from Calcutta direct to Dundee have been larger than to same date last year.

HEMP.—Manila lower. Good roping has sold at 53/ to 55/; low, 46/ to 48/; Quilot, 63/. 1,844 bales by auction were chiefly taken in. A few lots sold included in the above quotations. 1,090 bales Sunn were partly sold at 14/ 10s to 22/ 5s. 288 packages South American bought in at 20/ per ton.

LINSEED.—The arrivals are liberal and the market quiet. Sales of Calcutta have been made by speculative holders at about 59s 3d, ex ship. To arrive, the nearest quotation is about 61s per quarter.

OILS.—Common fish oils are firm at the quotations. A large business has been done in sperm at 80/ per tun for colonial. Transactions in olive are chiefly restricted to common qualities, including Zante at 46/. Galipoli quoted 48/ to 49/. A cargo has been offered direct to London at 46/ 15s per tun. Palm is firmer at 38/ 10s to 39/ 5s, and the lower qualities in proportion. Cocoa-nut meets with a better demand for exportation. Ceylon, 38/ 10s. Cochin, 43/ to 45/, and fine still scarce. The market for linseed oil is firmer at 30/ 5s on the spot, and 31/ to 32/ forward deliveries. English brown rape oil has declined in value, viz., 46 on the spot or early deliveries; but now more inquiry prevails. Last four months, 44/; refined, 48/ 10s; foreign, 50/ 10s per ton.

PETROLEUM is quiet. American refined, 1s 6d to 1s 6½d per gallon.

TURPENTINE firm. American spirits, 30s 6d per cwt.

TALLOW.—The market was firmer in the middle of the week, but the latest quotations of Petersburg yesterday showed 6d reduction, and the business was limited in all positions. Petersburg on the spot and to March, 45s 3d to 45s 6d; October to December, 46s 6d per cwt. The supply of colonial continues ample.

PARTICULARS OF TALLOW.—Monday Jan. 16, 1871.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market closes flatly. 221 casks crystalised Demerara by auction part sold at easier rates, from 37s 6d to 39s. 483 bags native Madras were taken in at 24s to 25s 6d. 500 bags beet withdrawn. Sales of West India to-day 141 casks, making 1,507 casks for the week.

COFFEE.—348 casks 151 barrels and bags plantation Ceylon by auction sold at very full rates: colory sorts, 64s to 80s 6d; pale and grey, 60s to 69s. 40 half-bales Mocha withdrawn at 90s per cwt for low quality.

RUM.—At auction to-day Jamaica in second hands sold at 4s to 4s 7d, and Demerara 2s 0½d to 2s 3d per proof gallon.

PEPPER.—Business in Penang black, on the spot and afloat, at 5⅜d. White held at 7⅜d. The last sales Singapore were at 7⅜d.

OIL.—45 tuns colonial sperm by auction part sold at 80/ to 80/ 10s. 70 tons whale bought in at 36/ per tun. 429 casks palm chiefly withdrawn. 65 pipes Ceylon sold at 38/ 10s per ton.

TALLOW.—Russian unaltered. 1,158 casks Australian by auction went at previous rates to 6d decline. Mutton, 43s 6d to 44s 9d; beef, 37s to 42s 6d, and about half sold. Town unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market opened at an advance of 2s per cwt, and closes rather easier with a moderate business doing. Dutch crushed continues firm, 37s 3d for this and next month, and for March-April, 36s 6d, f.o.b., Holland.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Azores and Valencia oranges have improved in value, owing to milder weather and reduced stock. Lemons in fair demand, price well supported, and any of fine quality held for a higher figure. Barcelona nuts improved in price. Black Spanish in demand. Brazil firm. The high price hitherto obtained for chestnuts has brought shipments from Spain and Naples, and the quantity exceeding the demand prices are much lower.

DRY FRUIT.—A quiet market, but clearances are good, and stocks are rather less than on the 1st inst. There is every prospect of a fair trade. Raisins are firmer, and more business has been done.

ENGLISH WOOL.—Market firm, but no excitement.

COLONIAL WOOL.—The market continues firm; fair amount of business doing.

FLAX.—Market firm.

HEMP.—Market very dull for Russian, and little business passing. Manila of good quality scarce and firm.

SILK.—Market firm but little doing, excepting in Canton silks, which have sold freely, and are now firm in price.

SEEDS.—The trade is inactive.

TOBACCO.—The market for North American tobacco has presented no new feature during the past week. Sales have chiefly comprised small lots of old import of good quality at current rates; but the transactions have been upon a very limited scale. In continental and other growths there has been a good business done, and prices of desirable classes are well maintained.

LEATHER.—The leather trade of the past week presents no new feature, but the previous demand remains unabated for shaved hides, light dressing hides, and the curried articles they produce. At Leadenhall on Tuesday there was a very small supply of fresh goods, and in addition to the articles named, light crop-hides, bellies, and calf-skins, of nearly all weights, were scarce and in request. Prices were in all cases well maintained.

METALS.—Again a very quiet week. The greatest caution is observable by all parties, and transactions are in consequence limited. Copper is unchanged in quotations, but prices are really not quite so firm. Tin is still buoyant, but rather more is offering for arrival. Iron, spelter, and lead are all quiet. Tin plates continue in good demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	46	6
Fat by ditto	2	2
Yellow Russian ditto	46	6
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 2,475 casks.

PROVISIONS.

We have a fall of 2s all round in bacon to-day. Prime sizeable Waterford, 64s, f.o.b.; heavy, 61s, f.o.b.; Cork to Limerick, 61s to 62s; landed for sizeable heavy, 5s less. Trade dull. Friesland butter, quality bad, receded to 144s. Zwoll, 130s to 136s. Fine Canadians made 124s.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 16.—The total imports of foreign stock into London last week amounted to 2,505 head. In the corresponding week in 1870 we received 4,011; in 1869, 4,694; in 1868, 3,019; and in 1867, 9,510 head.

Owing to the mild weather, and to the depression in the dead meat market, the cattle trade has been in a quiet state to-day, but in consequence of the limited supplies offering prices have been maintained. From our own grazing districts the receipts of beasts have been about an average, but the show of foreign has been trifling. The demand for all breeds has been inactive, at about last week's quotations. For the best Scots and crosses 5s 10d to 6s per 8 lbs has been obtained. The show of sheep has been short. The trade has been quiet, at late currencies; the best Downs and half-breds have sold at 6s 10d to 6s per 8 lbs. Calves have been quiet, and there has been but little inquiry for pigs.

SUPPLIES OF SALE.

HOP MARKET.

BOROUGH, Friday, Jan. 20.—Much firmness has been observable in the hop market. Choice qualities have continued in good demand, and the late advances have been thoroughly maintained. Medium and inferior grades also have been purchased freely at prices tending towards improvement. Mid and East Kents, 35s to 140s; Weald of Kent, 35s to 70s; Sussex, 30s to 66s; Farnham and country, 75s to 112s; old, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Jan. 20.—Only moderate supplies of potatoes are on sale at these markets. The trade has been quiet at our quotations. English Regents, 80s to 100s; Scotch Regents, 80s to 100s; and Rocks, 70s to 85s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 20.—The demand for all useful kinds continues; and as our market is but very indifferently supplied with such, prices are tending upwards. The East India wool sales will take place here from the 24th to 27th, or 28th inst., and the quantity announced to be brought forward is 10,600 bales.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 20.—There was a good attendance, and a large business was done in wheat at 1d per cental over Tuesday's rates at this market to-day. Flour 6d higher. Indian corn had a good demand at 1s per quarter advance. Barley and beans were steady. Peas 6d per quarter more money. Oats and oatmeal favour sellers.

WAKEFIELD, Friday, Jan. 20.—This market is firm but quiet to-day at Tuesday's rates. Holders are less disposed to sell red wheat, as an active foreign demand has again sprung up in the East Coast. The inquiry for barley is very limited, and late prices are scarcely maintained. No change in other articles.

The Gazette.

TUESDAY, January 17.

BANKRUPTS.

George Hayter, Edgeware road, fruiterer.
William Brent, Aberystwith, Cardiganshire, innkeeper.
James Broff Byers, Market Rasen, Lincolnshire, solicitor.
Charles Edward Tawell Colman, Great Yarmouth, smack owner.
William Cuss, Lavender terrace, Wandsworth road.
William Clabon Diaper, Bury St Edmunds, innkeeper.
Edwin Faint Easby, Sowerby, Yorkshire, music dealer.
Edward Charles Griffiths and John Ash, Chetwynd Mills, Newport, Shropshire, millers.
Samuel Henn, Leamington, eating house keeper.
John Hughes, Liverpool, builder.
John Kebble, Layham, Suffolk, butcher.
John Martin, Chatwell Court, Staffordshire, ironfounder.
Charles Herman Lewis Muller, West Hartlepool, ship chandler.
William Root, Leamington Priors, job master.
Richard Thwaites, New Elvet, Durham, grocer.

SCOTCH SEQUESTRATIONS.

Thomas Wilson, Edinburgh, commision merchant.
Alexander Stewart Smith, Joseph Campbell Lennie, and David Keer Smith (the Scottish Ochestral Society), Edinburgh.
Henry Henderson, Edinburgh, coach hirer.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

THE

LEGAL & GENERAL LIFE ASSURANCE SOCIETY,

10 FLEET STREET, TEMPLE BAR (FOUNDED 1836),

Has taken a leading part in freeing Life Assurance Contracts from all needless restrictions.

The "Proposal Form" is most simple in its terms.

The Policies are "Indisputable"—that is, free from future challenge.

The Invested Funds bear an unusually high proportion to the Liabilities.

The Guaranteeing Share Capital of One Million (£160,000 paid up) is fully subscribed by 300 Members of the Legal Profession.

Nine-tenths of the Profits belong to the Assured.

Annual Accounts have always been published in full detail.

Settlement Policies in favour of Wife and Children now granted, in terms of the Married Women's Property Act, 1870.

Unreserved information on all points, on application to

E. A. NEWTON, Actuary and Manager.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

TEETH.—MR WEBB (MANY

years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d, postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE

CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage 6d.

Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 45a Moorgate street, City, near the Bank of England. Circulars free by post.

THE PERFECT SUBSTITUTE FOR SILVER.—The Real Nickel Silver, introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs Elkington and Co., is beyond all doubt the best article next to sterling silver that can be used as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

	Fiddle, or Old Silver.			Bead.			Thread			King's, or Shell.		
	£	s	d	£	s	d	£	s	d	£	s	d
Tbl. Frks or Spns. p.doz.	1	10	–	2	1	–	2	2	–	2	5	–
Dessert — —	1	2	–	1	7	–	1	10	–	1	11	–
Tea Spoons		14	–		19	–	1	1	–	1	2	–

These are all as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern—
Table Spoons and Forks ..... £1 2s per dozen
Dessert ditto, 16s per doz; Tea Spoons 10s —

Tea and Coffee Sets, from £3 15s to £21 16s; Dish Covers, from £9 to £26; and Corner Dishes, from £7 10s to £18 18s the set of four. Cruet and Liquor Frames, &c., at proportionate prices. Biscuit Box, 12s to £5 10s.

The largest stock in existence of Plated Dessert Knives and Forks, Fish-eating Knives and Forks, and Carvers.

All kinds of re-plating done by the patent process.

WILLIAM S. BURTON, Furnishing Ironmonger, by appointment, to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled stock, with lists of prices and plans of the 20 large show rooms, post free. 39 Oxford street, W.; 1, 1a, 2, 3, and 4 Newman street; 4, 5 and 6 Perry's place, and 1 Newman yard, London. The cost of delivering goods to the most distant parts of the United Kingdom by Railway is trifling. WILLIAM S. BURTON will always undertake delivery at a small fixed rate.

SEVENTEENTH REPORT OF THE ALLIANCE BANK (Limited).

Capital. £4,000,000. Paid-up capital, £970,650.

DIRECTORS.

Matthew Hutton Chaytor, Esq., Chairman.
Alfred Castellain, Esq., Deputy-Chairman.

Christopher Atkinson, Esq.	James McMaster, Esq.
John Elm, Esq.	John Grant Morris, Esq.
Joseph Fildes, Esq.	Robert Rumney, Esq.
Henry Gruning, Esq.	John Torrance, Esq.
William Keates, Esq.	Charles John Venables, Esq.
Daniel Mackenzie, Esq.	

At a General Meeting of the shareholders, held at the City Terminus Hotel, Cannon street, in the City of London, on Thursday, January 19, 1871, the following report was presented:—

The Directors have to report that the net profits of the Bank for the last half-year (after making the necessary deductions for interest on current and deposit accounts, current expenses, bad debts, and rebate on bills not yet due), amount to £15,417 15s 4d, which, with £3,557 7s 7d, balance from the previous half-year, makes a total of £18,975 2s 11d now to be disposed of.

The Directors, therefore, recommend that a dividend for the last six months of 7s 6d per share, or £3 per cent. per annum, free of income tax, be now declared, which will absorb £14,559 15s, and that £336 11s 10d be written off building and furniture accounts; leaving £4,078 16s 1d to be carried forward to profit and loss new account.—By order of the Board,

W. H. RANSFORD, Secretary.

Bartholomew lane, E.C., 14th Jan., 1871.

N.B.—It is proposed to forward the Dividend Warrants to the shareholders on the 28th instant.

(For London).. QUILTER, BALL, and Co.
(For Liverpool, Manchester, & Birkenhead).. HARMOOD W. BANNER,
} Auditors.

The Secretary having read the advertisement convening the meeting:

The Chairman authenticated the "Register of Transfers" by impressing upon it the common seal of the Company.

The reports and accounts having been taken as read:

It was proposed by the Chairman, seconded by the Deputy-Chairman, and resolved unanimously, that the report and accounts be received and adopted.

The Chairman then declared a dividend, for the half-year ending the 31st December last (free of income tax), of 7s 6d per share, being at the rate of £3 per cent. per annum.

It was resolved unanimously that a vote of thanks be given to the Chairman, the Directors, and Officers, for their attention to the affairs of the Bank for the past half-year.

(Signed) M. H. CHAYTOR, Chairman.

Extracted from the Minutes.

W. H. RANSFORD, Secretary.

THE IMPERIAL OTTOMAN BANK,

CONSTANTINOPLE.

(Capital, £4,050,000; paid-up, £2,025,000.)

Branches at Smyrna, Beyrout, Salonica, and Alexandria; and Agencies at Lanarca (Cyprus), Paris, and London

The London Agency receives money on deposit for fixed periods at rates to be agreed upon. It grants credits on Constantinople, Smyrna, Beyrout, Salonica, Alexandria, and Larnaca; purchases or collects bills drawn on those places, and undertakes the negotiation of all Turkish Government securities and the collection of the coupons.

The London Agency will also execute orders through the Branches of the Imperial Ottoman Bank at Salonica, Smyrna, Beyrout, and Alexandria, for the purchase of produce, such as Cotton, Wool, Silk, Madder roots, Valonea Opium, Grain, &c.

Terms may be ascertained on application at the offices of the London Agency, No. 4 Bank buildings, Lothbury.

R. A. BRENAN, Manager.

IMPERIAL OTTOMAN BANK.

CORRECTED NOTICE.

GENERAL DEBT OF THE OTTOMAN EMPIRE.

The Imperial Ottoman Government hereby give notice to the bearers of Bonds of the General Debt (5%) of the Ottoman Empire, who intend to receive in Europe the current half-yearly Interest, that they must declare such intention at the Agency of the Imperial Ottoman Bank in London, or at its correspondents in Frankfort and Amsterdam, between the 13th January and the 23rd January, 1871, inclusive.

This declaration must be accompanied by a list of the numbers of the Coupons intended to be deposited, but not by the Coupons themselves.

After the 23rd January, 1871, the Coupons of which the lists have been sent in, in accordance with the above directions, are to be deposited for verification, together with a duplicate list, at the Agency of the Imperial Ottoman Bank in London (in London daily, Saturdays excepted, between the hours of 11 and 3), or at its correspondents in Frankfort and Amsterdam, when they will be exchanged for a receipt payable at ten days' date.

Coupons not declared by the 23rd January must be sent to the Imperial Ottoman Bank, Constantinople, who alone are authorised to pay them after that date.

The necessary forms can be obtained on application at the offices of the Imperial Ottoman Bank, 4 Bank buildings, Lothbury.

N.B.—Cheques can be sent by post only at the written request and risk of the holder of the Bonds.

THE AGRA BANK (LIMITED).

ESTABLISHED IN 1833.—CAPITAL, £1,000,000.

HEAD OFFICE—Nicholas lane, Lombard street, London

BANKERS.

DEPOSITS received for fixed periods on the following terms, viz.:—

At 5 per cent. per annum, subject to 12 months' notice of withdrawal.

At 4 per cent. per annum, subject to 6 months' notice of withdrawal.

At 3 per cent. per annum, subject to 3 months' notice of withdrawal.

BILLS issued at the current exchange of the day on any of the branches of the bank free of extra charge; and approved bills purchased or sent for collection.

SALES AND PURCHASES effected in British and foreign securities, in East India stock and loans, and the safe custody of the same undertaken.

Interest drawn, and army, navy, and civil pay and pensions realised.

Every other description of banking business and money agency British and Indian, transacted.

J. THOMSON, Chairman

THIRTIETH REPORT OF

THE CITY BANK, LONDON.—

At a GENERAL MEETING of the shareholders, held at the London Tavern, on Tuesday, 17th January, 1871.

DIRECTORS.

John Jones, Esq., Chairman.

Henry Vigurs East, Esq.	Wm. Macnaughton, Esq.
John Hacklock, Esq.	William Simpson, Esq.
Andrew Lawrie, Esq.	Jonathan Thorp, Esq.
Robert Lloyd, Esq.	James E. Vanner, Esq.
Wm. McArthur, Esq., M.P.	George Young, Esq.

MANAGERS.

John Woolmore Duncan. | Alfred George Kennedy.

BRANCH OFFICES: No. 34 Old Bond street—Edward G. Mullins. Nos. 159 and 160 Tottenham court road—Alfred Gliddon. No. 25 Ludgate hill—Wm. Herbage.

The "Register of Shareholders" and "Register of Transfers" having been duly authenticated, the following REPORT was read, viz.:—

"The accounts of 'Liabilities and Assets' and of 'Profit and Loss,' presented herewith, show that—after providing for interest on current and deposit accounts and for bad and doubtful debts—the gross profits for the six months ending 31st December last amount to £44,282 17s. 3d. to which is added the balance from last half-year of £1,443 8s.

"Due provision having been made for current expenses and rebate of interest on bills discounted not yet due, the Directors declare a dividend at the rate of £7 per cent. per annum, free of income tax, and £5,000 to the Reserved Fund, which thereby amounts to £100,000, and carry forward a balance of £1,585 14s 8d to the credit of the present half-year.

"The Directors, in announcing the retirement from the Board of Mr John Campbell, have to express their deep regret at the loss of his services.

"The dividend will be payable on and after the 24th inst."

The dividend was then declared for the half-year ending the 31st December last, at and after the rate of £7 per cent. per annum on the paid-up capital, free of income tax.

It was resolved unanimously:—

That the report now read be received and adopted.

That the best thanks of the shareholders are due to the Chairman and Directors for the time and energy bestowed on the management of the bank.

That the thanks of the shareholders be given to the Managers, Secretary, and other officers of the bank, for the way in which they have discharged their duties.

(Signed) JOHN JONES, Chairman.

OWEN LEWIS, JOHN CURRY, } Auditors.

THE CITY BANK, LONDON.

Incorporated by Royal Charter, A.D. 1855.

HEAD OFFICE—(Corner of Finch lane) Threadneedle street.

BRANCH OFFICES: No. 34 Old Bond street. Nos. 159 and 160 Tottenham court road. No. 25 Ludgate hill.

	£	s	d
Subscribed capital (50,000 shares of £20 each)	1,000,000	0	0
Paid up capital	500,000	0	0
Reserved fund	100,000	0	0

CURRENT ACCOUNTS are made up to the 30th of June and 31st of December, in each year; and if the credit balance shall not, at any time during the half-year, have been below £500, interest at the rate of 2 per cent. per annum is allowed on the minimum monthly balances. If not below £200, interest at the rate of 1 per cent. per annum is allowed on the minimum monthly balances; but if under £200 no interest is allowed: in cases where a remunerative balance is not maintained a small charge for commission is made. Parties keeping current accounts have the privilege of drawing cheques, of having approved bills discounted, of obtaining loans upon negotiable securities, of depositing bills, coupons, &c., for collection; and of lodging with the Bank, deeds and other valuable property in the fireproof strong rooms for safe custody.

DEPOSIT ACCOUNTS.—Money, in amounts of £10 and upwards, is received from the public generally—subject to seven days' notice of withdrawal, and interest is allowed thereon at the current rates of the day; the Bank notifying any change in the rate of interest by advertisement in one or more of the leading London newspapers. If the money be withdrawn within a fortnight no interest is allowed. Persons having current accounts can transfer any portion of their credit balance to deposit account.

The AGENCY of COUNTRY and FOREIGN BANKS, whether joint stock or private, is undertaken by the Bank.

LETTERS of CREDIT, payable at any of the chief commercial towns and cities of the world, are granted. Mercantile and Marginal Credits are also granted by the Bank.

CIRCULAR NOTES are issued by the Bank, addressed to all, and payable at any of the places on the continent where the Bank has an agent.

DIVIDENDS, &c., on Government and other stocks, annuities, pensions, &c., are received for customers of the Bank without charge; the purchase and sale of stocks, shares, and securities are also undertaken; and every description of banking business is transacted.

The officers and clerks of the Bank are pledged not to disclose the transactions of any of its customers.

London, January 17, 1871.

BANK OF EGYPT.

Notice is hereby given, that the Fifteenth Annual General Meeting of this Corporation will be held at the City Terminus Hotel, Cannon street, on Wednesday, the 1st day of February next, at half-past Two o'clock p.m. precisely, when the Directors will present a report and statement of accounts, as audited, for the half-year which ended on the 31st of December, 1870.

The Transfer Books will be Closed from Monday, the 23rd January, to Friday, the 3rd February, both inclusive.—By order of the Court,

EDWARD CHESHIRE, Secretary.

The holders of these Bonds are requested to present the same in due course for Payment, and all interest thereon will cease and determine from the dates fixed for Payment.

The Bonds, with lists arranged in numerical order, must be left two clear days for examination.

J. HENRY SCHRODER and CO.,
Contractors for the Loan.

145 Leadenhall street, London,
17th Jan., 1871.

THE

WEST POLBREEN TIN MINING COMPANY.

SITUATED IN THE PARISH OF ST AGNES, CORNWALL.

IN 2,500 SHARES OF £3 EACH.

CONDUCTED ON THE COST-BOOK SYSTEM.

BANKERS—Alliance Bank, London.

MANAGER—Capt. John Nancarrow, Camborne, Cornwall.

OFFICES—11 ROYAL EXCHANGE, LONDON, E.C.

The progressive and now almost perfect success of the operations at the Polbreen Tin Mine have had the effect of attracting attention to an adjoining sett that had long enjoyed a reputation in the St Agnes district for containing within its bounds exceedingly rich stores of Tin ore, which had never been more than very slightly developed. The Polbreen Mine, as is now well known, is on the eve of declaring its First Dividend after barely twelve months' working, and has kept up the established fame of the vicinity for the quality as well as the quantity of its mineral treasures. The quality, indeed, of the Tin now in hand at Polbreen forms an important element in the amount of profit that will be netted by the shareholders, for it has been found to sample equal to any "stuff" raised within the parish of St Agnes, renowned as it is above all others in the county of Cornwall for the excellence of its ore.

Another remarkable peculiarity of the Polbreen Mine has been the facility with which every operation has been carried to the desired result. There has been no difficulty from hard ground; there has been no impediment from water; the lodes are found to run in a regular direction, causing no anxiety as to the possibility of their being thoroughly and continuously worked when their track is once discovered. All these advantages and facilities are very certain to extend into the neighbouring property, which positively touches Polbreen on the western side.

West Polbreen, then, is situated exactly to the west of its namesake, one boundary line separating the two for a considerable distance. This alone is a sure guarantee for the wealth of the westernmost of the pair, as the tin-bearing lodes in the St Agnes district run, almost without exception, from east to west—run, in fact, seawards. As West Polbreen lies between the western cliffs and the great majority of the mines in the district, there is scarcely a lode in the parish that may not be expected to contribute to the wealth of this sett as far as its area extends for their reception—which area, let it be remembered, is full double that of Polbreen.

The highly promising geological formation of the ground included in the West Polbreen boundary has been fully reported on by Capt. John Nancarrow and Capt. James Rowe, and the favoured position of the sett will be seen also by reference to the map that accompanies the prospectus. Wheal Coit and West Wheal Coit lie immediately to the north, while the Polberro group, Trevaunance, Wheal Pie, Wheal Kitty, Penhalls, and other celebrated mines, are in close contiguity towards the north-east.

There is no doubt, therefore, that West Polbreen lies in the very richest part of the St Agnes district. As noted on the map, the past profits yielded by Polbreen itself to the workers of days gone-by have been estimated at no less than £40,000. Trevaunance, a little plot of three and a half acres, in private hands, has made the magnificent return of £200,000, and still furnishes an income to its owners. The sums cleared from the others are likewise to be reckoned by thousands of pounds. Wheal Kitty figures, according to the best data at command, for £50,000; Penhalls for £35,000; Blue Hills, £37.000; Polberro, £30,000; Wheal Coit, £20,000; Wheal Coates, £17,000; Wheal Friendly, £16,000; and Wheal Pie, £4,000. With one or two exceptions these mines are still being worked, and giving income to their owners or dividends to their companies. Penhalls, for instance, paid £4,500 in dividends last year, against £3,875 in 1869; and Wheal Kitty £4,294, against £2,577 in the preceding year. But West Polbreen is almost wholly in *virgin ground*—a repository of mineral not yet rifled by pick or blast.

Just sufficient has been done on West Polbreen by former holders thoroughly to test its productiveness; but the fortunes that have been realised in so many instances from Cornish mines have not been won in that fashion. The days for the mere scratching of the crust have passed away; and grander returns than ever are now obtained by the union of capital and perseverance with the most practical and experienced engineering skill that can be found.

Former holders of West Polbreen actually met with a good quantity of Tin in simply carrying to surface the stuff dislodged while working a way from the shaft to the adit. The simplicity of this operation is a pledge for the profits that await those who will apply to a sett of such magnificent promise the men, machinery, and science that can be commanded at the present day.

There are no vast expenses to be incurred at West Polbreen. There is no heavy outlay to face in clearing away the rubbish and wreck of former days—no pumping engine required to get rid of a lake of water accumulated from neglect and abandonment.

Six lodes are known to exist in West Polbreen, two at least of which run from the neighbouring Polbreen mine, where they are being worked at this moment with great profit. One of these will, it is thought, be reached with not more than three months' labour.

These considerations fully justify the recommendatory opinions of Captain J. Nancarrow and Captain J. Rowe. The sett is nearly all in virgin ground, and it seems difficult, as the latter states, to conceive how such a property could have remained unwrought up to this present time.

Within a very short distance of West Polbreen, Tin was being raised during the past year from an open working, that looked like a mere gravel-pit to the eyes of the passer-by inexperienced in mining matters. Almost as easily, but with, it is believed, unexampled productiveness, will West Polbreen yield up her stores.

Never was there a time when those stores would have returned such excellent profits to the Mining Adventurer as during this year of 1871. The price of Tin is now £30 per ton higher than the *average* of the last ten years; £13 per ton above the average of the dearest of those years; and £55 per ton higher than the average of the cheapest. Or, in other words, the shareholders in West Polbreen may get £85 per ton for their Tin, whilst, when the former workers ceased operations, the quotation for their produce was very possibly but £30 per ton. Nor is the present price due to exceptional causes. The world's consumption of Tin treads hard on the supply. Neither commercial nor political influences have had power to check the advance. The United States of America produce no Tin; and in their ever-increasing population and daily-augmenting wealth, England has a customer for this commodity that will long keep the price steadily remunerative. But, as shown above, the cost of raising the ore from West Polbreen will be singularly moderate; and the profit to the shareholders on the market price must, as a consequence, be singularly good. When brought to dividend some months hence, West Polbreen will stand amongst the highest on the list, with her shares necessarily advanced at least 100 per cent. in value. The possible rise in the quotations for shares in such a mine is something to be wondered at. The money actually called up on a sett in an adjoining parish has been 9s 9d only, and the shares are now selling at £11.

A lease of the sett for twenty-one years has been secured, and will become the property of the shareholders.

The West Polbreen Company is constituted on the Cost-Book principle, which gives the shareholders perfect control over the expenditure, by necessitating an audit of the accounts at short intervals, fixed by the Stannaries Act of 1869, and is a safeguard against the mine being run into debt under any pretence whatever.

The shares, 2,500 in number, will be issued at £3 per share, so as at once and for all to raise a capital amply sufficient for every outlay that can be requisite until the mine pays its own expenses, and is brought to dividend.

Polbreen, the mine immediately contiguous, under the same management as West Polbreen, will reach the position of paying its expenses and settling the period for the first dividend within the next two months; and as the lodes run from the one to the other, the shares of West Polbreen will at once assume a substantial value, and spring to a quotation such as mines less fortunately circumstanced are years in attaining.

Application for shares should be made to

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1870. *As part of an early number of the* Economist, *we shall, in continuation of the Series commenced with* 1863, *issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the Year, &c.; the object of the Supplement being to place in possession of our readers a Commercial History of* 1870 *worthy of preservation and adapted for reference.*

THE FALL OF PARIS AND ITS PROBABLE EFFECT HERE.

What may be the exact position of the present negotiations for the surrender of Paris, it is not very easy and not very important to determine. For a fortnight or more it has been plain that the end was fast coming near, though it was impossible to predict the precise hour. Everyone with a spark of human feeling must hope that the Government of Paris will not, out of obstinacy or love of false glory, continue the struggle till the food of the city is quite or almost exhausted. In such a case as this they *ought* to surrender with a very large supply in hand, else the Parisians will be worse starved after the capitulation than before it. Count Bismarck has justly said that the Germans cannot undertake, besides feeding their own troops, to feed 2,000,000 of Parisians also. And an interval will be wanted, after the fall of the city, before the ordinary laws of supply and demand can operate, or before any foreign help can be given.

This, however, will be settled without our having anything to do with it. What concerns us most intimately, because it is the only part of the matter our conduct can change, is the effect of the fall of Paris on the minds of men here. There is a prevalent idea that as soon as Paris falls the war will be at an end; that the natural effect of peace on our money market will be felt; that the continental money here for a time will be withdrawn; that both France and Germany will begin to borrow from us; and that so the value of money will very rapidly rise. But though there is great foundation for these expectations, there is a contrary consideration, the effect of which must, for some time, be much felt, and which is somewhat disguised and overlooked.

We do not mean the possibility to which some of our contemporaries give a dubious credence, that after the capitulation of Paris Monsieur Gambetta can long continue to maintain the war. This war has marred many confident prophecies; but rightly or wrongly, we must doubt greatly if he has any such power. The moral effect of the fall of Paris will be immense. The ascendancy of the capital has always been great in France, and it is very great still, as Monsieur Gambetta and his associates prove, for their Government was appointed only by an accidental crowd of excited Parisians. The capitulation will everywhere find in the provinces beaten armies—hasty levies half-trained and half-hearted—without competent officers, with no general whom they can trust to lead them to victory, and now led by generals whose army always expects them to lead it to defeat, and who, if we may judge from their timid strategy, seem half to expect defeat themselves. The capitulation will find too a civil population long deceived by false promises—long buoyed up by false hopes, and only now the more likely to hope and to believe nothing further. Every people would be likely to sue for peace in such circumstances, but perhaps the French are more likely than any. Excitable and effervescent as in some respects they are, yet in other aspects there is a timid rationality about them. If they take to counting the cost they count more narrowly and more anxiously perhaps than any nation—much more so certainly than the English. Such a people will not, we expect, when Paris is gone, long continue a hopeless, a pernicious, and a costly strife. While there was any real hope courage was wise, but scarcely any guilt is worse than that of maintaining, at the cost of many lives, a policy and a post plainly untenable.

The disturbing force which we think is not adequately considered is different, and is this. Before France can borrow of us, and before French money can go home with promise of security, there must be a French Government fairly safe and stable, if not perfectly so. And where is such a Government to be found? Not in the Empire, with the blame of the war and the shame of Sedan, and still less, we think, in the present Republic, with the memory of this painful defence, and the discredit of its collapse; possibly in some other kind of Republic—possibly in some form of Monarchy. But then these substituted powers must be organised; and in the meantime France is disorganised, her industry is half destroyed, her population are suffering, foreign armies are in her provinces, and the vestiges of her own armies are scattered up

and down, and must be much better than the vestiges of other armies if they do not cause grave suffering and are not an additional evil. That is, on the whole, France will be a country without a Government just at the moment she most requires a Government.

Although therefore Germany may begin to borrow much from England as soon as she wishes, we doubt if for sometime France will have the means of so doing. Certainly she will not be able to borrow with the ease and the suddenness which many seem to expect. The Money Market, like Count Bismarck, requires to treat with a nation—and with an authorised and recognised agent of that nation; and where is that agent to be found?

THE BEST REMEDY FOR THE ERRORS OF THE NEW STAMP ACT.

THERE are several "miscarriages" in the New Stamp Act, of the origin of which we have no wish to speak further, but the remedy for which ought at once to be considered. Grave dissatisfaction exists at the unexpected changes, and a strong feeling that the law cannot remain as it is.

The principal miscarriage is the "new tax" on the negotiation and on the payment of interest on certain foreign securities. Practically it is a new tax, even if the solicitor to the Inland Revenue is correct in saying that it existed before, only that the department which he advises did not collect it. The broad result is that whereas formerly the negotiation and the payment of interest on *certain* foreign bonds only was taxed, now the negotiation and payment of interest on *all* such bonds is to be taxed. Putting aside the unexpectedness of the change, we come to the question—are these dealings with foreign securities advisable subjects for taxation or are they not?

The first impression certainly is that they are. They are properties capable of sale and yielding an income, and if other such properties are taxable, why should not these be so also? The presumption is always in favour of equality; inequality has to justify itself. Can it then in this case do so?

First,—it is said that the law cannot be worked. It says that every person who, in the United Kingdom, "negotiates "or pays any interest upon any foreign security not being "duly stamped shall forfeit the sum of 20*l*." But in practice, the person who pays the interest on the bond has no means of knowing whether it is stamped or not. The coupon which represents that interest is separated from the bond, and presented for payment by itself. The bond itself may not be in this country. These coupons are largely bought by exchange dealers, and form one of the cash items by which the indebtedness of different countries is settled. All this trade would be stopped if the buyer had to assure himself that the bond to which once the coupon was attached was duly stamped; but the buyer must so assure himself if the law is to stand, for the recognised agents of foreign Governments cannot safely pay these "coupons" unless they are satisfied as to the stamping of the parent bond.

This difficulty affects great sums of money. Messrs Baring and Messrs Rothschild pay "coupons" on bonds amounting to hundreds of millions, many, perhaps most, of which never were in England at all. And it is a difficulty not felt in English securities. English bonds with coupons must be stamped when issued, else the issuing company would be liable to heavy penalties. No respectable company ever runs the risk of these penalties; and an English banker paying the coupon of an English bond runs no risk though he does not see the bond. He knows that it is stamped very well. But a foreign security is not stamped with an English stamp when issued. Presumably it was issued in its own country, and for its own country. When Messrs Rothschild therefore deal with a coupon on a foreign bond, they cannot assume that it was stamped as an English banker can in dealing with an English bond. They must have evidence, and this evidence makes the difficulty.

Secondly,—it is said that this tax—to the extent to which it is new—is retrospective and therefore unjust. In 1862, when the system of taxing foreign bonds was first begun, all bonds then existing were exempted. But now the purchaser of a bond issued (say) in 1865, who did not expect to be taxed when he bought, is suddenly taxed, and finds his property less valuable than he thought. We confess indeed that we are not sure as to the argument from abstract justice in such a matter. If the Act of 1862 had taxed all bonds then existing as well as all bonds thereafter to be made, we should not be sure it had done wrong. But there is an obvious inequality in exempting existing securities from the new tax of 1862, and not exempting them from the new tax of 1870.

Thirdly,—there is a difficulty in the stamping of these foreign bonds. Certainly the law will not do as it stands. The law says:—

"11. Where an instrument is chargeable with ad valorem "duty in respect of any money in any foreign or colonial "currency, such duty shall be calculated on the value of such "money in British currency, according to the current rate of "exchange on the day of the date of the instrument.

"12. Where an instrument is chargeable with ad valorem "duty in repect of any stock or of any marketable security, "such duty shall be calculated on the value of such stock or "security according to the average price thereof on the day "of the date of the instrument."

But the effect of these clauses is that a series of bonds extending over some years, during which the Exchange has much varied, is sometimes taxed with a higher stamp duty and sometimes with a lower one. One Five-Twenty bond would be taxed (say) at the rate of 3s to the dollar, another at the rate of 4s, and there is much vexation in such differences. They interfere with and complicate dealings, and a tax which does so violates one of the well-known principles of taxation. It makes the taxpayer pay in a way in which it is particularly unpleasant to him to pay. And this objection does not extend to English securities, since there is no "exchange" in dealing with them.

Fourthly,—it is said that this tax on the import of foreign bonds is injurious to English interests. England, as Mr Goschen observed, earns a commission by being, for many purposes at least, the monetary clearing-house of the world. Far more debts not of home origin are settled here than anywhere else in the world, and the business being transacted here we get a brokerage on immense amounts, and so become richer. Everything which impedes the settlement of foreign balances in England tends to drive that settlement to some unencumbered money market abroad, and so gives the dealers in that market a profit at the expense of ours. Now the free importation of foreign bonds and foreign coupons is one of the readiest ways in the present state of business of settling international balances, and a stamp duty which prevents or impedes the import of foreign securities is practically a bounty on settling those balances abroad, and a tax on settling them here.

Exchange business, we must remember, is one of the finest calculation, and what would be thought an inconsiderable and petty charge in most kinds of trade is here, in certain states of the market, influential and vital. Nothing can be more absurd or more inconsistent than to purify our tariff of all minor import duties because they impede ordinary trade, and then to impose an import duty on articles used in the money trade, which is of all trades the easiest to hurt because its calculations are the most refined, which is particularly worth keeping because, being in fact a trade of brokerage, it yields a large remuneration without requiring a proportionate capital.

These arguments against the tax plainly, we think, preponderate over the one argument for it. That argument only is that foreign securities being a kind of property, ought to be taxed if other properties are taxed. But we are not to pursue minute equality in taxation when that pursuit causes considerable evils. All our taxation rests on the application of this principle. Why else should a man who buys imported sugar be taxed, and a man who buys imported raisins not be taxed? Why should a man who drinks beer be taxed, and a man who drinks cider not be taxed? We should charge like things with like taxes when no real evils ensue; but it is pedantry to aim at an overnice adjustment when we hurt business by doing so.

What the remedies should be for the other miscarriages in the Act we must leave to another week.

THE "QUARTERLY REVIEW" ON THE LESSONS OF THE WAR.

THE "Quarterly Review," in an article of considerable force, though not, perhaps, of any great width of view, on the political lessons of the war,—an article attributed by rumour to a distinguished Member of the Opposition in the House of

Lords,—comments with something like bitterness on the vacillations of the popular mind in relation to our national defences, declaring it to be "the fault of our English system, "that, with a dynasty absolutely secure, it artificially imitates "the vices of a throne mined by revolution and conscious of "hourly danger." The Reviewer shows that it was the instability of the French Executive, the necessity for looking to the most opposite points of the political compass for aid, for fomenting the love of glory on the one hand, for respecting the hatred of a conscription on the other—the necessity for conciliating the army, which, as was supposed at least, could only be done be relaxing its discipline, on the one hand, and the equally strong necessity for strengthening it, which could only be done by improving its discipline to the utmost on the other hand,—which led to the frightful collapse of the French military system. The Emperor had yielded to the Corps Legislatif here, and to the peasantry there. He had made things comfortable for the army, and he had made the army comfortable to the country; and the net result was that first the army failed him disgracefully, and then the country. After pointing this out with a good deal of brilliancy, and pointing out also how the stability of the Prussian throne, which enabled the Hohenzollerns to set public opinion on the same subject at defiance, had given Prussia the fruits of a uniform and coherent military policy of a long series of years, never modified in deference to any popular pressure, the Reviewer goes on to assert that England, so far at least as our military policy is concerned, stands in precisely the position, not of Prussia, but of France. The administration of the War office is always changing. Every Minister, in succession, has his own crotchets as to what will ensure efficiency; and every Cabinet, in turn, is subjected to a Parliamentary pressure of variable direction and equally variable intensity. Except in times of spasmodic alarm, reductions of expenditure are always popular; and times of spasmodic alarm come at intervals far too rare, and are continued for a period far too short, to mend the matter, if they do not absolutely make it worse. Hence the Quarterly Reviewer finds that the method of our military policy is far more like the incoherence of France than the steady coherence of Prussia, and predicts for us, whenever tried, a collapse of the same fatal kind. Our political machinery, he says, "unri- "valled as an instrument of enfeebling the arm of Govern- "ment, and therefore hindering an excess of executive inter- "ference, has prevented the oppressions into which the zeal "of continental bureaus constantly betrays them. It satis- "fies the most imperious want of a free people, which is to "be let alone. It is not ineffective for purposes of mere "destruction, especially when it is driven by the forces of "sectarian animosity. But in matters where it is necessary "that Government should govern and create, it lamentably "breaks down. All the virtues that are attributed to it,— "in many respects justly,—for purposes of peace, make it "helpless for purposes of war."

We do not, on the whole, dissent very materially from this criticism. The Reviewer may be slightly caricaturing the incoherence of public opinion when he describes "the decisions "of the House of Commons upon the question who is to rule "the country," as "something between a judgment and a "scramble;" but as regards military matters at least, this is not a bad description of what the policy of the House of Commons has been. Nor is it conceivable that while the military policy of the House of Commons is decided by "something between a judgment and a "scramble," the successive War-Ministers are likely to save us from the results of our own flightiness of purpose. Popular Government *means*, and as we suppose ought to mean, a Government which, for good and for evil, savours of all the good qualities and all the bad qualities of the people. It would not be well, but the reverse, if on subjects on which we are ignorant and careless, we were to be saved from the natural results of that ignorance and carelessness. The Quarterly Reviewer is perfectly right in saying that the English people and the English House of Commons have no steady military policy, and that as a consequence we are, and while it is so, always must be, unprepared for any great and sudden military effort.

But when the Reviewer assumes, as we think he does, that nothing can really remedy this mischief, except a change which will give us, in some form or other, a more permanent Executive, operating like the Presidential Government in the United States for instance, or the dynastic power of Princes like Hohenzollerns who refuse to surrender the army to the tender mercies of Parliaments, we cannot at all go with him. He seems to us to ignore the fact that military collapses happen as much to permanent Executives, which are not possessed with a special care and genius for military administration, as to changeable Executives. There is nothing to prove that the next, or next but one, President of the United States, will be much readier for a sudden war than was Mr Buchanan. General Grant, who gained his Presidential chair by his success as a soldier, may be; but generals of genius and experience are not likely to be permanently resident at the White House. The military collapse of Austria in 1866 was not the collapse of an unstable Executive. The army of Austria had long been one of the great Imperial institutions, and yet it vanished before the Prussian arms even more quickly than the French army. The Russian military system had been most carefully matured and prepared by a ruler of real genius before the Crimean war in 1853; and yet it was found quite unequal to the strain put upon it by very indifferent armies under very feeble commanders. The instability of the Executive of a State is not by any means the sole cause of military incompetence. You may have a dynasty as completely masters of the situation as the Hohenzollerns, and as fond of dabbling in military matters, and yet as incompetent or as unsuccessful as Napoleon III. No doubt a variable mind in military affairs is a sure cause of failure; but a well-preserved tradition is not only not a sure cause of success, but may be—if the military tradition so preserved is not wise and well adapted to the exigencies of the people—as sure a cause of failure as variability of mind itself. The remedy for ignorance and incoherence of purpose is instruction. And we maintain that if you can but once get a people well instructed in what they want, there is *far* less danger of a feeble and ignorant policy on military matters, or any others, than there is from a dynastic tradition, however well preserved. When, therefore, the Reviewer proposes somewhat faintly, and as if he were half afraid of his own suggestion, that the military estimates might be voted for a term of years in order to escape the incoherence of popular feeling, we entirely object to his remedy. The people must learn what they really want, and must learn to understand the importance of keeping to a principle when once they have adopted it. The best way to teach them this is to turn their attention constantly to the subject. If, with an instructed people, and a House of Commons improved, as we may fairly hope that it will be improved when it comes to be chosen by an instructed people, we cannot ensure a certain amount of clear and constant purpose in military matters, as we can in domestic matters, we do not know any conceivable device by which such clearness and constancy of purpose can really be obtained. There was a time when the English people understood little or nothing about commercial and financial policy. We do not say but that that time may come again, if the children of the new electors are not speedily taught the elements of clear notions on these subjects. But at least for a considerable term of years we have had a House of Commons clearly knowing its own mind on this subject, and neither ignorant nor fickle. The same may be said of the general drift of our criminal legislation; and we do not at all see why the same should not be true of our Army and Navy system. There is at least far more chance of getting a coherent system out of popular knowledge, than there is out of bureaucratic independence. Popular intelligence is not easily cultivated, but so far as it is attained it is a sure guarantee against both folly and fickleness. Bureaucratic independence is no guarantee at all against the former; and while you have no safety as to the bureaucratic successions, it is no considerable guarantee against the latter. The military estimates might be voted for six years, and the only result be that all would be misspent, while at the end of the six years the people would know far less about the matter than before, and the nation be more helpless. It seems to us idle to propose any remedy for the misgovernment of a self-governed people, except the better information of the governing body,—that is, of the public itself.

THE RECALL OF MR MOTLEY.

It is hardly possible to read carefully the correspondence between Mr Motley and the American Secretary of State, Mr

Fish, without being struck by the difficulties which beset American Governments in the conduct of their diplomatic affairs in Europe. Some years ago, during the American Civil War, all Europe was laughing at the rhodomontade talked by Mr Cassius Clay, the American Minister at St Petersburg. Quite recently, we could hardly restrain our astonishment at the extraordinary displays of Mr Washburne in Paris, who appeared to have quite a policy of his own, as distinct from that of his Government; and now we are let into the secret of the differences between the most accomplished servant of the present Administration, Mr Motley, the historian of the Netherlands, and his chief at Washington, differences which led to the peremptory recall of the Minister for a fault which, to English critics, seems considerably slighter than that for which other American Ministers seem to have incurred no blame at all, but still undoubtedly a fault, and one which, in the eyes of any English Foreign Secretary, would have been thought a very grievous fault. We may describe the whole difficulty, as it is illustrated by the correspondence between Mr Fish and Mr Motley, as arising from a very insufficient sense of discipline on both sides, the side as well of the President as of his subordinate. This insufficient sense of discipline naturally leads to mistrusts and hesitations which could not possibly exist between a real chief and his servants.

Mr Motley received his appointment, as is everywhere admitted, through the influence of Senator Sumner, who was undoubtedly regarded by the President from the first a little too much as some of the less powerful of English Kings have regarded the King-maker to whom they have owed their Throne. Mr Motley had hardly received his appointment, and had not received his instructions, when he began to study on his own account, and with an obvious leaning to the Sumnerite view on the subject, the great controversy upon the Alabama claims; and he not only studied for himself, but he reduced to writing and communicated to one or two friends the result of his studies, and even laid it before the principal Secretary of State, Mr Hamilton Fish. Mr Motley's view was of course not the view of the President, who was hardly likely to accept a policy from his own Minister, and it is quite certain that from the moment the "memoir" of Mr Motley had been communicated to Mr Fish, Mr Motley was profoundly distrusted by the Government as its exponent, though it did not venture to cancel his appointment. Mr Motley himself seems to have been told before he left Washington that the Alabama claims, if treated at all between the two Governments, would be treated directly between the President and Mr Thornton in case the British Government should give its assent, so that he was not at all surprised or rebuked when he was instructed a month or two after his first conversation on the subject with Lord Clarendon to request that the negotiations might be resumed on the American side of the Atlantic. Mr Motley himself, indeed, appears to have fully intended to clear his mind of his own views, and to become the faithful organ of the President; but this was not so easy a matter for an accomplished man brim-full of the subject, proud of his own mastery of it, and with even some of his own happy phrases ringing in his head. At all events it was at his very first official interview with Lord Clarendon that the offence was committed for which, more than a year subsequently, he was peremptorily recalled. The President had instructed Mr Motley, says Mr Fish, to take a very hopeful view of the prospects of an agreement on the subject, and above all to suppress all threats. Mr Motley, on the contrary, expressed a feeling of despondency as to the possibility of the two nations ever understanding each other; and he hinted at "the contingencies" which might result from not coming to an agreement. Again, he gave out of his own head an account of the reasons why the previous treaty (concluded by Mr Reverdy Johnson) had been rejected by the Senate, of which he had not been instructed to give any account. Naturally the Secretary of State and the President were annoyed and piqued. Not so naturally they suppressed their annoyance, told Mr Motley that his "general presentation and treatment of the several subjects discussed in the interview meet "the approval of this department,"—a sentence which, Mr Fish says, was due to his consideration for Mr Motley, but which certainly expresses a good deal more than consideration for a man who had, as Mr Fish elsewhere asserts, spoken "*in direct opposition to the "temper and spirit*" of his instructions. In point of fact, either the President and Mr Fish changed their own minds as to what the temper and spirit of their instructions were; or they were afraid to tell Mr Motley plainly that he had transgressed his instructions. It seems that Mr Motley also forgot in his despatch to say that he had communicated the report of the interview to Lord Clarendon for revision, and that when he added this detail a month later, it added greatly to President Grant's annoyance at that misrepresentation of his own views, of which, in his view, Mr Motley had been guilty. At any rate, here was the beginning and end of Mr Motley's offence. It is not denied that he did his best to correct his statement, when he found that the President thought it an inaccurate, and to some extent mistaken, representation of his views, that he did all in his power to set the matter straight by subsequently reading the very words of his principal to Lord Clarendon, and that no further offence of the kind was charged against him.

It is clear then not only that Mr Motley made a considerable blunder on the occasion of his first interview with Lord Clarendon, but that the President and Mr Fish kept him completely in ignorance of the importance they attached to the blunder, until they curtly told him that he might resign if he pleased, but would be recalled if he did not resign, a year later. The subordinate had counted too much on his own literary reputation, and had acted, perhaps felt, as something more than a mere servant of the Government. On the other hand, the chief had not ventured to call him to order in the straightforward and simple manner which our own Government would of course adopt in such a case, and had indeed instead gone on fostering a feeling of secret resentment and injured pride against a subordinate whom it was not convenient just then to remove. Who can wonder at the result—an unseemly quarrel between the Minister and the Secrerary of State in the face of all Europe?

There can indeed be very little doubt that the United States have at present no sufficient supply of highly-cultivated and really capable men who are willing to be the mere mouthpieces of a Government. If the Government chooses strong political supporters, these strong supporters are apt to count on their influence in Congress, and to act as if they were in part independent on that account. If the Government chooses eminent literary men like Mr Motley, these literary men are apt to suppose that their power in presenting a view is a reason for claiming a certain amount of influence in modifying the view;—and in either case the Home Administration is not strong enough in its hold over them: it is afraid to enforce discipline: it acts a timid and hesitating part: and when it gets up the courage to recall, it is compelled to be abrupt, cavalier, and even rude. We cannot say that the perusal of this correspondence at all adds to our wish to see eminent *litterateurs* chosen for this sort of service at home. They are far too apt to squeeze in views of their own, and not to know where their instructions end and their own ideas begin. On the other hand, the same correspondence suggests to us the old maxim that bad masters make bad servants. Mr Fish could hardly condemn himself more strongly than by printing side by side his first slightly qualified but apparently, so far as it went, hearty approval of Mr Motley's language, with his avowal a year later that Mr Motley had gone in direct opposition to both the spirit and letter of his instructions.

BUSINESS NOTES.

RAILWAY COMPETITION.—We believe a very serious loss is now being incurred by several of the leading railway companies to the north of the Metropolis in connection with the competitive coal traffic. The loss falls principally upon the Great Northern and Midland Companies, who have broken their traffic agreement; but they are not the only sufferers—the London and North-Western and Great Western being also engaged in the ruinous competition. The matter is one which the shareholders of the respective companies ought to remember at the ensuing meetings. If we are not misinformed, the regular weekly loss incurred by the companies in question amounts to a sum which will tell perceptibly upon all the dividends, and in some cases will make a very serious difference indeed. It is a great pity that at the very time when railway property stands higher than it has done for several years, the directors of so many leading companies should re-

sume the perverse practices which were so rife a few years ago. Some of the boards must be unwise in their course of action, and the shareholders of each company should make a searching demand for information as to the policy which has been entered upon.

Cotton Growing in India.—The *Delhi Gazette* gives an interesting account of a successful experiment in cotton growing during last season in India, in the neighbourhood of Delhi, which appears to possess some value with respect to the question of the ability of India to compete with the Southern States of America. The superiority of the South lies mainly in the ability to obtain a large return per acre — the average being several times higher than that of India; but the effect of the experiment is to show that *four* times the present ordinary yield is obtainable in India. The experimenter was Mr Login, superintending engineer of the Umballa division, and the method of cultivation was suggested to him by what he had seen in Egypt. The *Gazette* states:—

> Notwithstanding some serious drawbacks arising from floods and a character of a portion of the soil, the results thus far have exceeded his most sanguine expectations. The seed selected was the ordinary seed of the country, purchased without any special effort at selection in the Delhi bazaar. It was planted at the usual times, on the Egyptian system, and has since been irrigated after the same plan. The result is that already about 300 lbs per acre of clean cotton have been collected, and there is still a period of six weeks of the gathering season left. It is believed that between 500 and 600 lbs will be secured. This is about *four times as much as the ordinary yield* under native cultivation, a result that is sure to arrest the attention not only of the Indian cultivator, but of the cotton manufacturers of England. If such results, as we have here recorded, are possible in all the cotton-growing districts of India the day is not far distant when Manchester will be independent of America.

It is further added that Mr Login will report the results officially to his Government, so that it may be hoped his facts will have ample publicity. Of course it is a long step from making experiments under vigilant European direction to the general adoption of novelties in agriculture among a population like that of India; and there is some danger of the experiments coming too late.

The Affair of the International.—It is now stated that there will be no appeal in this case, which arose out of the seizure by the English Government, under the Foreign Enlistment Act, of a ship loaded with a submarine telegraph cable to be laid between Bordeaux and Dunkirk. The decision of the Admiralty Court last week was that the seizure was invalid, there being no ground for treating the proposed cable as a military telegraph; and the ship was consequently ordered to be released, though costs were not given, as the Government had probable cause for their action. Both sides appealed, and we must express our regret at the resolution of the Government not to prosecute their appeal. The opinion of the Judge appeared to be mainly grounded on the fact that the cable would be useful for commercial purposes, though it would be available for military communications as well, and he refused to treat it as a military telegraph in the sense of the Act. But if the Foreign Enlistment Act is to be interpreted so narrowly, we fear it will never be of much real help in preserving our neutrality, and will rather be a snare to us in dealing with foreign Powers. The broad ground for regarding the proposed line as a purely military affair, is the simple fact that the French Government of National Defence was not likely to commit the folly of indulging in any new expenditure that was not supposed to be military. To fancy that it would enter into new undertakings for the convenience of merchants, when its one thought is the national defence, and it is at its wits' end for money, is surely most absurd. We should desire very much then to see such cases going before the highest tribunals, who would be more likely than the inferior Courts to disregard quibbles, and look at the main facts and the reason of the matter. Hitherto the judicial decisions on the Foreign Enlistment Acts have been frequently unfortunate, having regard to the spirit and policy of these enactments; and the Government should at least make an effort to obtain the opinion of the highest tribunals to which it can appeal.

The Bankers' Balances of Local Government Officials.—The case of "*ex parte* Adair and others, *in re* Gross," before the Judge in Bankruptcy, decides a point of some consequence to bankers, but may perhaps be more valuable as an illustration of the loose practices which prevail as respects money matters among many of our local Government authorities. The question in the case was the right of the justices of the eastern division of the county of Suffolk to a balance which stood to the credit of the bankrupt, B. L. Gross, on certain special accounts opened by him with the National Provincial Bank, at Ipswich. The material facts were, that according to a common custom in the provinces, the bankrupt was the treasurer of various local authorities, and among others of the county rates for the eastern division of Norfolk; and that the money which he thus held he mixed up at first with his own bank account, but afterwards he got separate accounts kept at the bank corresponding to each fund, though the accounts were still all balanced together for the purpose of crediting his own private account with the balance of interest. When the bankrupt absconded the "county" accounts were in credit to the extent of 3,079*l*, but the balances overdrawn on the bankrupt's private account were 2,703*l*. The justices claimed this sum of 3,079*l*, and the trustee on the estate the net balance of all the accounts—the bank of course supporting the latter claim, since the decision in favour of the justices would necessarily, instead of leaving the bank with a balance, constitute them creditors of the bankrupt to a considerable amount. The Chief Judge, as we think wrongly, has decided in favour of the justices, on the ground that the bank had distinct notice that all the moneys in the special accounts were county monies. We do not see why the separation of accounts amounts to any notice of the kind. The arrangement was obviously one purely for the convenience of the county treasurer, who had sole control of all the accounts; and the bank could have no knowledge whether or not the account in their books corresponded or not to the treasurer's own accounts with the county. If there were any foundation for the judgment at all, the bank, in the opposite case of the special accounts being overdrawn, ought to have had a claim upon the county; but clearly the reply to any such claim would have been that the county knew nothing of the bank. There was really no privity between the bank and the principals of the agent, with whom only they dealt; and as the bank could only have claimed against the agent if the account had been overdrawn, so it should only be liable to the agent when there is a balance. The mode of dealing with the interest also showed that the moneys were not considered to be trust monies. The effect of the judgment can only be that bankers will in future take care to have such accounts so named as to imply no notice to them of their nature, which might easily be done by numbering them with the letters of the alphabet; but it certainly seems most unjust to hold such notice to be given according to the present practice. With regard to the loose custom of the local authorities, it is well known that too little precaution is used with almost all local monies. Collectors and treasurers make large profits out of money in their hands, which really might be secured for their constituents, who would also be saved from no small risk of loss which they at present incur. Why local authorities do not adopt the precaution of opening bank accounts in their own names, directing cheques to be paid only on the signature of two or three of their number, and taking care to have the pass-book frequently checked, is one of those mysteries of neglected business which are only too common and disastrous.

The Courts of Law and the Treasury.—We hope some attention will be given to the *dicta* of the Judges of the Court of Queen's Bench in granting a rule *nisi* for a *mandamus* against the Lords of the Treasury to allow certain costs of a criminal prosecution. The applicant was the County Palatine of Lancaster, and the case arose out of the Acts which have been passed from time to time to throw certain expenses of criminal prosecutions upon the Consolidated Fund. The particular difficulty was that while the custom had been, in the absence of any regulation, to allow one brief in ordinary cases, and two briefs in cases where the Court had thought two counsel necessary, the Treasury had lately refused to pay for the two counsel. The question raised by the present application for a *mandamus* was the right of the Treasury thus to deal with the counties which had conducted criminal prosecutions. According to the report of the case:—

> Mr Justice Blackburn observed that the question came to this, whether the discretion was to be deemed vested in the Court or in the Lords of the Treasury.

The Lord Chief Justice observed that it went further than that, for the Court had, in the exercise of its discretion upon the nature of each case, directed the expenses to be incurred as necessary for the administration of justice, and the Treasury, without any means of knowing the facts of each case or forming a judgment upon them, had taken upon themselves to overrule the decision of the Court, and disallow expenses deemed by the Court necessary for the administration of justice.

Mr Manisty said that really was so.

The Lord Chief Justice.—You have said quite enough to entitle you to a rule *nisi* for a *mandamus*.—Rule *nisi*.

The Lord Chief Justice took this occasion to observe that the card on which the Judge's circuits had been printed had lately been disallowed by the Treasury as too expensive.

Mr Justice Blackburn added—And we were shown the Queen's sign-manual on a sheet of foolscap.—(Much laughter.)

Now in all these remarks we think there are symptoms of some danger to the public Exchequer. It may be quite possible that in the present case the Judges have a "discretion" as to what burdens should be laid on the public; but it is obviously not desirable that they or any other authority except the Treasury should have the final voice in the matter. The paymaster is the House of Commons, represented by the Treasury, and not Her Majesty's Judges, and it will be very singular if the paymaster is not to look over the bills. If the law should be that he is not to do so, then the sooner it is altered the better; and we think we may trust the House of Commons so to vote the money that there shall be no fund out of which to pay anything except what the Treasury sanctions. This was done in the case of the Churchward Contract, and the precedent may be usefully followed. The last remarks of the Judges appear to be very childish. It might perhaps be wiser to grant allowances to officials to enable them to bear certain incidental expenses with the details of which the State would have nothing to do; but where the Treasury has control it must be economical and even mean, or there will be no end to the corruption and extravagance.

Legal Distinctions between Debts.—A decision of the Vice-Chancellor—*re* the Albert Insurance Company, Parlby's case—appears to show the inequitable consequences of the legal habit of drawing distinctions between debts. Major Parlby, who was a policy-holder in the company, had also borrowed from it, on the security of the company, a sum of 250*l*; and upon a summons by the official liquidator for the latter sum, he claimed to set off the present value of the obligation undertaken by the policy. A claim of this sort seems to be one of the most obvious equity. Two parties have dealings, and in a final settlement of accounts it is merely asked that the claims of the one against the other should be balanced. But the Vice-Chancellor, on the contrary, decides that "the claim on the policy, being an un-"liquidated debt, the amount of which, for many reasons, "could not be fixed, ought not to be set off against the 250*l*, "which was part of the immediate assets of the company, "and which it was the duty of the liquidator at once to get "in." It is impossible not to perceive the injustice of such a law. A man is compelled to pay money to a concern which may really owe him money—an amount, it is true, which there may be some difficulty in estimating, but of which it is easy enough to obtain a minimum estimate. What the fact of the one debt being definite or liquidated, and the other not, has to do with the justice of the matter, it would be difficult to explain.

The Valdity of Transfers.—The Lords Justices—*re* the Bank of Hindustan, China, and Japan, Harrison's case—have decided in favour of the validity of a transfer by a shareholder to his clerk for a nominal consideration, but which had been duly registered, and have refused to put the original shareholder on the list of contributories. The facts of the case were that the assent of the directors was given to the transfer, on Mr Harrison, as they say, undertaking to be surety for the future calls, but according to his own account on his undertaking to be surety for one call only which he paid. At any rate the transfer was duly completed and registered, and the Lords Justices hold that it is not to be disturbed. In the circumstances, as the shares involved some risk of liability, the transfer could not be considered as a gift, and if Mr Harrison was now liable at all, it was as a surety, and his liability should be enforced in some other way than by placing him on the list of contributories. "A deed could not be revoked or a transfer of property dis-"turbed because the bargain upon which it was made was "afterwards broken. The remedy would be for breach of the "contract."

The Revivers of British Industry.—The agitation which made so much noise a year or two ago in favour of "reviving" British industry by means of protection appears almost to have died out and been forgotten; but a few days ago at a meeting in West Smithfield "to consider what can be "done for the unemployed workmen who are starving in "London," the old heresies have shown once more a faint sign of life. A resolution was moved condemning what is called "one-sided Free-trade,"—that is, the freedom to every man in England to purchase whatever suits him best in the open markets of the world, without any differential tax in favour of home production. Of course it was not shown in what respect this Free-trade was one-sided; but the attempt was made to stimulate the ordinary Protectionist prejudice by holding up the spectacle of some particular industry which was displaced by foreign competition. "The corkcutters," it was said, "who once numbered 5,000 in London, were now "idle because the foreign corks were cut and brought into the "English market at a less price than they could be manu-"factured at home. Other trades had proportionately suf-"fered;" and so forth—arguments which are curiously fallacious in the advocacy of complete Free-trade, for how are displaced corkcutters to be benefitted any more than they are now, when every country has Free-trade, unless they betake themselves to some other occupation for which there is ample room already? People have not forgotten yet the inability or unwillingness of the "starving unemployed" in London to avail themselves of the recent demand for labour in the north; and may justly fear that even the completest Free-trade by itself would not get rid of a social malady, which is due to many complex causes, among which lack of capital to employ labour is not to be reckoned. The usual nonsense about English people being heavier taxed than foreigners was also repeated at the meeting; but a common sense amendment in favour of a system of migration and emigration was finally carried, and the proceedings at the meeting are chiefly noticeable as a lingering remnant of an agitation which, at the best, was mostly artificial.

Losses of Anchors and Chains.—The following interesting statistics as to the success of recent efforts in checking the nefarious practices in connection with the loss of chains and anchors is communicated by Mr Henry Jeula, the well-known statistician of Lloyds. The table compares the first six months of 1870 with the corresponding period of 1866:—

Loss of Anchors and Chains.

	Number		Percentage of Decrease.	Number Average Five Years.		Percentage of Decrease.
	1866.	1870.			1870.	
January	254	53	79·13	119	53	55·46
February	108	45	58·33	78	45	42·31
March	65	27	58·46	55	27	50·91
April	13	9	30·76	22	9	59·09
May	17	9	47·06	12	9	25·00
June	11	9	18·18	9	9	nil
First quarter	437	125	70·73	252	125	50·40
Second quarter	41	27	34·15	43	27	37·21
First half-year	468	152	67·52	294	152	48·30

Borrowing by Building Societies.—The Court of Queen's Bench, in the case of Richardson *v.* Williamson and others, have decided that the directors of a building society which was not empowered to borrow money were liable upon a deposit note for money which they had signed purporting to be granted in the name of the society. The case appears to show the unsatisfactory state of the law, which restricts the borrowing powers of societies or companies. The Lord Chief Justice argued that in such a case the lenders could not be the losers, but that the actual borrowers should lose—the directors, who represented that they had authority to borrow on the part of the company. But this seems to be hardly a fair statement. The constitution of a friendly society is necessarily not private, and was a matter to which a lender was necessarily obliged to look when the borrowing was in its name. Surely there is as much reason for letting the loss fall upon the lender as upon the innocent agent of the incapable borrower. The primary injustice is of course in the law, which exempts the society or company although it has received the money; and the anomaly is such that, as we have more than once pointed out, Courts of Equity try to

minimise the injustice by distinguishing between loans—for instance, holding loans to pay off debts incurred in the course of business to be perfectly valid, even when made to a society which has no power to borrow. But this primary injustice hardly excuses the additional injustice of making people liable for money which they never got and did not pretend to receive on their own account, the lender having full means of judging as to the capacity of the principal who did receive it.

STOCK EXCHANGE SALES.—The Court of Common Pleas last week granted a rule *nisi* in the case of Dent *v.* Nichols, so as to have the points reserved at the trial brought up for discussion. With regard to the question whether a minor could be a transferee, Mr Justice Willes put the question to the defendant's counsel whether an infant, made a transferee, had not a right to elect to take the shares when he came of age? If so, he said, then the name of a person had been given as transferee who could hold the shares. This points to farther definitions of the Stock Exchange rule—that a dealer must substitute a "transferee" to whom no reasonable objection can be taken. Not only must the definition be in these terms, but distinctions may have to be drawn between objections which could properly be taken, and would be given effect to, at any time before or after the completion of the transaction, and others which could only be taken at the time. Thus an infant may be held to be a possible transferee, though he could not have accepted a valid transfer within the time fixed by the Stock Exchange rule, and an objection to him at the time would probably have been given effect to. Every successive step in these litigations appears to raise a prospect of fresh disputes.

THE STAMP ACT AND FOREIGN SECURITIES.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The understanding arrived at that the Stamp Act of 1870 will not be enforced in respect of stock issued abroad, and upon which the interest is payable abroad, seems to involve the conclusion that additional consideration of the subject is required. The positive refusal of many of the commercial houses in this city to accept such bonds if charged with the English stamp indicates a settled determination upon the matter, which must follow from some strong reason. Mr Lowe intimated to the deputation from the City, some days back, that he would have considered all their representations had they been presented to him when the Act was before the House, thus admitting that the points raised had not been dealt with by those who framed the Act; and he requested the deputation to furnish him with a reason why the bonds in question should be exempted from its operation. There appears to me to be a complete and very sufficient reason in the absence from those bonds of any stipulation for the due provision of funds for interest and redemption due to foreign holders in case of war. In all contracts for loans issued in this country by foreign Governments, there is an express clause providing for the due remittance, in all times, of the funds required for interest and redemption of capital. This clause is of course absent from the bonds of the home loans; and, on account of its absence, the refusal of the foreign houses trading in bonds and stocks to receive such as bear the English Government stamp is, in my opinion, given. It will no doubt be objected that if English subjects choose to buy foreign stocks, they must be prepared to meet a tax equal to that paid upon home issues, and to take the risks of their investment; but this is not quite the whole case. If English subjects elect to invest in foreign bonds of the class in question, it may be, and probably is, because they do a profitable trade with the country issuing those stocks, and that they pay upon the ordinary and usual scale taxation upon the profits of their trade. In case of war, the refusal of neutrals to buy the stamped bonds in question would inflict loss upon their holders, and the Legislature inflicting the stamp would occupy very nearly the position of the Irishman who made a bonfire of bank notes to spite the Bank. It may be deemed an extreme view that an issuing Government would refuse to pay upon or redeem such bonds; but it is only an application of the everyday rule of the Prussians in this war to oppress the enemy by every possible means; and, whether extreme or otherwise, it is doubtless the reason of the resolution of the foreign houses, dealers in and importers of them, to refuse such bonds. The stamp would, under these circumstances, involve loss of trade or depreciation in the value of the stamped bonds—very nearly equivalents.

The deputation hardly contrived to say a word about the operation of the new Act regarding registered stocks. If Mr Melville be a correct expositor of the law, a merchant borrowing 10,000*l* for a week should pay in stamps 10s transfer on a nominal consideration, and 12*l* 10s mortgage duty. It needs no argument to prove that either the law will be evaded, or stocks must become depreciated by the newly-created obstacles to their being held by persons requiring to raise money upon security. The Chancellor might, by an Act requiring for the legality of such loans a stamp (say) of 1s per 1,000*l* for periods under three months, and 1s 6d for periods under twelve months, secure an addition to the revenue from stamps, since no banker would, if the stamp were so moderated, grant a loan except in accordance with the Act, and no broker would undertake to exempt his client from its operation.

But, Sir, while we are dealing with the stamps on stocks and shares, it seems to me desirable to go a long way further, and to liberate our numerous home securities from the cumbrous restrictions of the transfer system. The continent generally has formed, and America has added to, the international currency (I borrow the term from Mr Hyde Clarke), by huge creations of stocks and shares "to bearer." Why should England not contribute thereto? Our system localises our stocks and shares, the foreign system disperses them, affording the whole world a choice of risks and of investments. Why should we tax ourselves to pay ourselves interest? Why impose heavy railway fares to provide for ourselves high dividends? Why should London levy rates to pay Londoners 4 per cent. on the very best security the Board of Works can offer? Paris, Brussels, Liege, Antwerp, a host of cities abroad, send their municipal bonds all over Europe. France, Italy, Austria, Russia, sell their railway bonds and shares elsewhere and here, always to bearer, except when employing the cumbrous machinery of our system they issue under an English constitution. When railway shares and joint-stock shares were first issued, they were universally transferred by registered deed, after the example set here. The law of "Sociétés Anonymes," adopted all over the continent from France, and the concurrent stamp system, have given shares to bearer, and converted into an international currency shares and stocks of all sorts but those of English parentage, which still are tied up in red tape of the earliest pattern and broadest make. The alteration required in the stamp duty is an extremely simple one. I had the advantage of conveying my views to some of the framers of the 1867 Stamp Act, in which the issue of fully paid-up shares to bearer was allowed upon payment of 1½ per cent. stamp once for all. This, added to the ½ per cent. stamp already paid by a transferee, amounts to a prohibition, and English shares to bearer are in consequence all but unknown. First,—it is desirable to allow shares to be made "to bearer" when paid up to the extent of (say) 50 per cent. Next,—all that is required is a Permissive Act for the issue of shares and stock to bearer upon the payment by the company, to be deducted from the dividend of the holder, of an amount equal to the calculated estimate of loss to the Government in commutation of transfer stamp. The French law is simple, and might be followed. The average price of the shares of any company issuing shares to bearer is taken every three months, and the calculated duty paid regularly to the Government, the amount being deducted from dividends when paid. In this country an examination of the stamps in the transfer office of each company for three years would give a fair average at once. This could be corrected each year by the subsequent average variations in price, and the duty fixed, deducted, and returned to the Government with the greatest ease. Trustees and others so disposed would continue to register by transfer; but the merchant and the mass of investors would obtain at an easy rate a convertible security, having a currency five times its present value.

What, Sir, would be the result as regards the world outside our shores? People abroad value the security afforded by our insular position; they are pleased to esteem the economic virtues for which they are good enough to give us credit. Would not the Germans trading in our woollen districts buy Lancashire and Yorkshire and other railway stocks

and securities oftentimes in place of the small rate-paying stocks of his own country? Holland and Belgium, France, and many other countries, are the homes of timid investors, who, if able to lock up in their own boxes our contributions to the international currency, would buy them, would compete for English stocks to pay a lower rate than that on which we require to reimburse ourselves, the heavy fares, rates, and taxes to be found in England; and we should carry our money abroad, again fostering fresh enterprise and developing new projects. We should create new trade, giving the best securities to the most cautious investors, and embarking our new capital and our unceasing energies in the thousand and one new fields which invite the exercise of English courage, English skill, and English probity, in their cultivation.—Yours faithfully, W. H. Bishop.

SPAIN AND INTERNATIONAL COINAGE.

TO THE EDITOR OF THE ECONOMIST.

Sir,—In centuries gone by, when a general system of international coinage was merely one of the utopias of some few statesmen and writers of advanced views in commercial progress, Spain achieved the great success of establishing a coinage of a thoroughly international character, through the wise measures of Ferdinand the Catholic, and Charles the Fifth. They secured the coinage of gold and silver pieces of the most trustworthy fineness and convenient form. The silver pieces struck as piastres and dollars, or pieces of eight reals, and of eleven-twelfths fine, were undeniably a coinage deserving of the high credit it everywhere gained. It became the chosen unit of circulation, and frequently of account also, in the remotest corners of the world. It was alike appreciated in the most distant colonies of either hemisphere, and amongst the great marts of commerce in all quarters of the globe, by the savage as well as by the enlightened races of the East and West. The international nature of its currency gave it a premium above other silver coin, a proportionate *plus* value representing its enlarged sphere of usefulness.

Considering what Spain has already accomplished in practically showing the advantages of an international coin, those who take an interest in the more modern and wider extension of the principle to what would be the mutually interchangeable coins of all the leading commercial nations, cannot be indifferent to the steps taken by Spain, a country of reviving trade, in connection with the Monetary Convention of 1865. The Government of the ex-Queen warmly welcomed the principles of that Convention. The late Republic, under the Ministry of Finance of Don Laureano Figuerola, endorsed what had been done, and, by decree of 19th October, 1868, settled the terms upon which Spain would be ready to work in complete unison with the other countries from the beginning of the year 1871. In the meanwhile, some coins have been struck of the metrical weights stipulated in the Convention, and on these is stamped the proportion borne by the weight of each coin to a kilogram. This is an improvement deserving of much approval, and a most sensible practice to adopt in an international coinage.

The Spanish authorities have taken great interest in the deliberations of the Paris Monetary Commission of the present year, and will, doubtless, be ready to second France and the other countries of the Convention whenever they resume, in happier days of peace, the discussion of the resolutions then arrived at. It will be recollected that the majority of opinions was decidedly in favour of a single standard of gold, and of a 25-franc piece, so convenient not only for Austria (as 10 florins), for Sweden, England, and America, but for Spain also as the nearest approximation to her Isabel doubloon of the intrinsic value of 25·8386 francs.

The Spaniards have entered into several international arrangements connected with railway and other enterprises, in which the franc and their own unit, the real (now about to be completely superseded by the *peseta* or Spanish franc of the Monetary Convention), are concerned. These arrangements have been entered into at a constant fixed rate of exchange of 19 reals = 5 francs. This gives 26·3158 centimes to the real, instead of 26·2910 centimes, and 26·3158 francs to the Isabel doubloon, instead of 25·8386 francs. The convenience in calculation of the equation of 19 reals = 5 francs, and of 20 francs = 76 reals, has been found sufficient to make the divergence from the true intrinsic valuation be willingly and largely submitted to, just in the same manner as Englishmen have allowed themselves, for a long series of years, to be mulcted to an enormous extent in public loans, and in railway and other obligations, by accepting 25 francs for the sovereign, instead of 25·22 francs, merely for the international convenience of avoiding troublesome fractions in account.

Under the *régime* of the system of the Convention, expected to be entered upon by Spain next month (January, 1871), the old *peseta* of 4 reals will become the new *peseta*, exactly equal to 1 franc. But here begins a little difficulty. The old peseta was worth intrinsically 1·0516 franc, or, at the tariff or fixed exchange of 19 reals to 5 francs, it was worth 1·0526 franc. Speaking in round figures, the old peseta may be said, when at its full weight as coined, to have contained about 5 per cent. more intrinsically of pure silver than the franc, so long as the proportionate fineness of the two coins was nine-tenths. And although in Spain, as in France, the double standard is not yet by actual legislation theoretically abrogated, it is practically about to be quashed in Spain, as already it has been in the countries parties to the Monetary Convention, by the peseta of the future, having, like the franc of the present, to be coined at ·835, instead of ·900 fine. Spain ought to cut the Gordian knot at once, by demonetising its old silver coinage of 20-real pieces or Spanish pieces of 5 pesetas ·900 fine. In all probability these *duros*, or 5-peseta pieces, in circulation are a good deal worn, often, indeed, much below the legal maximum value of what the full-weighted new pesetas will represent, even at their reduced fineness. In fact, they are doubtless, circulating to a large extent, worn into tokens, like our English silver coinage, although theoretically treated as of full weight, like sovereigns, napoleons, or the 5-franc silver pieces of days gone by. It is easy to see that, under the traditions of the old double standard, the retention of the old pesetas, chiefly in the form of duros or 20-real pieces, in the circulation of Spain, at their normal original full value, might appear to be theoretically justifiable. Far different, however, is the question of practical reason for it, seeing that the double standard is but the shadow of a name in the countries of the Convention Spain is about joining, and who, as England has done since 1816, have all tokenised—if we may use such a term—their silver standard.

In the absence of the demonetisation of old pesetas being decreed, the difficulty has arisen that the holders of Napoleons or 25-franc pieces of any country party to the Convention of December, 1865, will receive in Spain, as change into silver coin from January, 1871, only 19 pesetas of present (or what will *then* be old) currency, although they can claim by law 20 new pesetas or francs, and, as before explained, the latter may weigh and be worth intrinsically more than the former. The inconvenience that will arise is too obvious to require much remark on the neeessity for a remedy being speedily applied, so that the international arrangement may not suffer even a temporary cause of friction and discredit. It is agreeable to observe that, even amidst the distractions of the lamentable state of war, from which we may only hope our neighbours will soon emerge, the late Minister President of the French Council of State, M. de Parieu, has, in a letter to the Spanish Minister of Finance, dated 16th ultimo, suggested that the Spanish Government should lose no time in demonetising its old current gold coins and the pieces of 20 reals silver, so as to establish at once an identical exchange between Spain and the countries of the Convention of 1865. He has cited the example of an arrangement of the kind between France and Piedmont before 1865, as the precedent for a successful remedy of a similar difficulty; and it is believed that the issue of new pesetas or francs might be accomplished without loss by the withdrawal of the demonetised pieces. M. de Parieu has further expressed his opinion to the Spanish Minister, that the old Spanish token coins might still remain in circulation, but restricted to the Peninsula, without any grave inconvenience, and that such a deferment of the demonetisation of those pieces would not lead to any real difficulty. Indeed, it is well established that coins of restricted circulation, like the portion of the Spanish subsidiary currency, possessing only a token value, never serve as a basis for international exchange. It is purely a matter of local interest so far as such coins are concerned. But, with the leading units of exchange, such as the peseta and franc, which are to be identical and quite synonymous in the nomenclature of the Convention, it is a matter of general interest that every cause of misunderstanding should be removed. There is no insurmountable difficulty to entire uniformity being in this instance easily attained, and it may

reasonably be hoped that the Government of King Amadeus will show itself as well disposed as its immediate predecessor to give all facilities for promoting a great international measure that is at once of importance to the interests of Spain, and to those of the whole commercial world.

December, 1870. FREDK. HENDRIKS.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and Jan. 21, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870-71.	TOTAL EXCHEQUER RECEIPTS To Jan. 21, 1871.		Same time last year.	
Balance on 1st April, 1870—	£	£	£	£	£
Bank of England	...	7,633,761		3,775,717	
Bank of Ireland	...	972,887		931,541	
			8,606,648		4,707,258
REVENUE.					
Customs	19,500,000	16,320,000		17,738,000	
Excise	21,660,000	16,559,000		16,817,000	
Stamps	8,589,000	7,165,000		7,443,000	
Taxes	2,850,000	921,000		2,583,000	
Income Tax	6,350,000	2,291,000		5,262,000	
Post Office	4,775,000	3,480,000		3,500,000	
Telegraph Service	675,000	400,000		...	
Crown Lands	285,000	331,000		331,000	
Miscellaneous	3,050,000	2,632,626		2,293,172	
Revenue	67,634,000		50,099,626		54,967,172
OTHER RECEIPTS.					
Advances, under various Acts, repaid		1,801,864		1,309,251	
Money raised for fortifications		...		100,000	
Money raised by Exchequer Bonds		...		700,000	
Temporary advances not repaid		1,000,000		1,500,000	
			2,801,864		3,609,251
Totals			61,508,138		63,283,681

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1870-71.	TOTAL EXCHEQUER ISSUES To Jan. 21, 1871.		Same time last year.	
EXPENDITURE.	£	£	£	£	£
Interest of Debt	26,840,000	24,365,920		25,274,427	
Other charges on Consolidated Fund	1,820,000	1,856,075		1,595,115	
Supply Services voted by Parliament	40,486,000	29,933,909		30,919,310	
Telegraph Service	360,000	300,000		...	
Expenditure	69,486,000		56,455,904		57,788,852
OTHER PAYMENTS.					
Advances under various Acts		1,116,114		1,355,308	
Expenses of fortifications		...		100,000	
Exchequer Bonds and Bills, &c., paid off		25,500		2,823,500	
(Exclusive of 600,000*l* Bonds paid off with Surplus Income.)					
Surplus income, to reduce Debt		2,464,526		...	
(Exclusive of 500,000*l* applied to repay Bank advances for deficiency.)					
			3,606,140		4,278,808
Balances on Jan. 21st, 1871—					
Bank of England		888,790		995,181	
Bank of Ireland		557,304		220,837	
			1,446,094		1,216,021
Totals			61,508,138		63,283,681

The following are the Receipts on account of Revenue during the week ending Jan. 21 :—

	Receipts of Week Ending Jan. 21.
	£
Customs	410,000
Excise	544,000
Stamps	202,000
Taxes	78,000
Income tax	270,000
Post Office	nil.
Telegraphs	nil.
Crown lands	66,000
Miscellaneous	27,697
Total	1,597,697

The total receipts of the previous week were 1,272,098*l*.

The Exchequer issues of the week on account of expenditure were 565,896*l*, viz. :—

	£
Interest of debt	200,000
Other charges on Consolidated fund	165,896
Supply services	200,000
Telegraph services	nil.
	565,896

During the week the cash balances have increased in the Bank of England and decreased in the Bank of Ireland as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Jan. 14	626,714	600,903	1,227,617
— — 21	888,790	557,304	1,446,094
Increase	262,076	...	218,477
Decrease	...	43,599	...

The other receipts to date were 799,500*l* less than last week. The other payments were 13,824*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, Jan. 25.

We are still without any official or authoritative statement, of what the branch of the Government at Bordeaux means to do with the new organisation of the Bank of France it has [illegally] established. But it must be something excessive, since M. Cuvier, the sub-governor, has resigned sooner than accept the responsibility of it. The expectation is that what is projected will involve the sale of forests and other State property. The desirability of employing this resource in the pecuniary embarrassments caused by the war, was pointed out in a preceding letter; but as there is nothing in France so jealously guarded as such property—a special law even in quiet times being necessary to warrant the disposal of the smallest fraction of it—the Bordeaux gentlemen will do a monstrous thing if they presume to deal with it of their own authority. A National Parliament has alone the right to dispose of the national possessions; and transactions respecting them made without its consent, will run the risk of being declared null and void.

Apart from the matter, the immediate convocation of an Assembly is of urgent necessity. A very eminent French Statesman, in a letter to me, calculates that the Government of National Defence has spent and is spending from 10,000,000f to 12,000,000f (400,000*l* to 480,000*l*) per day; and it is manifestly intolerable that a few persons should dispose of such a sum without anything like control. How, indeed, they dare do it is a wonder to foreigners who come from countries in which the established doctrine is that Parliaments must regulate the national expenditure.

The discontent caused by the dissolution of the Councils General of Departments, unaccompanied by the election of new ones, and the transfer of the power of those bodies to commissions nominated by Prefects, is fast increasing, and will no doubt be violently manifested when war shall rage less fiercely. To the protests against these measures already made, M. Michel Chevalier has just added one, which, from his influence in the country and from the energy of his language, is making great sensation. He shows that the essence of Republicanism is that no tax, general or local, shall be levied except by representatives of the people freely elected. He shows, in the matter of general taxation, that the refusal of the Government to convoke an Assembly, or the pretext that as part of the country is occupied by the enemy a complete one cannot be formed, is absurd, since even an incomplete Parliament would have better right to speak and act in the name of France than the dozen men who, by the aid of the Paris mob, have possessed themselves of supreme power. He shows, in the matter of local taxation, that the pretext is still more extravagant, inasmuch as each department taxing itself alone, and spending only its own money, those that are not in hostile occupation are in such respects not influenced by those that are—the Hérault and the Gard in the South, for example, which are at a great distance from the enemy, being just as capable of controlling their local business as they were before the Rhine department and the Meurthe, in the East, were invaded.

According to the last advices from Paris, "the financial

world was greatly occupied with a new loan of 400,000,000f (16,000,000*l*) made to the Government by the Bank of France." In the country this statement has occasioned surprise—first, because the sum named is very considerable; and next, because it was not known that the Government had previously been borrowing from the Bank. From representations sent by balloon, the general impression was that with the taxes levied in Paris itself, with the calls due on the Empire loan, with the aid of Treasury bills, and with leaving debts unpaid, the Government had been able to abstain from loan raising. This belief was confirmed by the gravity with which the Minister of Finance declared in the official newspaper that he knew nothing of the 10,000,000*l* loan of London got up by his Tours colleagues, and by the complacency with which he made the non-official journal that serves as his organ throw the responsibility of the operation entirely on them, and express the hope that their explanations about it would be found satisfactory by the future National Assembly. And now it turns out, that though having less expenditure to provide for, the Parisian branch of the Government has borrowed even more than the provincial one!

The Paris Government has granted in the extraordinary Budget of 1871 a credit of 30,000,000f to the Minister of Agriculture and Commerce for "the payment of expenses concerning the supply of provisions to the capital." On their part the Bordeaux rulers having found (probably to their great surprise) that, out of a sum of 117,500,000f awarded to the Armament Commission for the purchase of arms and ammunition from private industry, 24,000,000f at least remained unexpended at the end of 1870, have decreed that the said 24,000,000f shall be considered "immediately disposable" for the same purpose in 1871.

The Government at Paris, under date the 12th, decreed that "the delay accorded for the payment of commercial bills should be prolonged for a month from the 14th January for all those subscribed at a date previous to the law of 13th August last, and for fifteen days for those subscribed after the passing of the said law. These enactments are not in accord with those of the decree of 8th January of the Bordeaux Government, and so the confusion in bill legislation the latter has caused is augmented. What the mercantile community of Paris thinks of the decrees concerning its bills is not stated in any of the letters and newspapers from that city that have come under my notice; but doubtless the people who have to pay are well contented with the delays granted, and those who have to receive are extremely discontented. Out of Paris, the acts of the Tours and Bordeaux delegations in this matter have been almost universally condemned. Traders think that the prolongations successively accorded are not sufficient; manufacturers, bankers, and others whose bills are payable hold that there ought to have been none at all, or that at all events after one was granted there ought to have been no other; and lawyers say that the wording of the provisional decrees is so loose that it gives rise to all manner of perplexing questions. A new objection is made to the last Bordeaux mandate, namely, that it allows unpaid bills to be protected, through stopping legal proceedings on them, and that thus it subjects the debtor to discredit which may be ruinous to him without giving any advantage to the creditor.

From the Paris Bourse we have received these quotations:—

	Jan. 12.	Jan. 14.	Jan. 19.	Jan. 20
	f c	f c	f c	f c.
Threes—cash.....	51 67½	... 51 50	... 51 75	... 51 40
End of month.....	51 70	... 51 40	... ...	... ...
New Loan(Empire)—cash	52 60	... 52 65	... 52 60	... 52 35
End of month.....	52 70	... 52 50	... ...	... ...
Four-and-a-Half—cash....	76 0	... ...	... 78 0	... 78 0
Bank of France	...	...2325 0	... ...	... ...

No report of the market accompanies the above, so that we do not know what speculators thought of the bombardment; but it is doubtful that, with shells falling into the town, the prices were anything more than nominal.

It would appear from what is said in some Paris journals that the payment of the last quarter's rent (due on 8th January for small holdings and on 15th for large ones) had been suspended for three months, as was that of the September quarter; but the text of the decree on the subject has not reached these parts. We learn, however, that numerous dissensions had arisen between landlords and tenants with respect to notices to quit, and that the Government had ordered that the decision of them by the Law Courts should be postponed for three months.

Discount of 8 per cent. on the calls due on the 750,000,000f (Empire) Loan having been offered by the Ministry of Finance, provided that all be paid together before the 1st February, a demand has been presented from different places that the like allowance shall be accorded on calls that were paid in full on subscribing or immediately after. The request is reasonable enough, but the Treasury is not accustomed to give back money it has once netted.

The issue of notes for local circulation is extending and seems likely before long to be made in every town. At Le Mans the Chamber of Commerce has put out 1f and 5f notes against a previous deposit of Bank of France notes or cash; reimbursements to be effected in the former in sums of not less than 100f. The Municipal Council of Bolbec—a little town a few miles from Havre which has suffered terribly from the visits and requisitions of the Prussians—has, in order to give employment to unoccupied men and to distribute relief in kind to the indigent, "created" notes of 1f, 2f, 5f, and 10f, to be reimbursed by the town after the termination of the war. They have no other security than its guarantee. The town of Fecamp has also commenced the issue of paper money.

In the expectation that Paris will soon capitulate to the Germans, and that it will be once more open to the rest of the world, speculators are making preparations for pouring into it, at the earliest possible moment, provisions and goods of all kinds. It will be in grievous want of everything, so that almost everything that can arrive there first will be certain to be sold on most profitable terms. The question is, however, how stores are to be got into the capital quickly?

The Government at Bordeaux had at the beginning of this month collected for it 40,000 sheep, 15,000 oxen, 60,000 tons of different sorts of alimentary substances, and since then it has probably got together equal or larger quantities. Its expeditions will of course be made to precede those of private industry, and they will for a time give ample occupation to the portion of railways still at work, and to all the vehicles and horses that can be found. The Eastern and part of the Northern lines being kept up by the Germans for their own use, appear to afford facilities for imports from Germany and Belgium; but the enemy on leaving may break them up. English speculators have been inquiring about the Western Railway and the Seine. The former has been so fearfully damaged that it cannot possibly be got into working order for months. The latter can only be ascended by vessels of very small draft; and all those in French hands, specially constructed for it, have already been secured. Moreover, the English colliers sunk at Duclair by the Prussians, and the fragments of bridges blown down near Paris, present impediments to navigation. How much time will be required to get these last removed there is no telling; but as long as they remain all the goods that may go up from the West will require to be carried in carts and waggons for distances more or less considerable.

Great inconvenience is being caused throughout the North of France and in most parts of Normandy by the scarcity and consequent dearness of sugar, arising from large quantities of that article having been appropriated by the Prussians, and by many factories having, on account of the invasion, suspended their operations. To Havre some not inconsiderable supplies have been brought from England and Belgium; but Dieppe and Fecamp, and probably other ports, have been prevented from getting any from abroad, because the Government has very unwisely placed them under blockade.

In the market of Havre transactions have been limited:—

Cotton.—The sales recorded for the week ending Friday were 204 bales, and the quotations were:—New Orleans very ordinary, 104f the 50 kilogs; Oomrawuttee good ordinary, 83f; Tinnevelly, 80f; Madras, 74f. Since Friday there have been sold 70 bales Indian, and 8 New Orleans.

Sugar.—No sales have been made,

Coffee.—Up to Friday 442 sacks Haiti, 102f 50c to 112f 50c, duty paid, the 50 kilogs; 213 Rio washed, 110f; 90 Porto Cabello garbled, 121f. Since that day Rio washed, 57f to 63f; Ceylon, 101f to 104f; Plantation, 91f to 117f.

Indigo.—5 chests New Granada, 12 Bengal, prices not stated.

Hides.—1,100 Rio Janeiro, 53f 50c the 50 kilogs.

Tallow.—30 pipes Monte Video saladeros ox, 53f 50c the 50 kilogs.

COMMERCIAL AND MISCELLANEOUS NEWS.

The mail from South Australia brings dates to the 6th of December. The approaching harvest was expected to yield 14 to 15 bushels of wheat to the acre, and a large surplus would be available for exportation, the English market being regarded as the most probable outlet, the neighbouring colonies now growing almost sufficient for their own requirements. The amount proposed for military defences had been refused, measures of economy still engaging the attention of Parliament. The bonded debt had entered upon the first stages of consolidation. In future a uniform title and interest at 5 per cent., instead of 6 per cent., are to be observed. A scheme was under discussion for imposing stamp, legacy, and succession duties, estimated to yield 25,000*l* per annum, but its details seemed to be thought too elaborate for a new country. The estimates had all but passed, and the end of the Session was approaching. There has been but little activity at the gold diggings. Operations have been resumed at the Burra mines; and a discovery of native sulphur has been made near Echunga. Opinions had been expressed "that a large Government expenditure is an interference with private enterprise. It keeps up the standard of wages, and prevents the profitable employment of capital in industrial pursuits. The abundant harvest may do some good, but it will not remedy the evil. The Government must cease to interfere between labour and capital before there can be any permanent prosperity in the colony." Owing to the favourable harvest wheat had declined from 5s 7d to 4s 7d per bushel. Flour

was 12/ 10s to 13/ 10s per ton. The banks bought 60 days' sight draughts on London at 1 per cent. discount, and sold same at 1 per cent. premium.

Tables published in the *East India, China, and Japan Monthly Shipping Register* illustrate the rapid development of the route by the Suez Canal. Out of a total of 1,629,744,424 yards of cottons shipped to the East in 1870, 933,760,170 yards went by way of Egypt, and 26,239,137 lbs twist, out of a total shipment of 62,692,056 lbs. From the same tables it also appears that while the exports to Calcutta have increased 2-1/10th million pounds sterling, those to Bombay have decreased three-fourths of a million. To Hongkong there is nearly a million excess, balanced by a reduction to other Chinese ports. The tendency to build large ships and steamers for the Eastern trade is shown by the fact that only 1,655 vessels sailed in 1870, against 1,880 in 1864, although the total tonnage in 1870 was 1,523,397 tons, while in 1869 it was 1,572,551 tons.

The annual official return published by the Inland Revenue shows that during the year ended the 31st of March, 1870, 35,564 probates of will, letters of administration, and testamentary inventories were taxed, amounting to 1,015,470*l*; 5,540,973 inland, and 3,040,169 foreign bills of exchange; 36,550 bankers' notes, and 146,049,040 penny receipt stamps for draughts and other documents. No account is kept of the number of stamps for marine insurances, which produced last year 86,936*l*. A total of 13,597 certificates were issued to attorneys, 1,147 to bankers, 66 to conveyances, and 12,143 licences to drivers of metropolitan public carriages, as well as 8,333 marriage certificates. Patent medicines produced 72,353*l* in way of duty; legacies and successions, 2,970,769*l*; fire insurances, 465,010*l*; and playing cards, 12,303*l*, the sum collected on 984,210 packs. A duty of 17s per ounce for gold, and 1s 6d for silver plate is charged for all manufactured in Great Britain and Ireland, and the sum derived from this source amounted to 66,039*l*. The stamps for divorce and matrimonial causes were 16,304 in number, and produced 3,244*l*; for Admiralty Court fees 22,565, producing 8,807*l*; 108,910 for patents for inventions, producing 121,329*l*. The companies' registration fees produced 9,496*l*; the record of title fees, 38*l*; land registry fees, 1,335*l*; common law court fees, 91,433*l*; public record fees, 720*l*; Copyhold Enclosure and Tithe Commission, 9,011*l*; Bankruptcy Court, 64,602*l*; Law Fund (Ireland), 9,549*l*; Chancery Fund (Ireland), 4,519*l*; Judgments Registry Fund (Ireland), 3,324*l*; Civil Bill Fund (Ireland), 13,678*l*; Registration of Deeds (Ireland), 11,355*l*. The aggregate amount of revenue of the Inland Revenue Department collected in stamps amounted to 9,532,878*l*, as compared with 9,505,238*l* in the preceding year, thus representing an increase, because, though the stamp duty on fire insurance was repealed on and after the 25th of June, 1869, the Bankruptcy Court and Chancery Court fee stamps in England became revenue on and after the 1st of October of last year.

The Excise duties for the year ended March, 1870, included 157,186*l* on 12,525 cwts of chicory; 6,874,468*l* on 50,697,459 bushels of malt, and 11,427,614*l* on 22,855,229 gallons of spirits. The railway duty amounted to 505,907*l*, being 5 per cent. on 10,118,159*l* received for conveyance of passengers. The stage carriage duty produced 30,700*l*, being a farthing for each mile travelled; and the hackney carriage duty 74,236*l*. A total of 32,682 brewers' and 5,417 maltsters' licences were issued, 586 to manufacturers of tobacco and snuff, 10,836 to beer dealers, 137,037 to beer retailers, 9,522 to spirit dealers, 12,548 to spirit retailers, 142 to spirit distillers, 170 to spirit rectifiers, 9 to makers, and 1,356 to retailers of methylated spirits. Licences were granted to 57,566 wine dealers, to 6,626 refreshment houses, to 393 passenger vessels, to 48 tea and coffee dealers, and to 283,357 dealers in tobacco, which last produced a revenue of 74,381*l*. Licences were also granted to 393 paper makers, 307 soap makers, 21 roasters of malt, 12 dealers in roasted malt, 122 makers and dealers in sweets, 16,212 retailers of sweets (producing a revenue of 11,254*l*), and to 62 vinegar makers. Post horses produced a revenue of 102,485*l*, stage carriages 72*l*, and hackney carriages (in London only) 2,614*l*, but all these were repealed at the beginning of the current year. Licences were granted to 20,736 hawkers and pedlars, to 3,971 appraisers and house agents, to 5,499 auctioneers, to 4,013 pawnbrokers, to 9,866 dealers in plate, to 16 makers and to 9,158 sellers of playing cards, and to 12,339 medicine vendors. A total of 59,627 persons were licensed to kill and 2,361 to deal in game, 18 to make and 876 to use stills, 2,473 to keep racehorses, 1,140,727 dogs, and 207,671 male servants. There were 882,322 persons paying duty for carriages, 744,906 for horses, 56,888 for armorial bearings, and 1,009 as horse dealers. The total gross sum produced during the year was 22,730,043*l* sterling.

At the present time Scotland has a total of 2,379 miles of railway. During the past year the maintenance of the permanent way, works, &c., cost 510,340*l*; the locomotive power, 560,369*l*, repairs and renewals of carriages and waggons, 204,562*l*; traffic expenses, 562,552*l*; general charges, 111,565*l*; rates and taxes, 95,229*l*; Government duty, 39,872*l*; compensation for personal injury, &c., 23,994*l*; compensation for damage and loss of goods, 10,200*l*; legal and Parliamentary expenses, 257,612*l*; steamboat, canal, and harbour costs, 56,500*l*; and miscellaneous working expenditure 45,357*l*. The total working expenditure amounted to 2,246,152*l*, and the total receipts to 4,561,894*l*, the net receipts being 2,315,742*l*, so that the proportion of expenditure to total receipts amounted to 49 per cent. The rolling stock consisted 1,211 locomotives, 2,443 carriages for the conveyance of passengers, 762 other vehicles attached to passenger trains, 10,836 waggons of all kinds used for the conveyance of live stock, minerals, and general merchandise, and 403 other carriages of various kinds. A very large proportion of the small lines in Scotland are worked by the larger companies, so that all the rolling stock above epitomised is the property of seven companies only—the Caledonian, which has 16,803; the Firth and Clyde Junction, 307; the Glasgow and South-Western, 8,445; the Great North of Scotland, 1,712; the Highland, 1,445; the Leven and East of Fife, 184; and the North British Railway Company, 16,740 vehicles of all kinds. During the year 2,872,705 first-class, 2,403,764 second-class, and 18,187,398 third-class passengers were conveyed, besides 20,328 season-ticket holders, 7,597,152 tons of minerals, and 2,041,300 tons of general merchandise. The passenger trains travelled 8,186,652, and the goods and mineral trains, 11,097,887 miles. The total stock and share capital received and capital raised by loans and debenture stock amounted to 61,131,860*l*, and the subscriptions to other companies to 1,714,092*l*.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the third week of January, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	3rd week Jan., 1871.	Corresponding Total in 1870.
West district	6,056	10,174	7,759	23,989	24,299
North district	6,800	14,936	12,816	34,552	30,872
Central district	7,058	8,771	7,577	23,406*	23,097
East district	7,787	12,488	11,459	31,734	33,977
South district	9,321	20,783	19,994	50,098	48,121
Total of the Metropolis	37,022	67,152†	59,605	163,779	160,366

* No returns have been received this week from Holborn (Central District).
† Of these outdoor paupers 19,719 are men and 47,433 are women.

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,802,000

	Number of Paupers. Indoor.	Outdoor.	Total.
Third week of January, 1871	37,022	126,757	163,779
— — 1870	37,088	123,278	160,366
— — 1869	36,874	113,198	150,072

Vagrants relieved in the Metropolis on the last day of the third week of Jan., 1871.

Men.	Women.	Children under 16.	Total.
787	179	31	997

In the year 1870 5,574 miles of new railroad were opened for traffic in the United States, bringing the total up to 54,435 miles. The average cost per mile of new road is $40,345. This is by no means an extravagant estimate, and is probably as nearly correct as can be ascertained. The largest increase has been in the States of Illinois, Iowa, Missouri; and Kansas, where railroad construction has been stimulated to the utmost by town and county subscriptions in the form of bonds. In Alabama and Georgia, the companies building railroads have been encouraged by State subsidies. The same encouragement has been granted in North Carolina, but in that State with little advantage. The difficulties in Europe, breaking out suddenly in the middle of the year, closed foreign markets against American bonds, and made it impossible for companies in general to negotiate their paper, or to carry forward intended or progressing works. Had peace been maintained, we doubt not that at least 10,000 miles of road would have been the complement of the year 1870. The average cost of railroads in the United States, including the great overland lines, which cost more than $100,000 per mile, or about 10 per cent of the total cost of railroads, is $47,277 per mile. But few of the great trunk roads have cost less than $80,000 to $100,000 per mile, while in the South the cost of railroad building, notably in the Atlantic States, has not exceeded $20,000 to $25,000 per mile. Since 1860 one-half of the present total has been constructed, and this total is equal to all the railroads of all other parts of the world in the aggregate. It is longer than the circumference of this earth. It is true that most of the railroads in Europe are furnished with two or more tracks, while in this country not more than 25 per cent. of the lines are so furnished. But in most instances these additional tracks are not required, and hence we find them only on the great trunk lines, such as the Erie, New York Central, and Pennsylvania, and their immediate connections east and west. This, however, necessitates a larger measure of turn-outs, sidings, &c., which may be reckoned at 10 per cent. of the total length. Thus, in estimating the total equivalent single track in use, we must add 35 per cent., which makes an aggregate of 73,487 miles, and to this sum must be added about about 5,000 city passenger railroads, one half of which are double-tracked; and together these aggregate a length of more than 80,000 miles of equivalent single track.—*American Railroad Journal.*

Clearing-house return	...	51,164,000	59,916,000	64,616,000	65,466,000

In 1861, the pressure on the money market, caused by the Secession movement in America, and the demand of bullion for France, was beginning to be less severe, but money still remained at the rate to which this pressure had carried it. Secession had now been proclaimed by five States, and numerous acts of hostility committed.

In 1868, the regime of 2 per cent., which followed the panic of 1866, continued.

In 1869, the ease in the money market which had existed from the opening of the year, continued with little prospect of change.

In 1870, there was a little momentary pressure for money, in consequence of the payments of "Mr Lowe's taxes." Some money was also locked up by the payment of the instalments of a Russian loan, which had been recently negotiated. Confidence was steadily reviving, and a rise in the Bank rate anticipated at no very distant date.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 7,584,117*l*; in 1868, an excess of 5,906,987*l*; in 1869, an excess of 3,036,022*l*; and in 1870, a deficiency of 1,197,526*l*. In 1871, there is an excess of 4,213,299*l*.

DISCOUNT AND MONEY MARKET.—The rates for money in the open market have advanced from ½ to ¼ during the week. The quotation for short bank bills was last Friday 2⅛ ¼, and is now 2¼ ⅜; but the market was weak last week at the figure quoted, and it is now firm at the higher rate—the rates for long-dated paper having advanced in proportion. The demand at the Bank has likewise been good during the latter part of the week. The advance in the value of money has thus been distinctly marked for the week, though there is still a great accumulation of money. The principal cause of the change has undoubtedly been the reports of the impending capitulation of Paris, of which official intelligence was received this afternoon. The event has for some time been looked forward to as one which would take away some of our surplus money, and precautions were at once taken on the news being received. It appears, however, that the diminution in the private deposits at the Bank has had some effect, and the steady current of gold to the continent, though the store at the Bank is still enormous, has also begun to attract a little attention. On the whole, there are many reasons for expecting firmer rates for money at once; but there may be some delay for a few days longer, till the terms of the capitulation are known and carried out, and the effect on France is perceived.

The withdrawal of bullion from the Bank in the week was 217,000*l*, and a farther sum of 88,000*l* was taken to-day. The private deposits in the Bank have also been diminished by the sum of 938,000*l*. The account shows that the "other securities" diminished slightly; but the advance in the rates for money in the open market occurred only on the last day of the bank week, and it is since then that there has been an improved demand at the Bank.

We subjoin our usual quotations for mercantile paper having various periods to run :—

2 to 3 months Bank bills	2¼ 2⅜	per cent.
4 — —	2½	per cent.
6 — —	3¼	per cent.
2 to 3 months Trade bills	2⅜ 2½	per cent.
4 — —	3	per cent.
6 — —	3½ 4	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1⅝ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

Vienna	5½ 6	per cent.
Berlin	4¼ 4⅜	per cent.
Frankfort	3	per cent.
Amsterdam	3½ 4	per cent.
Hamburg	4	per cent.
St Petersburg	7 8	per cent.

ENGLISH GOVERNMENT STOCKS.—The report of negotiations for the capitulation of Paris, which appears now to be as good as settled, according to a Foreign Office telegram published this afternoon, suddenly altered this week the entire prospects of the stock markets. The capitulation being carried out, whether the war goes on afterwards or not, will put an end to the suspense which has so long arrested business. In the event of peace, which the Germans will make an anxious effort to obtain, the arrangements for liquidating the war debts, repairing losses, and re-establishing business of all kinds, must immediately begin; and the effect of these proceedings may at once be discounted on the Exchange. In the contrary event of a continuance of the war, it will be continued under very different conditions from those which have existed since the formation of the siege of Paris; and the necessary changes will have a similar effect on the markets to the conclusion of peace itself. The Parisians, when their city falls into German hands, must endeavour as they best can to restore the usual relations of business and commerce, and they will almost certainly be heavily requisitioned. In other words, there must be some drain of capital to France and Germany, though not on the scale which is probable at the conclusion of peace. The capitulation therefore, though some of its consequences are uncertain, enables people to reckon on the immediate future for business purposes with more confidence than they have done for many months. As we anticipated, the first effect has been to enhance almost all prices, especially foreign securities. Until Wednesday, in the absence of business, and with the high level of prices which had been reached, the general tone was flat; but the announcement on Wednesday morning that M. Jules Favre was in Versailles, coupled with authoritative assertions that proposals for capitulation were being made, at once produced an improvement, which was fairly sustained on Thursday and to-day till this afternoon, when a farther rally took place on positive reports that the capitulation was actually

settled. But the improvement on the whole has been of a moderate description, great uncertainty being felt as to the nature of the proposals made, and fears entertained as to the reaction in values which appears inevitable as soon as Paris is placed in communication with the outer world, and the partial or complete liquidation of the war begins.

In English Government stocks the fall between last Friday and Tuesday was about ¼—from 92 9/16 1/16 to 92 3/8 ½. On Wednesday, under the influence of the capitulation reports, they advanced ⅛; but this was soon checked, and there was hardly even an improvement for the day, while on Thursday the lowest figure of the earlier part of the week was again touched. To-day there was a tendency to flatness at the opening of the market, but the closing price is 92½ ⅜. New and Reduced have moved in sympathy with Consols, and the change for the week is a fall of 1/16. There is no doubt that these stocks are at a very high figure, and, as of late they have been a good deal taken up for foreign holders, the sensitiveness they have shown under the capitulation reports is not surprising.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.	
	Lowest.	Highest.	Lowest.	Highest.	March.	June.
Saturday	92½	92¾	92½	92½	10s pm	15s pm

FOREIGN GOVERNMENT STOCKS.—The dull tone of the markets and the absence of business produced some slight changes in the downward direction in the early part of the week, but the transactions were only nominal. Since the reports of the capitulation there has been a considerable improvement, chiefly in Turkish, Egyptian, and Spanish, the former being favourably affected by the prospect of access being gained to Paris so as to permit the drawings which are in suspense to be made. The improvement has only been slightly checked by what would otherwise have been the event of the week—the issue of the second part of the North German loan. The amount asked for is too small to affect the market much, especially in the face of the large accumulation of money at the present moment. Any check of this sort, too, has been balanced by the occurrence of the settlement, which has shown on the whole a scarcity of stock, the tendency having lately been to speculate for a fall, and the settlement commencing in the midst of the first momentary improvement, which the reports of the capitulation naturally produced. Generally, however, it must be observed that as yet there has been very little dealing, and like the last the present settlement is one of the most meagre which has occurred for a long time on the Stock Exchange. It is remarked that there must have been an unusually large payment of half-yearly dividends in London, owing to the payment exclusively in London of the interest upon some Turkish and Egyptian loans which is payable both in London and Paris, while otherwise there has been a great accumulation of money; but nevertheless there have been comparatively few purchases for reinvestment. To-day the market has been buoyant, especially in the afternoon, when the fact of the capitulation of Paris was confirmed—the favourite stock for investors being Spanish securities, which there is a disposition to regard very favourably on the apparent evidence that the country is settling quietly down under the government of King Amadeus. South American securities, as we noticed last week, have also been in request.

On the strength of the capitulation reports the French National Defence Loan has materially improved, the quotation being ¼ to ⅜ dis. instead of 3¼ 3, which was the closing price last week. The calculation is that capitulation must bring peace, and that all French securities must improve as soon as France is permitted to set its house in order. There will also be a drawing in the course of February. The new loan of North Germany has likewise been at a premium, the closing figure being ½ to ⅝—equivalent to the present price of the first issue, on which there are several months of an accrued dividend, while a drawing will also be shortly due. The prospect of peace has an especially good effect on North German securities, as it is all but certain the Prussian finance administration will take care to be reimbursed by its requisitions on France, and the addition made by the war to the indebtedness of the new German Empire will be extremely little.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

The prospectus of the new issue of the North German loan contains conditions almost exactly similar to those of the last issue. The total amount is 7,500,000*l* equal to 51,000,000 thalers, of which 3,000,000*l* is offered for subscription in London through the agency of the London Joint Stock Bank —the remainder being offered in Germany. The loan is a 5 per cent. one, redeemable at par on 1st November, 1875, and principal and interest payable in Germany or London at the option of the holder at the exchange of 6 thlr. 24 sgr. per £ sterling. The price of issue in London is 96*l*, payable by instalments terminating on the 1st of May next.

Advices from Madrid state that Senor Moret, the Minister of Finance, in fulfilment of the programme he lately presented to the Cortes, is "about to bring forward a series of measures calculated to place upon a better system the collection of the public revenue, and to facilitate the recovery of arrears."

ENGLISH RAILWAYS.—In this department as in foreign stocks there was comparative dulness until Wednesday, the absence of business producing a weak tone, though the actual fluctuations were very slight. Subsequent to the reports of the capitulation of Paris, and the announcement of favourable traffic returns early in the week, there was a very marked improvement, several of the principal stocks reaching a higher point than they had previously touched in anticipation of the dividends. The settlement also showed a scarcity of stock, which contributed still further to strengthen the market. It is also estimated that whatever reaction there may be on account of the realisations and the demands for capital, which the opening up of Paris will cause, all tending to depress the markets, the depression will be least felt in the best English home securities, which are steadily improving in value. The depression

to be apparent must be shown in a stationary security, and it is probable that the principal home railways, as the result of the coming dividends, and continuously favourable to traffic returns, will be placed on a higher level than they now are.

Early in the week the reports of the quarrel between the northern lines out of London on account of the coal traffic had a slightly depressing effect; but though the accounts of the competition are very serious (involving, it is stated, each of *four* great companies, the Great Northern, Midland, London and North-Western, and Great Western), it seems incredible that this drawback can be chronic, or one which shareholders ought seriously to fear. Certainly railway prospects were never better, and directors will incur a heavy responsibility if they throw away the profits accumulating in their hands.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	87⅝ ⅞		88 ⅛	+ 1⅛
Great Eastern	40¾ 1		40¾ 1	... ...
Great Northern	124½ 25½		125 6	+ ¼

London and Brighton 4½ %	91 100 xd		98 100	... ...
London, Chat., & Dover Arbitration 4½ %	91 2		91½ 2½	+ ½
Metropolitan District 6 %	109 11 xd		109 11	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), for the week ending January 21, amounted to 668,759*l*, being an increase of 22,137*l* on the corresponding week of the previous year. The principal increases are—Great Western, 5,173*l*; Lancashire and Yorkshire, 3,575*l*; London and North-Western, 3,297*l*; Caledonian, 3,100*l*; North-Eastern, 2,353*l*; and Midland, 2,144*l*. The following shows the increase or decrease in each case, both for the week and for the aggregate of the half-year to date:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts.		Aggregate Receipts of Half-year to date.

Madras 5 %	103¾ ¾		103¼ ½	... ...

AMERICAN SECURITIES.—There is not much actual purchasing for investment going on in any department, but so far as it takes place the set is principally to securities which are extra-European; and the United States securities, as they offer the largest market and the best security of any such foreign country, are looked on with most favour. The buying, to which we have formerly called attention, has accordingly continued, but there is little change to note. The following shows the changes for the week in the most important stocks of this department:—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90⅛ ¼		90¼ 1	+ ⅛
Ditto 1865 Issue	89⅛ ¼		90⅛ ¼	+ ⅛
Ditto 1867 Issue	88⅛ ¼		89⅛ ⅜	+ ⅛
Ditto 5 % 10/40 Bonds, exchange 4/6	88 ⅛		89 ⅛	+ 1
Atlantic and Great Western Consol. Bonds	...		28 9	... ...
Erie Shares	18⅝ 19		18⅝ ¾	− ⅛
Illinois Central Shares	109¾ 10½xd		110 11	+ ¼
Massachussets 5 % Sterling Bonds, 1900	94 6		93 5	− 1
Panama General Mortgage 7 % Bonds, 1897	92 4		94 6	+ 2
Pennsylvania Gen. Mort. 6 % Bonds, 1910	90¼ 1½		90⅜ 1½	... ...
Virginia 6 % Bonds	55 7		55 7	... ...
Ditto 5 % Sterling Bonds	55 8		55 8	... ...

The single unfavourable circumstance affecting American securities continues to be the Erie frauds; and the statements published by the American press, as to the large sums paid for law, and to buy off litigation, give an extraordinary idea of the way in which it is possible in America to take the money of the shareholders of a joint stock company and use it in defeating their just claims by means of bribes to judges and "fees" to gentlemen of the bar. According to the last accounts of the Erie Company it would seem that about 60,000*l* were spent in 1868 on "law," 200,000*l* paid to Mr Vanderbilt for withdrawal of ligation, and 86,000*l* to other parties for similar purposes. So long as such things occurs and the Supreme Court of the United States is so difficult to move, there will be a certain distrust of almost all United States securities, except those of the Government itself.

Messrs J. S. Morgan and Co. invite subscriptions for 500,000*l* sterling 6 per cent. Mortgage Bonds of the United Canal and Railroad Companies of New Jersey. It is stated that the companies united consist of the Camden and Amboy Railroad and Transportation Company, the Delaware and Raritan Canal Company, and the New Jersey Railroad and Transportation Company, united into one interest and under one management; and this undertaking includes three avenues of traffic between New York, Philadelphia, Baltimore, and Washington, as well as the country south and west. The prospectus also states that "the paid-up share capital of the companies amounts amounts to 16,550,000 dols, and the entire bond and funded debt of the companies (including the 369,200*l* sterling bonds issued in 1869, and the present issue of 500,000*l*), are covered by a mortgage security representing 20,000,000 dols or 4,000,000*l*. The aggregate gross earnings of the companies are nearly 8,000,000 dols per annum. The dividends paid on the share capital are 10 per cent. The net earnings heretofore accumulated in excess of profits divided as dividend are upwards of 1,000,000 dols, which has been expended in the works and is not represented in the share or loan capital." The bonds are for 200*l* each, issued at the price of 92 per cent., or 184*l* each bond, and subscriptions are payable by instalments terminating on the 1st of May next.

A distribution of 1½ per cent. on Atlantic and Great Western Railway certificates of debentures, 1864, has been arranged to be made as soon as the necessary details can be settled, it being understood that negotiations are in progress with the Dutch holders of the Ohio Divisional Bonds to come in under the reconstruction scheme, and thus put an end to all litigation.

JOINT STOCK BANKS.—This department has ruled active, under the influence of the favourable dividends recently declared, and the more cheerful feeling which prevails in regard to the immediate future prospects of trade. The capitulation of Paris, it is supposed, will lead to considerable movements in specie, and the banks generally will reap the benefit of any upward movement that may occur in the value of money; while the impetus given to trade by the depletion of stocks of produce and goods on the continent during the last six months will necessarily cause an increased demand for accommodation. From this time the quantity of commercial paper afloat—already large—will probably be augmented. The London and County Bank have this week declared a dividend of 6 per cent., with a bonus of 3 per cent., which, with the payment made in June last, is equal to a total distribution of 17½ per cent. on the paid-up capital. This is ½ per cent. in excess of last year. An unfortunate feature in the market, however, has been the announcement that the Consolidated Bank is involved to the extent of about 30,000*l* in connection with the failure of Mr Simon Attia and others. The advances which have been made upon very unsound securities are equal to the amount required to pay the dividend recently declared, and have only just been discovered, otherwise no distribution would have been made. The assistant-manager has been suspended pending inquiry. Among the changes in the quotations are—An advance of ½ in Alliance, English, Scottish and Australian Chartered, and Imperial Ottoman; 1 in Anglo-Austrian, Egypt, British North American, London and County, and Union; ¼ in Anglo-Egyptian; and 1½ in London and Westminster. On the other hand, Bank of Roumania shares show a decline of ½, Metropolitan ¼, and Consolidated of ¾ on the week.

TELEGRAPH SHARES.—The market has been a little dull at the end of the week in consequence of an announcement by the Indian Submarine Company that owing to the repairs of the Falmouth and Gibraltar line not being completed, and other interruptions of business, quarterly dividends would not be paid. The report issued by Hooper's Telegraph Works Company, however, has had a favourable influence upon Construction shares. Telegraph Constructions are 1, Hooper's ½, and Silver's 2 better. Anglo-Mediterranean shares have receded 1, and Great Northern ¼; but French Cables have advanced ¾; British Australian and West Indian ½.

MINES.—In this department there has been a lack of animation; nevertheless prices have been fairly supported for British shares. Californian and Mexican mines have been rather pressed for sale. The most important changes are—A rise of 2½ in Providence (Uny Lelant); ½ in Great Laxey and Great Wheal Vor; 2 in Van; and ¼ in South Condurrow. On the other hand, West Chiverton has given way 2; Tankerville and Wheal Mary Ann ½. In foreign mines the leading feature is a reduction of 1½ in Eberhardt.

The prospectus of the Pyramid Range Silver Mountain Company (Limited), with a capital of 500,000*l* in 5*l* shares, divided into 60,000 A Priority shares, and 40,000 B Deferred. The latter, and 20,000 A shares, having been taken in part payment of the purchase money, and applications are now invited for the remaining 40,000*l* A shares. The property is situated near Arizona, U.S., and the assay reports appear satisfactory, being furnished by good authorities. The sum to be paid to the vendors is 400,000*l* of which 100,000*l* is required to be paid in cash for the acquisition of the interest above mentioned. A further 100,000*l* will be paid in A priority shares fully paid-up, one half of which, however, and the remainder of the purchase-money, 200,000*l*, to be paid in B or deferred shares, will not be delivered to the vendors, but will be deposited in the hands of Charles Gilpin, Esq., M.P., and John Morris, Esq., as trustees, until a dividend of 20 per cent. has been paid on the remaining A share capital. No dividend is to be paid on the B shares in any year until 20 per cent. has been paid on the A share capital; but all profits beyond 20 per cent. per annum on the entire capital will be divided between the A and B shares, in their respective proportions.

MISCELLANEOUS.—The changes in the quotations for miscellaneous shares have been neither numerous nor important, and the amount of business passing has been limited. The Tobacco 6 per Cent. Italian loan has advanced 1, and Australian Agricultural shares are ½ better; but we note a decline of 1 in Peel River Land and Peninsular and Oriental Steam shares on the week.

The Corporation of the City of London are prepared to receive subscriptions for 120,000*l*, being part of an amount of 160,000*l* required to erect a foreign cattle market. The bonds will be issued at par in amounts of 1,000*l*, 500*l*, and 100*l*, and will bear interest at the rate of 4¼ per cent. The bonds will be redeemed in eight years.

EXCHANGES.—The exchange upon Antwerp and Brussels has altered to-day 2½c, viz., from 25.30 37½, to 25.32½ 40, the change indicating a diminution in the demand for the means of remittance to Belgium.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The demand is very good for the continent, and as the arrivals have been but small, 295,000*l* have been withdrawn from the Bank. The Oneida has brought 45,200*l* from the Brazils, and the City of Washington 5,000*l* from New York. The amount due on the 30th inst. by the Overland mail from Australia (550,190*l*) will all be sold for abroad. The mail from Melbourne, due about the end of February, is bringing 585,500*l* on English account.

Silver.—The large orders lately received having to a great extent been filled, the price has slightly declined to the quotations given below. A large amount of Dore silver is being received from China; this is being taken for refining purposes. The Algeria has brought 13,600*l* from New York; the Calabria has brought 10,000*l* from New York; the City of Washington has brought 74,500*l* from New York—total, 98,100*l*.

Mexican Dollars.—The Bangalore has taken 25,000*l* to China; the demand is not, however, brisk, and the greater part of the coin to hand is taken for refining purposes. We have received about 32,000*l*, per Darien, from New Orleans, and Calabria from New York.

Exchange on India for banks' drafts at 60 days' sight is 1s 10¼d to 1s 10½d on all Presidencies.

India Government loan notes remain as last quoted, viz., 4 per Cents., 90 to 90½; 5 per Cents., 98½ to 99; and 5½ per Cents., 106 to 106½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11½d per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0½d to 5s 0 15/16d per oz std, last price; ditto, containing 5 grains gold, 5s 1d per oz std, last price; Mexican dollars, 4s 10¾d per oz, last price. Quicksilver, 11*l* to 12*l* per bottle; discount, 3 per cent.

The sum of 88,000*l* was withdrawn from the Bank of England to-day.

According to the official return published in to-night's *Gazette*, the imports of the precious metals into the United Kingdom during the week ended January 25 were—Gold, 94,223*l*; silver, 467,532*l*. The exports were—Gold, 271,533*l*; silver, 81,925*l*.

FAILURES AND EMBARRASSMENTS.—The following are announced:—

Mr M. L. Yuly, of Great Winchester street buildings, in the Mogador trade. Liabilities about 50,000*l* or 60,000*l*.

Mr Simon Attia, of 17 Gracechurch street, African merchant. Liabilities, 20,000*l* or 30,000*l*.

Mr Isaac Mendez, of 10 Union court, Old Broad street, merchant. Liabilities about 20,000*l*.

The above three failures are stated to be connected with each other, and the *Times* states that the Consolidated Bank is understood to be involved to the extent of 30,000*l*.

Feb. 1.—Guatemala 5%, 1856.
Japanese 9%, 1870.
Moorish 5%, 1862.
Russian Anglo-Dutch 5%, 1870.
Turkish Guaranteed 4%, 1855.

PUBLIC COMPANIES.

STOCKS.

Montevidean 6 per Cent. Loan, 1864.—Bonds, representing 35,100*l.*, have been purchased and cancelled.

North German Loan.—The application list closed yesterday for London, and closes to-day for the country.

Roumanian Government Iron Bridges Annuity. — Bonds for 13,900*l.* have been drawn for repayment on the 1st April.

RAILWAY COMPANIES.

Manchester, Sheffield, and Lincolnshire.—The 2½ per cent. per annum dividend was declared at the half-yearly meeting.

BANKS.

Consolidated.—It is stated that the bank has sustained a loss of nearly 30,000*l.* by the failure of merchants in the Mogador trade.

English, Scottish, and Australian Chartered.—Available profit, 25,425*l.* The directors propose a dividend at the rate of 7 per cent. per annum on the paid-up capital, which will require 21,000*l.*, leaving, after an appropriation of 1,000*l.* to premises and furniture accounts, the sum of 3,425*l.* to be carried forward.

Hallett, Ommaney, and Co.—A further dividend of 1s in the pound (making 10s 4d) is payable to the creditors.

London and County.—The directors announce the usual dividend of 6 per cent., with a bonus of 3 per cent., being together 9 per cent. for the half-year ending the 31st of December last. This, added to the June dividend, is equal to 17½ per cent. for the year 1870, and the amount carried forward to profit and loss new account will be 4,300*l.*

National.—The adopted reported stated the profit for the past half-year, with 2,032*l.* brought forward, at 56,975*l.*, and a dividend was decared for that period at the rate of 7 per cent. per annum, free of income tax. It was also decided to carry 2,500*l.* to reserve, and 1,975*l.* to profit and loss new account. The report, which was adopted, mentioned that the decision of the arbitrators in the affair of the London, Chatham, and Dover Railway has had the effect of liberating capital hitherto locked up.

North-Western.—Dividend declared at the rate of 6 per cent. per annum.

Staffordshire Joint-Stock.—Available profit, 15,540*l.* Of this 7,000*l.* is added to reserve (thus increased to 42,000*l.*), 6,559*l.* is applied to the payment of a 7½ per cent. per annum dividend, 1,200*l.* to the purchase of business, and 781*l.* is carried forward.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

English and Foreign Credit.—At the meeting a dividend at the rate of 6⅞ per cent. per annum was declared; surplus, 416*l.*

National Discount.—At the meeting a dividend at the rate of 17 per cent. per annum was declared, free of income tax.

New Zealand Trust and Loan.—At the meeting an interim dividend at the rate of 10 per cent. per annum was declared.

ASSURANCE COMPANIES.

London and Provincial Marine Insurance.—A dividend at the rate of 10 per cent. per annum is announced, and 15,000*l.* is to be added to the reserve.

Liverpool Marine Insurance.—The underwriting account for 1869 resulted in a heavy loss; but that of 1870 bids fair to show a good profit.

Ocean Marine Insurance.—The available balance amounts to 88,346*l.* (after payment of the interim dividend of 10,000*l.* in July last), out of which it is proposed to pay interest at the rate of 5s per share and a bonus of 20s; to add 15,000*l.* to the reserve fund, increasing it to 90,000*l.*; and to carry forward 23,346*l.* There will remain the sum of 122,685*l.* applicable to the risks of 1869 and 1870.

Thetis Marine Insurance.—An interest payment at the rate of 5 per cent. per annum is notified.

Universal Marine Insurance.—The net premiums received during the year, after deducting re-insurances, &c., amounted to 282,902*l.*, while the payments of losses and claims during the same period, on account of 1870 and previous years, have been 189,534*l.* The balance to the credit of income and expenditure account has increased from 160,633*l.*, as per last balance-sheet, to 226,422*l.* The directors recommend the payment of a dividend of 7s 6d, and a bonus of 2s 6d per share, free of income tax, making, with the distribution in July, 12½ per cent. for the year.

MISCELLANEOUS COMPANIES.

Australian Agriculture.—An interim dividend at the rate of 5 per cent. per annum is announced.

British Shipowners.—A dividend of 5 per cent., making with the interim distribution 7½ per cent, for the past year, has been declared. 10,000*l.* is placed to depreciation, and 2,428*l.* carried forward.

Hooper's Telegraph Works.—The report announces that the profit of the year, after writing off 20 per cent. for depreciation of the works (13,000*l.*), and the whole of the preliminary expenses, has been 36,440*l.*; and that, after deducting the amount due to Mr Hooper in accordance with his contract, the net balance is 24,782*l.*, of which 6,250*l.* was distributed on the 1st of July, leaving 18,532*l.*, out of which a dividend is declared for the six months of 10s 6d per share, or at the rate of 15 per cent. per annum, which will absorb 13,125*l.*, and leave 5,407*l.* to be carried to the formation of a reserve.

Improved Industrial Dwellings.—Half-year's receipts, 8,225*l.*; profit, 3,739*l.*; which, added to the previous surplus, leaves 6,040*l.* available. A 5 per cent. dividend absorbs 3,125*l.*

Linoleum Manufacturing.—The report shows a net profit for the year of 14,962*l*, to which 1,767*l*, the balance brought forward, has to be added. The directors recommend the payment of a dividend of 15 per cent. for the twelve months, leaving 2,000*l* to be added to the reserve fund, and 1,530 to be carried forward.

London and St Katharine Docks.—At the meeting a dividend at the rate of 3 per cent. per annum, free of income tax, was declared, leaving 15,695*l* to be carried to reserve, which now amounts to 165,873*l*.

Merchant Shipping.—No interim dividend is to be paid this half-year.

Millwall Dock.—An issue of 6 per cent. mortgage debentures to the extent of 230,000*l* is announced. The net returns for the current year are estimated at 27,876*l*, while only 15,719*l* is required for interest on the debentures.

M'Queen Brothers, Limited.—Mr Good has been appointed official liquidator.

Nevada Freehold Properties Trust.—Creditors must send in their claims to Mr James Ford, the official liquidator, by the 28th February, the 8th March being appointed for the adjudication.

Universal Private Telegraph, Limited.—Creditors' claims must be forwarded to the liquidators by the 13th February.

MINING COMPANIES.

Anglo-Italian.—A call of 2s 6d per share is payable on the 23rd February.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

On the 1st of February next, and thenceforward, money orders may be obtained at any money order office in the United Kingdom, payable at any place in North Germany, Baden, Bavaria, Wurtemburg, or Luxemburg. The commission chargeable will be threefold the commission on inland money orders, viz:—On sums not exceeding 2*l*, 9d; above 2*l*, and not exceeding 5*l*, 1s 6d; above 5*l*, and not exceeding 7*l*, 2s 3d; above 7*l*, and not exceeding 10*l*, 3s. No single money order will be issued for a higher sum than 10*l*. The issue of money orders in North Germany, Baden, Bavaria, Wurtemburg, and Luxemburg, payable at money order offices in this country, will also commence on the 1st of February next.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The capitulation of Paris has had an important influence upon the grain trade to-day, and the tendency of the quotations has been upwards for all descriptions of produce. Transactions have been somewhat limited; nevertheless, holders have demanded an advance of 1s per quarter on wheat, 6d on oats, and 1s on maize, in anticipation of large shipments to France at an early date. Flour has been in active demand, and barrels have advanced to 29s, the quotation for sacks being 39s per 280 lbs. Barley, beans, and peas are held at extreme rates. This week's imports of foreign and colonial produce into London have amounted to 6,780 quarters of wheat, 4,830 barley, 3,830 oats, and 12,350 barrels of flour.

At Liverpool and Wakefield, this morning, the wheat trade ruled steady at rising currencies.

The Liverpool cotton market was quiet in the early part of the week, but on Wednesday the demand increased, but a good business has since been done at an advance of ⅛d to ¼d per lb. The total sales are 94,950 bales, of which the trade have taken 68,080 bales; speculators and exporters 26,870. The imports for the week are 73,303; the actual exports, 121,162 bales; and to-day's stock is estimated at 565,880 bales. Quotations for American descriptions have advanced ¼d per lb; East Indian,

½d per lb; and Bengals remain unchanged since last Friday. To-day the market closes quiet. Sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended January 26, 1871:—

	Imported.	Exported.
American.....bales	41,352	8,216
Brazilian	9,818	202
East Indian	13,289	7,365
Egyptian	16,693	169
Miscellaneous	613	117
Total.....	81,765	16,069

At New York on the 26th current, middling Upland cotton was quoted at 15½ cents per lb. According to Sir Charles Forbes and Co.'s circular, the exports of cotton from Bombay to December 29 since the opening of the season had been 1,079,928 bales, against 1,143,095 bales; of these 918,696 were from Great Britain, against 971,945 bales during the corresponding period in 1869.

The colonial produce markets closed to-day with a fair amount of animation. Sugar was firm, though the transactions in raw goods were not very large. Coffee shows an advance of 1s to 2s per cwt on the week. Tea is unchanged in value, with a limited business passing. Sago and rice have been in request at steady currencies.

The annexed is dated Havana, Jan. 7:—Clayed sugars—The demand for low graded descriptions noticed in our last report was but of short duration, being checked by the high pretensions of holders, as well as by the much-reduced stock. Prices varied from 9½ rs to 9¾ rs for No. 12 for current qualities, below No. 10, whereas the few remaining lots of dry sugars obtained 10 rs and even 10¼ rs for No. 12. The transactions in old sugars having been very insignificant since the latter part of the past month, the market for new produce not having opened as yet for want of stock, we can only give the following quotations, which are based upon the last sales effected, viz.:—Nos. 7 to 10, 23s 5d to 25s 8d per cwt of 112 lbs; Nos. 11 to 12, 26s 3d to 26s 9½d, ditto. The stock here and at Matanzas amounts to 19,176 boxes, against 67,433 boxes in 1869. Of Muscovado sugars of the old crop no stock is left in the market, neither of Centrifugals in hhds nor in boxes. Of the new crop, small parcels of both classes have already appeared, which met with a ready sale, say at 9 rs to 9¼ rs for Muscovadoes, and at 9½ rs and 9¾ rs for Centrifugals in boxes Nos. 10/12. The exports from here, Matanzas, Cardenas, and Sagua la Grande during the last month, were distributed as follows, viz.:—To the United States, 35,571 boxes 1,075 hhds; Great Britain and a market, 1,779 boxes; Belgium, 493 boxes; Spain, 1,577 boxes; South and Central America, and other parts, 480 boxes—total, 39,900 boxes 1,075 hhds, against 58,229 boxes 3,825 hhds same month last year, and the aggregate of exports from the above-mentioned ports sum up to 1,677,373 boxes and 340,019 hhds, against 1,695,000 boxes and 287,355 hhds in 1869.

Annexed is from Messrs William Moran and Co.'s indigo report, dated Calcutta, Dec. 27, 1870:—In consequence of the Christmas holidays, and the urgent request of the principal buyers that extra time should be allowed them to take delivery and ship the purchases they had already made, there has been but one public sale held since our last report. In prices we have no change to notice, about 47,500 maunds are now disposed of. Exports of indigo from 1st November, 1870, to 26th instant:—To great Britain, 4,385 chests; France, 26; Trieste, 1,278; Foreign Europe, 94; America, 699; Gulphs and Levante, 295—total, 6,777 chests.

The wool market has been very firm, and a considerable quantity of both English and foreign produce has changed hands, notwithstanding the colonial sales are advertised for Thursday next. The quantity to be offered is stated to be upwards of 110,000 bales.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on December 15, thus refer to the Cape wool trade:—The mail steamer arrived in Table Bay on the 30th ult., bringing telegraphic news to the 28th October. By this means we learnt that the London wool sales had opened at about the closing rates of July sales, and there seemed an impression that prices would improve as the sales progressed. This caused prices to advance here, and a brisk business has been done during the fortnight at gradually increasing rates for all kinds of wool. The advance has been chiefly on greasy and scoured sorts—the former being ¼d to ½d per lb dearer, and the latter ½d to 1d per lb dearer than our last quotations. The telegraphic news per steamer Roman, received here on the 13th instant, reports a decline in prices, and has put a stop to business for the present. After the mail arrives here we fancy that prices will recede to our last quotations. The demand for superior greasy wool for the American market continues to be very active, and we have to report a further advance in value of ¼d per lb.

The annexed is dated New York, Jan 13:—The most notable feature of the financial situation is the accumulation of currency at this centre, with the consequence of an easier feeling in the money market. The renewed activity in stocks for a rise in prices, however, affords employment for an immense amount of currency, and thus prevents that yielding in the rates for accommodation which would otherwise doubtless take place. The demand for mercantile purposes is moderate, since there is little disposition on the part of buyers as yet to anticipate their requirements, or extend their operations. The rates for call loans remain 6 to 7 per cent., while the discount rates of prime and good paper vary from 7 to 10 per cent. Trade, as a whole, continues rather slow, though there are indications of coming activity in some departments, which are likely to become more strongly marked with the restoration of decided monetary ease. Gold has ruled tolerably steady, with little demand, except for mercantile purposes. Foreign exchange firm.

THE COTTON TRADE.

LIVERPOOL.—JANUARY 26.

Cotton has been in increased demand throughout the week, and prices have gradually hardened. On Wednesday a more favourable aspect of foreign politics caused some excitement, and a large business was done at an advance of about ¼d per lb; to day the market has been quieter, and some little reaction has taken place, but quotations are generally fully ¼d higher than those of last week. Sea Island has been in good request, and the better kinds of Island and Florida are fully 1d per lb dearer. The quotations are now given separately for Island and Florida cotton, and stained is no longer quoted. American has been in active request, and after advancing ¼d to ⅜d per lb, has slightly receded, and is quoted $\frac{3}{16}$d per lb higher than last week. New York advices to the 25th instant quote middling Upland 15½ cents costing to sell in Liverpool 8¼d per lb by steamer. In Brazil the business continues moderate, and it is without material change in value. Egyptian has again been in good request, and the current qualities have advanced ¼d per lb. In East Indian a good business has been done, the trade having been free buyers during the last few days, and exporters having operated to a fair extent in the lower qualities, and prices are generally ¼d per lb higher. Bengal and Scinde show no quotable change.

In cotton "to arrive" the business has been considerable. The latest quotations are—American, basis of middling, from any port, December shipment, $8\frac{1}{16}$d; December-January, 8d. Mobile, ship named, 8⅛d; January-February shipment, 8⅛d; ship named, not sailed, 8⅛d; Texas, ship named, 8¼d; New Orleans, ship named, 8¼d; December shipment, 8¼d; Dholerah, fair merchants, Canal, January-February shipment, 6½d; Oomrawuttee, fair new merchants, Canal or Overland, February-March shipment, 6⅝d; Bengal, fair new merchants, Cape, December shipment, 5¾d per lb.

The sales of the week, including forwarded, amount to 94,950 bales, of which 7,920 are on speculation, and 18,950 declared for export, leaving 68,080 bales to the trade.

The actual export this week amounts to 12,162 bales, consisting of 6,030 American, 110 Brazil, 78 Egyptian, 57 West India, and 5,887 East India, of which 11,842 bales only are deducted from the stock, in order to adjust the export within the annual circular.

JAN. 27.—The sales to-day will probably amount to about 12,000 bales, with a quiet market.

304350	565880	226410	243490

The above figures show :—

	bales.
An increase of import compared with the same date last year of	224.120
An increase of quantity taken for consumption of	17.080
A decrease of actual exports of	18.050
An increase of stock of	263.530

In speculation there is a decrease of 38.530 bales. The imports this week have amounted to 73,303 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to January 21) is 336,000 bales. The actual exports have been 12,162 bales.

LONDON—JANUARY 26.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

In the early part of the week the market was quiet, but the demand increased on Wednesday, and still continues at prices about ⅛d per lb higher than last Friday's quotations. At this advance considerable sales of Bengal afloat have also been made.

NEW YORK.—JANUARY 13.

Buyers still rather lack confidence, and do not operate with much general freedom, but the tone of the market is a little more steady at full former figures, and business has increased somewhat. The rather easier feeling on ocean freights lately has enabled exporters to work to greater advantage, and the demand from domestic spinners noted in our last has to-day developed into quite a large business, though all purchases were said to be based entirely upon actual wants. We quote as follows :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c

Good middling	16 ...	16½ ...	16½ ...	16¾ ...

The demand for future delivery has not amounted to much, buyers still entertaining fears of the Liverpool market, in view of the large accumulation of supplies there and the very evident weakness of the position, the more so that the Bombay cotton is commencing to move, and will soon begin to add to the stocks. Sellers, however, have refrained from urging business, and former prices are retained on most months. Receipts at New York since Friday night, 26,544 bales. Total receipts since September 1, 1870-71, 532,547 bales; ditto for the same time of 1869-70, 372,225 bales. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year :—Receipts at cotton ports since Sept. 1, 1870 :—New Orleans, 592,383 bales; Mobile, 208,013; Charleston, 214,913; Savannah, 437,894; Memphis, 104,331; Galveston, 57,548; Wilmington, 52,316; Norfolk, 151,311; other ports, 20,321—total, 1,839,030 bales. Foreign exports at Southern ports and New York since Sept. 1, 1870 :—New Orleans, 357,359 bales; Mobile, 109,345; Charleston, 72,563; Savannah, 203,157; Galveston, 24,876; New York, 292,700; other ports, 13,821—total, 1,073,821 bales. Stocks at principal ports :—New Orleans, 214,126 bales; Mobile, 54,622; Charleston, 36,489; Savannah, 80,335; Galveston, 58,458; Norfolk, 8,310; New York, 83,000; Boston, 6,000—total, 541,376 bales.

NEW YORK, Jan. 21.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 147,000 bales, and since the 1st of September, 2,048,000 bales. Shipments to England, 89,000 bales; to France, none; and to the continent, 31,000 bales. Total since the 1st of September, 1,223,000 bales; stock at all ports, 550,000 bales. Middling Upland, 7⅞d, cost and freight, per steamer.

NEW YORK, Jan. 24.—The receipts of cotton at all American ports during the last four days have been 68,000 bales. Exports to Great Britain, 38,000 bales; and to the continent, 14,000 bales.

NEW YORK, Jan. 25.—To-day's receipts of cotton at all United States ports amount to 27,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, JAN. 26.—Our market during the week has been quiet in tone, with only a very small business. Prices however have remained remarkably firm, and on the announcement being made yesterday of proposals for the capitulation of Paris, prices for both yarns and cloth were advanced; but no response was made to this, and to-day both the Liverpool cotton market and our own are again quiet, and a very limited business doing at Tuesday's rates. The chief business of the week has been in goods and yarns for quick delivery, and in all these cases full prices were paid. Few contracts for forward delivery were entered into, as buyers would only operate at a concession in price, and this producers were enabled to resist, owing to their already deep engagements. The market at the close is quiet but steady.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Producers continue to ask ⅛d to ¼d per lb advance on Tuesday's current rates, and as buyers do not respond, the actual business of the past two days has been exceedingly limited.

BRADFORD.—A hopeful feeling prevails in the wool market, and a fair amount of business is doing for immediate consumption. Good wethers and wether-matchings are most in request, and there is rather more disposition to operate in hogs. Prices are extremely firm, very good and scarce wethers having a hardening tendency. Bright-haired wools are neglected. Noils are in less request, though a fair amount of business is still doing in brokes which command rather better rates. The lower description of wools do not sell so readily as they did. In the yarn market there is good inquiry, both for export and home, but the higer rates, consequent on dearer wool, tend in many cases to prevent business. The same feature characterises the piece market.

LEEDS.—The markets in the cloth-halls were rather better attended. The quantity of goods sold, though not large, would bear favourable comparison with that of any late market. Of meltons, coatings, and tweeds, moderate selections were made, and for plain goods there was a fair sale. Prices showed no change.

NOTTINGHAM.—There continues to be an average amount of business doing in the lace trade. For good silk there is a tolerable demand at late rates, inferior qualities being dull of sale. Business in the hosiery trade continues healthy. The home demand is still active, and some good shipping orders are in course of execution, the operatives generally being well employed at good wages. The value of hosiery yarns is unaltered.

BELFAST.—Flax supplies, though in excess of those offerep last week, were not extensive; an active demand prevailed, and advanced rates in some instances were realised. Yarns—Demand continues to improve, and sales have been effected in almost all descriptions. Stocks have decreased. Prices tend upward. Linens, brown handloom.—Demand steady for approved makes of light linens for bleaching. Power-loom—Demand moderate for heavy linens and diapers; stocks not extensive; rates steady. Bleached and finished linens—The home trade is very healthy; buyers have invested with increased freedom. Stocks stationary; rates unaltered.

WOLVERHAMPTON.—The news of the capitulation of Paris has come at a time when new orders are more needed than they have been at any time in the past several months. In 1870 orders were generally getting closely worked up, and the specifications resulting from the orders given out at the quarterly meetings have not yet arrived in a sensible degree. Consumers of ore and pig-iron are still in the market for certain qualities, and sales are being reported. The tin-plate working firms hereabouts will be the first affected by peace.

CARDIFF.—The steam-coal collieries of the district continue on about two-thirds time, the principal sources of demand being the Eastern markets, Italy, Spain, the West Indies, and South American stations. French purchasers show no increase. There is no change to report in quotations. The demand for railway iron has not improved, but makers have confidence that there will shortly be a renewal of purchases. In other descriptions of iron there is no alteration.

BIRMINGHAM.—The attendance and the business transacted were below the average. The general condition of the South Staffordshire iron trade just now is described as very quiet. Mills and forges are not making on the average quite four days a week. Nail rods are in rather brisk request, in consequence of the activity which has recently manifested itself in Worcestershire nail trade. Pig iron continues in good request, and steady at the 2s 6d advance established at quarter-day. Present quotations are:—Common forge cinder, &c., 2*l* 12s 6d to 3*l* 2s 6d; mine pigs, 3*l* 12s 6d to 3*l* 17s 6d; hydrates, 3*l* 15s to 4*l* 5s; foundry, common, 2*l* 17s 6d to 3*l* 7s 6d; ditto, best, 3*l* 12s 6d to 4*l* 2s 6d.

DUNDEE.—The upward tendency in our flax market continues, and there has again been a considerable amount of business doing in goods on the spot at full prices, while holders seem more inclined to insist on a farther advance than to sell at current rates, which are still barely equivalent to the advance which has taken place in the foreign markets. Tows continue in fair demand, and prices of medium qualities are well maintained; in the finer descriptions there is comparatively little doing. Jute continues very firm, and the tendency of prices is still upwards. The yarn market continues very firm, and spinners of flax and tow yarns require higher prices, in consequence of the advance in flax goods. Jute yarns are in steady demand at full rates. The demand for linens continues good. Hessians are in rather less active request, but manufacturers are still fully employed with the execution of previous orders.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 13.—The market opened firmer and fairly active for speculation, consumption, and export, at steady prices on family grades, and 5 to 10 cents dearer on low grades. Extra State to buy quotable within the range of $6.25 to $6.50, with buyers at $6.25 to $6.30 for fair to good. Superfine and No. 2 were active for export. Southern St Louis and Southern Illinois very firm, with moderately fair trade. The market closed very firm but quiet. The wheat market has been firm, and a fair business has been done. Sales at $1.47½ to $1.48 for No. 2 new spring, $1.49 for new No. 1 spring afloat, closing with sales at $1.45 in store for No. 2 spring; $1.52½ for amber winter, $1.53 for white Western, $1.37 for mixed spring. The corn market has ruled quiet; sales at 79c to 79½c to 80c for new Western mixed; 80c to 81c for Western high mixed to yellow; 81c for Jersey; Southern white nominal at 93c. Western white at 82c to 83c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The corn trade opened quietly, but with a firm tone on Monday last, when full prices were demanded and paid for all dry samples of English wheat. An occasional advance of 1s per quarter was realised on really choice samples, and there was no disposition on the part of holders to force sales. To-day the news of the capitulation of Paris created considerable excitement, as it is believed that large shipments on French account will immediately follow. Considerable purchases of wheat and flour were effected, and a further rise of 1s per quarter took place in the value of wheat. The supply of English produce on sale was not large, and the transactions were accordingly restricted. Foreign wheat changed hands to a fair extent at a similar improvement. The attendance of millers has been thin throughout the week, and the condition of the samples has been much affected by the unfavourable weather. To-day the return of frost had the usual influence upon prices in creating additional firmness; and holders look forward with confidence to a brisk demand should the capitulation be followed by proposals for peace. An important feature in the market has been the large demand for flour. Sacks are 6d to 1s dearer, and barrels, which have been largely in request for export, have advanced 1s.

Grinding barley may be quoted 6d dearer on the week, but malting is unchanged in value. Oats are 6d to 1s, and maize is 1s per quarter dearer. Beans and peas have been held at extreme rates. Rapeseed is 1s to 2s dearer on the week.

Mr Geo. Dornbusch thus reports the state of the floating grain trade:—During the last eight days 50 grain and seed-laden vessels have arrived at ports of call, viz.—26 wheat, 7 maize, 1 barley, 4 rye, 3 beans, 4 linseed, 1 rapeseed, 1 cotton-seed, 1 oilcake, 2 locust beans. The floating grain trade opened quiet, but mid-week prices of most articles assumed an upward tendency. To-day the reported capitulation of Paris caused a general advance in prices. Wheat was at first wanting in activity, but later more inclination was shown to operate—the enhanced prices asked, 1s to 2s, kept buyers at a distance. Maize—The small quantity offering off the coast limited business, and encouraged buyers to offer an advance of 6d upon last week's rates. In cargoes on passage some business has been done at an advance of 6d to 1s on the week. Barley—Arrived cargoes are quoted 6d to 1s dearer. A large business has been done in corn on passage at an advance of 6d upon late rates. Rye—No arrived cargoes offering, and demand steady at about late prices. In cargoes on passage the business done has been at improved rates. Beans—An arrived cargo has sold at about late prices. Oats—Arrived cargoes none offering; some business has been done in cargoes on passage and for shipment at enhanced rates. The reported sales are as follows:—Wheat—7 arrived cargoes: new Rostoff Ghirka, 48s 6d; new Ghirka and Taganrog, 48s 10½d; new Ghirka and Odessa, 51s; Ghirka and Odessa,

50s 6d; Ghirka and Nicolaiff, 50s to 50s 9d per 492 lbs. To arrive, 2 cargoes: Odessa Ghirka, 50s to 52s per 492 lbs. Maize—8 arrived cargoes: Odessa, 32s to 34s 6d; Galatz, 34s 6d; Galatz and Constantinople, 34s 7d; Danubian and Sulina, 34s; Moldavian and Sulina, 34s 6d per 492 lbs. To arrive, 7 cargoes: Odessa, 33s to 34s; Danubian, 34s; Foxanian, 34s per 492 lbs. Barley—4 arrived cagoes: Berdianski, 27s 3d; new Azow, 27s 6d to 28s; Azow, 27s 4½d per 400 lbs. To arrive, 11 cargoes: Odessa, 26s 6d to 27s; Azow, 26s 6d; new Taganrog and Constantinople, 26s 6d; Danubian and Ibrail, 26s 9d; Danubian and Kustendjie, 26s 6d per 400 lbs. Rye—To arrive, 2 cargoes: Odessa, 34s 9d; Danubian, 33s 9d per 480 lbs. Oats—1 arrived cargo black and Prince Edward's Island, 22s. To arrive, 3 cargoes: Black and Prince Edward's Island, 22s 6d to 22s 9d per 304 lbs net; Orel and Riga, 17s 6d per 304 lbs net. Beans—1 arrived cargo Saide, 37s 6d per 480 lbs. Linseed to arrive 6d dearer; spot firm. The sales are—3 arrived cargoes: Azow, 58s 6d to 59s 3d per 424 lbs. Arrived in London several hundred tons Calcutta, 59s to 59s 3d per 410 lbs. On passage, 150 tons ordinary brown and Calcutta, 60s 6d per 410 lbs; Black Sea and Odessa, 3,000 quarters, 59s; Odessa, 2,400 quarters, 59s 6d per 424 lbs. Shipped or to be shipped, 250 tons East India and Calcutta, 59s 3d per 410 lbs. To be shipped, Azow, 9,000 quarters, 60s per 424 lbs. Rapeseed 3d to 6d dearer. The sales are—arrived in London 150 tons ordinary brown and Calcutta, 66s 3d for 416 lbs. To arrive: 1,100 tons yellow mixed and Calcutta, 72s 6d to 73s 3d per 416 lbs; 700 tons ordinary brown and Calcutta, 67s 6d per 416 lbs; 100 tons secondary brown, 66s 6d per 416 lbs; 2,000 quarters Wild Azow, 36s per 424 lbs. Cotton-seed steady. The sales are—to arrive: 900 to 1,000 tons Egyptian, 9l 2s 6d per ton.

We have been requested to publish the following:—A meeting of the General Committee of the French Peasant Farmers' Seed Fund will be held at the Salisbury Hotel, Fleet street, on Monday, the 30th inst., to receive a report from the Executive Committee as to the progress already made in the collection of donations for supplying seed-corn and other seeds to the ruined French peasants, thus enabling them to sow their land and prevent famine following in the train of war. Among other matters which will occupy the consideration of the meeting is the question—whether an English representative shall be sent to the impoverished districts to aid in the proper distribution of the seed, and to furnish any information that may appear valuable for the guidance of the Committee in London. The object of this fund differs from that of others which provide relief for immediate wants, for it will enable the small peasant to sow his land, and thus provide in some measure for the future.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market remains flat, but is so barely supplied that quotations generally have not experienced any change during the week. Sales could not be effected unless at some reduction, and this has been accepted for a few small parcels of grainy Demerara, fine qualities selling fully 1s to 1s 6d per cwt under the highest point attained last week. Fine grey and yellow realised 37s 6d to 38s by auction. Total sales of West India to yesterday, including the above, 140 casks. 1,129 bags grocery Barbadoes sold at 30s 6d to 33s. A parcel Madras Jaggery went rather cheaper. Porto Rico has sold below the extreme rates lately demanded. Nothing of interest has transpired in other descriptions. Refined stove goods close firmer, and the makers in Holland, &c., will not effect further sales for delivery unless at an advance. The home deliveries still contrast favourably with last year, and the landings are moderate in extent. Present stock in London 64,170 tons, against 77,550 tons last year, and 72,640 tons in 1869.

Mauritius.—There have not been any public sales.

Jaggery.—2,744 bags good quality by auction were taken in, and since sold at 20s per cwt.

Manila.—4,000 bags superior quality clayed sold at 28s.

Other Foreign.—At auction 248 casks Porto Rico part sold. Privately 300 casks, the prices ranging from 32s 6d to 35s 6d. The business to arrive has been chiefly restricted to beet sugar at about 26s 6d to 26s 7½d, f.o.b., on the basis of 88 per cent.

Refined.—Dry goods were dull and lower until yesterday, when the export demand revived, and the home trade have been buying. The result is that prices are nearly up to the top price last quoted, viz., 53s to 55s per cwt for Titlers. Pieces have sold rather more readily.

MOLASSES.—No sales reported in West India. 196 packages Sandwich Island by auction sold at 11s to 12s per cwt.

RUM.—There is a want of animation in the market. A few sales have been made at rather irregular prices. Leewards, &c, 1s 8½d to 1s 9d; common, 1s 7d; Demerara, 2s to 2s 2d; Berbice, 1s 11d per proof gallon; and some Jamaica at prices which do not transpire.

COCOA.—Some business has been done privately, partly for exportation. Trinidad remains steady in price. Fine Guayaquil, 53s per cwt. The deliveries have rather improved, but the total stock is still large, being 40,049 pkgs, against 24,970 last year, and 22,490 bags in 1869. Upon foreign the increase is most apparent.

TEA.—The market continues well supplied from recent arrivals. Medium to good grades of Congou red and black leaf remain steady, but the low qualities of the former are heavy, and have sold at reduced rates. There has been a moderate demand for Indian growths, and prices generally are hardly so firm as at the beginning of the year. The public sales this week consisted of 6,000 packages, of which about 2,500 were disposed of previously, the kinds most in request being Souchongs and medium broken teas with quality, prices for the latter sorts showing fully 1d per lb advance. Pekoes, on the other hand, with the exception of a few fine parcels, were quite neglected. The auctions passed heavily, and nearly 3,000 packages had to be withdrawn in the absence of offers, teas of inferior quality being quite unsaleable.

COFFEE.—There has been a good demand, and the moderate quantities brought forward have chiefly found buyers, the market yesterday being very strong. Plantation Ceylon by auction has gone 1s to 2s dearer in many cases. 1,078 casks 77 barrels 1,083 bags sold readily as follows; also a few parcels by private contract: grey, 58s to 67s; b ld, 68s to 71s; colory, small berry and low middling to good, 60s to 73s; fine and bold, 74s to 83s 6d. Native is 1s higher. 102 bags by auction all sold as follows: good ordinary mixed, 55s to 55s 6d; good, 56s 6d to 57s. 102 casks bold Ouvah, 59s 6d to 60s. About 2,000 bags are reported sold for arrival at 55s to 55s 6d. 39 barrels and casks Jamaica sold as follows: middling pale to colory, 63s to 72s; fine ordinary to low middling, 58s to 60s 6d. Some parcels ordinary have sold privately. 95 packages Mocha were chiefly taken in. A few lots very low quality sold at 71s. 454 cases Naidenbarum sold at 69s to 72s, and good at 80s to 80s 6d 118 bags Rio were partly disposed of at 58s. 691 bags Guatemala sold at 59s 6d to 60s 6d. 63 bags Natal at 60s 6d to 66s per cwt. The landings last week were 1,200 tons, and the deliveries did not exceed 710 tons, leaving the stock at the close 25,270 tons, against 22,720 last year, and 18,320 tons in 1869.

RICE.—Prices are rather higher, and there is more inquiry generally. About 40,000 bags were reported sold on the spot to yesterday, including middling to fine: white Bengal at 9s 6d to 13s 3d; Rangoon at 9s 6d to 10s 1½d. 200 tons Balam at 10s 3d to 11s ex quay. 400 tons As-Koolie at 10s 6d ex ship. A floating cargo of

Necrancie Arracan sold at 10s 6d open charter. At auction 1,398 bags from the Cape, sold at 9s 9d to 10s per cwt for Rangoon and Arracan.

SAGO.—At auction 1,730 bags small grain sold at 6d advance: common to good, 16s 6d to 17s 6d. Some parcels sold privately at 17s to 17s 6d; bold, 18s 6d to 19s. 60 tons small afloat at 17s 6d per cwt landed.

SAGO FLOUR.—The last sale made was at 15s per cwt.

TAPIOCA.—A large business has been done, at prices ranging from 1¾d to 2½d for Singapore and Penang, including part of 802 bags by auction. There are rather higher rates.

PEARL TAPIOCA.—335 bags by auction sold at 16s 6d to 19s for small and medium, and 17s 6d to 18s per cwt for very bold grain.

SPICES.—Black continues firm. Further business has been done for arrival in Pena g at 5⅜d, and a large quantity just arrived off the coast sold at 5⅜d to 5¾d. The same price paid on the spot, and refused for 554 bags by auction yesterday. Singapore on the spot sold at 6⅛d; to arrive, per steamer, at 6d. White pepper is again slightly dearer. Singapore sold privately at 7⅜d; Penang, 7½d. 516 bags of the former by auction obtained 7⅜d to 7⅝d, and fine bold, 7¾d to 7⅞d. 107 cases Penang nutmegs were chiefly taken in, there being less demand than of late. A few cases sold: 80's at 2s 7d. 5 cases middling Penang mace at 3s 6d. 145 bags Pimento sold at 2d to 2⅛d. The market is less freely supplied. 10 cases good Penang cloves sold at 1s 1d to 1s 2d. 20 bags Amboyna at 4½d per lb. A large arrival of Zanzibar. 88 bales Ceylon cinnamon sold at last sales' prices for good to fine qualities. 31 bales spurious withdrawn. 120 bags bark sold at 2½d per lb. 100 cases Cassia from Calcutta at 42s to 43s. 45 cases Cochin ginger partly sold at 35s per cwt for small and wormy.

SALTPETRE.—The market is firm, but rather quiet. A small parcel of fine Bengal on the spot sold at 30s 6d, refraction 5¼ to 4¾. About 400 tons reported for arrival at 29s to 30s 3d per cwt according to date of sailing. Present stock 2,264 tons, against 4,190 tons last year, 3,810 tons in 1869, 7,650 tons and 10,460 tons in 1868 and 1867 respectively at the same date.

SHELLAC.—A steady demand prevails. 802 chests by auction about half sold: orange, 125s to 135s; liver and native orange, 120s to 125s; common button, 5*l*; fine garnet, 5*l* 17s 6d per cwt.

DRYSALTERY GOODS.—Turmeric is quiet. Bengal by auction was taken in at 20s 6d for a small parcel. A few lots of Madras sold at 21s 6d to 24s 6d. There is a limited demand for Gambier. 700 bales were taken in at 15s 9d to 16s. To arrive 15s 1½d to 15s 3d paid. 320 boxes cutch were bought in at 22s 6d, which is the nearest value of good q ality. Several parcels myrabolanes sold at 11s 6d to 15s 9d per cwt. 117 chests lac dye were chiefly taken in. A few lots superior sold at 2s per lb. 120 bales safflower partly found buyers at full rates: low to good, 7*l* to 14*l*; fine, 15*l* 10d to 15*l* 12s 6d per cwt.

SHELLS.—Manila Mother o' Pearl have been sold at some reduction on late nominal rates, viz., 7*l* 10s for good. A few parcels of Bombay sold upon former terms: mixed and wormy, 3*l* 19s to 5*l* 15s; bold, 6*l* 2s 6d to 6*l* 18s per cwt.

METALS.—During the last two days there has been rather more business done in some descriptions, but the markets generally have a quiet appearance. There is a better demand for copper at some recovery on last week's quotations, especially as regards Chili, which has sold at 65*l* to 66*l* 5s; Walaroo, 73*l* to 74*l*. British firmer in price and more doing. Foreign tin is dull: Straits, 134*l*; to arrive, 130*l* to 132*l*. English 2*l* lower. Tin plates continue in demand. No change can be quoted in railway or bar iron, the market being rather quiet. Scotch pig is also inactive at 51s 6d to 51s 7d cash, 51s 10d one month. Spelter attracts rather more attention. Several contracts have been made for forward delivery: Silesian, 17*l* 10s to 17*l* 17s 6d; Belgian, &c., 17*l* 5s to 17*l* 10s. On the spot Silesian sold at 18*l* 5s. Lead continues dull: English, 18*l* per ton.

HEMP.—At the public sales 78 tons Russian were chiefly taken in: Petersburg clean, 35*l*. By private contract a few sales of Manila are reported on former terms, including some good roping at 53*l* 10s, and some Sunn hemp at 18*l* 10s to 23*l* 10s per ton.

JUTE.—The market is firm, and the state of trade in Dundee satisfactory. Rather higher rates have in some instances been obtained for parcels afloat, the sales including common to fine marks at 18*l* 17s 6d to 25*l*. 3,593 bales by auction on Wednesday about half sold at 19*l* to 25*l* per ton, being 5s to 10s per ton advance.

LINSEED.—There has been a good demand this week. Calcutta, 59s 3d to 59s 6d; to arrive, 60s 6d. Black Sea off the coast, 58s 9d to 59s and a large business at 60s for spring shipments.

OILS.—The last sales of sperm were at 80*l* 10s per tun. There is still a demand, but holders will not sell. Common qualities of fish oil firm. Olive firm; the better kinds quoted 48*l* to 49*l*, and common 46*l* to 47*l* 10s per tun. A steady inquiry prevails for palm. Low to fine quality 32*l* 10s to 38*l* 10s. Cocoa-nut oil is firm, with buyers of Ceylon at 38*l* 10s, and sellers now asking 39*l*. An inquiry has been experienced for arrival at 39*l* 5s. The ordinary qualities of Cochin cocoa-nut have been in demand, with sales of some extent at 42*l* 15s to 43*l*. Fine scarce, and relatively high. The market for linseed is quiet at 30*l* to 30*l* 5s, and forward deliveries at 31*l* to 32*l*. English brown rape is rather dearer, viz., 47*l* on the spot and to April. For the last four months business at 45*l*. English refined quoted 49*l* to 49*l* 10s. Foreign firm at 50*l* to 51*l* 10s per ton as in quality.

PETROLEUM quiet, at 1s 6d to 1s 6½d per gallon.

TURPENTINE.—French spirits, 36s. American, 36s 6d per cwt, with small sales.

HIDES.—The sales of East India, comprising 208,376 hides, went off at previous quotations, rather more than three-fourths being sold. 9,017 tanned ditto also found buyers. 5,252 buffalo hides about half sold, and met a good demand at full prices.

TALLOW.—The changes in the prices of Russian during the week have been unimportant. Deliveries continue good, and the market is now steady. Petersburg, 45s 6d: March, 45s 9d to 46s; June the same; October to December, 46s 6d per cwt. The public sales of Australian declared for to-day are again large. Particulars will be given in the Postscript.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—There was less pressure to sell. West India closes rather dearer. Sales 257 casks; for the week 383 casks. At auction 1,000 bags Bengal were taken in above the value. Business reported in unclayed Manila, of which particulars do not transpire. The refined market is again higher for dry goods.

COFFEE.—1,344 casks 156 barrels 908 bags plantation Ceylon coffee chiefly sold, and without any material alteration in prices.

TEA.—Public sales were held this morning comprising about 3,000 packages, when prices went in favour of the buyers.

PEPPER.—Further business was done in Penang at 5¾d, and on the spot at 5⅛d per lb.

SALTPETRE.—125 tons Bengal sold to arrive at 29s 3d to 29s 6d. A parcel on the spot, refraction 5¼, at 30s 3d per cwt.

DRYSALTERY GOODS.—500 bales Gambier were taken in at 15s 3d to 15s 6d; 1,000 boxes cutch at 23s; 1,236 bags Bengal turmeric at 21s 6d; and 74 bbls Bengal safflower at 8*l* 10s to 14*l* per cwt.

OIL.—219 casks Ceylon cocoa-nut by auction sold at 39s to 39s 9d; 535 casks palm partly sold at 31s to 38s 3d.

TALLOW.—Of 2,129 casks Australian by auction about 1,600 casks sold: sheep, 43s to 44s 9d, being firmer rates. Beef, at 36s to 42s 6d, was lower. 316 casks South American part sold at lower rates in some cases: beef, 43s to 43s 3d; sheep, 40s to 43s 6d per cwt. Town unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market opened quiet, at 2s decline, but has since recovered the same. Dutch very firm, at 9d advance for present and forward delivery.

DRY FRUIT.—Currants are, for middle qualities, rather lower, and for lowest sorts unaltered in value. Fine samples are scarce, and parcels as they offer are taken at former prices by the trade. The deliveries continue good, and there are no arrivals to fill up the decreasing stocks. The country trade is being done chiefly by Liverpool houses, where fruit is cheaper than in London. Raisins are dull, and other fruits show no alteration.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states tha the supply of oranges from Azores and Spain being limited, prices are well sustained. Seville sours scarce; further arrivals expected. The crop of Messina lemons is short, with improvement of price for any of good quality. Barcelona nuts higher. Black Spanish selling freely. Brazil in good demand.

ENGLISH WOOL.—A good steady demand for all sorts, especially deep grown wools.

COLONIAL WOOL.—Prices firm. First series of colonial wool sales commenced 2nd February, for which 66,000 fresh arrivals are to hand.

SEEDS.—The seed trade continues inactive, and quotations are unaltered.

FLAX.—Market firm.

HEMP.—Market quiet and very little doing.

SILK.—Market very firm for Tsatlee-reel Cantons. Business done in market No. 1, 16s 9d to 17s 3d.

TOBACCO.—The tobacco market during the past week has been devoid of any particular interest. For American growths there has been only a limited inquiry, buyers being unwilling to operate largely. Prices continue without alteration. For continental growths as well as substitutes, also segar descriptions, there has been more demand, and some transactions of an extensive nature are now pending.

LEATHER.—During the past week there has been an improved demand for most descriptions of leather. On Tuesday, at Leadenhall, the supply of fresh goods was very limited, but a fair amount of business was transacted at about late prices. Light crop hides, light English butts, light dressing and shaved hides, English and foreign bellies, calfskin and English horse hides, continue scarce and in request.

METALS.—Business is rather sluggish, although the appearances in respect to the war are rather more favourable. Copper is rather more firmly held, and some kinds are commanding improved prices. Iron is steady. Tin is barely so buoyant, the business of the week having been very small. Spelter is neglected. Lead is in steady demand. Tin plates command a ready sale, at improved prices.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	46	6
Fat by ditto	2	2
Yellow Russian ditto	46	6
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 1,221 casks.

PROVISIONS.

Great uneasiness in the bacon market has been caused by the rumoured capitulation of Paris. Prices which fluctuated in the middle of the week subsided yesterday to a rise of 1s on sizeable, and 2s on heavy. Consumption good. Fine butter, of which there is very little, realises fabulous prices. No arrival of Friesland.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 23.—The total imports of foreign stock into London last week amounted to 2,047 head. In the corresponding week in 1870 we received 6,009; in 1869, 2,039; in 1868, 1,573; and in 1867, 6,923 head.

The cattle trade to-day has been in a quiet state notwithstanding the shortness of the supplies; prices, however, have been maintained. As re-

gards beasts, the receipts have again been only moderate, owing to the few foreigners present. The inquiry has been limited, but prices have been unchanged. For the best Scots and crosses 5s 10d to 6s per 8 lbs has been paid. The show of sheep has been small. The demand has been inactive, at late rates. The best Downs and half-breds have changed hands at 5s 10d to 6s per 8 lbs. Calves have been quiet, and there has been but little inquiry for pigs.

SUPPLIES ON SALE.

	Jan. 24, 1870.	Jan. 23, 1871
Beasts	3,533	2,390
Sheep	19,585	10,740
Calves	148	22
Pigs	130	60

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d		s	d		s	d		s	d
Inferior beef	3	4	to	4	0	Inferior mutton	3	4	to	4	0
Middling ditto	4	0		4	8	Middling ditto	4	4		4	10
Prime large ditto	4	8		5	0	Prime ditto	5	0		5	2
Prime small ditto	5	0		5	4	Large pork	3	0		4	0
Veal	5	4		5	8	Small pork	4	4		5	0

HOP MARKET.

BOROUGH, Friday, January 27.—Considerable activity continues to prevail in this market. Owing to the low figure at which English hops are offered the business doing is extensive, and prices throughout ruled firm. Mid and East Kents, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, January 27.—These markets have been moderately supplied with potatoes. The trade has been quiet, at our quotations. English Regents, 75s to 95s; Scotch Regents, 75s to 100s; and Rocks, 65s to 80s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 27.—The East India sales, in progress since Tuesday last, have gone off with spirit at an average advance of about 1d per lb on last October sale-rates. The home trade are the only buyers, as neither French nor Germans have attended this series.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Jan. 27.—At this market to-day there has been a good demand for red wheat at 1d per cental advance on the quotations of Tuesday. Flour sold at an improvement of 1s per sack and 6d per barrel. Barley and beans very firm. Peas held for 1s per quarter advance. Oats and oatmeal quiet. Indian corn a fair business done at 6d per quarter advance.

WAKEFIELD, Friday, Jan. 27.—Owing to the prospect of an early termination of the war, the wheat trade has assumed a firmer tone, and prices are noted 1s to 2s per quarter dearer than last Friday. The demand was chiefly for fresh reds. Barley has a steady sale. Beans and oats are rather dearer.

The Gazette.

TUESDAY, January 24.

BANKRUPTS.

Albert Adolphus Armstrong, Upper Baker street, Portman square, and Park place, Regent's park, surgeon dentist.
Charles Coney, Great Cambridge street, Hackney road, boot maker.
William Durrocb, St Thomas street, Southwark, surgical instrument maker.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

TEETH.—MR WEBB (MANY years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 502, improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with greater efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the laughing gas being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
64 LUDGATE CITY, and
56 HARLEY ST., CAVENDISH SQ., } London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 5s.

SPANISH FLY IS THE ACTING ingredient in ALEX. ROSS'S CANTHARIDES OIL, which speedily produces Whiskers and thickens Hair. 3s 6d, sent by post for 54 stamps.—ALEX. ROSS, 248 High Holborn, London, and all Chemists.

HAIR-CURLING FLUID, 248 HIGH Holborn, London.—ALEX. ROSS'S CURLING FLUID curls Ladies' or Gentlemans' Hair immediately it is applied. Sold at 3s 6d, sent free for 54 stamps. Had of all Chemists.

GREY HAIR, 248 HIGH HOLBORN, London.—ALEX. ROSS'S HAIR DYE produces a perfect colour immediately it is used. It is permanent, and perfectly natural in effect. Price 3s 6d, sent by post for 54 stamps; and all Chemists.

HAIR DESTROYER.—248 HIGH Holborn, London.—ALEX. ROSS'S DEPILATORY removes superfluous hair from the face, neck, and arms, without effect to the skin. Price 3s 6d, sent for 54 stamps. Had of all Chemists.

HAIR COLOUR WASH.—BY damping the head with this beautifully perfumed Wash, in two days the hair assumes it original colour, and remains so by an occasional using. 10s 6d, sent for stamps. ALEX. ROSS, 248 High Holborn, London, and all Chemists.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

KINAHAN'S LL WHISKY.

This celebrated and most delicious old mellow spirit is the very
CREAM OF IRISH WHISKIES,
in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy. Note the red seal, pink label, and cork branded
"KINAHAN'S LL WHISKY."
New Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY, BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

WILLIAM S. BURTON, Furnishing Ironmonger by appointment, to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled stock, with lists of prices and plans of the 20 large show rooms, post free. 39 Oxford street, W.; 1, 1A, 2, 3, and 4 Newman street; 4, 5, and 6 Perry's place, and 1 Newman yard. The cost of delivering goods to the most distant parts of the United Kingdom by railway is trifling. William S. Burton will always undertake delivery at a small fixed rate.

ISSUE OF £500 000 STERLING 6 PER CENT. MORTGAGE BONDS OF THE

CAMDEN AND AMBOY RAILROAD

AND TRANSPORTATION, DELAWARE AND RARITAN CANAL, AND NEW JERSEY RAILROAD AND TRANSPORTATION COMPANIES, Forming the UNITED CANAL AND RAILROAD COMPANIES OF NEW JERSEY.

In Bonds to Bearer of £200 Sterling each, at the Price of 92 per cent., or £184 per Bond.

The repayment of the Bonds at par (£200) in 1894 is secured, in addition to the Mortgage, by the establishment of an Annual Sinking Fund, to be paid by the Companies to, and accumulated by, the "Fidelity Insurance Trust and Safe Deposit Company of Philadelphia."

Principal and Interest payable in Sterling Money in London, free from any Federal or State Tax.

Messrs J. S. MORGAN and CO. offer for public subscription the above Mortgage Bonds of the United Canal and Railroad Companies of New Jersey, at the price of £184 per £200 Bond, payable by instalments, as under:—

£10	per £200 Bond	on	Application.
£40	—	—	Allotment.
£40	—	—	1st March, 1871.
£50	—	—	1st April, 1871.
£44	—	—	1st May, 1871.
£184			

Subscribers may pay the full amount in advance on allotment or on any of the above-mentioned days, and upon such payments discount at the rate of £4 per cent. per annum will be allowed. In case default be made in payment on allotment, or of any of the instalments on the days named, the allotment will be liable to be cancelled, and the amounts then already paid forfeited. Upon payment of the allotment money, Scrip Certificates to Bearer will be issued to the Subscribers, which will be exchanged for the Bonds, as soon as possible after payment of the whole amount of the subscription.

The United Canal and Railroad Companies of New Jersey, upon whose Mortgage Security the above Bonds are issued, consist of "The Camden and Amboy Railroad and Transportation Company," "The Delaware and Raritan Canal Company," and "The New Jersey Railroad and Transportation Company," who, by agreement between themselves, under authority of the Legislature of New Jersey, have been united into one interest and under one management, by which an end was put to the competition previously existing.

These Railway and Canal Companies form three avenues of traffic between New York, Philadelphia, Baltimore, and Washington, as well as the country south and west. They are amongst the oldest and most successful of all the Railroad Companies of the United States, and have always been conspicuous for their very able and judicious administration.

The paid-up Share Capital of the Companies amounts to 16,550,000 dols, and the entire Bond and Funded debt of the Companies (including the £369,200 sterling Bonds issued in 1869, and the present issue of £500,000), are covered by a Mortgage Security representing 20,000,000 dols, or £4,000,000.

The aggregate gross earnings of the Companies are nearly 8,000,000 dols per annum. The Dividends paid on the Share Capital are 10 per cent. The net earnings heretofore accumulated in excess of profits divided as Dividend are upwards of 1,000,000 dols, which has been expended in the works, and is not represented in the Share or Loan Capital.

It will thus be seen that a very large margin of net income will remain after providing for interest on the Bond debt, together with a Sinking Fund for its redemption, equal to 2 per cent. currency per annum on the amount of the Loan, which will be paid semi-annually to, and accumulated by, the "Fidelity Insurance Trust and Safe Deposit Company of Philadelphia."

It may be mentioned as an evidence of the value attached in the United States to this property, that the Pennsylvania Central Railroad Company has recently offered to lease it in perpetuity, paying, in addition to the interest on the debt, a dividend of 10 per cent. per annum to the holders of the common stock of the Companies. This proposal is now under consideration.

The principal secured by the Bonds is made repayable at par in 1894, and the Coupons for interest, at the rate of £6 per cent. per annum, will be made payable half-yearly, on the 1st September and 1st March in each year; the first half-yearly payment will fall due 1st September next. All payments will be made in London, in sterling money, clear of all taxation in the United States.

Applications to be made to Messrs J. S. Morgan and Co., in the annexed form; but none will be considered unless accompanied by a deposit of £10 per Bond applied for. This deposit will be returned without deduction in the event of no allotment being made.

22 Old Broad street, London, 28th January, 1871.

ISSUE OF £500 000 STERLING 6 PER CENT. MORTGAGE BONDS of the CAMDEN AND AMBOY RAILROAD AND TRANSPORTATION, DELAWARE AND RARITAN CANAL, AND NEW JERSEY RAILROAD AND TRANSPORTATION COMPANIES, forming the UNITED CANAL AND RAILROAD COMPANIES OF NEW JERSEY.

No.———

FORM OF APPLICATION.

To be left with Messrs J. S. Morgan and Co., after payment to them of the Preliminary Deposit.

GENTLEMEN,—Having paid the sum of £ , I hereby request that you will allot me £200 Bonds of the above Loan, and I hereby agree to accept such Bonds, or any smaller number that may be allotted to me, and to pay the further sum due on allotment according to the terms of the prospectus issued by you.—I am, gentlemen, your obedient servant.

To Messrs J. S. Morgan and Co.

Signature .....

Address in full.....

Date .....1871.

Messrs COATES and HANKEY, of 24 Gresham street, London, are authorised to receive applications for 40,000 A Priority Shares in the

PYRAMID RANGE SILVER MOUNTAIN COMPANY (Limited).

Registered under the Companies' Acts, 1862 and 1867.

Capital, £500,000, in 100,000 Shares of £5 each, divided into 60,000 A Priority Shares and 40,000 B Deferred Shares.

Applications are now invited for 40,000 A Priority Shares of £5 each, having priority of dividend over the B Shares up to 20 per cent. per annum.

£1 per Share payable on application, £1 per Share on allotment, and the remaining £3 within 12 months from the allotment. One month's notice to be given before any call is made.

The remaining 20,000 A Priority Shares, and the 40,000 B Deferred Shares are taken in part payment of the purchase money; the vendors are not entitled to receive more than 10,000 of the A Priority Shares, nor any of the B Deferred Shares, until a dividend of not less than 20 per cent. shall be paid on the remaining A Share Capital, and no dividend will be paid on the B Shares, in any year, until a dividend of 20 per cent. shall have been paid on the A Share capital.

All dividends beyond 20 per cent. on the entire capital declared in any year will be applicable to A and B Shares, pro rata.

DIRECTORS.

The Hon. L. G. Agar Ellis, M.P.
William Austin, Esq, Director of the Sambre and Meuse Railway.

PROSPECTUS.

For several years tradition has pointed to the existence of mountains of silver in the neighbourhood of Arizona, in the United States, but until a very recent period their exact position could not be ascertained, in consequence of the district being in the possession of Indians. The submission, however, of the latter, about twelve months since, led to bands of explorers being organised, and the discovery and location by them of ledges of silver ore, unequalled in mining enterprise. Upon the facts being made known, experienced miners repaired to the spot, and in consequence of their reports and statements made by them as to the extent, richness, and value of the ores, the vendors, under whose notice these reports came, forthwith despatched practical and competent persons to investigate the locality, and procure samples from all parts of the mountainous range, the results of which, after being duly tested convinced them that the ledges of ore in sight, in point of magnitude and richness, as well as facility for working, were unequalled, and in point of quantity inexhaustible.

An assay of 40 lbs of ore, consisting of 32 samples, was made by Messrs Riehn, Hemme, and Co., of the California Assay Office, Mr Leopold Kuh, of San Francisco, and the San Francisco Assaying and Refining Works, and gave results varying from 13.01 dols to 4,861.09 dols per ton.

The district was visited in the month of October last by Mr Henry Morgan, of 39, Jermyn street, St James' (in whose intelligence and veracity the Directors place the utmost reliance), who was then travelling in America, and whose attention was directed to these wonderful discoveries. He was accompanied by men of sound practical knowledge, and by Dr Cleveland, of San Francisco, a well-known scientific authority. In the presence of Mr Morgan, and under his personal direction, numerous samples of the ore were taken from all parts of the range and brought by him to England, for the purpose of being assayed. The following are the Certificates of Assay by Messrs Johnson, Matthey, and Co., of Hatton garden, and by the School of Mines, Jermyn street, to whom such samples were submitted by Mr Morgan:—

"Assay Offices and Ore Floors, Nov. 23rd, 1870.

"CERTIFICATE OF ASSAY.

"For H. Morgan, Esq.

"We have examined the samples of minerals marked as under, and find the following to be the result:—

Mark of Sample.

"1. Large. Produce of silver, 134 oz per ton of 20 cwt of ore.

"2. Small. Produce of silver, 119.50 oz per ton of 20 cwt of ore.

"3. Small. Produce of silver, 86 oz per ton of 20 cwt of ore.

"(Signed) JOHNSON, MATTHEY, & CO.

"Metalurgical Laboratory, Royal School of Mines,

"Jermyn street, London, Nov. 26th, 1870.

"SIR,—A sample obtained by breaking off portions "from several lumps of ore from New Mexico has been "assayed according to request, and found to contain "of silver—129 oz 9 dwt 4 grains per ton of "2,240 lbs.

"For DR PERCY,

"Henry Morgan, Esq." "RICHARD SMITH."

As the object was to obtain a fair average assay of the ores taken from all the ledges, Mr Morgan, after consulting with the author ties at the School of Mines, and Messrs Johnson, Matthey, and Co., as to the best means of attaining that end, sent the whole of the samples to Messrs Johnson, Matthey, and Co. with the request that they would break a piece from each, pound them together, and ascertain by every means in their power the commercial value of the ore. The following is the result of the assay of 190 of such specimens:—

"Assay Offices and Ore Floors, Nov. 28th, 1870.

"CERTIFICATE OF ASSAY.

"For Henry Morgan, Esq.

"We have examined the samples of mineral marked "as under, and find the following to be the result:—

"Average sample taken from 190 specimens of mineral.

"2 qrs 20 lbs. Produce of silver, 139.500 oz per ton of 20 cwt.

"JOHNSON, MATTHEY, and CO."

The identity of the samples assayed in England is verified by a statutory declaration, which may be seen at the Offices of the Solicitors.

The account published by Mr Morgan of his visit to the mines, which accompanies the prospectus, furnishes full details of the marvellous character of the properties which this Company has secured, and attention is particularly directed to the plan, illustrating the peculiar fact that the mass of ore which it is intended to work is above ground, and can be seen by any person visiting the spot, and the gross quantity ascertained. The useful scientific examinations to ascertain the contents and probable produce of mines, are not, therefore, in this case necessary.

The vendors were the original owners of two sixth-parts of the property agreed to be sold to this Company, they have expended more than £30,000 in acquiring one other six-part, and are under engagements to pay the sum of £100,000 for the remaining three sixth-parts. They have agreed to make over the whole to the Company for the sum of £400,000, of which £100,000 is required to be paid in cash for the acquisition of the interest above mentioned. A further £100,000 will be paid in A priority shares fully paid-up, one half of which, however, and the remainder of the purchase-money, £200,000, to be paid in B or deferred shares, will not be delivered to the vendors, but will be deposited in the hands of Charles Gilpin, Esq., M.P., and John Morris, Esq., as Trustees, until a dividend of 20 per cent. has been paid on the remaining A share capital. No dividend is to be paid on the B shares in any year until 20 per cent. has been paid on the A share capital; but all profits beyond 20 per cent. per annum on the entire capital will be divided between the A and B shares, in their respective proportions.

The Comstock Mines in the Virginia District, Nevada, which have yielded over 120,000,000 dollars, or £24,000,000 sterling, have for the last nine years crushed and extracted the silver from 1,500 tons of ore per day, even with the disadvantage of the ore being underground, and steam-power being necessary.

The ore of the Ledges belonging to this Company being a soft chloride may be crushed and amalgamated at the rate of 2 tons per diem for each stamp head; and as it is on the surface, there will be no expense for raising, and no fuel nor steam-power is required. The working cost, therefore, will be amply covered by the estimate of £2 per ton per diem.

The supply of ore being inexhaustible, it is proposed to commence with the erection of 125 stamps, equal to the reduction of 250 tons daily, the estimated outlay for which will be £81,000, viz.:—

	£
125 stamps complete, with amalgamators, &c.—say at £400 each	50,000
Tramway, waggons, &c.	14,000
Building, waterwheels, &c.	15,000
Tools and sundries	2,000
	81,000

It is intended to convey the ore to Gila River by means of a tramway, when it will be worked by water power, which is abundant, and no steam-power will be required.

From the assays and calculations above-mentioned, it results that with the working capital which will be at their disposal, the Company will be enabled to crush and extract silver from at least 250 tons of ore per diem. The average assays show more than 200 dols, or £40 per ton, estimating, however, the produce, for the purpose of this calculation, at only 50 dols, or £10, per ton, the daily produce would be	£ 2,500
Deduct for working (including cost of mining, milling, haulage, and other expenses, at £2 per ton	500
The result is, per working day, a net profit of	2,000
On this limited estimate, the net annual revenue, allowing 280 days, would be	560 000

or more than 100 per cent. per annum on the entire capital of the Company.

No time will be lost in the erection of the stamps, buildings, and requisite machinery, and it is confidently expected that within nine months from the formation of the Company, the mines will be in full operation.

An agreement, bearing date the 27th day of January, 1871, has been entered into between Asbury Harpending, Esq., acting on behalf of himself and other persons, of the one part, and Mr Charles Warner, on behalf of the Company of the other part, for the sale and purchase of the property at the price of £400,000, to be paid as to £100,000, in fully paid up A Priority Shares as to £200,000 in fully paid up B Deferred Shares, and as to the remainder, in cash. This agreement, as well as the Title-deeds to the property, the Articles of Association, Certificates of Assays made in England, and the declaration of Mr Morgan, may be seen at the offices of the Company's Solicitors, Messrs Asburst, Morris, and Co., 6 Old Jewry, London.

Applications, accompanied by the payment of £1 per share, will be received by the Bankers of the Company, or by Messrs Coates and Hankey, 24 Gresham street, London, or by Mr Charles Warner, Secretary of the Company, Lombard House, George yard, Lombard street, London, where prospectuses can be obtained.

NORTH GERMAN CONFEDERATION 5 PER CENT. TREASURY BONDS.

Issue of £7,500,000 Sterling, or Thalers 51,000,000 German Silver Currency Nominal Capital. Redeemable at Par on 1st November, 1875.

SECOND EMISSION.

Principal and Interest Payable to Bearer in Sterling in London, or in Thalers at the rate of 6 Thlr. 24 Sgr. per £1 Sterling in Germany.

His Majesty the King of Prussia, in pursuance of an Act of the North German Parliament promulgated on the 20th November, 1870, empowering the raising of [illegible] Thalers effective, has authorised the second emission of 5 per Cent. Treasury Bonds for the same amount, and on the same conditions as the first emission; viz., £7,500,000 Sterling, or Thalers 51,000,000, the conditions being as follows:—

1.—The whole Capital will be divided in 5 series of Bonds, each series to be for £1,500,000, or Thalers 10,200,000

2.—The whole of the Bonds will be repaid at par on the 1st November, 1875 the Government reserving the right of paying off at par one or more series, or the whole, at any earlier period by giving six months' notice. In the event of one or more series being redeemed, the series will be drawn by lot.

3.—The Bonds will be signed by the Commissioners appointed by law, and will be issued to bearer in Sterling, in sums of £100 (Thalers 680),—£500 (Thalers 3,400),—£1,000 (Thalers 6,800), and in Thalers, in sums of Thalers 200, Thalers 500, Thalers 1,000 each, with Coupons payable half-yearly on the 1st of May and 1st of November each year up to their termination.

4.—Principal and interest of every Sterling Bond will be payable in London in Sterling, at the place to be designated by the authorities of the Confederation; and in Germany in Thalers, at the rate of Thlr. 6.24 Sgr. for £1 Sterling; and principal and interest of every Thaler Bond will be payable in Germany in Thalers, and in London in Sterling at the rate of £1 Sterling for Thalers 6.24 Sgr. Holders must give eight days' notice at the place where they desire to receive payment of the Bonds.

The London Joint Stock Bank have been duly authorised by the Contractors to receive Subscriptions for £4,000,000 nominal capital of the above Treasury Bonds which amount is reserved for the Subscription in London, and will be issued exclusively in Sterling Bonds in Sums of

£100 (Thalers 680)
500 (— 3,400)
1,000 (— 6,800)

The price of emission in London is £96 for every £100 Stock bearing Interest from the 1st May, 1871, payable as follows:—

£5 on application.
25 on allotment.
20 on the 1st March, 1871.
25 on the 3rd April, 1871.
21 on the 1st May, 1871.

Scrip will be issued to be exchanged for Bonds after payment of the first instalment, and the Bonds will be delivered as soon as they are received from the Government of the North German Confederation.

Subscribers may pay up the remaining instalment under Discount, at the rate of 4 per cent. per annum, on any day when an instalment falls due. The Scrip already issued will, in this case, be exchanged for fully paid Scrip bearing interest from the 1st November, 1870, and Subscribers must therefore pay for each £100 Stock £2 10s in addition to the above-named price of £96, which amount will be repaid by the Interest payable 1st May. Fully paid Scrip of the first and second emission will thus be placed on an equal footing.

The failure to pay the whole of the instalments subjects all previous payments to forfeiture.

Applications will be received in the annexed form.

The allotments will be made as early as possible after the close of the subscription. In cases where the amount allotted is less than was applied for, the balance of the deposit will be appropriated towards payment due on allotment. If more than sufficient for this purpose the balance will be returned to the subscriber. Where no allotment is made, the amount of deposit will be returned without delay.

Subscription lists for the remaining £4,500,000, or Thalers 30,600,000 will be opened simultaneously in London and other places of the North German Confederation by the Royal Seehandlungs Society, and the Prussian Bank. The amount above mentioned will be issued at the option of the subscriber in Sterling or in Thalers. All Sterling Bonds, wherever issued, will bear the Imperial Government stamp, and will be exchanged by the London Joint Stock Bank. The Provisional Scrip issued in London can only be paid on, and exchanged for the definitive Bonds in London; and the Provisional Scrip issued in Germany, can only be paid on, and exchanged for, the definitive Bonds in Germany.

Copies of the law authorising the loan, and of the powers granting the same in London by the London Joint Stock Bank, may be seen at the Bank.

5 Princes street, London, E.C.
25th January, 1871.

HOLLOWAY'S OINTMENT AND PILLS.

—Effects of colds.—In winter almost every current of air is pregnant with sore throats, influenza, and a similar host of annoying disorders. All may be readily subdued by rubbing Holloway's ointment externally over the affected part. The unguent penetrates all diseased and erroneous action. Whatever or whenever the malady, this invaluable ointment searches out its cause, and safely effects the precise remedial action required, without weakening the system, or leaving behind the seeds of future disease. Holloway's pills greatly assist this curative action. The sick of all nations have voluntarily borne testimony to the wonderful cures performed by Holloway's medicaments, when both the faculty and the patients themselves saw no relief but death.

CREDIT LYONNAIS (Limited).

Capital, entirely paid up, 20,000,000 Francs (£800,000).

Lyons, Paris, Marseilles, London.

Notice is hereby given, that the half-yearly coupons (No. 14) for the usual Interim Dividend at the rate of Five per cent. per annum are NOW PAYABLE at the Offices of the Company in France, and also at the London Agency, No. 5 Austinfriars, E.C.

DEBENTURES AT 5, 5½, AND 6 PER CENT.

CEYLON COMPANY (LIMITED).

The Directors are prepared to Issue DEBENTURES to replace others falling due, viz., for 1 year at 5 per cent., for 3 years at 5½ per cent., and for 5 years at 6 per cent. per annum, also for longer periods on terms to be ascertained at the office of the Company.

R. A CAMERON, Secretary.

Palmerston buildings, Old Broad street, E.C.

THE TRUST AND LOAN COMPANY OF UPPER CANADA.

Incorporated by Royal Charter.

Established 1851.

Capital, £1,000,000; Paid-up, £250,000; Uncalled, £750,000; Reserved Fund, £79,547.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

Charles Morrison, Esq., Deputy-Chairman.

James Hutchinson, Esq.	W. Gordon Thomson, Esq.
The Hon. Ashley Carr Glyn.	T. M. Weguelin, Esq., M.P.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

This Company was the first established in England for the purpose of receiving, upon the security of a large subscribed capital, money on deposit at a fixed rate of interest, and lending the same, together with the paid-up capital, on mortgages of real estate in Canada.

The Company has been in successful peration since 1851.

The Directors are now issuing Debentures for three years and upwards. Any information required can be obtained on application to

F. FEARON, Secretary.

7 Great Winchester street buildings, London.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National decrees of 7th and 8th of March, 1848, and by Imperial decrees of 20th of July 1854, and 31st of December, 1866.

Recognised by the International Convention of 30th April, 1862

	francs.		£

LONDON BANKERS.

The Union Bank of London.

LONDON AGENCY—144 Leadenhall street, E.C

MANAGER—G. Pietsch.

SUB-MANAGER—Theod. Dromel.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct banking business of every description with the Continent, India, China, &c., &c., &c., upon terms to be ascertained at the Office.

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-en-the-Rhine, founded in 1847.—The Principal, Herr THOMAS, prepares Gentlemen's Sons for the Army, Civil Service, and Mercantile pursuits. German and French are constantly spken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Bon-on-the-Rhine —Frequent escorts

EDUCATION.—"ONE YEAR'S

Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 1l5 per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1870.

As part of an early number of the Economist, *we shall, in continuation of the Series commenced with* 1863, *issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the Year, &c.; the object of the Supplement being to place in possession of our readers a Commercial History of* 1870 *worthy of preservation and adapted for reference.*

Just Published. No. I. New Series. Price 8d and 8½d.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for January, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to January 25.

Advertisements for next Number, to be published on Feb. 25, must be sent, to insure insertion, on or before Feb. 23.

OFFICE—340 Strand.

THE ALLEGED TERMS OF PEACE.

The terms which it is alleged that Germany asks of France are so harsh and so improbable that we cannot believe them. They have not indeed been contradicted, and considering that they may excite France to continue the war, and may cause her to elect an Assembly inflamed with war passion, the absence of contradiction is strange. Still we cannot believe them.

The alleged pecuniary indemnity is impossible. France could not raise 400,000,000*l*, or anything like that sum. It would require her to add more than 30,000,000*l* to her annual taxation, which would not be possible. France is, speaking broadly, a country of great savings but of small earnings. Her people are timid in business though penurious in expenditure. She has no income tax, and she would not bear one; she is oppressed with protective duties, and she would not bear Free-trade. Her soil is tilled carefully and anxiously; but it is tilled at a great disadvantage. for the peasants who own it and work it have no science, little capital, and an obstinate adherence to use and wont. Such a country cannot be taxed as you would tax a young Anglo-Saxon community—as you would tax America, where the power of tax-paying is at a maximum, and the disposition to pay equally great. In France both the ability to pay and the willingness are small comparatively.

We must remember, too, that the time within which the fine to Germany must be paid by France is limited. Until it is paid, Germany must occupy and must hold in pledge some important part of France, and this would be very onerous, very costly, and very unpleasant, if it lasted many years. In 1815 the Duke of Wellington commanded an army of occupation in France, but it was abandoned before long, and part of the fine remitted. The position of a garrison in a country still hostile, though peace has been declared, is very tedious and very irksome. A national army like that of Germany would probably dislike it peculiarly; more than any other it would like to go home to its friends to relate its deeds, and enjoy its glory. The compensation must be made therefore by France to Germany within some brief time, and that of itself narrows the amount. France could not borrow anything near the monstrous sum asked unless the loan were spread over a very long period, even if she could borrow it then.

We therefore entirely disbelieve the amount of the alleged indemnity. The rest of the terms though severe are, we fear, not so unlikely. The amount of territory named, we believe, will be that which Count Bismarck will really ask. Most shrewd observers have said that now that the Germans were really in Metz it would be many years before they were out again. Some even think (and not without improbability) that the reason why Count Bismarck would not make peace at Ferrières was that Metz had not then fallen, and that nothing but Metz would serve his purpose. Indeed, from the German point of view, it is difficult to see that anything else will. They wish, in case of another war with France, to begin it with as much advantage as possible on their side; and there is certainly no military advantage equal or comparable to the possession of Metz. If the Germans had been really wise, they would, as we then held, and as we still hold, have made peace after Sedan without demanding territory. The gain of any territory is not, as we believe, equal to the evil of annexing a hostile population, and of incurring French hatred. Such an annexation will entail on Germany the curse of an "Ireland," and the curse of a new

war; but, according to the saying, "it is as well to be "hanged for a sheep as a lamb." If these wise reasons are to be overlooked, and if territory is to be taken, then take the most useful territory. Do not content yourself with second-rate fortresses, and a frontier of dubious value. Take the "virgin fortress," which has a fame of ages, and around which is an entrenched camp, capable of holding an army that could, if needful, hang on the rear of the French army wanting to invade Germany, endanger all its communications, and cripple all its movements. The robber who took the pewter and left the plate has always been laughed at, and the policy of Germany would be much the same if she took Alsace and left Metz.

The article as to Pondicherry puzzles us. No possession could be of less use to the Germans. No great trade could be easily established there; to make it a rival to Bombay or Calcutta is an impossibility from its situation. But, on the other hand, its cession might be popular in Germany, which, not having any foreign possessions, attaches an undue importance to their value. For ourselves we should regret it exceedingly. India is a strange and anomalous possession, in which we do not want changes. No one can tell what the effect of a new rival, as it would be thought, to the English would have on the excitable and incalculable native mind. Unquestionably we could put down any disturbance so caused; but still it might, for aught we can say, cause a disturbance, and on that ground we should lament it. Besides in India France has long been and long acquiesced in being a beaten Power. She holds Pondicherry upon condition of not keeping more than a very small force there. That condition ought, as the lawyers would say, to "run with the territory." But Germany will not take it so. Certainly she will not consent to be bound by the fetters of a beaten Power. She will want to keep troops there; she will keep them (such is the pride of nations, from which we cannot expect her to be free) only to show she can keep them. And thus we should have "a pea in the shoe"—a trivial but unceasing cause of acute irritation between us and a great Power, all whose real interests are the same as ours.

As to the cession of the French ships of war, we feel no such regret. If Germany wishes for a fleet, we cannot object to her acquiring one. We may think she is mistaken, because, as we believe, her present fleet is enough to defend her shores (indeed, as it has now defended them), and to protect her commerce. Still, if she wants more ships of war, and likes to take her indemnity from France in that way, England will not regret it. Our navy is not so timorous as to fear any other.

The marvellously—the even absurdly—harsh article is the 400,000,000*l* of indemnity, and this we disbelieve. If anything could justify M. Gambetta's proclamation and his wish to continue the war, it would be such a proposal as that.

THE STOCK EXCHANGE AND "DEFICIENCY BILLS."

THE sum by law applicable to the reduction of the National Debt during the current quarter is 1,019,000*l*, and it was expected that the whole of this sum would have been applied to purchases of Stock or Exchequer Bills in the market. But in fact only 19,000*l* has been so applied, and the remaining 1,000,000*l* has been used to pay off a sum owing on "deficiency bills" to the Bank of England. Some members of the Stock Exchange do not like this, as they consider that the whole quarterly balance by law ought to come into their market and augment the price of Stock and Exchequer Bills in which they deal; and some disinterested persons doubt whether the Legislature did not intend that the quarterly balance should be applied to the permanent debt of the country, and whether that intention is complied with by the liquidation of these transitory advances from the Bank of England.

The law on the subject is contained in the Exchequer and Audit Act of 1866, and is certainly very confused, and (as we think) not very wise. By Clause 16, at the close of each quarter, an account is directed to be made up of the income and expenditure of that quarter; and if that account shows a surplus, one-fourth part of that surplus shall be "expended "in redeeming funded or unfunded debt, or in repaying to "the Bank of England or the Bank of Ireland any advances "made by them under the provisions of this Act towards "supplying the deficiency of the Consolidated Fund during "the said quarter." And this is an express authority to do what Mr Lowe has done—viz., apply the quarterly surplus to the payment of deficiency bills; but unluckily Clause 12 of the Act—the only clause under which the Government can borrow, or the Bank lend—says that all advances on "defi-"ciency bills" shall be paid in another way, and out of another fund.

Thus on the 31st December, 1870, the Treasury are to prepare an account of the "income and charges for the Con-"solidated Fund," and the charges for the public debt; and if the income be not enough, the Bank of England or the Bank of Ireland may advance the amount of the deficiency on the application of the Treasury; but all such advances "shall "be paid out of the growing produce of the Consolidated Fund "in the *succeeding* quarter." That is, in plain English, Clause 16 says such bills *may* be paid out of the surplus of the past quarter, and Clause 12 that they *shall* be paid out of the produce of the coming quarter, which seems a clear contradiction.

We do not profess to solve the puzzle; but looking at the reason of the thing, we think the best interpretation is that Clause 12 does not mean to interfere with the power of the Government given by the 16th, but only to give an additional remedy to the lending Bank. It does not mean that they may not be paid from any other source, but only that if they are not otherwise paid the Bank has a lien on this source, and a right to require that the debt shall be paid out of it. Clause 12 is not, on this interpretation, a restriction on the borrower, but a protection to the lender. But nothing can be more uncertain than so fine a gloss, or worse drawn than the Act is, and two railway companies would fight the matter to the last tribunal, and no two judges would agree.

As a matter of business, the idea of this Act is a mistake. It is not desirable that at each quarter a fresh account should be made up, and a fresh surplus calculated and invested. At the end of each financial year the surplus should be computed, and then invested by equal quarterly sums, or as may be thought best; but only one surplus should be calculated annually and not four. Hitherto this has not been so important as it is now. The effect of recent changes has been to distribute the receipts of the revenue much more unequally over the different quarters than they ever were before, and consequently a quarterly account has become not only a mistake in theory, which it was always, but a perplexity in practice, which, as all the four quarters of the year were pretty much alike, it hitherto has not been.

And the surplus so calculated should, we think, be available, in the discretion of the Finance Minister, for the payment either of permanent debt or temporary, just as he pleases. It is absurd that he should be obliged to pay debt with one hand, and at the same time to contract debt with the other.

As the matter is both intricate and important, we give the clauses referred to:—

12. At the close of each of the quarters ending on the thirty-first day of March, the thirtieth day of June, the thirtieth day of September, and the thirty-first day of December in every year, the Treasury shall prepare an account of the income and charge of the Consolidated Fund of Great Britain and in Ireland for such quarter, and the charges for the public debt due on the fifth day of April, the fifth day of July, the tenth day of October, and the fifth day of January shall be included in the accounts of the said charge for the quarters ending on the days preceding the latter dates; and a copy of such account shall forthwith be transmitted by the Treasury to the Comptroller and Auditor-General; and if it shall appear by such account that the income of the Consolidated Fund in Great Britain or in Ireland for the quarter is not sufficient to defray the charge upon it, the Comptroller and Auditor-General, if satisfied of the correctness of the deficiency, shall certify the amount thereof to the Bank of England or to the Bank of Ireland, as the case may be, and upon such certificates the said Banks shall be authorised to make advances, from time to time, during the succeeding quarter, on the application of the Treasury, by writing, in a form to be from time to time determined by them, to an amount not exceeding in the aggregate the sum specified in such certificates; and all such advances shall be placed to the credit of the Exchequer accounts at the said banks, and be available to satisfy the orders of credits granted or to be granted upon the said accounts by the Comptroller and Auditor-General; and the principal and interest of all such advances shall be paid out of the growing produce of the Consolidated Fund in the said succeeding quarter.

16. Within fifteen days after the expiration of the quarters ending on the thirty-first day of March, the thirtieth day of June, the thirtieth day of September, and the thirty-first day of December, in every year, the Treasury shall prepare an account of the public income and expenditure of the United Kingdom, according to the actual receipt and issue of moneys on the Exchequer accounts at the Bank of England and Bank of Ireland in the twelve months ending on such quarter days respectively; and if there shall appear by such account to be a surplus of income above expenditure, the Treasury shall certify the same to the National Debt Commissioners, and one-fourth part of such surplus shall be applicable to the reduction of the National Debt, as hereinafter directed; and the National Debt Commissioners shall publish from time to time in the *London Gazette* the sum which will be so applied in the ensuing quarter. The Treasury shall cause one-fourth part of such surplus income to be charged on the Consolidated Fund in the quarter succeeding the termination of such account; and the sum so charged shall be issued by the Treasury from time to time in the next ensuing quarter to the National Debt Commissioners, who shall apply the same, during the said quarter, in redeeming funded or unfunded debt, or in repaying to the Bank of England or to the Bank of Ireland any advances made by them under the provisions of this Act, towards supplying the deficiency of the Consolidated Fund during the said quarter; and all debt so redeemed shall be forthwith cancelled. And a copy of every account prepared by the Treasury, as aforesaid, certified by the Comptroller and Auditor-General, shall be laid before the House of Commons within fifteen days after the expiration of the said quarterly periods, if Parliament be then sitting, or if not sitting then within one week after Parliament shall be next assembled.

GENERAL BUTLER'S MOTION.

The English public must be careful not to attach too much importance to the news from Washington, to the effect that General Butler has moved and carried, by a majority of 172 to 21, in the House of Representatives a resolution given "in "the name and on behalf of the people of the United States," offering to O'Donovan Rossa and the Irish exiles and patriots a cordial welcome to the capital and the country. There are a great number of apparently very formidable political events in the United States which have no real political significance at all, and a great many more, which are apparently very trifling, full of the weightiest significance. How to distinguish between them is next to impossible for Englishmen, and will sometimes tax the skill of a thoroughly well-versed American Statesman, if he has been absent from his country and not closely observing the antecedents even for a few weeks. We know nothing in the world more difficult or complicated, and, let us add, in many respects less *worth* studying, to any but the technical politician, than the ins and outs of United States' politics. In this case the matter happens to be pretty plain. Ever since the election of President Grant the Republican party has been losing ground at the State elections and the Democrats gaining it. Now there are two great bodies of public opinion of the first importance, in an electoral point of view, to these two great parties—the German vote and the Irish vote. To conciliate either of these votes, either of the great parties would profess almost anything in the world, however little they felt what they professed, supposing the matter began and ended with professions. Unfortunately the broad divisions in America between the Executive and the Legislative functions tends to stimulate this immoral readiness to make any sort of profession for the sake of gaining votes. The Legislature relies, with true Yankee cunning, on its Executive for not doing a foolish thing, even though the Legislature seems to encourage the doing of it ever so much by saying it as loudly and with as much effusion as it can summon up. If President Johnson and President Grant had not practically resisted the Fenian raids into Canada when they came to the point, there is no doubt at all that the Congress would have blamed them severely, and would have repudiated the Presidents' action altogether. But it is precisely because Americans trust their Presidents to keep the law uninfringed that they trust themselves to talk as if they would be very glad to see it infringed, for party purposes. No sooner were the Fenian prisoners released under a covenant not to go to Ireland, than the two parties who yearly fight for the Irish vote, saw a great opportunity open before them. The Democrats were first in the field. An old Irish exile, one of the '48 exiles, who has long been a flourishing member of the New York Democratic party, got up a meeting, at which various big words were spoken and considerable sums promised for the purpose of giving the new band of exiles a grand reception in New York. This looked serious to the Republican party, who have been losing ground steadily for the last two years, and something of counter-strategy was needed. General Butler was precisely the man for the situation. If his party does not in his mind stand above every consideration, except himself—chiefly, no doubt, because it is his party which he looks to to furnish the ladder by which he will raise himself—his conduct both during and since the conclusion of the war must have conveyed a strangely false impression of his character. The social honour to the Fenians was taken out of his hands. Only a public or political honour remained, and for that his resolution provided. Republicans who were not nice as to the selection of the words by which they should buy back the Irish vote, and Democrats who were not going to let the Republicans have all the credit of the compliment to themselves, followed him into the lobby, and only 21 men remained out of 193 present, who were not willing to accord a special political welcome to the men who had raised the standard of a useless rebellion against England.

We need not say that for the United States, who complained so bitterly of the honour accorded in private English drawing-rooms to Messrs Mason and Slidell, and other representatives of the Southern rebellion, to interfere in this official way to do honour to the secessionists of the United Kingdom, is one of those flagrant offences against political consistency and self-restraint which deservedly lower the influence of Legislative bodies both in the eyes of their fellow-countrymen and in that of foreigners. At least, if the people of the United States, who feel no admiration at all for "O'Donovan Rossa and the Irish exiles and patriots," do not think worse of their representatives for passing this vote, it will only be because similar votes, similarly hollow, have been passed so often that they have ceased to measure their Congress by any standard which would admit a feeling of surprise at unscrupulous language of this sort,—they have come to regard "resolutions" as a species of political bait by which the different parties strive to cover their hooks for unwary electors. The only wonder is that when language has reached this sort of depreciation it should continue to be a bait at all,—and perhaps only with Irishmen would it succeed. But such are the facts of the case. The paper currency of the United States is not half so much depreciated as the currency of their political verbiage. "Resolved," in the mouth of the House of Representatives, has far less relation to the moral process known as volition, than the "not at "home" of an English servant to the actual absence of the mistress from the house. When words are thus used by a political assembly, there is always danger of a moral schism between the assembly and the nation, which may have the most disastrous consequences.

As regards, however, the relations between England and the United States, we may say with some confidence that this little bit of party profligacy will not affect them at all. Our statesmen are too much used to this sort of manœuvre to take any notice of it, and their desire to meet honestly the proposals which General Schenck brings with him, are, as we believe, heartily seconded by the good-will of the whole English people. We lament General Butler's resolution, not because it will produce the smallest effect on our political relations with the United States, but because it will necessarily tend to strengthen that habitual misunderstanding of American affairs, and that unjust because excessive disgust at the proceedings of the American "Democracy" which make Englishmen think so scornfully of the really great institutions, and much greater people amongst whom these cunning political tricks are common if not popular.

LONDON JOINT STOCK BANKS—HALF-YEARLY REPORTS AT 31 DEC., 1870.

Note.—The *London Joint Stock Bank* does not, like all the other Banks, separate *Acceptances* from Deposits. Hence the 17,310,000*l.* above must be largely reduced to arrive at the Cash Deposits. In December, 1867, the Acceptances were given at 2,784,000*l.*

The Cash Deposits, exhibited above (A), are higher in the older Banks :—In the *London and Westminster* to the extent of 2⅓ millions, compared with 30 June, 1870 ; and in the *Union*, 1½ millions. The mixing up of Acceptances and Deposits by the *London Joint Stock Bank* renders it impossible to make an exact comparison in their case. But the compound figure given, viz., 17,310,000*l.*, is 4⅓ millions *more* than at 30 June last,—and it is impossible to suppose that more than a small part of this large increase is in Cash Deposits. The Deposits in the six younger Banks are scarcely up to the level of June. On the whole, the Table supports the general belief that there is in this country some considerable amount of funds, driven here from France and elsewhere by the war ; but it is impossible to do more than guess at the actual extent of these funds. To say 10 millions might be as far from the truth as to say only 4 millions.

The Dividends are much the same as in June, but rather better than in December, 1869 ; and the Cash and Government Securities do not call for remark. The variations do not seem to be wider than would arise in the ordinary course of business. In the case of the four older Banks the Dividend is of course much assisted by the high proportion borne by the Cash Reserves to the Capital bearing dividend. In these four cases (see D below) the Reserves are 1,820,000*l.*, or (say) 40 per cent. of the Paid-up Capital, 4,900,000*l.*

* The *London Joint Stock Bank* has made no return of its Acceptances since Dec., 1867, when the amount was given as 2,784,000*l.*

The Acceptances (C) are less at the *Union*, especially as compared with 1869 ; and still more conspicuously less at the *City* and *Consolidated*. As pointed out above, it is probable that they are considerably more at the *London Joint Stock*. But at the *London and County* they are higher than since Dec., 1868. We have often expressed the general opinion of cautious persons against the impolicy of Banks committing themselves to large amounts of Acceptances. The example of the *London and Westminster* is in this respect entitled to high praise. Credit cannot be used twice over with ultimate advantage. It cannot be made the basis of large Cash Deposits, and also of a disproportionate mass of Acceptances floating about the country, and subject in their treatment to the sensitive action of the money market from day to day.

In the next Table (D) we have put together such of the items of the several Bank returns as suffice to indicate with some precision the nature, and profit and loss results, of the several businesses. We begin with the Paid-up Capital and Cash Reserve, and we assume that upon these fixed funds the managements may well make 4 per cent. per annum. Deducting therefore the produce of this 4 per cent. from the profits of the half-year, we obtain (col. 6) the amount of profit derived from the Banking business itself—that is to say, from the difference between the rates of interest paid on deposits and current accounts and received from discounts, advances, and commission on acceptances, &c. ; and this profit admits of being expressed in the concise form of a Percentage (col. 7), the differences in which, comparing one Bank with another, show pretty plainly the varieties in the kinds of business transacted. In the last column (8) are given the Expenses of management, and if these expenses be compared with the banking profits (col. 6) the excess is of course the surplus provided by the business, and available for dividend, reserve, &c.

The following is the Table :—

(D) London Joint Stock Banks—Half-year ended 31 Dec., 1870—Profit Results. (In cols. 1 and 2 the 0,000's are omitted—thus, 2,00 = 2,000,000*l* and 9 = 90,000*l*.

1 Paid up. Cap.	2 Paid up. Res.	3 Banks.	4 Profits after Deducting Int. and Rebate.	5 Computed Results—Half-year. 4 % p. a. on Cap. & Res.	6 Derived from Cash Deposits in Half-year. Amount	7 Pr. ct.	8 Expenses of Management.

6,32	1,88		668,800	163,800	505,000		
80	5	Consolidated.....	44,000	17,000	27,000	23 0	12,500
10	...	Central	9,600	2,000	7,600	33 0	4,900
20	1	Metropolitan.....	12,000	4,200	7,800	28 6	5,100
18	...	London & S.-Western.	13,500	3,600	9,900	36 6	9,300
7,60	1,44		745,900	190,600	557,300		
1,00	50	London and County...	191,000	30,000	161,000	24 3	104000
8,60	1,94	Totals	936,900	220,600	718,300		

The profits in col. 4 are the figures which remain *after* providing for interest allowed and for rebate—but *before* setting aside expenses.

*The *London Joint Stock Bank* mix up Acceptances with Cash Deposits, and, therefore, render it impossible in this case to give the Percentage required in col. 7.

The Table may be read thus:—For example—The *London and Westminster Bank* have 2,000,000*l* Paid-up Capital and 1,000,000*l* Cash Reserve (cols. 1 and 2), together 3,000,000*l*, upon which 4 per cent. per annum provides (col. 5) 60,000*l* in the half-year. The Profits are 243,300*l* (col. 4), leaving 183,300*l* (col. 6) as the sum made upon the employment of 21,986,100*l* of Cash Deposits (Table A), or equal to 16s 7d per cent. for the six months, or 33s 2d per cent. *per annum*. The Expenses (col. 5) are 62,677*l*, which, deducted from 243,300*l*, gives 183,300*l* as the benefit derived from the *business* apart from the Paid-up Capital and Reserve.

The *London and Westminster* shows a Percentage in the half-year of 16s 7d on its Cash Deposits (making, say, 1*l* 13s 2d per cent. *per annum*). The *Union* result is 1*l* 8s 2d for the six months, and the *City* 1*l* 3s 3d. These higher figures, as compared with the *London and Westminster*, indicate, it may be assumed, the contributions to profit and loss of the large aggregate Commissions on Acceptances. The 18s 10d at the *Imperial* and the 17s 3d at the *Alliance* are nearer to the *London and Westminster* standard. The four younger Banks show percentages from 1*l* 3s to 1*l* 16s 6d on the half-year—to be explained, we imagine, by the very much higher rates they obtain by discounts and advances for classes of customers somewhat removed from the stream of the recognised money market. In the smaller Banks the high relative magnitude of the expenses to the banking profits (col. 8 compared with col. 6) proves very plainly the cardinal maxim of all Banking—mainly, that profits are in proportion to the extent to which a Bank can employ not its own money, but the money of other people. The *London and County* show a Percentage of 1*l* 4s 3d for the half-year on their 13½ millions of Deposits. Their very high expenses are accounted for by their numerous Branches. The Commission on their three millions of Acceptances doubtless assist the account.

THE PROJECTED UNIVERSITY OF LAW.

Probably in no other civilised country but England, and in no English career but the legal profession, could the wretched jumble of extravagance and incompetence presented by the administration of the Inns of Court have been tolerated in this reforming age up to the present day. Those singular self-elected autocrats of the bar, "the Masters of the Bench" of the several Inns, more generally known to the profane public as "the Benchers," receive and expend an annual income of nearly 60,000*l*. They are responsible to nobody for their outlay; they admit no public audit; they refuse to the mass of the profession the right to question their action even in such matters of gravity as the refusal to "call" a student, or to enrol an obnoxious Q.C. in the ranks of their own co-operative hierarchy. These are serious causes of complaint in the case of institutions which are as clearly national property as the Endowed Schools, or the Universities; but there is a still graver charge against the Inns of Court. Their existence is to be justified only on the ground that they impose a test of moral and intellectual fitness upon persons admitted to the bar. As a matter of fact, they impose no such test. They compel students to eat a certain number of dinners in hall; they are very exact in obtaining payment for commons and a variety of supplementary fees; and they make a pretence to look after the professional training of the candidate by demanding of him either a certificate from the Council of Legal Education—a body of recent origin—of having passed a satisfactory examination, *or* of having attended the lectures of the Readers appointed by the Inns, *or* of having "read" for twelve months in a barrister's chambers. The first qualification being optional, somewhat troublesome to obtain, and when obtained of no plain practical value, is sought by few. The second is easily got by the idlest, who may lounge over a newspaper or make caricature sketches in a note-book while the lecturer is prosing away at his dull task. The third alternative—working in chambers—is the only one through which at present a law student in England can acquire a knowledge of his profession. Its value varies with the character of the student himself: he need learn nothing in chambers any more than at lectures; he need hardly attend or glance at the papers of the pleader with whom he reads, or in short do anything but pay his one hundred guinea fee. Of course an industrious man, meaning to succeed, will plod through disheartening difficulties, until at last he gets a real knowledge of business, and some sound though quite empirical and unscientific notions of law. But no thanks are due to the Inns of Court for these acquirements, which are never tested before admission, and which, so far as the worthy trustees of the Inns' property are concerned, are put on a level with the ignorance and incompetence of the dullest and idlest.

Obviously such a state of things is a scandal to the profession which claims *par eminence* the designation of "learned," and long ago distinguished lawyers have attempted to provide a remedy. A quarter of a century since a Committee of the House of Commons reported in favour of establishing a Legal University, by affiliating and co-ordinating the Inns of Court with their educational machinery, the "Law Societies" of Attorneys and Solicitors, and the Academic Faculties of Law. Nearly ten years later, a Royal Commission investigated the subject, and recommended some similar organisation. But the matter has slept since, mainly for two reasons. In the first place, the vested interests are mighty and powerful in Parliament, including the *élite* of the bar—the men who have succeeded under the old system, and who consequently see no reason why there should be any new system. Secondly, the public have never yet taken up the question as one in which they had a direct interest, as they certainly have. We may hope that now, when the habit of Conservatism has been thoroughly broken through, when lawyers, like Lord Cairns and Lord Westbury, call imperatively for reform, when the most erudite and experienced member of the Equity bar has placed himself at the head of a serious movement to provide a machinery for doing the work that the Inns of Court have neglected, when the Lord Chancellor and ten other eminent Judges approve, when the Attorney-General, the Solicitor-General, and some three score Q.C.'s co-operate,—the people outside will perceive the importance every way of the interests involved, and will help the work by emphatic condemnation of abuses too long tolerated.

Six months ago a meeting, over which Sir Roundell Palmer presided, was held in Lincoln's Inn Hall, to discuss the possibility and desirability of establishing an University of Law in London. During the long vacation, the suggestions generally adopted at the Lincoln's Inn meeting were thrown into a definite shape. The outline of a plan has now been published, and in the present Session, we understand, an attempt

will be made to obtain from Parliament an Act and a Royal Charter from the Crown constituting the University. The objects of the Legal Education Association, which has taken up this work, are thus defined :—

1. To place the general course of studies and the examinations preliminary to and requisite for admission to the practice of the law, in all its branches, under the management and responsibility of a legal university, to be incorporated in London.
2. To make the passing of suitable examinations in this university (or of equivalent examinations in the legal faculty of some other university of the United Kingdom) indispensable to the admission of students to the practice of the bar, or to practice as special pleaders, certificated conveyancers, attorneys, or solicitors; such examinations and the course of study preparatory thereto being either combined or divided as may be desirable and convenient with a view to the knowledge of the general principles of law, or to the acquisition of the special attainments necessary for particular branches of the practice of the legal profession.
3. To offer the benefits of the course of study and examinations to be afforded by the university to all classes of students who may desire to take advantage of them, whether intending or not intending to follow the legal profession, in any of its branches, and whether members or not of any of the Inns of Court.
4. To enable the university to confer (among other honours) such degrees in law as are conferred by other universities.

The peculiar feature of this scheme is that it starts on a Conservative principle, which is likely to disarm opposition. It does not propose to meddle with the present administration of national property by the benchers of the Inns of Court, or to deprive those irresponsible monopolists of their disciplinary authority over the bar. The benchers may still refuse to call a man because he is in trade, or is an attorney, or a red Republican. They may still refuse to give their reasons for refusing; they may proceed to disbar a delinquent for breach of professional etiquette, and so forth. In this manner the present regulations for the admission of attorneys to practice are left undisturbed. The only change demanded is that nobody shall be allowed to become either barrister or attorney, unless he has graduated in the proposed legal school. The government of the University would be practically in the hands of a Senate, on which the Inns of Court and the Incorporated Law Societies might be represented in due proportions, and seats reserved also for delegates from the Legal Faculties of the Universities. The only institution that would be supplanted by the University of Law is the Council of Legal Education, which has proved its uselessness by the experience of fifteen years. Few will regret the disappearance of a lecture system which was never made fruitful by an examinational test, and of an examination which was never made compulsory. It is not clear as yet to what extent the Association propose to compel attendance on classes or practical work in chambers in addition to the examination. There can be no difficulty, however, in devising a liberal scheme of education, which honestly enforced will at last engraft a scientific study of law on the empirical technicality of the English bar, and redeem the country from the reproach of being left far behind the nations of the continent in the training of those who administer justice in our Courts, and have no small share in the work of legislation.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, Jan. 21, 1871 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	88,304 4 9	107,421 15 4
To transfer certificates from Post Office Savings' Banks to Savings' Banks	351 13 6	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	4,136 18 11
Total	88.655 18 3	111.558 14 3
POST OFFICE SAVINGS' BANKS:—

To transfer certificates from Savings' Banks to Post Office Savings' Banks	4,136 18 11	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	351 13 6
Total	72.324 4 5	351 13 6

Total amount on Jan. 21, 1871, at the credit of—	£ s d
The fund for the Banks for Savings	37,804,923 6 10
The Post Office Savings' Banks fund	15,019,456 16 0
Total	52,824,380 2 10
Ditto—by last monthly account	52,775,310 7 11

BUSINESS NOTES.

RAILWAY DIVIDENDS AND THE RELATIVE PRICES OF ORDINARY SHARES.—What percentage is the ordinary stock of railways expected to pay at the present prices to investors? A glance at the return yielded last year by such of the principal railways as have already declared the dividend for the second half of the year, compared with the respective prices of the ordinary shares furnishes the following results, allowing for the accrued dividend :—

	Return for 1870. %	Price, Feb. 2, 1870.	Return to Investors. % £ s d
Manchester and Sheffield	35/	45xd	3 18 0
London and Brighton	15/	43xd	1 15 0
Midland	6½	127¼	5 5 0
Lancashire and Yorkshire	7	135½xd	5 6 0
London and South-Western	4⅞	94	5 7 0
Great Eastern	⅜	40	2 3 6
North-Eastern	7⅛	146¼	5 10 10
Great Northern	6⅝	124½	5 9 6
Ditto A	7¼	134	5 10 9

Railways which are quoted below par are kept up at a good price for various reasons, chiefly as they are well held or not, and one of the above companies, the London and Brighton, may be considered in a special position. The return of the larger and better companies is a fitter test of what an investor may look for, and the result, as shown above is that the principal railways would yield to the investors at Thursday's prices between 5¼ and 5*l* 11s per cent.—the North Eastern showing the largest return. The inequalities are most material, as will be seen from the following comparison of the present prices with what they would be at a rate calculated to yield the investor 5¼ per cent., taking into account the accrued dividend. We include in the comparison the London and North-Western Company, assuming that the dividend to be declared will correspond to the calculation in the ECONOMIST of the 14th ult. :—

	Estimated Return for Year. / Actual Return for Year.	Present Price.	Price at which Investor would receive 5¼ %.
London and North-Western	6¾	129	132⅝
North-Eastern	7⅛	146¼	154⅛
London and South-Western	4⅞	94	95⅛
Midland	6½	127¼	127¼
Lancashire and Yorkshire	7	135½	140
Great Northern	6⅝	124½	130⅛
Ditto A	7¼	134	143¼

Thus in the case of the Midland Company only does the present price agree with what the price would be to yield 5¼. With all the other lines, which are above or about par, the quotation might be higher, in some cases a good deal higher, to yield the same rate. No doubt there are other points which the investor should look to besides the mere amount of the dividend—the nature of each company's property, the liability to fluctuation, and the like. In these respects there is great difference—the dividend of the London and North-Western, for instance, being many more degrees stable than some others, though less likely to progress rapidly on account of the large amount of ordinary stock. An ordinary investor again will always be shy of a stock like Great Northern A, which very slight differences in the net revenue compared with the enormous traffic of the company will send up and down in great leaps. The ugly competition for the coal traffic between Derbyshire and Yorkshire and London is likewise a drawback to one or two of the lines. Still it may be doubted whether the inequalities pointed out are not such as an investor could fairly take advantage of, especially in the case of lines, which are known to be rapidly progressive, and are not subject to the drawbacks mentioned.

THE INTERNAL REVENUE OF THE UNITED STATES.—The New York *Commercial Chronicle* publishes an official detailed statement of the Internal Revenue of the United States during the last three years, from which we take the following

summary, adding for last year the equivalent in pounds sterling* :—

	1868. dols.	1869. dols.	1870. dols.	1870. £	Per Cent of Entire Collectn. in 1870.
Spirits	18,635,630	45,026,401	55,581,599	10,189,960	30·00

It is evident from this account how nearly the Americans have come, after several years' experiments in taxing everything, to the system which has been found most expedient in England. Fifty per cent. of the above large sum of 34,000,000*l* is derived from the first three items—"spirits," "tobacco," and "fermented liquors,"—answering to our own spirit and malt duties, and the Customs' duties on tobacco. Of the remainder, income tax supplies about 7,000,000*l* and stamps 3,000,000*l*—most fruitful branches of our own internal revenue. The great taxes on "sales," "gross "receipts," and "raw produce," which were at first the pillars of internal taxation in the United States, have been found intolerable, and have dwindled to almost nothing accordingly. A more signal proof of the wisdom of following old lights in the matter of taxation could hardly have been furnished than by this rapid abandonment in the United States of the rash experiments which were so cheerfully ventured on a few years ago. The rate of the income tax in America last year was 1s per £, and as the total yield is 7,000,000*l*, one penny there appears to bring in about 583,000*l*. A penny in England yields about a million and a quarter, so that we have an amount subjected to income tax more than double the American income similarly subjected. The American scale is not however so low as ours, and the tax is possibly not so well collected; but the figures may nevertheless indicate a great difference in the fortune and taxable resources of the two countries.

THE CLEARING-HOUSE RETURNS.—We called attention a fortnight since to the diminution of transactions, as indicated by the Clearing-house returns. The net decrease then for the first fortnight of the year was about 9,000,000*l*—not altogether due to the falling off of business on the Stock Exchange settling days. The decrease has since continued, though not to the same extent, and the total decrease for the year is now 13,375,000*l*—equal to about 4 per cent. on the total for the same period of last year. The falling off on the Stock Exchange settling day in this week's return is :—

	£
Clearing last year	26,849,000
— this year	23,028,000
Decrease	3,811,000

—and as the actual falling off in the whole clearing for the week is 5,081,000*l*, there is a difference, amounting to 1,220,000*l*, not due to settling day. The decrease in the volume of ordinary transactions is not great; but, as a check to the expansion which has hitherto been manifest in these returns, the fact is undoubtedly worth some notice.

THE LONDON AND COUNTY BANK, AND THE CHATHAM AND DOVER ARBITRATION.—The statement of the chairman of the London and County Bank at the meeting this week, illustrates the practical working of the London, Chatham, and Dover arbitration. The bank, he said, in exchange for the sum of 74,000*l* of principal and interest owing to it, had received 30,428*l* arbitration debenture stock, and 43,288*l* of ordinary stock—the two together making up the nominal amount of its claim, but of course representing a much less sum. The chairman tried to put the best face on the matter, by showing that, with the interest on the debenture stock alone, the bank would receive the equivalent of 2¼ per cent. upon its whole claim, which was not a bad investment at the present rates of money; but of course no such mode of putting the case will cover the fact of loss of principal money, which the bank would certainly not lend at a long date at any such price. The arbitrators in short decreed a composition upon a majority of the conflicting claims, giving up altogether the attempt to adjust priorities nicely, by which the bank and other creditors would in the end have been paid in full. We think it was well for all parties that they had such power, that the Legislature delegated to them the duty of cutting a difficult knot, which ought as a rule to be discharged by the Legislature directly; but it is still useful to keep in mind how singular and unprecedented was the bestowal of so much power on "arbitrators." We may take this opportunity of noting how much the debenture stock has improved since its first issue. It first stood about 88 in the uncertainty of the public as to the position of the company, but it is now 92½, ex div., which shows a rise of practically 6 per cent. The debenture stock ought at least to be at par, as will shortly be apparent when the company is reconstructed, and the fact of there being a fair surplus after paying the debenture holders is made apparent to the public.

ACCEPTANCE OF A BILL OF EXCHANGE.—The Judicial Committee of the Privy Council have had a nice question before them, in an Australian appeal case—the Bank of Van Diemen's Land *v.* the Bank of Victoria—as to what is due diligence in obtaining the acceptance of a bill of exchange. The Bank of Van Diemen's Land had discounted for 3,000*l* a bill drawn by one Gunn on Goldsborough and Co., of Melbourne, and had sent the bill to their agents in Melbourne, the Bank of Victoria, to obtain its acceptance. The bill was received on a Friday, was left at the office of Goldsborough and Co. for acceptance the same day, and was called for the next day, according, it was alleged, to the usual practice. When called for, Messrs Goldsborough's clerk said the bill had been mislaid, and told the bank clerk to come on Monday; but on Monday morning one of the firm of Goldsborough saw something in the papers about the drawer, and hearing that no goods had been shipped to meet the bill, cancelled the acceptance written, in which state the bill was returned to the bank. There was no question but what the bill, if accepted, would have been paid, and as the drawer had failed, the Bank of Van Diemen's Land sued the Bank of Victoria for the loss. The Judicial Committee, however, have decided that in the circumstances there was no failure of duty on the part of the Bank of Victoria, and "it was only by a singular circumstance "which had occurred that the acceptance had not been "obtained." But could not the bank, upon the statement that the bill had been mislaid, have asked for and obtained an undertaking that it would be accepted?

A DEFECT IN THE NEW BANKRUPTCY LAW.—The decision of the Lords Justices in the case—*ex parte* O'Loghlen, *re* O'Loghlen—indicates a defect in the new bankruptcy law, which ought to be amended as soon as possible. An adjudication of bankruptcy, which had been granted by the Registrar against Sir C. O'Loghlen, was annulled, on the ground that the Act did not apply to a person who was resident out of England, as Sir C. O'Loghlen was—his place of residence being Dublin. Sir C. O'Loghlen had held the office of Judge Advocate-General, and his office was at 35 Great George street, Westminster; but he did not reside in England, and he had been personally served in Dublin with the debtor's summons. In these circumstances the Lords Justices held that the proceedings in bankruptcy in England were invalid—Ireland and Scotland being expressly exempted from the operation of the Act of 1869. But for what reason should the law be that the process of bankruptcy against a debtor who had an office and did business in England should be invalid in that country, merely because England was not his place of residence, but some other part of the United Kingdom? Common sense would say that in such a case a creditor should fairly have his choice, either to bring the debtor's summons before the Courts of that particular part of the United Kingdom where the debt was contracted, or in the Courts of the part where the debtor resided. It might well be that most of the debtor's property and debts were in the locality of his business, and not of his place of residence; and in any case, when communication is so perfect throughout the country, it would be simple enough to provide that the creditors, after the adjudication,

* Converting the dollar at 3s 8d.

might transfer the management of the bankruptcy to whatever place and Courts were thought most expedient. The Lords Justices supported their case by a reference to the awkwardness which would arise when aliens, resident abroad, were subjected to the process; but there would be no awkwardness if the bankrupt had property in this country, while there would be no use making him bankrupt if there was none. Nor are the cases exactly parallel, for no Court within the United Kingdom could have power over a foreign country, whereas, it is purely a question for our Legislature to determine how far the judicial writs of one part of the United Kingdom should be current in the other two parts—the true policy being to break down barriers as much as possible. Apart from the particular facts of this case therefore—such as the misstatements in the affidavits, upon which the adjudication was granted, to the effect that Sir C. O'Loghlen left England to avoid paying his debts, which the Judges very properly censured—we think it a misfortune that the general rule should be what has been laid down.

THE MANCHESTER CHAMBER OF COMMERCE ON THE STATE OF LANCASHIRE.—We have already more than once drawn attention to the new prosperity of Lancashire and the causes of it, and the statements made at the annual meeting of the Manchester Chamber of Commerce show how much felt the improvement is in Lancashire itself. The chairman stated that "the price of cotton had gone down, while the "price of manufactures had advanced, so that there was a "greater margin than they had known for some time between "the cost of the raw material and the price at which manu-"factured goods were selling. Another satisfactory evidence "of this improvement was seen in the number of new mills "that he heard it was in contemplation to build in the dis-"trict round Manchester. Another subject of congratulation "was in the fact that, as a consequence of this improve-"ment, the working classes were never better employed, or "employed at higher wages than now. So far as out-door "labour was concerned, such was not the case, owing to the "hard weather we were experiencing, but in this respect improve-"ment would only be checked probably for a short period." At the same meeting, with regard to foreign competition, which was so great a bugbear two or three years ago, one of the speakers noticed that, "in 1850, the exports of "manufactured cotton had been 1,000,000,000 lineal yards; "in 1860, the exports had been 2,000,000,000 yards; and in "1870, they had been 3,000,000,000 lineal yards. The facts "that new cotton-mills were being built and more people were "going into the trade showed that there was a large amount "of prosperity in cotton manufacturing." Thus Lancashire is once more looking up, and as there is little enough likelihood of an early rise in cotton, its prosperity may be thought well established for another period. Another observation made by one of the speakers is also worthy of remark:—"Having been on a "committee to examine cotton goods returned from India on "the supposition that they were mildewed, he was glad to "make it known that after going through a great number of "bales they found they were free from mildew in every in-"stance. The mistake had been in concluding goods to be "mildewed from the discoloration of the outside wrappers."

BANKERS AS BAILEES.—Lord Justice James, with the concurrence of Lord Justice Mellish, whom he consulted, has affirmed the decision of the Master of the Rolls—*re* the United Service Company (Limited), Johnston's claim—which was to the effect that the company could not be considered gratuitous bailees of the claimant's securities, they having had a power of attorney to receive the dividends and place them to his account, and the securities being also held to secure the balance of his account. The company, having allowed their manager absolute control of their securities, were also held to have been guilty of negligence. The decision of the Master of the Rolls on a minor point was reversed, the claimant's own negligence being held to have contributed to his loss; but the main decision, which we noticed some time ago, was confirmed.

SHAREHOLDERS' LIABILITIES.—Two more cases arising out of disputes in settling the list of contributories have just been before the Courts. In the one—McEwen *v.* the West London Wharves and Warehouses Company, Limited—the alleged shareholder has succeeded in disputing his liability. The facts were that he had applied for 100 shares, which had been allotted to him; but he sold them in the market to the International Contract Company, which had financed the Wharves Company, delivering to the purchaser the scrip certificates, but executing no deed of transfer. This was in 1865, and no attempt was made to treat him as a shareholder till the winding-up of the International Contract Company, when calls were made and he declined to pay. The Vice-Chancellor held that, in the circumstances, the plaintiff's name had been improperly placed on the register, the Wharves Company having previously dealt with the International Contract Company as the owner of the shares. In the second case—*re* National Provincial Marine Insurance Association, Cliff's case,—the alleged shareholder has been held to be liable. The circumstances were that Mr Cliff, who had been the original allottee of 200 shares in the company, assigned 150 to a Mr Barron, a schoolmaster in reduced circumstances, to whom he, as an old pupil, had made advances, and that the terms of the transfer were that Mr Barron should pay for the shares out of the future dividends, and Mr Cliff should have a lien upon them for his advances. Mr Cliff, too, paid a call which was made before the winding-up. The Master of the Rolls held that the transfer, although registered, was not complete; that Mr Cliff had not intended to abandon his interest in the shares; and that the "balance order" applied for must issue against him.

ACCEPTANCE OF BILLS BY LIQUIDATORS.—The Lords Justices of Appeal in Chancery—*re* the London and Mediterranean Bank, *ex parte* the Agra and Masterman's Bank—have decided that though liquidators under the Winding-up Acts have power to accept bills, yet they cannot delegate their *discretion* to a third party. They also intimated a doubt whether the liquidators had power to delegate the signature of specific bills; but the case before them being one where *discretion* had been delegated, they decided only on that ground. The bills in question had been signed by one of the liquidators and the manager of the London and Mediterranean Bank, in pursuance of a resolution agreed to by the four liquidators; but the terms of the Act are that, in voluntary liquidation, bills accepted on behalf of the company must be signed by two at least of the liquidators, unless a different number is fixed by the company when they are appointed.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, Feb. 1.

An official announcement of the conclusion of an armistice was transmitted to this town by telegraph from Bordeaux. But strange to say it was not accompanied, or preceded, or followed by the news that Paris had capitulated, that its forts had been occupied by the Germans, and that it had to pay 200,000,000f to the conquerors; and it was only from London letters and newspapers that we learned those facts. Most extraordinary was it that the French people—in the rest of France no more was known than at Havre—should have been kept in ignorance by their Government of matters of such immense importance to them; but so it was. The news of the armistice gave rise in this town to no public manifestation either of joy or of displeasure; but at bottom the people were pleased with it, because it gave hope of peace, and at the same time, they sorrowed over the new disaster that had befallen their country. The pompous manner in which M. Gambetta has since seen fit to speak of the event, as if he were really and truly Dictator of France, and has prated about war *à outrance* has grieved the partisans of the Republic, so contrary to Republicanism is it for one man to take so much on himself, and it has subjected him to ridicule from the enemies of that *régime*. As, however, a National Assembly is to be elected forthwith, the will of the entire nation will prevail, not that of citizen Gambetta, and he will be reduced to his proper place, or at all events be prevented from doing mischief.

How the enormous liabilities of the country after the war are to be met has undoubtedly occupied the thoughts of many reflecting men; but thus far no comprehensive scheme has been propounded by anyone having authority. Projects have indeed been put forward for paying off the national debt in unredeemable paper, and so escape the heavy annual charge it occasions for interest; for buying up railways from companies and paying for them in paper also; for issuing *assignats* to an unlimited amount, and forcing people to accept them under pain of death; for extorting money from "the rich;" and so forth. Such projects, however, are absurd and iniquitous, and

the authors of them are men of no note. In truth perhaps it would not be possible at the present moment even for a financial genius, if there were one in France, to say at once all that should be done. But it requires no genius to indicate certain of the measures that might or ought to be undertaken. Among them, the sale, if not of all at least of great part, of the national forests and domains, not in the lump, but in portions, in a series of years; and the immediate disposal of the jewels and the baubles, the palaces and the other things which the French people have had the stupendous folly to keep for years for the mere personal pleasure and splendour of their Kings and Emperors. These sales would produce a good many millions of francs. Then a complete remodelling of the system of taxation might be effected in such a way as to get a larger revenue with greater ease to the people. Or if that, in the agitated state of the country, should not be considered possible, the establishment of an income tax, accompanied by a reduction of the burdens on different branches of industry, would be desirable. This latter scheme, found advantageous in England, could not fail to work well in France. If borrowing should be necessary, as undoubtedly it will be, there seems no reason why the State should not do for itself what it has allowed the City of Paris, the Credit Foncier, and the Suez Canal to do—attach lottery prizes to its loans. In spite of the objections to lotteries, the French are devotedly attached to them, and with them content themselves with an extremely low rate of interest for their money. In the difficulties that will beset the Government, it might well take advantage of this weakness of the people. By doing so, it would get money more easily, and would have less to pay for it than by borrowing in the ordinary way. It would, moreover, bring forth a lot of hoarded coin, the clients of lotteries being addicted to thesaurisation. Whilst creating resources, it would of course be desirable that a large reduction in expenditure should be effected; but the passion of Frenchmen for living wholly or in part on the public as placemen—a passion fiercer even under a Republic than under a Monarchy—forbids any very strong hope in that respect. The army and navy, however, cannot, we may assume, fail to be reduced.

That under existing circumstances the Treasury is fearfully embarrassed no thinking man can doubt, seeing that receipts have been greatly below their normal figure, and expenses immensely above. It would not be worth while to notice incidents that demonstrate a situation so inevitable, were it not that the branch of the Government established at Bordeaux has repeatedly affirmed (in, however, a non-official manner) that it is in no want of resources, and that some correspondents of English newspapers, placing credit in it, have declared that there is "plenty of money" in hand. Facts proving the contrary have already been brought under your notice, the most striking being an arrangement for paying pensions earned by seafaring men not in cash, but in oysters, to be dredged in Arcachon. To them may be added these two, presented this week:—First, in answer to an inquiry from the Prefects of Departments as to whether the subventions promised by decree of July, 1870, for completing cross-roads would be granted, the Minister of the Interior, M. Gambetta, has in a circular said, "most undoubtedly," and accordingly he "invites them to put down in their Budgets the sums accorded." But at the same time he orders them "not to proceed to the division of the subventions among different localities until the situation of the Treasury shall permit the payment of them." The second instance is this:—In the last sitting of the Municipal Council of Havre, the Colonel of Engineers charged with the erection of the works for the defence of the town reported that, in consequence of the "persisting delay in the arrival of funds promised by the Minister of War," he could not continue his operations unless a sum of 200,000f were placed in his hands. The Council resolved to advance him the money, but "on the express condition that it should be reimbursed at the earliest possible moment by the Government."

In spite of its embarrassments, the Bordeaux Government continues to issue financial decrees in a very magnificent way. It has ordered that of 20,000,000f promised some time back to poor departments for furnishing batteries of artillery, 12,784,000f shall be set apart for 1871; that of 300,000f accorded as an extraordinary contribution for the artillery of the Mobilised National Guards, 250,000f shall be spent in 1871; that an additional sum of 52,500,000f shall be accorded for buying arms from private manufacturers; and that an extraordinary credit of 200,000f, in addition to one of like amount of the 4th January, shall be granted for carrying letters to Paris by special means. That other sums have been disposed of is probable, but the preceding are all we have heard of in these parts.

The immediate convocation of a National Assembly is particularly satisfactory, in that the reckless expenditure which has for some months been made, without anything like control, by the Tours-Bordeaux gentlemen will certainly be restrained, and that the projects of new taxation they are stated to have proposed will be subjected to revision. One of these projects is said to be the imposition of a tax of from 5 to 10 per cent. on the revenue from foreign stocks, shares, and bonds. Such a charge, added to what is already levied for the negotiation of foreign securities on the Bourse, would have, of course, the effect of driving all such *valeurs* from the French money market, and of subjecting French holders to grievous loss. It is surprising that the Bordeaux rulers did not see this, or had no one to tell it them.

The Bordeaux Government thought fit some time back to order that when the Prussians appeared in, or threatened any part of the coast from the Saint Valery-sur-Somme to the mouth of the river that leads to Caen, it should be blockaded. In consequence of this Dieppe and Fecamp have for some time past been blockaded by French vessels of war, as if they were enemy's ports. The measure has been disastrous to them, stopping their maritime trade, and preventing them from obtaining coffee, sugar, salt, and other things of general necessity. In Fecamp it has besides struck a heavy blow at the cod-fishery of Newfoundland, one of the principal industries of the town—a number of fishing vessels that had gone to England for safety not having been able to return in due time, and a number of others that remained in port not having been able to get the salt they needed for curing. The Government of Bordeaux have just, however, notified that on account of the armistice the blockade is to cease. It deserves severe censure for having established it.

Another measure of these Bordeaux rulers ought also to be set aside—that, namely, which prohibits the export from Normandy of grain, oxen, sheep, and other agricultural products. It has had the effect of depriving Norman farmers of their customary market in England, and has thereby subjected them to grievous loss, and has at the same time enabled the Prussians to "requisition" such things largely for nothing. A more absurd decree could not have been imagined.

M. Jules Favre telegraphed yesterday from Versailles to the sub-prefect of Havre to send immediately to Paris all the stores of provisions and of fuel he can by way of Amiens and Rouen. Fom this it appears that it is not possible to render the Seine navigable, or to repair the Western Railway beyond Rouen with anything like promptitude. Even on the line between Havre and Rouen several days will be required to patch up bridges and viaducts in such a way as to permit trains to pass over them. To what extent the railway between Dieppe and Rouen has been broken up is not known here; but as the French Embassy at London has requested that stores from England may be sent to Dieppe, we may assume that it can be utilised. The quickest way of communication from England with Paris will, however, undoubtedly be the Northern Railway, that is by Boulogne, Calais, or St Valery-sur-Somme, the Germans having kept that line in good order for their own purposes.

The Post Office notifies that from this day letters may be sent to Paris, via Versailles, but that they must not be sealed-up. It is M. de Bismarck who has imposed this condition. Nothing could well be more churlish. Exiles from Paris will write to know what during their absence has become of their families, friends, servants, business, fortunes, houses, and furniture; and of what earthly interest can such things be to the Germans?

Before the outbreak of the war it may be remembered an attempt was made by the Protectionists to obtain a denunciation of the Treaty of Commerce with England. In spite of the invasion of their country these gentry have not lost sight of the matter, and at Lille, Roubaix, and Amiens, have latterly agitated it anew. It is probable they have done the same at Rouen also; but communications with that city having been entirely suspended for weeks past, we are not informed. At Havre, where the Treaty is generally, though not unanimously, approved of, the desire is expressed that the Government shall do nothing with respect to it, but leave it to be dealt with by a Parliament in quieter times.

In the last letters and newspapers from Paris, brought by balloon, and which are to the 23rd, little is said on the subject of the loan of 400,000,000f. alleged to have been obtained by the Government from the Bank of France; and that little is to the effect that the belief was that the money, or the greater part of it, was not destined to be employed in the capital, but to be sent to Bordeaux.

From Paris we learn that the Bank of France had commenced the issue of 20f notes, destined to replace those of 25f. The remark was made in a previous letter that objection was presented to notes of 25f, as less convenient than those of 20f in counting by the decimal system, but that nevertheless, having been adopted, the advantage of superseding them by 20f paper was not apparent to people out of Paris. These people will no doubt find the reason of the measure explained when they return to the capital.

The Bourse quotations of Paris that have reached us are these :—

	Jan. 21. f c		Jan. 23. f c
Threes—cash	50 75		50 65
End of month	50 80		50 70
New Loan (Empire)—cash	51 70		50 80
End of month	51 70		51 80
Bank of France	2325 0		...
Italian	...		54 25
Lyons Railway	...		766 0
Northern ditto	...		877 0
Suez Canal	...		225 0

At Paris some days back the Government thought fit to "make known to the holders of foreign securities the arrangements for the payment of coupons and interest ordinarily effected in that capital." They were, it said, that Austrian dividends were to be paid at the Ministry of Finance, at Vienna; Italian, by Messrs de Rothschild, at London; Ottoman at London also. All this has long been known out of Paris, and the announcement was made there no doubt to enable distressed holders to sell or borrow on their coupons. Of other foreign securities no mention was made in the Governmental announcement.

In answer to the appeal of the Government, the Southern Railway has for its part paid in advance for all its taxes for 1871. It is the only one of the great lines that has not suffered from partial destruction in the war; but its traffic must necessarily have greatly declined.

The total receipts of the Suez Canal for 1870 are stated to be 6,387,204f.

The Havre market continues to present little activity: even the conclusion of an armistice has not influenced it.

COTTON.—The sales of the week ending Friday last were only 173 bales, and the quotations fixed on that day by brokers were—For New Orleans very ordinary, 104f the 50 kilogs; Oomrawuttee good ordinary, 85f; Tinnivelly ditto, 80f; Madras ditto, 74f. From Friday up to to-day the sales have been 200 bales.

COFFEE.—In the week ending Friday the sales were 1,218 sacks Hayti, 97f to 105f the 50 kilogs. duty paid; 180 Rio washed, 120f; 350 Santos, 104f; 100 Malabar, 110f. Also some Rio and Ceylon by auction. Since Friday 100 Hayti, 70f, duty paid; 180 ditto, 105f; 700 Port-au-Prince, 104f; 483 Santos, 106f and 106f 50c; 1,100 Malabar, 100f; 270 Rio washed, 115f.

SUGAR.—No sales.

INDIGO.—The Bengal mentioned last week was, it is said, taken at about 1f 25c premium the ½ kilog.

HIDES.—3,000 Monte Video salted ox, 61f the 50 kilogs; 2,000 Pernambuco salted, 55f; 4,000 ditto dry salted, 84f.

WOOL.—No sales.

TALLOW.—100 tons La Plata sheep, 50f 50c and 51f the 50 kilogs, duty paid.

Owing to the extreme difficulty of railway communications with the southern and western parts of the country, the reports of the Bordeaux, Marseilles, and Nantes markets received here are of too old a date to be of any interest.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and Jan. 28, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870-71.	Total Exchequer Receipts To Jan. 28, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1870—					
Bank of England	...	7,633,761		3,775,717

Totals			62,677,268		64,602,240

The following are the Receipts on account of Revenue during the week ending Jan. 28 :—

	Receipts of Week Ending Jan. 28. £
Customs	410,000
Excise	691,000
Stamps	197,000
Taxes	245,000
Income tax	535,000
Post Office	nil.
Telegraphs	50,000
Crown lands	nil.
Miscellaneous	13,631
Total	2,141,631

The total receipts of the previous week were 1,597,697l.

The Exchequer issues of the week on account of expenditure were 1,168,276l, viz. :—

	£
Interest of debt	400,000
Other charges on Consolidated fund	97,953
Supply services	670,323
Telegraph services	nil.
	1,168,276

During the week the cash balances have decreased as follows :—

	Bank of England. £	Bank of Ireland. £	Total. £
Balances on Jan. 21	888,790	557,304	1,446,094
— — 28	873,167	549,511	1,422,678
Decrease	15,623	7,793	23,416

The other receipts to date were 972,501l less than last week. The other payments were 24,270l.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Alta California* states that the supply of gold bullion from California in 1870 shows an increase, notwithstanding an insufficiency of rain for the wants of the miners. The gold bars sent to the Mint were of the value of $20,492,055; the gold bars exported, $8,962,148; and the silver bars exported, $11,672,391, making a total of $41,126,594. The year's export of merchandise, being domestic produce, was of the value of $17,135,708; of foreign and Eastern merchandise, $3,103,114; and of treasure, $33,509,480, making a total of $53,748,296. The export of wheat in 1870 was less than in 1869, but still amounted to 4,197,397 sacks (of 100 lbs), of the value of $7,072,404; and of flour, 218,570 barrels, of the value of $1,151,056. Almost the whole export of wheat was to the United Kingdom, but some was sent to China, Japan, and Australia.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fourth week of January, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresponding Total in 1870.
	Adults and Children	Adults.	Children under 16	4th week Jan., 1871.	
West district	6,035	10,091	7,607	23,733*	24,525
North district	6,828	14,664	12,358	33,850	31,298
Central district	7,066	8,890	7,591	23,547	23,339
East district	7,821	12,408	11,255	31,484	34,979
South district	9,238	20,670	19,856	49,764	48,539
Total of the Metropolis	36,988	66,723†	58,667	162,378	162,680

* No returns have been received this week from St George's (West District).
† Of these outdoor paupers, 19,383 are men and 47,340 are women.

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,802,000.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 1st day of February, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,182,060	Government Debt	11,015,100
		Other Securities	3,984,900
		Gold Coin and Bullion	21,182,060
		Silver Bullion	...
	36,182,060		36,182,060

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities	12,925,669
Rest	3,343,727	Other Securities	16,829,505
Public Deposits (including Exchequer, Savings' Banks, Commissioners of National Debt, and Dividend Accounts	5,090,016	Notes	12,390,180
		Gold and Silver Coin	691,321
Other Deposits	19,091,253		
Seven-day and other Bills	367,979		
	42,845,975		42,845,975

Dated the 2nd February, 1871.

G. FORBES, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	24,550,559	Securities	30,202,174
Public Deposits	5,090,016	Coin and Bullion	21,873,381
Private Deposits	19,091,253		
	48,731,828		52,075,555

The balance of Assets above Liabilities being 3,343,727*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase.	Decrease.
	£	£
Circulation	294,695	...
Public Deposits	729,180	...
Other Deposits	...	1,103,106
Government Securities	...	1,000,000
Other Securities	848,145	...
Bullion	90,429	...
Rest	18,105	...
Reserve	...	198,246

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Feb. 1, 1871.	Week ending Jan. 25, 1871.	Week ending Feb. 2, 1870.
	£	£	£
Thursday	9,478,000	9,686,000	9,528,000
Friday	23,[illegible]	11,072,000	26,349,000
Saturday	14,[illegible]	10,704,000	16,284,000
Monday	14,[illegible]	11,[illegible]	16,[illegible]
Tuesday	14,[illegible]	15,[illegible]	15,[illegible]
Wednesday	14,[illegible]	9,861,000	11,407,000
Total	90,427,000	65,[illegible]	95,458,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, Feb. 2, 1870.

The total since the 4th of January, 1871, is 310,899,000*l*, compared with 324,374,000*l* for the corresponding period last year, showing a decrease of 13,375,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding dates with the present week.	Feb. 6, 1861.	Feb. 5, 1868.	Feb. 3, 1869.	Feb. 2, 1870.	Feb. 1, 1871.
	£	£	£	£	£
Circulation, including bank post bills	20,534,616	24,327,678	24,311,278	23,742,378	24,550,559

Clearing-house returns	...	76,195,000	83,553,000	95,458,000	90,427,000

In 1861, there was temporarily a good demand for money, in consequence of the numerous biddings for a loan to the Indian Government; but the general circumstances of the money market indicated the approach of greater ease. The American crisis still occupied all minds, though the debates in Parliament threatened to turn on Italian affairs, and the recent annexation of Naples and part of the States of the Church to the kingdom of Victor Emmanuel.

In 1868, there had been a tendency to send bullion to the continent, partly, it was supposed, to pay for the imports of grain in consequence of the deficient harvest of 1867, and partly to obtain a rather higher interest than the rate current in England.

In 1869, there was an upward tendency in the discount rates, and a steady augmentation of the value of money was looked forward to. Among home subjects the state of pauperism in London was the subject of much discussion, the famine of 1866 and the distress of previous years having left a large remnant of chronic pauperism.

In 1870, the rate for money was again easier after the temporary pressure of the previous week. It had now become evident that prosperity had returned to Lancashire, and a great improvement in business was looked forward to.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,007,278*l*; in 1868, an excess of 4,505,507*l*; in 1869, an excess of 732,239*l*; and in 1870, an excess of 451,478*l*. In 1871, there is an excess of 2,261,748*l*.

DISCOUNT AND MONEY MARKET.—There has again been an upward tendency in the money market, and the rate for the best short-dated Bank bills is now 2½ instead of 2¼ ⅜, which we quoted last week. The increase in the rates for trade bills and for long-dated paper is still greater. The demand, both in the open market and at the Bank, has been very active, there being some apprehension on Wednesday of a rise in the Bank rate, and there being still a general and probably just impression that an early rise is to be looked for. To-day the rates have remained firm, although the announcement of harsh proposals of peace from Germany tends to prolong the suspense, and the dealers are offered plenty of money at call. The demand at the Bank has likewise been very good to-day. Things are still in suspense, and though little doubt is entertained that peace will be brought about somehow, there is a disposition to wait till there is some prospect of the preliminaries being arranged, and some knowledge of what the terms are. The unofficial statements about the German terms have tended to check the effects which would naturally be looked for on the approach of peace.

The increase of "other securities" at the Bank during the week was 848,000*l*, which shows the pressure upon the establishment for discounts. At the same time, however, the receipts of bullion have exceeded the withdrawals by the sum of 90,000*l*, so that the withdrawals on continental account have already ceased to make a distinct impression. But with the certain return of peace we may expect the movement to be resumed to a greater or less extent.

We subjoin our usual quotations for mercantile paper having various periods to run:—

Bank bills—3 months	.....	2½	per cent.
Do 4 —	.....	3	per cent.
Do 6 —	.....	3½	per cent.

Trade bills—Short		2⅜	per cent.
Do	3 months	2⅜ 3	per cent.
Do	4 —	3 3½	per cent.
Do	6 —	3¾ 4	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½	per cent.
Discount houses at call	1½	per cent.
Do with seven days' notice	1¾	per cent.
Do fourteen days	2	per cent.

The allowance for money at fourteen days' notice was increased last Saturday from 1¾ per cent. to 2 per cent., which has continued the figure throughout the week.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6	2½	...
Vienna	5	6	5	5
Berlin	5	5	4½	4
Frankfort	4	4	3¾	3⅞
Amsterdam	5	4	5	3⅝
Turin	5	6	5	6
Brussels	2½	4	2½	3¾
Madrid	5	5	5	5
Hamburg	...	...	4	4¼
St Petersburg	5	8	5½	7

English Government Stocks.—The stock markets opened this week with a favourable tone under the influence of the news that the capitulation of Paris and an armistice had actually been signed by M. Jules Favre, and that elections for a new Constituent Assembly, to meet at Bordeaux within twenty-one days—before the expiration of the armistice—were to be held on the 8th instant. Under the influence of these reports, prices kept up at the begininning of the week; but towards Wednesday there was a reaction, Consols gradually drooping, and the rates for money becoming a good deal firmer. On Wednesday a sudden drop took place—the stiffness in the money market creating an impression that the Bank rate would be put up on Thursday, some alarm being caused by statements from the Berlin correspondent of the *Times* respecting the proposed German terms of peace, and the railway market being also unfavourably affected by the disappointment of expectations respecting the Midland dividend. The statements as to the German terms—an indemnity of 400,000,000*l*, the cession of Alsace and Lorraine, as well as of Pondicherry, in the East Indies, and twenty war ships—were certainly alarming enough, and the weakness of the market has been maintained by the absence of any subsequent contradiction of the statements; but it would appear that the state of dealings in the market and the prospects of peace were of themselves sufficient to account for a good deal of the weakness that has been shown. It is obvious that with the approach of peace, or the continuance of war on new conditions, the past suspense will be ended, and there will be considerable demands for money. The stock markets besides have been very sensitive lately, owing to the high point to which prices had crept up during the suspense. On Thursday and to-day there has been the usual reaction after sales, which has been assisted in the railway market by the unexpectedly good dividends of the North-Eastern and London and South-Western Companies, but on the whole there has been little business, and the tone remains flat. In the face of the probable rise of money, no great improvement is likely, except in special securities, for a few months to come.

In Consols the lowest price of the week was on Thursday morning 91⅝ ¾; but there was an improvement the same day of ⅛, which was maintained to-day, the closing price being 91 15/16 92 1/16. The fall for the week, however, has been ⅝. In New and Reduced the lowest price was 91⅞ 92, and the fall for the week is also ⅝, the closing price being 92⅛. The settlement of the account was arranged on Thursday without difficulty; but there has since been comparatively little business done, a feature which has generally extended to other departments.

On Tuesday the Government broker applied a sum of 19,000*l* to the purchase of Government securities, but a good deal of disappointment was occasioned by the announcement that this would be all the purchases of the quarter—the balance of 1,000,000*l* available for the Sinking Fund having been applied to pay off the deficiency bills of the Government. One of the causes which were counted upon to maintain the price of Consols has thus been suddenly taken away.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March.	June.
Saturday	92⅜	92½	92⅜	92½	10s pm	15s pm
Monday	92	92½	92	92½	10s pm	15s pm
Tuesday	91⅞	92	91⅞	92	10s pm	15s pm
Wednesday	91⅜	92	91⅜	92	7s pm	12s pm
Thursday	91⅝	91⅞	91⅝	91⅞	7s pm	12s pm
Friday	91¼	92	91¼	92 1/16	10s pm	15s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
Consols for money	92⅛ ⅛		91⅞ 2	–	⅛
Ditto account	92¼ ⅛		91 15/16 2 1/16	–	1 1/16
Reduced 3 %	92⅛ ¼		92 ⅛	–	⅛
New 3 %	92⅛ ¼		92 ⅛	–	⅛
Bank Stock, last dividend 4½ %	236 8		241 3	+	5
India Stock, 10½ %, red. at 200 Apl. 30, 1874	204 6		205 7	+	1
Ditto 5 %, red. at par, July 5, 1880	110½ ¼		113 ½	+	2¼

Exchequer Bills.—10s to 15s pm.

Colonial Government Securities.—The following are the changes for the week in this department :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
Canada 6 %	103½ 4½		104 5	+	½
Ditto 5 %	98 9		98 9	...	...
New Zealand 5 % Consolidated Bonds	99½ 100½		99 ½	+	1
New South Wales 5 % Bonds, 1883 to 1896	100 1		99½ 100½	–	½
Nova Scotia 6 % Bonds, 1875	102 3		102 3	...	...
Queensland Government 6 % Bonds, 1884-5	107 8		107 8	...	...
Victoria 6 %	112 13		112 13	...	...
Ditto New 5 %	101½ 2½		101 2	–	½

Foreign Government Stocks.—There was a slight improvement on Saturday in most descriptions, but afterwards until Wednesday there was a steady decline—the closing prices of that day being 1⅝ lower than the closing prices of last Friday in Egyptian (7 per Cent., 1868); 1½ in Italian 5 per Cents.; 1½ in Mexican New 3 per Cents.; 1⅜ in Turkish 5 per Cents., 1865, and 1½ in 6 per Cent. Bonds, 1869; 1 1/16 in Spanish 3 per Cents.; ¼ in Portuguese 3 per Cents.; and ½ in Argentine 6 per Cents. The drop in the latter case was mainly due to the announcement of a new loan for 6,000,000*l* to be brought out next week; but the other changes we have noted show a movement in the market, due to the general causes we have indicated above. Foreign stocks were too high, and the inevitable sales consequent on the approach of peace, with the unfavourable rumours of Prussian terms, naturally had a great effect. The flat tone of the market since Wednesday, coupled with an indisposition to transact business, has continued to-day, though prices are generally a shade better.

To-day there was some temporary weakness in Turkish securities, in consequence of some hitch in the provision of money for the dividends as the 1865 loan now due, but the affair was promptly arranged. In such a weak stock as Turkish, an incident of the kind is apt to have a more than usually prejudicial effect.

The report of peace has continued to have an excellent effect on the French National Defence loan, which advanced early in the week to 2½ prem., and notwithstanding subsequent fluctuations, is now at an advance of 2 for the week. The German loan (first portion), under the influence of the same news, went to 2⅜ prem., and closes at 1⅞ 2⅛ pm. Allotment letters for the second portion of the loan were issued this morning, and the scrip of this portion is at ⅝ to ¾ pm.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

The Secretary of the Committee of Mexican Bondholders states "that the terms of the project of settlement submitted by their agent in his letter of the 29th of December, and published on the 30th ult., appearing to them inadmissible, they have telegraphed to Mexico suggesting certain amendments. In the event of these communications resulting in the receipt of a formal proposition from the Government of Mexico, it will be immediately submitted to the bondholders at a public meeting."

A Würtemberg loan, exclusively for Germany, for 9,000,000 florins has been contracted with Messrs von Erlanger and Sons, of Frankfort.

ENGLISH RAILWAY STOCKS.—In this department the fall in the early part of the week was almost as conspicuous as in foreign securities, though the market is undoubtedly not really so weak, owing to the progressive improvement in the profits of the principal lines. The closing prices of Wednesday, compared with those of last Friday, showed Midland to have fallen 2⅜; North-Eastern, 1½; Great Northern, 1, and A, 2; Great Eastern, 1⅜; London and North-Western, 1½; Lancashire and Yorkshire, ¾; Metropolitan District, ¾; Caledonian, ½; North British, ½; and South-Eastern Deferred, 1, Preferred, 1½, and Ordinary, ¾. Of the great lines the London and South-Western had alone remained stationary, while London and Brighton had improved ⅜. The special weakness of the market, assisted no doubt by the general causes we have referred to, was owing to the disappointment of public expectations in the matter of the Midland, Lancashire and Yorkshire, and Great Eastern dividends—the announcement of the Midland especially telling on Wednesday's market. It would seem that in these cases the general expectation has been that the Midland would pay 7½; Lancashire and Yorkshire, 7½; and Great Eastern, 2; whereas the actual announcements are 7, 7, and 1¼ respectively; but the expectations were perhaps exaggerated, at least in the case of the Midland. Subsequently the tone was better, the announcement of the London and South-Western dividend of 5¾ being better than was expected, and that of the North-Eastern, 8½, which is an improvement of 1¼ on the corresponding dividend of last year, being quite up to the most sanguine expectations, and rather more than the minimum which it would have been safe to speculate upon. The home railway market has thus been better both on Thursday and to-day, and the closing prices we subjoin, as will be seen, show slighter falls from last week than the above comparison of the lowest prices of the week.

Late in the afternoon to-day there was renewed heaviness, on account of the announcement that the Great Northern dividend would be 8¼ on the ordinary stock and 10½ on the A stock, which have disappointed speculators. The advance shown by these figures is nevertheless a very important one on the corresponding dividend of last year, and in any other state of the market ought not to have caused heaviness. There are other causes of weakness in the Great Northern stock—especially the competition for the coal traffic, which does not seem to be coming to an end. The Metropolitan dividend is also announced to-day, viz., 3½, and is fairly up to expectation.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Caledonian	88 ½	.....	87½ 8		−	½
Great Eastern	40½ 1	.....	39 ½		−	1½

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), for the week ending January 28, amounted to 674,859*l*, being an increase of 26,793*l* on the corresponding week of the previous year. The principal increases are—North-Eastern, 5,871*l*; London and North-Western, 4,441*l*; Lancashire and Yorkshire, 3,162*l*; Great Western, 3,152*l*; and Caledonian, 3,018*l*. The following shows the increase or decrease in each case, both for the week and for the aggregate of the half-year to date:—

* The aggregate in the case of these companies is reckoned from the 1st of August, 1870.

FOREIGN AND COLONIAL RAILWAYS.—These shared to a comparatively slight extent in the depression of the early part of the week in foreign securities, and there are only slight variations to note for the whole week. The colonial railways and some foreign lines, as well as the Colonial Government securities and our own railway debentures, have been steadily sought out for investment, and prices have now reached a very high point.

We subjoin our usual list of the changes for the week:—

FOREIGN.	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Antwerp and Rotterdam	12⅜ ⅛	.....	12⅜ ⅛		−	⅛

Subscriptions are now invited for 5,000 7 per cent. preference shares of the Porto Alegre and New Hamburg Brazilian Railway Company, Limited, according to an amended prospectus, the former one having been withdrawn owing to a technical informality. The capital of the company is 292,500*l*, in 14,625 shares of 20*l* each, of which 10,000 are preference shares—half of them now offered to the public. The Brazilian province of Sao Pedro do Rio Grande do Sul, through which the railway runs, and which is stated to be one of the richest in the Empire, guarantees 5 per cent. upon the whole capital of the company, amounting to 14,625*l*, which is to be appropriated to, and will be sufficient to pay, the interest on the preference shares.

The prospectus has been issued of the Glasgow and Cape Breton (Nova Scotia) Coal and Railway Company, Limited, with a capital of 100,000*l*, in shares of 10*l* each. The

prospectus states that the line is authorised by Act of the Nova Scotia Legislature, and that Government, recognising the great importance of providing cheap and ample accommodation of transit from these coal fields, has granted a lease for seventy-eight years, of one square mile of the most valuable coal seams in the district. The present means of transport being but of a limited nature, the existing collieries only raised the quantity shown in the Government report for want of further railway accommodation, and when this line is completed they will at once increase their outpost. Along the line between the Reserve and Sydney Harbour, several coal claims have been taken up, and will commence working as soon as they are supplied with the necessary means of transit. It is added, as a most important consideration, "that in all probability the import duty of 5s a ton on coal "sent to the United States will, during this season, be entirely "abolished; but in any case, the reduction from 5s to 2s has "already been sanctioned by Congress."

AMERICAN SECURITIES.—A moderate business has been concluded in Five-Twenty bonds this week, but sales have preponderated, and prices are accordingly weaker. The fluctuations have been unimportant, the changes in the week being as follows:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90¾ 1	.....	90¾ ¾	—	¼
Ditto 1865 Issue	90¼ ⅜	.....	90 ¼	—	⅛
Ditto 1867 Issue	89⅝ ⅜	.....	89 ¼	—	⅛
Ditto 5 % 10/40 Bonds, exchange 4/6 ...	89 ¼	.....	89 ¼	...	...
Atlantic and Great Western Consol. Bonds	28 9	.....	28 9	...	...
Erie Shares	18⅝ ⅞	.....	18 ⅛	—	⅛
Illinois Central Shares	110 11	.....	109½ 10	—	½
Massachussets 5 % Sterling Bonds, 1900...	93 5	.....	93 5	...	...
Panama General Mortgage 7 % Bonds, 1897	94 6	... .	93 5	—	1
Pennsylvania Gen. Mort. 6 % Bonds, 1910	90¼ 1½	.....	90½ 1½	...	...
Virginia 6 % Bonds	55 7	.....	54 6	—	1
Ditto 5 % Sterling Bonds	55 8	.....	55 8	...	...

JOINT STOCK BANK SHARES.—The changes in this department have generally been of a favourable character, the prospect of an early advance in the value of money, coupled with the removal of the obstacles to trade created by the Franco-German war, having induced further purchases. Agra shares have advanced ½; Anglo-Egyptian, ¼; Bank of Australasia, Egypt, and Chartered Mercantile, 1; London Joint Stock, 1½; London and County, London and Westminster, and Union of London, ½. On the other hand, Anglo-Austrian, Imperial Ottoman, and Union of Australia have declined ½; and Midland shares, ¼.

TELEGRAPHS.—The transactions in telegraph shares during the week under review have not been extensive, and the quotations are without important variation. The only changes worthy of note are—a rise of ¾ in China Submarine and West India; ½ in Mediteranean Extension; and a decline of ¼ in British Indian Submarine and French Cables. Construction shares have shown firmness, Telegraph Constructions having advanced 1, and Silver's India Rubber ½. In Hooper's Telegraph Works, however, there is a reaction of ½.

MINES.—The recent announcement of several new concerns has had the effect of checking speculation in the mining market, and values were depressed at the opening of the week. Subsequently, however, a reaction took place. Among British mines Tin Croft are 1, and South Condurrow ¾ better. Wheal Mary Ann have declined 2; Van, 1; Tankerville and Great Laxey, ½. The market for foreign mines opened with dulness, but to-day's closing quotations show a slight improvement. Cape Copper are 1; Eberhardt and United Mexican ½ better. The new ventures do not appear to have made much progress.

MISCELLANEOUS.—In this department there has been little doing; nevertheless prices have been well supported, Bolckow-Vaughan and Canada shares showing a rise of 3 on the week; Australian Agricultural, ½; Royal Mail Steam, 1; and Berlin Waterworks, ¼. Hudson's Bay shares have declined slightly; otherwise there is no adverse movement.

EXCHANGES.—The exchange on Belgium has again altered this week by 2½ centimes, showing a farther diminution in the demand for the means of remittance to that country. The recent withdrawals of bullion for export have thus answered their purpose. On the other hand, the exchange on Italian cities has varied in the week, from 26.82½ 87½ to 26.77½ 82½, showing an increased demand for the means of remittance to Italy.

On Tuesday the short exchange on Paris, after a long interruption, was quoted 25.20 30; but there is no similar quotation to-day. The three months' quotation is very wide.

The biddings for 400,000*l* in bills on India were held on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 299,500*l*; to Bombay, 100,000*l*; and to Madras, 500*l*. The minimum price was fixed as before, at 1s 10d on all the Presidencies, and tenders on Calcutta and Madras at 1s 10½d will receive about 9 per cent., on Bombay at that rate about 32 per cent., and above in full. These results show an increase in the demand for means of remittance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The demand for the continent has sensibly declined the past two days, and we look for an influx to the Bank during this week of some portion of the late arrivals. There were withdrawals of gold from the Bank in the early part of the week, before the undermentioned supplies came on the market, amounting to 77,000*l*, and sovereigns to the value of 201,000*l* have also been taken out for Egypt. The Nile has brought 84,500*l* from the West Indies; the Nyanza has brought 550,190*l* from Melbourne; the Somersetshire has brought 16,500*l* from Melbourne; the Caldera has brought 60,000*l* from Valparaiso—total, 711,190*l*. The Massilia has taken 28,300*l* to Alexandria.

Silver.—Fine bars remain as last quoted; the demand is entirely for Holland, and there are buyers at 60½d per oz standard. The Nile has brought 45,900*l* from the West Indies; Nyanza has brought 387,224*l* from China; Nebraska has brought 10,000*l* from New York; Siberia 11,000*l* from New York; City of Paris has brought 30,000*l* from New York—total, 484,124*l*. The Seine has taken 17,150*l* to the West Indies.

Mexican dollars.—From the West Indies and New York we have received during the week about 110,000*l* of this coin; with the exception of a few trifling orders for China, they have been taken for refining purposes.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10⅜d to 1s 10½d on all the Presidencies. The Council drafts on India were allotted yesterday; the minimum, as before, was 1s 10d per rupee. Tenders on Calcutta and Madras at 1s 10½d will receive about 9 per cent., and on Bombay at that price 32 per cent.; all above in full.

India Government loan notes.—We quote 4 per Cents. 90 to 90½; 5 per Cents., 98½ to 99; and 5½ per Cents., 106 to 106½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅜d to 5s 0 15/16d per oz std, last price; ditto, containing 5 grains gold, 5s 0 7/16d per oz std; Mexican dollars, 4s 10⅜d to 4s 10½d per oz. Quicksilver, 11*l* to 12*l* per bottle; discount, 3 per cent.

According to the official returns published in to-night's *Gazette*, the imports of the precious metals into the United Kingdom during the week ended February 1 were—Gold, 665,218*l*; silver, 666,818*l*. The exports were—Gold, 283,997*l*; silver, 86,241*l*.

To-day the sum of 10,000*l* was withdrawn from the Bank for transmission to Egypt.

PUBLIC COMPANIES.

RAILWAY COMPANIES.

Blackpool and Lytham.—Dividend announced at the rate of 3 per cent. per annum.

Bristol and Exeter.—A dividend at the rate of 5½ per cent. per annum has been announced.

Carnatic.—The surveys are under the consideration of Government, and as soon as their decision is known the necessary works will be commenced. The revenue upon the present section is 1,987*l.* and the net balance 620*l.*

Colchester and Stour Valley.—Dividend announced at the rate of 3*l* 8s per cent. per annum.

Glasgow and Cape Breton (Nova Scotia) Coal and Railway, Limited.—Capital, 100,000*l.* in 10*l* shares. The company proposes to construct a cheap line in Cape Breton Island, 21 miles long, to open up a valuable coal district; and the Nova Scotian Government grant a lease, by way of bonus, of a square mile of land, containing important seams of coal. These collieries offer to guarantee a large traffic to the railway; and the contract price for way and plant is 82,000*l.*

Great Eastern.—A dividend at the rate of 1¾ per cent. per annum has been announced, as contrasted with 1 per cent. this time last year.

Great Northern.—The dividend is announced at the rate of 8¼ per cent. per annum, as contrasted with 7¾ per cent. at the corresponding period. The A stock dividend will be at the rate of 10½ per cent.

Lake Shore and Michigan Southern.—Messrs Foster and Braithwaite invite application for $2,000,000 7 per Cent. Consolidated Mortgage Currency Bonds at 79. The bonds are payable to bearer, and are redeemable July 1, 1900. The amount of the mortgage is $25,000,000, and the company undertake to set aside $250,000 annually on account of a sinking fund.

Lancashire and Yorkshire.—A 7 per cent. per annum distribution is notified.

London, Brighton, and South Coast.—At the meeting the dividend at the rate of 1½ per cent. was declared, and the board were authorised to construct a short branch to the New Foreign Cattle Market.

London and South-Western.—Dividend officially recommended at the rate of 5¾ per cent., as against 5¼ per cent. for the corresponding half of 1869.

Londonderry and Enniskillen.—The report recommended that a dividend at the rate of 5 per cent. per annum be declared and paid on the 3,062*l* stock B, also a dividend at the rate of 5 per cent. per annum on the 31,850*l* stock A; also a dividend at the rate of 5 per cent., together with 1¾ per cent. on account of arrears, making 6¾ per cent. per annum on 247,737*l* stock B, leaving a balance of 24*l*, leaving arrears of dividend as under:—Due to B stock, 6*l* 14s 6d per cent., and to C stock, 76*l* 6s per cent. The capital account to the 31st December last showed that 710,125*l* had been expended.

Maryport and Carlisle.—Dividend announced at the rate of 12 per cent. per annum.

Metropolitan.—A dividend at the rate of 3¼ per cent. per annum is recommended.

Midland.—The dividend is announced at the rate of 6¾ per cent. per annum, as compared with 6½ per cent. for the corresponding half.

Neath and Brecon Railway—New 6 per Cent. A Debenture Stock.—Messrs Coates and Hankey receive subscriptions for 120,000*l* (out of a total of 150,000*l*) A debenture stock at par. The capital is a first charge upon the net revenue of the line, overriding about 1,250,000*l* in stocks and shares. The board have the right of redemption in ten years at 10 per cent. premium. The main line, 33 miles long, is already open, and this money is required to construct a branch of 7½ miles to the Swansea Vale line.

North-Eastern.—Dividend notified at the rate of 8½ per cent. per annum, as compared with 7¼ per cent. for the second half of 1869.

North Staffordshire.—Dividend announced at the rate of 3 per cent. per annum.

Porto Alegre and New Hamburg (Brazilian) Railway, Limited.—Capital, 292,500*l*, in 14,625 shares of 20*l* each; issue of 5,000 shares, bearing 7 per cent. preferential interest. There is a guarantee from the Province of Sao Pedro do Rio Grande do Sul of 5 per cent. upon the whole capital, and the capital is divided into 10,000 preference shares (the interest upon which is covered by the guarantee), and 4,625 ordinary, taken by the contractors in part payment. The revised prospectus has appeared. The line will connect the two towns mentioned, the contract price being 280,000*l* for the whole 27 miles and plant. The province is stated to be a rich one, there being many German settlers, and a large traffic is looked for. Various favourable concessions have been made to the company by the State.

Ulster.—The report notifies that the gross revenue for the half-year amounted to 84,990*l*, showing an increase of 5,761*l*. The working expenses were 37,612*l*. After covering debenture and rent charges, 37,192*l* remains, including 8,234*l* brought forward. The directors recommend that 3,267*l* be appropriated to pay a dividend at the rate of 4½ per cent. per annum on the preference stock; 24,583*l* to pay a dividend at the rate of 5 per cent. per annum on the ordinary shares; 2,000*l* to credit of renewal account; and 7,341*l* to the credit of the current half-year. The capital account shows that 1,456,275*l* had been expended, leaving a balance against the company of 24,803*l*.

Weymouth and Portland.—Dividend declared at the rate of 4¾ per cent. per annum; surplus, 380*l*.

BANKS.

Clydesdale.—A dividend of 11 per cent. and a bonus of 1 per cent., both free of income tax, have been declared, and 10,000*l* has been set aside for new buildings, and 5,000*l* for reserve.

London and County.—The report, adopted at the meeting, showed, inclusive of the previous balance, 7,181*l*, a divisible sum of 94,349*l*. Out of this a dividend and bonus, together 1*l* 16s per share (17½ per cent. per annum), were declared, leaving 4,349*l*. The deposits are 13,396,251*l* and acceptances 3,110,121*l*. The dividends are free of tax

London and South-Western.—Available profit, 6,165*l*. A dividend of 6s per share requires 2,665*l*, and 500*l* is added to reserve. The surplus includes rebate.

York City and County.—The report announced a dividend of 8 per cent., and a bonus of 6 per cent., absorbing 17,500*l*, and leaving 2,690*l* as balance.

Yorkshire Banking.—The profits to the 31st of December last were 32,626*l*, out of which the directors were authorised to pay a dividend of 25s per share, free of income tax (being at the rate of 20 per cent. per annum), 25,000*l*; to make a further addition to the reserved surplus fund of 6,000*l*, carrying to the credit of the bad and doubtful debt fund the balance of 1,626*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

General Credit and Discount.—The yearly report shows a present available surplus of 76,726*l*; and after paying a half-year's dividend at the rate of 5 per cent per annum, 35,000*l* will be added to reserve, which will then be 75,000*l*, and 4,226*l* will remain to be carried forward. Business is reported to have increased and the deposits are 4,608,438*l*. The company is entirely free from all complications.

London Financial Association.—The aggregate liabilities now amount to 154,995*l*, having been decreased 13,000*l* since last meeting. The company's securities are now of a nominal amount of 2,182,175*l*, all fully paid up.

ASSURANCE COMPANIES.

Home and Colonial Marine Insurance.—The annual report states that the 1868 account, now closed, shows a profit of 27,506*l*; and there stands at the credit of the 1869 account, after deducting all expenses, 31,135*l*. The net premiums of 1870 amounted to 110,193*l*, and the claims paid to date have been 36,508*l*. A dividend is announced at the rate of 6 per cent. per annum.

International Life Assurance Society.—Creditors are required to send particulars of claims to Mr Maynard by the 25th February, the 26th April being appointed for the adjudication.

Law Life Assurance.—The year's report states:—The total assets of the society, all invested on first-class securities, amounted on the 31st December last to 5,459,509*l*; the total income for the year 1870 was, from premiums on assurances, 271,618*l*; from interest on investments, 234,723*l*—together 506,341*l*. The dividend to the proprietors for 1870 is at the rate of 4*l* 4s per share per annum, half of which was paid in October, 1870, and the remaining half of which will be paid in April next.

London and Provincial Marine Insurance.—At the meeting a dividend at the rate of 10 per cent. per annum, free of income tax, was declared, and 15,000*l* was added to reserve (now 60,000*l*). The net premiums for the year were 131,781*l*.

Ocean Marine Insurance.—The adopted report states the available balance at 88,346*l*, after deducting the interim distribution of 5s per share. This was appropriated—10,000*l* in payment of 5s per share additional interest; 40,000*l* in payment of 20s per share bonus; 15,000*l* to reserve fund (thus raising it to 90,000*l*); and 23,346*l* carried forward to next account. The chairman congratulated the shareholders on these results, and said that, after the apportionment of the above amounts, there still remained a further sum of 122,685*l* applicable to the risks of 1869 and 1870.

Universal Marine Insurance.—At the meeting a year's dividend at the rate of 12½ per cent. was agreed to.

MISCELLANEOUS COMPANIES.

British Indian Telegraph.—The receipts for October were 5,157*l*; for November, 7,453*l*; and for December, 3,920*l*. The cable was repaired on the 13th October; but the Falmouth line is still interrupted. No quarterly dividend is recommended.

City of London Brewery.—Year's profits, 73,101*l*. Out of this 4 per cent. as an interim dividend was paid in August last, which absorbed 23,460*l*. After setting aside 3,000*l* for depreciation of leasehold properties, and placing 1,000*l* to reserve—thereby raising that fund to 52,000*l*—there remained available for present distribution 45,641*l*, out of which a dividend of 7½ per cent. was declared, making the total distribution 11½ per cent. for the past year. These appropriations will absorb 71,447*l*, and leave a balance of 1,653*l*.

India Rubber, Gutta Percha, and Telegraph Works.—The report shows a large increase of business, and continues:—

These results are the more gratifying as there has been no corresponding increase of expenditure. The operations of the year, after writing off the usual depreciations, amounting to 13,864*l*, show a net profit of 87,801*l*. Of this the directors propose to apply 49,599*l* in payment of a dividend of 15 per cent. per annum, being 6*l* 15s per share, and place 30,000*l* to the credit of patents, goodwill, and depreciation account, leaving a balance of 8,202*l*. Since the last annual meeting the entire cables of the West India and Panama Telegraph Company, and of the Cuba Submarine Telegraph Company have been despatched from the company's works, as wells as several smaller cables. The company's works are now fully employed in executing large contracts for various departments of her Majesty's Government, and the screw steamer International, which the company has purchased and fitted up for laying cables since the last annual meeting, is now engaged in laying telegraphic cables for the postal service of the French Government.

Lion Brewery.—After writing off 5,510*l* for depreciation, &c., after carrying 3,000*l* to reserve, and paying interim dividends, the year's profit is 20,147*l*. The preference dividend absorbs 3,000*l*; and a distribution upon the ordinary shares of 7 per cent. (making 12 per cent. for 1870), 14,773*l*; leaving 2,374*l* to the current year.

National Freehold Land.—The report states:—

The balance sheet for the year shows a decrease in the deposits received of 82,327*l*, as compared with last year. On the other hand, the withdrawals were less by 31,480*l*. The members' capital is reduced 11,210*l*; the amount at the end of the year being 1,088,266*l*, as compared with 1,099,476*l* at the end of the preceding year A further sum of 55,917*l* has been added to convertible securities, making the total amount of such securities 231,018*l*. The gross profit for the year is 58,476*l*, and, after deducting current expenses and interest on completed shares, and the profit added to uncompleted shares, a balance of 19,738*l* remained. Of this amount, the directors have placed a further sum of 5,000*l* to the reserve fund, and recommend that a bonus of 1 per cent. be paid to the members.

Railway Rolling Stock.—The report stated that the profits of the six months amounted to 6,988*l*. The usual dividend of 12 per cent. was declared on the ordinary shares, and of 6 per cent. on the preference shares, both per annum. These absorbed 7,396*l*. The reserve now stands at 11,579*l*.

Westminster Palace Hotel.—At the meeting a dividend at the rate of 3½ per cent. per annum was declared, free of income tax.

MINING COMPANIES.

General Brazilian.—A call of 1s per share is payable on the 6th March.

Troy Silver Mining, Limited.—Capital, 50,000*l*, in 1*l* shares, the whole to be paid up within three months. The object is to acquire a valuable property in Nye County, Nevada. The greater portion of the shares have already been subscribed for, and the purchase price has been paid.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The wheat trade at Mark lane to-day was animated, though the transactions were not on the extensive scale they would have been had the means of communication with Paris been greater, or had French agents been operating for cash. Wheat fully maintained Monday's advance for both English and foreign qualities. On the continent the markets are rising. Flour continued in good request, barrels being in especial demand for shipment at about 30s. Maize and oats were very firmly held, while grinding barley, beans, and peas supported late rates. This week's imports of foreign and colonial produce into London have amounted to 2,240 qrs of oats, and 3,460 barrels of flour.

At Liverpool and Wakefield this morning, the wheat trade ruled quiet, and prices showed weakness.

The Liverpool cotton market has been dull throughout the week, and prices have declined ⅛d to ¼d per lb. The total sales are 66,130 bales; of which the trade have taken 44,880 bales, speculators and exporters, 21,250 bales. The imports for the week are 69,374 bales; the actual exports, 13,461 bales; and to-day's stock is estimated at 578,800 bales. Quotations for American descriptions have receded ⅛d to $\frac{1}{16}$d per lb; East Indian, ⅛d per lb; and Bengals remain unchanged since last Friday. To-day the market closes quiet; sales, 9,000 bales at unchanged rates.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended February 2, 1871 :—

	Imported.	Exported.
American.....bales	45,416	9,357
Brazilian	8,134	205
East Indian	9,673	6,583
Egyptian	9,342	49
Miscellaneous	2,160	9
Total	74,695	16,203

At New York on Feb. 2, middling Upland cotton was quoted at 15½ cents per lb. Advices from Bombay to Jan. 28 quote the cotton market active and advancing at 190 rs for Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, January 7 :—There has been no very noticeable feature in the cotton market during the past fortnight, if we except the continued absence of anything but the most trivial supplies of new cotton. During the week which has just closed there has been very little doing, owing to the dull home accounts received, and the reluction in limits which has consequently been made. The rapid improvement also which has taken place in freights, and the expected advance in exchange, have both tended towards making buyers less anxious to enter into fresh business. Accounts from the up-country markets of Khamgaum and Oomrawuttee have uniformly reported a spirited business there, principally on European account, at rates varying from 190 rs to 195 rs for new Oomrawuttee of second quality to 200 rs to 205 rs per candy for first quality, free from black leaf, in full pressed-bales, laid down in Bombay. Native dealers do not appear to have been able to compete with the European orders, for good cotton especially, and with few exceptions have contented themselves with purchasing to a moderate extent in the lower grades offering. This will account for the unsatisfactory quality of the small parcels to be obtained at the moment on the green. Supplies of old cotton are coming in more freely, but the good parcels are held in strong hands, and no opportunity has as yet offered of operating at safe prices. Crop accounts continue all that could be desired. The rain in Broach has not done any harm whatever.

Export of Cotton from Bombay to Jan. 6.

Actual exports since last mail left, 22,178 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated January 20 :—Our last report was dated 13th inst. We have had since then a quieter market, with a decline of fully ¼d per lb on fair cotton, but barely ⅛d on good fair owing to the comparative scarcity of the latter. Indeed the falling off in quality has become so decided and so general that few parcels are met with of which a considerable proportion has not to be rejected in consequence of the admixture of unsound and inferior cotton. The choice descriptions of "Gallin" are extremely scarce, and whenever offering command fancy prices, whereas the lower grades, owing to their very unsatisfactory quality, are comparatively neglected. We quote :—Fair, 8¼d per lb, f.o.b.; good fair, 8⅜d per lb, f.o.b.; good to fine (Gallin), 10d to 12½d per lb, f.o.b.; extra fine, 13d to 14d per lb, f.o.b; freight about $\frac{5}{16}$d per lb for steam-pressed bales.

The colonial produce markets have ruled less active this week, and prices have shown weakness. Sugar has been dull on slightly easier terms for both raw and refined goods. The coffee sales have gone off quietly at late rates. Rice has been in demand for export. Cocoa is unchanged in value.

The following report, dated December 26, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo :—The export business of the fortnight has been carried on with unabated activity; the shipments of produce to date have augmented the total in our usual list of manifests to considerable figures, the disposal of which may be seen below :—

Plantation Coffee.

	1870. cwts.		1869. cwts.
To Great Britain	142,928	.....	124,370
Foreign ports	6,145	.....	156
Australia and India	3,228	.....	1,953
	152,301	.....	126,479

Native Coffee.

To Great Britain	13,114	.....	12,605
Foreign ports	2,986	.....	2,388
Australia and India	648	.....	356
	16,748	.....	15,349

Coffee—There has again been a good deal of activity in our coffee market, and the deliveries of parchment in execution of previous contracts have been on a scale of some magnitude, whilst new transactions to a fair extent have taken place at our previous rates. There has scarcely been as much done in native clean coffee as in the previous fortnight, owing rather to the scarcity of supplies than to any lessened demand.

* The stock of sugar in Holland is in first hands only; in all other countries in first and second hands.

Annexed is Messrs Durant and Co.'s circular:—We have to report a month of small daily business, gradually increasing towards the end without any general quotable advance, but prices rather hardening as the doings became more frequent. The announcement of the capitulation of Paris induced some buoyancy of feeling and a desire for purchase, but importers seemed fully alive to the chance of improved prices. Hence the transactions have not been really large, nor can we quote even now any positive advance, but the highest price of September and the first week of November are easily obtainable. Japan silk remains neglected. Canton silk, on the other hand, has had a full share in the business done, and the deliveries show that it is entering largely into consumption; in this class we can trace a full 6d advance. Bengal silk is in rather improved request, the lower qualities especially. The deliveries show some improvement. The next periodical public sales are fixed to commence on the 22nd inst.

Mr Helmuth Schwartze observes:—The first series of wool sales commenced to-day when the following wools were offered—1,992 bales Sydney; 1,898 Cape; 952 Port Phillip; 706 New Zealand—total, 5,548 bales. There was a large attendance of the home trade, the continent, too, with the exception of France, being well represented. Biddings were spirited, and prices for Australian and Cape ruled 1d higher for scoured and ½d higher for fleece, as compared with closing rates of last November series. The arrivals in time for these sales comprise 14,598 bales Sydney; 22,584 Port Phillip; 573 Van Diemen's Land; 13,926 Adelaide; 988 Swan River; 3,517 New Zealand; 18,625 Cape—total, 76,811 bales. The auctions, as at present arranged, are to last till the 26th February, and to be followed as usual by sales of low wools.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, January 3:—At two public sales held during the past week, 1,700 chests were disposed of; the demand on the whole has been good, and at our last sale fine indigo sold decidedly dearer, and all kinds brought very full previous market rates. The following private sale is reported:—A. C. T., 54 chests, Tattariah, Tirhoot, at 277 rs 8a per fy. md. The quantity disposed of up to date is 53,500 maunds, against 47,000 maunds at same date last year. Exports of indigo from November 1, 1870, to January 2, 1871:—To Great Britain, 6,659 chests; France, 26; Trieste, 1,721; foreign Europe, 126; America, 792; Gulphs and Levante, 368—total, 9,692 chests.

Mr L. Th. van Houten reviews the Dutch tin trade as follows:—Our tin market was very animated in the beginning of the month, at 76½ fl for Banca, with 14/d prompt, which gradually advanced to 78¼ fl, very little tin being offered by the holders. Towards the close of the month, the English market became very unsettled, especially influenced by heavy shipments from the Straits, and English tin being also officially reduced 2*l* per ton, this seriously affected our market, and Banca consequently declined to 77½ fl, which is the nominal closing quotation, there being no disposition on the part of buyers to operate. Banca tin for delivery ex next spring sale was sold from 75½ fl to 77 fl, but there are now again sellers at 75½ fl. Billiton tin was in good request, but lots on the spot being very scarce, was very sparingly offered. Several arrivals of Billiton ton have taken place during the month, the greater part of which, however, had been sold before hand. We can now buy ex ship arrived (but frozen in at the seaports) at 77 fl, and parcels afloat at 76 fl. The following statement shows the position of Banca tin in Holland on the 31st January from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in Jan. ..... slabs	10,357	13,229	6,719
Deliveries in Jan.	10,400	13,300	17,500
Stock second hand	60,500	49,548	78,573
Unsold stock	90,436	74,029	52,660
Total stock	150,936	123,577	131,233
Stock of Billiton	4,423	7,500	788
Import in Jan.	5,523	1,598	3,400
Delivered and shipped in Jan.	2,500	1,598	3,300
Quotation Jan. 31 ... Banca	77½fl	64½fl	67½fl
Quotation Jan. 31 ... Billiton	76½fl	63½fl	67fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 18,400 peculs, equal to 1,150 tons, against 28,000 peculs, equal to 1,750 tons, last year. The estimated quantity of Billiton tin now afloat is 9,784 peculs, equal to 612 tons, against 9,149 peculs, equal to 570 tons, last year.

The annexed is dated New York, January 20:—The money market shows some amelioration from the extreme stringency in the early part of the week, the heavy disbursements in the shape of interest and dividends, usual at this period, counteracting the efforts of the stock cliques to create artificial scarcity and consequent pressure. The supply is ample, and call loans are freely supplied at from 5 to 7 per cent. Discounts of mercantile paper are also more readily obtained at 7 and 8 to 10 per cent., according to grade. The accumulation of currency continues, and the supply of National Bank notes is excessive—so much so, indeed, that a number of the banks are offering small notes at ¼ per cent. discount, five and ten notes at ⅛, and larger notes $\frac{1}{10}$. A similar glut of these bank notes occurred about this period last year. There is still a large surplus of grain in the interior to be realised upon. The hog crop is the largest for many years. The cotton crop is a large one, and, notwithstanding the material reduction in price, the South has shown its ability to buy a large amount of goods and to pay for them promptly. Gold remains very steady, and exchange shows very little change.

THE COTTON TRADE.

LIVERPOOL.—FEBRUARY 2.

The cotton market this week opened quietly, and, after more firmness on Saturday, became on Monday decidedly heavy, the anticipation of a favourable effect from the capitulation of Paris having been completely disappointed. The pressure to sell has since increased under the influence of continued large receipts in the United States, while the demand has fallen off, and quotations generally show a considerable reduction from the prices of last Thursday. Sea Island continues in good request, and better grades of Florida are 1d per lb dearer.

American has fallen ¼d per lb, the recent imports being freely offered. New York advices to the 1st instant quote middling Upland 15⅜c, costing to sell in Liverpool 8⅛d per lb, by steamer. Brazil, at the opening of the week, was in fair request, but has since been neglected at ⅛d decline, except in fine qualities, which are steady. Egyptian has participated in the general dulness, and prices are quoted ¼d per lb lower. In East Indian only a limited business has been done, and, with considerable desire to sell, prices of most descriptions have given way ⅛d per lb.

In cotton to arrive there has been a large business at lower prices, the latest quotations being:—American, basis of middling, from Charleston, ship named, 7¾d; New York, sailed, 7¾d; any port, January-February shipment, 7⅞d; February-March, 7⅞d; February-March, not below good ordinary, 7¾d; Savannah, January-February shipment, not below low middling, 7¾d; due, 7¾d; Mobile, at sea, 7¾d; ship named, 7¾d; ship named, not sailed, 7¾d; January shipment, 7¾d; New Orleans, ship named, 8d; January-February shipment, 7 1/16d; February-March, 7 1/16d; Texas, ship named, just sailed, 8d; low middling Texas, steamer, at sea, 7⅞d; ship, at sea, 7¾d; shipping or shipped, 7 1/16d; due, 7 1/16d; New Orleans, February shipment, not below good ordinary, 7 1/16d; Oomrawuttee, fair new merchants, canal, January-February shipment, 6⅝d.

The sales of the week, including forwarded, amount to 66,130 bales, of which 4,790 are on speculation, and 16,460 declared for Egypt, leaving 44,880 bales to the trade.

FEB. 3. — The sales to-day will probably amount to about 9,000 bales; the market without change.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	203,090
An increase of quantity taken for consumption of	26,850
A decrease of actual exports of	14,000
An increase of stock of	230,360

In speculation there is a decrease of 43,930 bales. The imports this week have amounted to 69,374 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to January 28) is 377,000 bales. The actual exports have been 13,461 bales.

LONDON.—FEBRUARY 2.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

With the exception of Saturday, when there was an active demand, particularly for parcels afloat, at a slight advance, the market has been dull all the week, and the latest transactions show a decline of about ¼d per lb.

NEW YORK.—JANUARY 20.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Jan. 20. From the figures thus obtained it appears that the total receipts for the seven days have reached 146,887 bales, against 132,585 bales last week, 139,631 bales the previous week, and 124,250 bales three weeks since, making the total receipts since Sept. 1, 1870, 2,048,024 bales, against 1,625,139 bales for the same period of 1869, showing an increase since Sept. 1, this year, of 422,885 bales. The exports for the week ending this evening reach a total of 119,349 bales, of which 88,748 were to Great Britain and 30,601 to the continent, while the stocks at all the ports, as made up this evening, are now 546,476 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Jan. 20.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	43267	20815	64082	28499	189214	177464
Mobile	2858	2261	5119	1024	65458	69282
Charleston	7147	2771	9918	1338	32830	29088
Savannah	10238	2021	12259	10843	88991	69668
Texas	8651	1449	10091	3421	58483	46807
New York	14116	1000	15116	5651	78000	67325
All other ports	2471	293	2764	310	33500	18091
Total	88748	30601	119349	51088	546476	486725
Total since Sept. 1	1027038	192510	1219548	838415	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 68,263 bales, while the stocks to-night are 59,751 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Jan. 13, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

The market the past week has been variable in tone, with prices early in the week advancing but later declining, the close to-day, however, being firm at ⅛c advance on last Friday, middling Uplands being quoted at 15⅜c, against 15¼c a week ago. The day following the close of our last report (Saturday), the European advices being better, our market became strong and active at an improvement of ⅛c. The next day, Monday, there was a further advance of ⅛c, but the close was quiet. Tuesday there was less doing, and prices yielded ⅛c. Wednesday and Thursday, with the sales small, there was no change in either tone or quotations, although the quotations were almost nominal. And to-day the market has remained in pretty much the same condition. Holders are firm, and no large purchases could be made, even at the quotations; but buyers at the same time are unwilling to operate, and to effect any considerable sale a concession would have to be made. The needy purchases have, however, in the absence of any large offerings, served to stiffen prices, so that the close this afternoon is firmer than yesterday, notwithstanding the large receipts of the week. For future delivery, the fluctuations have corresponded very nearly with the fluctuations for spot cotton, but the transactions have been limited, and no large movement could take place without changing the ruling rates. To-day, with little doing, the close was for January, 14¾; February, 15; March, 15¼; April, 15½; May, 15⅝. The total sales of this description for the week (including 2,950 bales, free on board, but not including bales "exchanged") have been 40,550 bales. For immediate delivery the total sales foot up this week 23,679 bales, including 2,721 bales to arrive, of which 4,355 bales were taken by spinners, 371 bales on speculation, 17,678 bales for export, and 1,275 bales in transit. The following are the closing quotations:—

Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Jan. 20. 1871.			Week ending Jan. 20, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	7247	6683	19203	3444	2992	21375
Columbus	3259	2306	13823	1552	2291	15395
Macon	4211	3462	15664	1626	1985	17718
Montgomery	3652	4497	11238	1037	1974	15391
Selma	4650	5072	10578	1297	1146	8275
Memphis	17169	11545	40572	10607	12608	19142
Nashville	4680	4399	6101	2763	2398	3749
	44868	38464	117179	22326	25394	101045

These totals show that the interior stocks have increased during the week 4,201 bales (being now 16,134 bales more than for the same period last year), while the aggregate receipts are 22,542 bales more, and the shipments 12,970 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 16,825 bales, against 17,443 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

EXPORTS of COTTON (bales) from NEW YORK since Sept. 1, 1870.

—*New York Commercial and Financial Chronicle.*

NEW YORK, Jan. 28.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 151,000 bales, and since the 1st of September, 2,199,000 bales. Shipments to England, 84,000 bales; to France, none; and to the continent, 23,000 bales. Total since the 1st of September, 329,000 bales; stock at all ports, 565,000 bales.

NEW YORK, Jan. 31.—The receipts of cotton during the last four days have been 78,000 bales. Export to Great Britain, 23,000 bales; to France, none; and to the Continent, 6,000 bales.

NEW YORK, Feb. 1.—To-day's receipts of cotton at all United States ports amount to 25,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Feb. 2.—Our market has remained flat and inactive throughout the week, and only a limited business has been done in yarns and goods. Prices to-day are the same as those current this day week, but on the announcement of the capitulation of Paris, producers had at once raised their quotations; but this had only the effect of keeping buyers out of the market. Owing to the dulness of the cotton market this advance has since been abandoned, but without leading to much if any increase of business. All our large buyers have remained inactive, no doubt waiting the effect of the political position of France. Both spinners and manufacturers are generally well engaged, and hardly any stocks exist; hence the firmness in prices. Buyers, on the other hand, are indisposed to renew their contracts, except at a concession equivalent to that in cotton, which they cannot yet obtain. At the close the market is very quiet, and prices but slightly in favour of buyers.

Messrs. Alex. Collie and Co. received the following telegram from Manchester yesterday:—Market quiet; quotations for both yarns and cloth unchanged since Tuesday, but to effect sales to-day producers would have to take rather lower prices.

BRADFORD.—The terms of peace required by Germany have had the effect of causing a marked depression in every branch of the worsted trade. In the wool market the feeling is very gloomy, and the operations unusually limited. There is some inquiry, and buyers may be found wherever there is a disposition to yield anything like late rates. The best classes of wool, including wethers and wether matchings in particular, are still most in favour, though the transactions are so limited. The same feeling is apparent in both the yarn and the piece markets, and the transactions are unusually meagre. Prices are firm.

LEEDS.—The markets in the cloth-halls were of a quet order. The most active demand was for low-priced hair-lists—white goods intended chiefly to be dyed black. Neither in coatings nor tweeds was much done; but moderate sales of meltons, particularly of such as are adapted for light overcoats, ladies' mantles, &c. Very little was done in any kind

of heavy goods, the season for their purchase being now over.

ROCHDALE.—The flannel market was rather dull, but prices were firm. For Yorkshire goods there was a fair sale, more particularly for scourers, the makers of which asked a slight advance in late prices, which checked sales. Wools keep steady in price, and a fair amount of business was done.

BIRMINGHAM.—The business transacted was again comparatively small. In the present unsettled state of continental affairs, both buyers and sellers manifest great reluctance to commit themselves to long contracts, and transactions for the most part are limited to immediate requirements. A good consumptive demand is reported for bars, sheets, gas strip, nail rods, and light castings, for local manufacturing purposes, but there is less doing in plates, and the orders for export are not up to the average of the season. Pig-iron makers are relatively better off than the manufacturers of finished iron, and prices in this branch continue firm at last week's quotations.

CARDIFF.—The steam-coal trade is still comparatively quiet, and there is no immediate prospect of improvement. Quotations are in many instances unremunerative. The severity of the winter has reduced the stocks of house coal in the West of England and Ireland, and the result is that this branch of the trade shows more vitality. At the ironworks, employment is without change. On home account, rail orders are not coming in so freely as anticipated.

DUNDEE.—Our flax market has continued very firm, and the upward movement of prices has received a fresh impulse from the prospects of an early termination of the war. The extreme rates now required by holders, however, tend to check business, as buyers seem disposed rather to wait the further development of the present crisis than to yield to the advance required. The yarn market continues without much change, except that tow yarns are again rather higher; for flax yarns very stiff prices are asked, but there has not been an extensive business doing. Jute kinds are steady. For linens, there continues to be a pretty extensive demand, and although for some descriptions of jute goods there is not so much inquiry, manufacturers are busily engaged, and prices are without any material change. Tows continue in good demand, and prices of all descriptions are well maintained. Stocks are now greatly reduced, and holders are requiring full prices. Jute keeps extremely firm, and prices have been rather dearer during the week.

BELFAST.—Flax—In the markets of the province supplies generally were not large. In some cases advanced prices were realized; but in the majority of the markets former rates prevailed. Yarns—Large sales of all descriptions were effected, though perhaps not reaching an amount equal to that to which they attained on preceding week. Prices of some descriptions have advanced. Linens, brown handloom—A steady demand existed for light linens for bleaching, cloth for dyeing, and Hollands, and for linen handkerchiefs. Brown, powerloom—A moderate demand existed for light and heavy linens. Bleached and finished linens—Steadine ss exists in the home trade. Stocks rather on the decrease. Prices decidedly firm.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 20.—The market for breadstuffs has been generally buoyant the past week, with a speculative demand and larger shipments, but closes at a pause in flour and wheat. The receipts of flour have considerably increased, but we had at the same time a large export demand and a fair business for speculation, upon which prices had advanced 10c to 20c per barrel. The business has been, as it was at the close of last week, largely in low grades of extra Western, from winter wheat, but as these have become scarce or have advanced in prices, attention has been again directed to extras from spring wheat. City-made flours have also had a free movement, millers having been enabled by the higher prices to take orders. The stock of flour in store continues large, but a large proportion of it is withdrawn from sale at anything like current prices. Wheat has steadily advanced. Liverpool has come in daily at higher quotations, enabling shippers to raise their bids, and there have been very limited offerings. Millers, too, have latterly been more anxious to buy, and with ocean freights easy for the amount of business offering, new spring wheat has advanced day by day, with a very fair volume of transactions. Other grades of wheat have sympathised but little with spring growths until to-day, when spring wheats were neglected, although offered at yesterday's prices. $1.50 for No. 2, delivered, and about 37,000 bushels amber winter sold at $1.43 to $1.46. Corn has been variable. There has been more export demand, and this has caused prices to improve to-day, but the local trade has been very dull, and, although offerings are small, the withdrawal of shipping orders causes prices to recede. Shippers took prime mixed and yellow to-day at 82c to 83c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The corn trade opened with considerable animation on Monday last, owing to large purchases for shipment to France. As we have already pointed out, however, the transactions were not on the extensive scale that was at one time anticipated, the large stocks accumulated in the hands of German and Belgian speculators having deterred operations here. At the same time were there less doubt as to the means of communication with Paris, or had there been regular cash agents appointed by the French Government, trade would have ruled more active. As it was there was a steady business transacted in wheat—chiefly for export—at an advance of 2s per quarter on the week, and this improvement was readily acceded to. In foreign wheat the demand was chiefly confined to American descriptions, for which 2s per quarter more money was paid, but other qualities were held at a rise of 1s to 2s. The quantity of wheat now on passage is in excess of any former year at the corresponding period, and it may be accepted that the rates now current are sufficiently high to bring full supplies of produce forward to meet our requirements. The large shipments that have been made up to the latest period of the year are the natural result of the anticipated demand from France. The great feature that now influences the trade is the attempt to re-provision Paris, and to keep its two millions of inhabitants from starvation. Some time must elapse before this can be effected, and it is doubtful whether an attempt will be made to replenish the stocks of cereal produce in the North of France, and to bring them up to their ordinary level, as the population is devoid of means and commerce generally is interrupted. In this event the shipments of produce to France will continue for some time, though on a more moderate scale than was expected, and will probably pass into immediate consumption. Flour has sold freely, and barrels have advanced to 30s, the quotation for sacks being 40s to 42s per 280 lbs.

Maize and oats have been in demand, and the quotations show a rise of 1s to 2s per quarter. Grinding barley is 1s dearer, while beans and peas have been held at extreme currencies.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 37 grain and seed-laden vessels have arrived at ports-of-call, viz., 20 wheat, 5 maize, 3 barley, 3 rye, 1 linseed, 1 cottonseed, 1 oilcakes, 3 locust beans. The floating grain trade has been somewhat irregular, and transactions have not reached any

great importance. Wheat—the news of the capitulation of Paris gave trade a firm tone early in the week, but business not so active as expected, and on Wednesday to effect sales a concession of 6d had to be granted. Maize has been in active demand, and 6d to 9d dearer. Barley also 6d to 9d dearer. Rye 6d to 1s dearer. The reported sales are as follows:—Wheat—12 arrived cargoes: Berdianski, 51s 6d to 52s; Ghirka Nicolaieff, 52s to 52s 3d; Ghirka Odessa, 50s to 52s; Ghirka Taganrog, 50s; Rostoff Ghirka Taganrog, 49s 6d; new ditto, 50s. On passage, 8 cargoes: Ghirka Odessa, 50s 6d to 52s 9d per 492 lbs. Shipped or to be shipped, 4 cargoes: Sandomirca Odessa, 54s per 280 lbs; Ghirka Taganrog and Odessa, 49s and 52s; new coast Ghirka, 52s per 492 lbs. Maize—5 arrived cargoes: Odessa, 35s 4½d to 35s 9d; Galatz, 34s 10½d per 492 lbs; and Ibrail, 33s 10½d to 35s 7½d per 480 lbs. On passage, 9 cargoes: Odessa, 34s to 35s; Galatz, 34s 3d per 492 lbs; Danubian, 33s 3d per 280 lbs. Barley—1 arrived cargo Odessa, 27s 6d per 400 lbs. On passage, 10 cargoes: Danubian, 27s to 28s; Odessa, 27s to 27s 6d; Taganrog, 27s 6d per 400 lbs. Rye—On passage, 1 cargo Danubian at 34s 6d per 480 lbs. Shipped or to be shipped, 4 cargoes: Odessa, 36s; Azow, 36s 3d to 36s 6d. Linseed—Arrived: 150 tons East India Calcutta, at 59s 4½d to 59s 6d per 410 lbs, and 1 cargo Azow at 60s per 424 lbs. On passage: 3 cargoes Azow at 60s, and 200 tons East India Calcutta at 61s 3d. To be shipped, 500 tons East India Calcutta at 61s 6d. Rapeseed—150 tons East India yellow mixed arrived at 73s 6d to 74s per 416 lbs. On passage, 200 tons ditto, at 73s. Shipped or to be shipped: 1,500 tons ordinary brown Calcutta, at 67s 9d to 68s 6d; 200 tons yellow mixed, at 72s 6d to 73s 6d; 100 tons secondary ditto, 71s 9d per 416 lbs. Cotton-seed—On passage, 1,050 tons Egyptian and Alexandria, 9*l* 2s 6d to 9*l* 3s 9d; and a small lot per steamer, 9*l* 7s 6d. Shipped or to be shipped: 700 tons ditto, at 9*l* to 9*l* 2s 6d per ton; and 800 or 900 tons ditto, 7*l* 7s 6d per ton, f.o.b.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There is not any improvement in this market, which has been quiet, and rather lower. Refined maintains the advance last reported, and is still rather scarce. Transactions in West India to yesterday amounted to only 500 casks, including a few lots of crystalised Demerara by auction at 37s 6d to 38s. The supply is still moderate in the absence of further arrivals. Low brown sorts are dull, and could not be sold upon former terms. In other respects there is scarcely any change to report. Further contracts have been made in beet sugar for delivery here. Yesterday a small cargo of fine grainy white Java sold for this port at a full price. Good qualities of Manila obtain former rates. The home deliveries in London already exceed those of last year by 2,150 tons, and the exports of raw sugar also show an increase. There is not any return of the refined exported. The stock, as given by the dock and other public warehouses, is 61,600 tons, against 74,700 tons last year, and 70,800 tons in the previous year.

Mauritius.—4,486 bags by auction partly found buyers at 40s to 41s; for fine grainy white, 6d duty, and washed at 37s 6d to 38s 6d. Low brown taken in at 27s per cwt.

Madras.—7,944 bags (Cheenie) sold at 28s to 28s 6d, for rather soft grainy brown, of the mark ASKA. No business reported in Jaggery. Good quality is worth 19s 6d to 20s per cwt.

Natal.—693 bags chiefly sold: brown, 24s to 29s; yellow, 34s to 34s 6d.

Foreign.—401 bags brown Guatemala sold at 25s to 29s. Privately, 7,500 bags clayed Manila, good quality at 27s, 4s duty. 1,800 boxes Havana at 31s 6d to 37s, and a few lots of grocery Porto Rico at 35s to 35s 6d. Yesterday, 1,200 baskets grainy white Java sold afloat for this port, No. 19, at 40s per cwt.

Refined.—The market is about the same as last quoted, but with less inquiry for dry goods at the advance. Titlers, &c., are scarce, and worth about 53s to 55s per cwt. There has been more inquiry for pieces, and at rather better prices, a few parcels selling for exportation.

MOLASSES.—150 puncheons Demerara have sold at prices which do not transpire.

RUM.—There is not any change in this market, which is however very steady. A few sales of West India reported at 1s 11d for Leewards, and 2s to 2s 2d for Demerara. 110 casks Mauritius have sold at 1s 5d per proof gallon. Sales of Jamaica at 3s 6d to 3s 9d per gallon.

COCOA.—At the sales on Tuesday 681 bags Trinidad went at steady rates, and chiefly sold: grey, 51s 6d to 57s; middling to fine, 61s 6d to 88s; very fine, 118s to 120s. 193 bags Grenada part sold at 48s to 50s for ordinary. 1,181 bags foreign were chiefly bought in—a few lots sold, including Cuba, at 62s. Sales of Guayaquil reported privately at 47s to 53s per cwt. The deliveries have improved, and the stock showed some decrease last week. It is, however, still rather large.

COFFEE.—The market has not shown much activity, owing to the uncertainty still felt with reference to the question of peace, and the ample stocks. Some inquiry prevailed for native Ceylon at one period, and a sale was made afloat at 58s, being 2s dearer, but this afterwards subsided. 2,232 bags by auction sold at about former rates: good ordinary mixed, 56s to 57s; rather bold, 58s to 59s. 722 casks 686 barrels and bags plantation sold steadily at last week's quotations: pale and grey, 60s to 72s; colory, low middling and small to good, 62s to 75s; fine and bold, 76s to 84s. 183 bales, &c., Mocha: mixed small berry, 93s 6d to 94s; ungarbled, 85s. 510 bags, native Mysore, &c., part sold at 60s to 62s 6d. 1,445 bags foreign partly sold: Guatemala, 56s 6d to 62s; Bahia, 54s 6d. 1,200 bags native Cochin sold afloat at 59s. A floating cargo of Rio is reported, but particulars have not transpired. The stoppage of navigation in the north of Europe continues to have an unfavourable effect upon the deliveries, and the stock is now nearly 3,000 tons above that of last year. Arrivals are soon expected from Colombo, but the crop of the season is reported as likely to prove deficient.

TEA.—The market has been quiet this week, with moderate transactions by private contract. On Tuesday a sale of 5,292 packages took place. 4,346 packages found buyers, all being without reserve. A chop of medium black leaf, with all faults, brought 1s 5½d. Several breaks of common black leaf, of recent import, sold at 11d to 11½d; prices rather in favour of buyers. Black leaf siftings, with all faults, realised 3½d to 3¾d per lb.

RICE.—A large business has been done, partly speculative, and cleaned continues in demand. Sales on the spot include Rangoon at 9s 9d to 10s; fine, 10s 10½d; low cargo Bengal, Casla, &c., 8s 7½d; to 9s 3d and white Bengal at 11s to 12s 3d. 800 tons Bengal have sold to arrive at 10s 9d to 13s 3d. 1,300 tons other kinds: Askoolie, 10s 6d to 10s 9d; yellow, 9s 3d to 10s 3d; and Casla, at 8s 8d, ex quay. The sound portion of 6,877 bags Rangoon by auction sold at 10s, with damaged, &c., at 8s to 9s 6d per cwt.

IMPORTS and DELIVERIES of RICE to Jan. 28, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ...tons	10700	3080	8330	4750
Deliveries	8190	3480	5520	3850
Stock	55610	49000	35450	17480

SAGO.—201 bags good small grain sold at 17s 9d per cwt, being again rather dearer.

SAGO FLOUR.—2,109 bags Borneo by auction part sold at 16s 6d. 2,000 bags reported to arrive at 16s.

TAPIOCA.—There is less demand. 3,209 bags by auction only partly sold at 2d to 2¼d for common dull to middling Penang and Singapore.

SPICES.—The market for black pepper still shows an upward tendency, the requirements for the continent during the war being large, and the stock here much less than usual. Business is still chiefly in Penang, several sales of which are reported for arrival at 5⅞d to 5½d, and up to 5⅞d cash on the spot. 754 bags by auction were partly sold, including a small quantity of sound, at 6d. Business reported in Singapore to arrive at 6d. No further change has occurred in white pepper. 20 cases Penang nutmegs by auction were taken in, excepting a few cases

71's, which sold at 3s 1d. Mace of good quality keeps firm. 2,000 bags Zanzibar cloves are declared for sale next week. 141 cases cassia buds by auction were taken in at 8*l* to 9*l* 10s, and 22 cases cassia vera at 5*l* 10s per cwt. 924 bags cinnamon chips and bark were taken in at 5d to 7d and 2½d per lb respectively. There have not been any public sales of pimento, and a limited business by private contract.

SALTPETRE.—The transactions in Bengal on the spot are limited to a few parcels. Refraction 5½ to 4 at 30s to 30s 6d, 7½ at 29s 6d. 100 tons afloat or landing have sold at 29s per cwt. The market has been quiet, and the later sales show some decline upon last week's quotations.

IMPORTS and DELIVERIES of SALTPETRE to Jan. 28, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported .....tons	470 ...	430 ...	450 ...	740
Total delivered	830 ...	1120 ...	1000 ...	1100
Stock	2030 ...	4150 ...	3650 ...	7780

Deliveries last week, 235 tons.

COCHINEAL.—The supply of Teneriffe continues large. At the public sales on Wednesday the bulk of 2,205 bags sold at rather higher rates. Silvers, 2s 4d to 2s 7d; blacks, 2s 5d to 3s 6d. 58 bags Honduras silvers, 2s 6d to 2s 9d. 31 bags Mexican silvers, 2s 4d to 2s 5d per lb. The deliveries last month were 3,435 serons, &c., against 2,600 serons, &c., in 1870.

OTHER DRYSALTERY GOODS.—Cutch is quiet, and the stock continues large. 500 boxes good Pegue by auction were taken in at 22s 6d. Gambier meets rather more inquiry, with sales on the spot at 15s 3d to 15s 6d. The quantity afloat at London and Liverpool is still very heavy. A parcel of China galls by auction sold at 43s to 43s 6d per cwt. Turmeric is quiet. There have not been any further public sales of safflower.

SHELLAC.—The market is very firm. 61 chests by auction were part sold at rather higher rates. Fine livery orange, 6*l* 7s 6d to 6*l* 10s per cwt.

METALS.—The general tone of business in these markets is better, but transactions have not been extensive. Straits tin receded to 131*l* 10s to 132*l* in the early part of the week, and to arrive at 129*l* to 130*l*, but since became firmer, closing at 133*l* to 134*l*. The deliveries of tin here and in Holland were smaller last month than in 1870. There is now less afloat. Several sales have been made in spelter, chiefly Silesian, at 17*l* 17s 6d to 18*l* 5s, according to date of delivery. Belgian rather less. Stock in London 2,630 tons, against 2,170 tons last year, and 1,550 tons in 1869. Lead has met a steady demand. English, 18*l* to 18*l* 2s 6d; soft Spanish, 17*l* 10s. Some advance has been paid for copper. The latest sales were as follows:—Chili, 65*l* to 66*l* 5s; Walaroo, 73*l* 10s to 75*l*. English is rather dearer. There have been few sales reported in railway bar iron, but the quotations remain firm. Scotch pig has been in more demand. This morning's price is 51s 6d to 51s 7½d per ton, cash.

HEMP.—Manila is quiet. 2,727 bales by auction were chiefly bought in. A few lots sold: good, at 53*l*; ordinary, 48*l*. Privately small sales at 44*l* to 53*l* 10s. 2,000 bales to arrive at 48*l* to 50*l*. 125 bales Sunn were sold at 16*l* 15s to 17*l* 5s per ton.

JUTE continues firm. The market in Dundee has rather improved, and stocks at this port are very much smaller than usual. During the week a large business has been done, chiefly for arrival, at firmer prices, the range of prices being from 19*l* 10s to 26*l* per ton.

LINSEED.—A good business has been done this week. Calcutta, 59s 6d to 60s; afloat, 61s to 61s 6d; black sea cargoes, 59s 6d to 60s; spring and summer shipments, 60s 6d to 61s per qr.

OILS.—Common kinds of fish oil are steady. Pale seal, 37*l*. Sperm continues in demand, and 82*l* to 83*l* the nearest value. A good business has been done in olive at former quotations for common qualities, ranging from 46*l* 10s to 47*l* 10s. Palermo, 48*l*. Gallipoli quoted 50*l* per tun. Linseed oil is rather firmer, and 30*l* 5s the value on the spot. English brown rape dull; sales by speculators as low as 46*l* to 46*l* 10s. Next month's delivery quoted 47*l*; last four months', 45*l*. Refined, 49*l*. Foreign, 50*l* 10s to 51*l*. Palm remains dull, at 38*l* 10s for fine, and other kinds in proportion. Cocoa-nut is higher. Ceylon, 39*l* 10s: for arrival, 40*l*. Fine Cochin scarce, at 46*l* to 47*l* per ton.

PETROLEUM.—American refined quiet, at 1s 6½d to 1s 7d per gallon.

TURPENTINE is quiet. American, 36s 6d to 37s; French, 36s per cwt.

TALLOW.—A steady business has been done in Petersburg for early deliveries, but the market is now rather quiet at 45s 6d on the spot: March, 45s 6d to 45s 9d; June, 45s 9d; October to December, 46s 6d per cwt.

PARTICULARS OF TALLOW—Monday, Jan. 30, 1871.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market continues quiet. At auction 100 casks crystallised Demerara and Berbice part sold at 36s 6d to 38s; 176 casks good yellow Porto Rico were bought in at 37s to 37s 6d. 688 bags Natal part sold at 24s 6d to 33s for brown and yellow. The business in West India was 171 casks, making for the week 598 casks.

COFFEE.—1,082 casks 541 barrels and bags plantation Ceylon chiefly found buyers at previous quotations. 160 bags native withdrawn. 1,449 bags East India from the Mauritius sold at 58s to 65s 6d. 945 bags native Mysore part sold at 59s 6d to 61s. 1,249 bags washed Rio obtained 58s to 63s. 654 bags good to fine ordinary Rio, 54s 6d to 57s 6d. 719 bags Natal sold at 61s to 76s per cwt.

RICE.—800 tons fine white Bengal are reported at 13s, ex ship, and a parcel Nocrancie Arracan at 10s 9d. 6,279 bags Bengal by auction part sold at 12s for good white.

DRYSALTERY GOODS.—747 bags Cutch of good quality sold at 21s 1,116 bags Bengal turmeric were taken in at 20s 6d to 21s per cwt.

SHELLAC.—191 chests sold at steady rates: livery to fair orange, 6*l* 5s to 6*l* 12s 6d per cwt.

OIL.—562 casks cocoa-nut by auction, a portion sold. Fine Cochin, 45*l* to 45*l* 5s; Ceylon, 39*l* 15s to 40*l* 15s, being higher; 323 casks palm, part sold at 31*l* to 39*l* per ton.

TALLOW.—Town unaltered. Petersburgh quiet at 45s 6d. At auction 2,216 casks Australian and 107 cases ditto, part sold at rather lower rates: Beef, 35s to 42s; sheep, 42s 6d to 44s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—In the home market there is less doing, but the market remains steady. In Dutch crushed sales have been made at 39s 6d; present shipment, f.o.b., Holland.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that St Michael oranges have improved in value. Valencia without alteration, but selling freely. Seville sours scarce, and command a high price. Lemons well supported. Barcelona nuts firm. Black Spanish have an upward tendency. Brazil without alteration. More inquiry for French and Spanish shell almonds.

DRY FRUIT.—The market for all fruit is duller than at any time since Christmas. Prices are firm, with absolutely nothing doing.

ENGLISH WOOL.—Market firm, with rather better prices.

COLONIAL WOOL.—Sales opened to-day; large attendance of buyers, home and foreign, the latter chiefly from Belgium and Germany; a few French. Competition brisk. Prices quite firm, at closing rates of last sales for all kinds, and in some cases ½d to 1d dearer.

FLAX.—Market firm.

HEMP.—Market for Russian very dull. Good Manila scarce and dear; lower qualities cheaper.

SILK.—Market firmer. Rather more doing.

SEEDS.—There is no alteration in the seed trade. The demand is inactive.

TOBACCO.—The market for North American tobacco has continued very quiet during the week, and only a few sales have been effected for good useful parcels both of leaf and strips. Prices continue firm. Of other growths used for cutting purposes, the stocks are extremely small, and what is offering is held for full rates. For cigar tobaccos there has been a good demand.

LEATHER.—There has been a fair average demand for most descriptions of leather during the past week, but on Tuesday at Leadenhall the transactions were generally of a limited character. The supply of fresh goods was small, and in some cases not adequate to the wants of buyers. Prime light English butts, light shaved hides, English and foreign bellies, calf skins, and English horse hides are in request at full prices.

METALS.—We have no change of any importance to report in our markets. Copper is very firm, but political matters are too uncertain to induce any active business. Straits tin, which touched in the middle of the week 132s to 133s, is again firmer. Spelter is slightly dearer.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	46	6
Fat by ditto	2	2
Yellow Russian ditto	46	6
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs.....	6	0

PROVISIONS.

Bacon market brisk at an advance of 2s to 3s; best sizeable Waterford, 67s, f.o.b.; heavy, 64s, f.o.b.; Limerick and Cork, 66s landed. with 3s less for heavy. A good demand for 10 to 12 lb hams, at 104s to 108s, for French markets. Friesland butter, 150s.

METROPOLITAN CATTLE MARKET.

MONDAY, Jan. 30.—The total imports of foreign stock into London last week amounted to 3,883 head. In the corresponding week in 1870 we received 7,195; in 1869, 3,477; in 1868, 1,930; and in 1867, 6,205 head.

The cattle trade to-day was without animation, and the tendency of the quotations was downwards. Butchers have been able to supply their wants freely through the carcass market, where the prices current are comparatively low, and this has had a depressing influence upon the quotations here. The supplies of beasts on sale to-day were only moderate, and the condition of the animals was good; nevertheless, sales progressed slowly, and salesmen were compelled to accept 2d per 8 lbs under the quotations current on Monday last. The top price for best Scots and crosses was 5s 10d per 8 lbs. About 260 Spanish beasts were exhibited, which sold at from 4s to 5s per 8 lbs, according to quality. Notwithstanding the limited number of sheep in the pens, there was no change apparent in the quotations, the demand being far from active. The best Downs and half-breds sold at 5s 10d to 6s per 8 lbs. Calves and pigs sold quietly, at late rates.

SUPPLIES ON SALE.

	Jan. 31, 1870.	Jan. 30, 1871.

HOP MARKET.

BOROUGH, Friday, Feb. 3.—Business in the hop market has been again on an extensive scale, the transactions concluded being at extreme rates previously current, and in some instances more money ha

been obtained. Mid and East Kents, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Feb. 3.—These markets were well supplied with potatoes. The demand has been quiet, at our quotations. English Regents, 70s to 90s; Scotch Regents, 60s to 90s; and Rocks, 55s to 75s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 3.—The sales of sundry kinds of foreign took place on Tuesday and Wednesday last, and on Thursday were held supplementary sales of East India of about 3,300 bales, which went off at about the closing rates of last week. Of the 11,222 bales and ballots of miscellaneous kinds, a larger quantity than usual found buyers at very fair rates, chiefly for home consumption; but there were also a few French and Belgian buyers present.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 3.—There was a thin attendance at this market to-day. Wheat was quiet at a decline of 1d per cental. Flour was 6d lower, but total business transacted was very moderate. Maize was slow at 6d less money. Beans and peas were a shade in buyers' favour. In oats and oatmeal there was no change.

WAKEFIELD, Friday, Feb. 3.—Wheat is held firmly for the extreme prices of last Friday at this market to-day, but the business passing is of a retail character. For barley trade is quiet at last week's prices. Beans and oats were fully as dear. Some sellers were asking 1s to 2s higher for wheat.

The Gazette.

TUESDAY, January 31.

BANKRUPTS.

Thomas Fardell, Trinity square, Tower hill, carman.
Henry Martin, Milbourne grove, West Brompton, captain in the army.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

OXYGENATED WATER HOLDS IN
Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.
Laboratory, 36 Long Acre. and all Druggists.

USE ONLY THE

GLENFIELD STARCH

THE QUEEN'S LAUNDRESS USES NO OTHER

DINNEFORD'S FLUID MAGNESIA.
—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

TEETH.—MR WEBB (MANY
years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S
extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 562, improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with greater efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the laughing gas being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
64 LUDGATE, CITY, and 56 HARLEY ST., CAVENDISH SQ., } London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 5s.

UNIVERSITY PLATE CHESTS.—
Gentlemen proceeding to the Universities should write for MAPPIN and WEBB'S ILLUSTRATED LIST of their SERVICES of PLATE and CUTLERY, in oak chests, for one, two, or more persons, at five eight, 12, and 16 guineas.—Mappin and Webb, silversmiths and electro-platers, 71 and 72 Cornhill, and 76, 77, and 78 Oxford street, London.

KINAHAN'S LL WHISKY.
This celebrated and most delicious old mellow spirit is the very
CREAM OF IRISH WHISKIES,
in quality unrivalled, perfectly pure, and more wholesome than the finest Cognac Brandy. Note the red seal, pink label, and cork branded
"KINAHAN'S LL WHISKY."
New Wholesale Depôt, 6A Great Titchfield street, Oxford street, W.

DUNVILLE'S OLD IRISH WHISKY,
BELFAST, of same quality as that supplied to the International Exhibition of 1862, Dublin Exhibition of 1865, Paris Exhibition of 1867, and now regularly to the House of Lords, the quality of which is equal to the finest French brandy, may be had direct from Belfast, in butts, hogsheads, quarter-casks, and cases.—Quotations on application to Messrs Dunville and Co., Royal Irish Distilleries, Belfast; or at their London offices, 4 Beaufort buildings, Strand, W.C.

ALLSOPP'S PALE OR BITTER
ALE.—Messrs S. ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for their SEASON-BREWED PALE ALE, in Casks of 18 Gallons and upwards, at the Brewery, Burton-on-Trent, and at the Branch Establishments.

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers on "ALLSOPP'S PALE ALE" being specially asked for.

THE PERFECT SUBSTITUTE FOR
SILVER.—The Real Nickel Silver, introduced more than thirty years ago by WILLIAM S. BURTON, when plated by the patent process of Messrs Elkington and Co., is beyond all doubt the best article next to sterling silver that can be used as such, either usefully or ornamentally, as by no possible test can it be distinguished from real silver.

	Fiddle, or Old Silver.			Bead Pattern			Thread Pattern			King's, or Shell.		
	£	s	d	£	s	d	£	s	d	£	s	d
Tbl. Frks or Spns. p.doz	1	10	–	2	1	–	2	2	–	2	5	–
Dessert — —	1	2	–	1	7	–	1	10	–	1	11	–
Tea Spoons		14	–		19	–	1	1	–	1	2	–

These are all as strongly plated, and are in every respect at least equal to what other houses are selling as their first quality at very much higher prices.

A second quality of Fiddle Pattern—
Table Spoons and Forks ..... £1 2s per dozen
Dessert ditto, 16s; Tea Spoons ..... 10s —

Tea and Coffee Sets, from £3 15s to £21 16s; Dish Covers, from £9 to £26; Corner Dishes, from £7 10s to £18 18s the set of four. Biscuit Boxes, 12s to £5 10s. Cruet and Liquor Frames, &c., at proportionate prices.

The largest stock in existence of Plated Dessert Knives and Forks, and Fish-eating Knives and Forks and Carvers.

All kinds of re-plating done by the patent process.

WILLIAM S. BURTON, Furnishing Ironmonger, by appointment, to H.R.H. the Prince of Wales, sends a Catalogue, containing upwards of 850 Illustrations of his unrivalled stock, with lists of prices and plans of the 20 large show rooms, post free. 39 Oxford street, W.; 1, 1A, 2, 3, and 4 Newman street; 4, 5, and 6 Perry's place, and 1 Newman yard, London. The cost of delivering goods to the most distant parts of the United Kingdom by Railway is trifling. WILLIAM S. BURTON will always undertake delivery at a small fixed rate.

"EUREKA."—THE FORD'S
EUREKA DRESS SHIRTS.—Now ready, a very large assortment of shirts for evening wear, plain fronts, fancy plaited, and richly embroidered. Six different sizes. Ready for immediate use, 8s 6d, 10s 6d 12s 6d, to 25s, or can be made to special order in a day or two.—Rd. FORD, 38 Poultry, E.C.; Branch, 308 Oxford street, W.

EDUCATION.—"ONE YEAR'S
Good Schooling" at the English and Continental College, Harrow (close to the station).—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's finishing instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward) in penmanship, commercial and polite correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid cricket field, close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of thirty pupils. Terms—30 guineas under 12, 35 guineas under 14, and 40 guineas per annum under 15 years of age. 10s for laundress, 10s for books and stationery, and for tuition of dancing, drilling, singing and brass band instruments. 10s per quarter are the only extras. Established 1857. Address Dr VELLERE Harrow

HONGKONG AND SHANGHAI BANKING CORPORATION.

Capital, 5,000,000 dols. Paid-up, 3,500,000 dols.

Court of Directors and Head Offices in Hongkong.

Subscribed capital, £2,500,000, in 50,000 shares of £50 each. Paid-up capital, £1,000,000; Reserve fund, £500,000.

DIRECTORS.

Nathaniel Alexander, Esq.	Frederick Harrison, Esq.
T. Tyringham Bernard, Esq.	Lord Alfred Hervey.
Philip Patton Blyth, Esq.	Wm. Champion Jones, Esq.
John Wm. Burmester, Esq.	E. H. Lushington, Esq.
Thomas Stock Cowie, Esq.	James Morley, Esq.
Frederick Francis, Esq.	William Nicol, Esq.

GENERAL MANAGER—William McKewan, Esq.

CHIEF INSPECTOR—W. J. Norfolk, Esq.

INSPECTORS OF BRANCHES—H. J. Lemon, Esq., and C. Sherring, Esq.

CHIEF ACCOUNTANT—James Gray, Esq.

SECRETARY—F. Clappison, Esq.

HEAD OFFICE—21 LOMBARD STREET.

MANAGER—Whitbread Tomson, Esq.

ASSISTANT-MANAGER—William Howard, Esq.

At the ANNUAL GENERAL MEETING of the Proprietors, held on Thursday, the 2nd February, 1871, at the City Terminus Hotel, Cannon Street Station, the following Report for the year ending the 31st December, 1870, was read by the Secretary,

WILLIAM CHAMPION JONES, Esq., in the Chair.

The Directors in submitting to the proprietors the Balance Sheet of the Bank for the Half-year ending the 31st December last have the satisfaction to report, that after paying interest to customers and all charges, allowing for rebate and making provision for bad and doubtful debts, the net profits amount to £87,167 16s 4d. This sum, added to £7,181 4s 4d brought from the last account, produces a total of £94,349 0s 8d.

The usual dividend of 6 per cent. for the half-year is recommended, together with a bonus of 3 per cent., both free of income tax, which will absorb £90,000, and leave £4,349 0s 8d to be carried forward to profit and loss new account. The present dividend and bonus, added to the June payment, will be 17½ per cent. for the year 1870.

The Directors retiring by rotation are:—William Nicol, Esq., Thomas Tyringham Bernard, Esq., and Nathaniel Alexander, Esq., who being eligible offer themselves for re-election.

The dividend and bonus (together £1 16s per share), free of income tax, will be payable at the Head Office, or at any of the branches, on or after Monday, the 13th inst.

We, the undersigned, have examined the foregoing balance sheet, and have found the same to be correct.

(Signed) WM. JARDINE, WILLIAM NORMAN, R. H. SWAINE, } Auditors.

London and County Bank, Jan. 26, 1871.

The foregoing report having been read by the Secretary, the following resolutions were proposed and unanimously adopted:—

1. That the report be received and adopted, and printed for the use of the shareholders.

2. That a dividend of 6 per cent., together with a bonus of 3 per cent., both free of income tax, be declared for the half-year ending the 31st December, 1870, payable on or after Monday, the 13th instant, and that the balance of £4,349 0s 8d be carried forward to profit and loss new account.

3. That William Nicol, Thomas Tryingham Bernard, and Nathaniel Alexander, Esquires, be re-elected Directors of this Company.

4. That the thanks of this Meeting be given to the Board of Directors for the able manner in which they have conducted the affairs of the Company.

5. That William Jardine, William Norman, and Richard Hinds Swaine, Esquires, be elected Auditors for the current year, and that the thanks of this Meeting be presented to them for their services during the past year.

6. That the thanks of this Meeting be presented to the General Manager, and to all the other Officers of the Bank, for the zeal and ability with which they have discharged their respective duties.

(Signed) W. CHAMPION JONES, Chairman.

The Chairman having quitted the Chair, it was resolved and carried unanimously—

7. That the cordial thanks of this Meeting be presented to William Champion Jones, Esq., for his able and courteous conduct in the Chair.

(Signed) WILLIAM NICOL, Deputy-Chairman.

[Extracted from the Minutes.]

(Signed) F. CLAPPISON, Secretary.

LONDON AND COUNTY BANKING COMPANY.

R. A. CAMERON, Secretary.

Palmerston buildings, Old Broad street, E.C.

BANK MANAGER.—

The Directors of the Consolidated Bank are prepared to receive applications for the post of MANAGER at the London Office of the Bank.—All communications must be by letter only, which will be treated as strictly confidential, to be addressed to the Chairman of the Bank, 52 Threadneedle street, E.C.

A GERMAN GENTLEMAN OF

long experience in the cotton trade, at present managing an extensive Liverpool firm, wishes to meet with a good London house willing to open a branch in Liverpool, or would take the MANAGEMENT of a London firm, where his knowledge and experience would meet with adequate remuneration. Highest references.—Address Cotton, 24 Cottenham street, Kensington, Liverpool.

LAKE SHORE AND MICHIGAN SOUTHERN RAILWAY COMPANY.

SALE OF 2,000,000 dols CONSOLIDATED MORTGAGE 7 PER CENT. CURRENCY BONDS AT 79 PER CENT.

Messrs FOSTER and BRAITHWAITE are instructed to sell Two Millions of dollars of Lake Shore and Michigan Southern Railway Consolidated Mortgage Bonds.

These bonds are of 1,000 dols each in the United States currency. They bear interest at 7 per cent. per annum, payable 1st January and 1st July by the Union Trust Company of New York, who are Trustees of the Mortgage.

They are redeemable 1st July, 1900, and are payable to bearer, both principal and interest.

The amount of the mortgage is 25,000,000 dols, and it is secured on the whole of the Company's property, including Railway and Branches, equipment and real estate.

It is stipulated in the mortgage that, in addition to the amount required to meet the annual interest, the Railroad Company shall pay over to the Trustees 250,000 dols per annum, as a sinking fund for the redemption of the principal.

Of the total amount of the mortgage (25,000,000 dols) 21,000,000 dols are retained to meet other bonds now outstanding, secured on various portions of the property, and maturing at different dates. When these bonds fall in, the Consolidated Mortgage will become the first and only mortgage charge.

The 2,000,000 dols of bonds now offered are part of the surplus, after providing for the outstanding debt. They are sold to provide a double track on the road from Buffalo to Toledo, and a steel track from Buffalo to Cleveland, and for other purposes.

The price is 79 per cent. (4s 6d per dollar) or £177 15s per bond of 1,000 dols, including interest from 1st January.

At the present exchange this price is equal to about 96 per cent. in United States currency, so that the bonds yield over 7 per cent. interest on the cost. When the United States return to specie payments, which may be looked for at no very distant date, the yield will be close upon 8 per cent.

Applications for the bonds to be made to Messrs Foster and Braithwaite, at whose Office may be inspected a Copy of the Mortgage, the Articles of Agreement between the consolidated companies, and other documents.

27 Austin Friars, London, E.C., February, 1871.

The Lake Shore and Michigan Southern Railway is one of the best established and most important railroads in the United States.

It is a consolidation of the various roads extending from Buffalo on Lake Erie, to Chicago on Lake Michigan, and comprising, with other lines, the Michigan Southern and Northern Indiana, the Lake Shore, and the Buffalo and Erie Railways.

Including branches the Company owns 1,013 miles of railroad.

The capital stock is 35,000,000 dols. The whole of the debt is covered by the Consolidated Mortgage for 25,000,000 dols.

The total receipts in 1869 were, 12,945,598 dols, which, after paying all working expenses, interest on debt, sinking fund, and other charges, yielded a dividend of 8 per cent. on the capital stock, and a surplus of 700,000 dols. The accounts for 1870 are not yet completed, but they show receipts amounting to about 13,600,000 dols, sufficient to pay as before all charges, a dividend of 8 per cent. on the ordinary stock, and leave a considerable surplus.

Persons unable to take the lessons may obtain the inventor's works for self-instruction at his only institution. 13 Strand.

NEATH AND BRECON RAILWAY.

Issue of £150,000 Six per Cent. A Debenture Stock, Redeemable at £10 per cent. premium within 10 years, at the option of the Board of Directors, upon giving 12 months' notice.

Messrs COATES and HANKEY are authorised by the Directors of the Neath and Brecon Railway Company to invite subscriptions for £120,000 of the above stock, the balance thereof having been already subscribed for.

The price is par, or £100 for each £100 stock, payable as follows:—

£	£		
10	on each 100 stock subscribed,	payable	on application.
15	—	—	on allotment.
25	—	—	on 31st March, 1871.
25	—	—	on 30th June, 1871.
25	—	—	on 30th Sept., 1871.
100			

Interest will accrue from the dates of payment of each instalment, but subscribers will have the option of paying the whole of the instalments on allotment, or on any of the days on which an instalment falls due, interest at the rate of 6 per cent. per annum being allowed on each payment.

The interest will be payable half-yearly, on 1st July and 1st January in each year, at the Union Bank of London, Princes street.

In the event of any subscriber not paying any instalments that may be due from him, the amount already paid shall be liable to forfeiture.

Scrip certificates will be issued on allotment, exchangeable for debenture stock certificates when fully paid up.

The Act of Parliament, under which this stock is issued, may be seen at the Offices of the Solicitors of the Company, Messrs Dean and Taylor, 18 New Bridge street, Blackfriars.

Applications, accompanied by the payment of £10 per cent., will be received on the enclosed form, which must be filled up and forwarded to the Union Bank of London, Princes street, E.C., or its Chancery lane branch; or to Messrs Coates and Hankey, 24 Gresham street, E.C., from whom prospectuses, with maps, may be obtained.

The Neath and Brecon Railway consists of a line 33 miles in length, open for traffic from the town of Neath to the town of Brecon, and of a Junction Line about 7½ miles in length, not yet completed, from the Main Line at Capel Colbren to a Junction with the Swansea Vale Railway, near the Ystalyfera Tin Plate Works. The Main Line forms a through communication between the Great Western Railway at Neath and the Midland, Mid-Wales, and Brecon and Merthyr Railways at Brecon, and thereby forms a connection with the railways leading to the Northern and Midland districts.

For a considerable part of its distance it runs through a rich maiden coal and iron district, and is so geographically situated as to command the traffic as it becomes developed.

The Junction Line will connect the Main Line with the Swansea Vale Railway and the Port of Swansea, and will open up a rich coal and iron district of its own, besides affording access to some of the largest tin-plate, copper, and other works of South Wales. It will also form the shortest route between the port of Swansea, with its surrounding mineral wealth, and the Northern and Midland districts of England by means of the railways concentrating at Brecon.

Under the Act of 1869, the Company is empowered to raise, for the completion of the Junction Line and for other purposes (by the issue of A Debenture Stock at par), a sum not exceeding £150,000, together with a further sum of £75,000 for the completion of an important branch not at present to be proceeded with.

The A Debenture Stock has priority over the Debenture and all other stocks and shares of the Company, amounting to about £1,250,000.

Inasmuch as a net receipt of £5 per mile per week is sufficient to meet the interest on the present issue, it is unnecessary to enter into any estimate of traffic; it may, however, be observed that the Swansea Vale Railway, to be connected with the Neath and Brecon by this Junction, is at present earning a gross traffic of £25 per mile per week.

No applications will be received after Wednesday, the 8th inst.

24 Gresham street, E.C., 26th January, 1871.

NEATH AND BRECON RAILWAY.

Issue of £150,000 Redeemable 6 per Cent. A Debenture Stock.

THE NEW BOARD OF TRADE ACCOUNTS AND THE COMMERCE OF THE COUNTRY.

Much interest attaches to the first publication of the Board of Trade Tables in their new form. As we have before explained, we can only accept that reform as preliminary and provisional. Any complete reform must be based on the abolition of the Bill of Entry, which, though the Commissioners who investigated the accounts reported against it, is still permitted to exist. Still the improvement is important; and, as we understand the annual saving to be considerable, we are doubly grateful. To get a better thing at less cost is very rare, and such a result is much to the credit of Mr Lefevre, the principal Commissioner who suggested these alterations.

At first however, as is natural, the change of form is confusing. All changes must be. In consequence of them we are always obliged to compare two things not precisely identical, and in consequence considerable explanation is necessary; and after all, for the time, the result is not satisfactory. It is only when the system has been at work for some time that we can reap the full benefit of it.

As to the point of cardinal interest to the country—our export trade—these Returns, if not carefully commented on and explained, would lead to much error.

Exports of British and Irish Produce in January.

	£
1869	13,621,114
1870	13,923,185
1871	11,458,039

—showing a very great reduction—much greater than anyone conversant with the actual state of trade would allow or suppose.

Some diminution in our export trade we are inclined to think there is. So great a continental war necessarily produces a grave effect, and it produces a greater effect after an interval than at first. These changes are always augmentative. Every diminution in trade tends to cause another diminution, because it stops profits, and diminishes earnings. The persons with whom those profits and earnings would have been laid out suffer in consequence, and the diminution of their trade appears in the Returns. And then the injury to this second set of people affects another third set of people, and so on through society. Several indications induce us to think that the accumulative consequences of the war are now telling in this manner. There has been a slight diminution in the Clearing-house returns (as we have before twice noticed), and a diminution in the rate of increase of railway traffic. To some extent therefore we believe the decrease in our exports shown in the Returns to be a real decrease. But the figures as they stand show a much larger decrease than there is.

The old month, so to speak, that is, the month of the old Returns, is a complete month. A great deal of the trade of the last week of the month is omitted in the new Returns. We now publish the accounts on the 7th of the month, and we also allow *six* days after the clearance of the vessel to elapse before her accounts are completely made up. Consequently the trade of the last four or five days of the month is very incompletely represented. In future this will not matter so much, because the trade omitted at the end of the month will be counterbalanced by the trade left over at the beginning of it. It will only matter for comparisons when trade is changing rapidly, so that four or five days at the end of the month differ exceedingly from four or five days at the beginning. But in this beginning of the new system the change is vital; the so-

called month of January, 1871, is some days shorter than that of January, 1870.

If we take off $\frac{1}{7}$th for this cause—no extravagant estimate—we shall account for 1,630,000*l* of the apparent decrease of exports. A part of the remainder is accounted for by the present condition of the cotton manufacture. In consequence of the great diminution in the price of raw cotton, there has been a great diminution in the price of the manufactured article. There has been a great reduction in the value of the cotton manufactures exported, but no diminution in their quantity. The figures are :—

QUANTITIES AND VALUES OF COTTON MANUFACTURE EXPORTED.

	Quantities. Yards.	Values. £
1869	233,131,122	3,913,972
1870	229,297,332	3,876,346
1871	230,785,325	3,507,871

Although therefore there may have been, and for the reason assigned we suspect there is, a slight diminution in our export trade, there is no such alarming and enormous diminution as the new accounts by themselves would seem to show.

The exactly opposite error arises as to our imports. Here the accounts show a large increase. The figures are :—

IMPORTS OF PRINCIPAL ARTICLES.	£
1869	13,567,967
1870	16,837,173
1871	25,899,077

As there has been a new mode of valuing these articles, at first it would seem natural that the difference arose in that way. But an examination of the accounts will show that it affects the quantities also. And the real reason is this. By one of the anomalies of the old system, January only included from fourteen to twenty-one days, and in consequence there was always a great diminution in the month of January as compared with the month of December. The returns at the end of each year were cleared up; the whole year was kept right, but the monthly comparison was made wrong. But now, by careful exertion, the authorities have got in the whole imports for January. So that in the imports we are comparing a new complete month with an old incomplete one, just as in the exports we are comparing a new short month with an old real one.

These perplexities in the accounts almost necessarily happen at every change. But notwithstanding we have no doubt that, on the whole, the changes are for the better, though they are not so great or so good as they ought to be.

THE TERMS OF PEACE AND THEIR PROBABLE EFFECT HERE.

EVERYTHING in Lombard street still turns on the conditions of peace. If these are thought to be satisfactory, much money will go abroad, and the value of money will rise rapidly; but if not, little will go, and money will remain much as it is.

The conditions are so critically important because they affect the borrowing power of France. If Germany should impose an enormous sum on France, she could not pay the interest on it, and so far as this market goes, she could not get it. We insert elsewhere a statement of the present state of French finance as near as it can be given. It will be seen to be the statement of a Government which has long been poor, which relies on inelastic taxes, which has used up all the easiest and pleasantest ways of adding to its income. No doubt a great financial reformer might do for France what Sir R. Peel and Mr Gladstone have done for England. If France had Free-trade and income tax, in a few years her trade would augment with extreme rapidity, and her revenue would be as elastic and as capable of bearing sudden burdens as the English. But such a reform would be excessively unpopular, and would probably be impossible for the coming Government, which, whether it be Republic, or Monarchy, or Empire, must, from the divisions of the people and its want of root among them, be very weak.

The difficulty of foreign lenders is the greater that we do not know what amount France itself will lend. The Empire at its weakest moment could reach the small savings of the mass of the people, and therefore, though it had a chronic deficit, it never wanted money. But we do not know that a *Republic* can tempt the hoards of the peasantry. It is an odious name to them, and they may shrink from risking their money with it.

The new Government of France will not only need much money for the German Indemnity, and for its own war expenditure, but much also—though of course not so much—for the relief of France. Paris and many other cities were before the war loaded with debt, incurred to pull down old houses and build new; they have now had to pay besides great sums to the Germans. Their resources are not easily increased, and they will want the help of the central Government, and must have it, for it would shake credit if Paris, or even great provincial cities, should be bankrupt. The peasantry, too, near Paris, and everywhere that has been the scene of war continuously, will be in extreme distress; they must be helped by richer people, and in France everything great is apt to be done by the Government, or not at all. These inevitable demands on France must be reckoned by Germany. It is of no use asking the extreme shilling from France. You must leave her with money to meet charges which she cannot evade, or hesitating lenders will be alarmed, and the money asked for will not be obtained.

There is of course *some* risk in lending to a country with so insecure a Government, and in such a confused political position, as the French. But many lenders here will, we apprehend, run the risk of that, if the German demand be not such as to defeat itself, and if no untoward events occur. But should a very startling sum be required by Germany very little will be sent from hence.

THE RESOURCES OF FRANCE AND THE WAR.

THE financial resources of France are now a question of peculiar interest. How will she be able to bear the losses of the war? and what indemnity can she afford to pay to Germany? France is a rich country, but her resources are far from inexhaustible, and it may be possible to form some notion how near the limit of exhaustion will be reached in "liquidating" all the cost of the war.

The first point in such an inquiry is the actual state of French revenue and expenditure. Every one knows in a general way that during the Empire there was a chronic deficit; that the debt was constantly accumulating, while every kind of capital resource was forestalled by the successive finance ministers; and that though the taxes were annually more and more productive, yet the increase never kept pace with the expenditure, and there was never any material remission of taxation. But we may look at the actual figures. The last year for which the accounts are closed was 1867, and the actual incoming and expenditure were then as follows :—

	Receipts. £		Expenditure. £
Ordinary Budget	67,689,000		61,565,000
Extraordinary Budget	1,448,000*		14,651,000
Special Sinking Fund Budget	3,134,000		1,963,000†
Deficit	5,908,000		...
	78,179,000		78,179,000

* Less loans and surplus from Ordinary Budget.
† Less re-purchases of Rentes.

Such is the last closed account of French finance, putting the actual receipts against the actual expenditure of the year. Roughly speaking, it shows a revenue of 72,000,000*l*, against an expenditure of 78,000,000*l*. No doubt 1867 was an "exceptional" year. It was the year of the Luxembourg difficulty, and also the year in which preparations for the great contest with Prussia began. But, in truth, these exceptions have been the rule under the Empire, and a year which exhibits a deficit of 5,000,000*l* or 6,000,000*l* is a better representative of the average year of the Empire than any of those years of M. Fould, when a balance on the right side by dint of extraordinary efforts was actually obtained. The two years subsequent to 1867, and prior to the war of last year, will also be years of deficit,—a loan of 17,000,000*l*, as may be remembered, having been obtained to cover the extraordinary expenditure of the three years 1867-68-69.

What the average annual deficit of the Empire has been it might be somewhat difficult to compute, but it is easy enough to see how rapidly the burdens of the country increased in amount. The total expenditure, as set out in the official accounts (including a part of the local expenditure usually dealt with in the Budgets of the Central Government)—

	£
In 1867 was	87,000,000
In 1850 was	59,000,000
Increase	28,000,000

And this is even an under-statement. In 1867, the practice

ceased of appropriating to expenditure a sum of about 6,000,000*l* annually for the amortisation of debt, but which sum was never so applied, and being again brought into account as a receipt, swelled the totals on both sides by mere cross entries. It would be nearer the mark to say that the annual expenditure in the period in question increased by 34,000,000*l*, and not by 28,000,000*l*. To take the "debt and dotations" alone, the annual charge increased about 10,000,000*l*.

Such was the financial position of France before the war. For twenty years there had been a chronic deficit. The annual expenditure had increased upwards of 30,000,000*l*, the annual charge for the debt 10,000,000*l*, and though new taxes had not been imposed in consequence of the growing prosperity of the country causing old ones to be more and more productive, yet there had been no remission of taxes. We should infer from such an account that probably there would be few unexhausted resources. The increasing productiveness of the old taxes, indicating the increasing wealth of the community individually, implies that *some* new taxes could be levied. It is not probable that the old taxes alone would weigh upon a community which had grown wealthy in proportion to the burden upon it when it was poorer; and this applies with special force to some of the French taxes, which have been peculiarly inelastic, only because of their arbitrary basis. It follows that as new taxes have not been imposed, there must be some unexhausted taxpaying power in the country; but as French taxes have been high this unexhausted power is not likely to be much. But besides the curtailment of expenditure, new taxation is the only resource in the present emergency. *How much* in both ways could France spare to pay the interest of new loans for liquidating the burden of the war?

First then as regards revenue, we find that the above sum of 72,000,000*l* was obtained in the following manner:—

	Amount. £		Per Cent.
1. Direct Taxes—			
Foncier tax £6,815,000			
Personal and furniture tax 2,031,000			
Tax on doors and windows 1,498,000			
Trade license tax 2,628,000			
Supplementary charge for collection 23,000			
	12,995,000	.....	17·8
2. Produce of Domains	505,000	.....	0·7
3. Produce of Forests	1,628,000	.....	2·2
4. Registration and Stamp Duties	17,364,000	.....	24·3
5. Customs and Salt Duties	5,831,000	.....	8·1
7. Indirect Taxes (Excise and Monopolies)—			
Alcoholic liquors..... ..... £9,361,000			
Salt 418,000			
Home-grown sugar..... 2,380,000			
Miscellaneous, including 1,248,000*l* from Special Sinking Fund Budget... 2,577,000			
Sale of tobacco..... 9,905,900			
Sale of powder..... 510,000			
	25,151,000	.....	34·8
8. Post Office	3,457,000	.....	4·8
9. University fees	147,000	.....	
10. Receipts from Algeria	619,000	.....	
11. Receipts for Civil Service pensions.....	592,000	.....	
12. Miscellaneous—			7·3
Ordinary £1,875,000			
Extraordinary 1,448,000			
Sinking Fund Budget..... 633,000			
	3,956,000	.....	
Total	72,245,000	.....	100·0

According to this statement, the national income of France is obtained in the proportion of 17·8 per cent. from Direct taxes (more than one-half of which fall on real property); 24·3 per cent. from Registration and Stamp duties, which are mainly taxes on the *transfer* of property, whether by sale or death; 34·8 per cent. from Excise duties and Monopolies; 8·1 per cent. from Customs; 2·9 per cent. from Domains and Forests; 4·8 per cent. from Post Office; and 7·3 per cent. from "miscellaneous sources," including the income from Algeria. The proportions indicate the inelastic nature of French revenue. The fact that nearly one-half is from Direct taxes and from Registration duties falling mainly on the transfer of property, points to a real difficulty in the machinery of taxation. If revenue could have been got in an easier way, an easier way would have been tried. And a stricter mode of dealing with the revenue would strengthen this conclusion. The proportion of "Excise duties and Monopolies" would be a good deal less than it is, and the proportion of revenue from other sources would of course be greater, if the receipts from monopolies were only net receipts, and not, as they are, the gross income. As compared at least with countries which do not make a monopoly of "tobacco," France seems to get more from its Indirect taxes than it really does. But even taking things as they stand, the statement does not show much room for fresh taxes.

We may look at the matter in detail. Of the above twelve heads under which we have classified the sources of French revenue, there are only four or five which need be looked at—the Direct taxes, Registration and Stamp duties, Customs, and Indirect taxes; and, perhaps, the Post Office. These comprise all the taxation, which is of course the only source to be looked at for new revenue. Very likely the Direct taxes will be the resource first thought of in France, but the difficulties in the way of adding to them will be enormous. The peculiarity is that, while they bring in 13,000,000*l* to the State, they also yield 8,000,000*l* to the communes and departments, forming in fact the principal source of local income in France. The State clearly cannot increase its income from this source, without endangering the local Budgets, which include most indispensable expenditure. We know how irreducible our own local expenditure is, and it is the same in France. No doubt after local exigencies are provided for the State may still extract something more, but each tax has its own difficulties. If we take the *Foncier* tax we find that the aggregate yield, adding the local receipt of 5,487,000*l* to the above sum of 6,815,000*l* is 12,302,000*l*, which does not seem a maximum amount, if it be true, as French financiers calculate, that the annual value of real property in France is rather more than that of England, and is upwards of 150,000,000*l*. Even if the annual value were only 125,000,000*l* the tax would be merely 10 per cent., and our own rates are more. And there is no kind of tax more tempting to increase at a pinch. But unfortunately in France the increase has been largely forestalled in another way. It is on this kind of property that the Registration duties—equal to *five* per cent. on the value transferred—fall with crushing severity. Besides the 12,000,000*l* above reckoned, there are at least 7,000,000*l* of the Registration duties, derived practically from the same source and which must be taken into account in any new impost. Assuming that if there were no Registration duties the Foncier tax might be doubled so as to be equal to 20 per cent. on the property, it would follow that with the Registration duties there is only a balance of 5,000,000*l* which the Foncier tax could be made to yield. But we doubt if such an addition is practicable. A much smaller addition in 1848 produced grave discontent, and the memory of it makes the Republic odious among the peasants to this day.

Taking the other Direct taxes we find that the aggregate yield is:—

	State. £		Local. £		Total. £
Personal and furniture.....	2,031,000	...	1,310,000	...	3,341,000
Doors and windows	1,498,000	...	578,000	...	2,076,000
	3,529,000	...	1,888,000	...	5,417,000
Trade licenses	2,628,000	...	1,410,000	...	4,038,000
	6,157,000	...	3,298,000	..	9,455,000

What we remark in this is that, taking the first two as virtually an income tax, a sum of 5,417,000*l* is a good deal for a country like France, which is less rich than England, but has a larger population. We doubt if an income tax of 7d or 8d per £ in France would yield any more. The Trade License tax again, amounting to 4,000,000*l*, is very heavy. If there is no income tax in France, it is at least plain that there are equivalents. Were there no other objection, the complexity of these taxes would be an obstacle to their increase. The Trade License tax, for instance, has a most complicated tariff, with a *double* classification of traders, according to the nature of their business and the size of the towns they trade in, besides other distinctions. The "Personal" and Furniture tax," again, is little better than a lump sum voted by Parliament, and distributed among the rich men of a district pretty much at the discretion of the authorities. Such taxes are not susceptible of ready increase, and any addition that may be made is apt to be lost in the collection.

As regards the *Registration* duties, our remarks are partly anticipated by what we said on the Foncier tax. The source of the taxes being to a large extent the same, if you increase the one you cannot increase the other. We should think that of two evils it would be preferable to raise the Foncier tax and leave the Registration duty alone, though to in-

crease the latter has been rather a favourite resource of French financiers. It is a ready expedient to make the duty 5½ or 6 per cent., or more, instead of 5 per cent.; but the check to transactions and the burden on those who must sell is most severe. Our own stamps on tranfers interfere quite sufficiently with business; but their maximum is ½ per cent., not 5 or 6. The Registration duties falling on movable property are more moderate, but they are a greater hindrance to business and less suitable for increase. Perhaps some additional income could be found by increasing the duties on *successions*, which are at something like our own legacy rates; but the strength of the family ties in France, and the close calculation of the family fortune, would probably make any increase of this kind peculiarly oppressive. The remaining taxes under this head of revenue—that is, the Stamp duties—are comparatively small, which would not yield much more if increased, while some are specially obnoxious. Altogether, we should say that not more than 1,000,000*l* or so could be obtained from the Registration and Stamp duties without oppression.

With regard to *Customs*, the one observation is that though the yield is small, the tariff is not light. Of course France has no large import of alcoholic liquors, but the duties on other articles of general consumption—tea, coffee, and sugar—are nearly the same as our own, or rather as our own were before Mr Lowe's last reduction of the sugar duty. The most important article is sugar, which yields 2,000,000*l*; but the exclusive increase of the import duty would not be productive of revenue so long as the cultivation of beet could be extended, while to increase *both* the import and excise duty, discouraging as it would be to beetroot cultivation, is hardly a possible expedient. An addition of a million or two to the Customs, which would put more protection into the tariff, would be a formidable addition to the burdens of France.

There remain the Indirect taxes—that is the excise duties and monopolies. In their present form not much could be made of these. The price at which the produce of the tobacco manopoly is sold is as high as the price of the taxed article in England. To increase the duty would tempt the contrabandist too much, and would in fact be impracticable. The duty on home grown sugar we have already referred to in our remarks on Customs. The principal other source of revenue here are the duties on alcoholic liquors, which certainly yield less than similar duties do in England or America; but then Paris is the principal place for levying them, and the Parisian octroi, which cannot be diminished now, would be an obstacle to the increase. The peculiar mode of levying them again, chiefly by charges on permits for passing from one part of the country to another, and for entry into large towns,—a mode of taxation which interferes as much as possible with business,—will not adapt itself to any great increase, for such increase would necessitate the use of more capital in the business. Nor will much be made of the miscellaneous Indirect taxes—the principal items of which are a levy of *ten* per cent. on the passenger traffic of railways, and similar locomotion duties.

The *Post Office* may offer some resource, but the gross receipt of 3,457,000*l* is already high, and the business is not one in which the increase of rates, if otherwise admissible, would bring in much more money.

To sum up this view of French revenue, we should be inclined to say that perhaps 5,000,000*l* more could be got from the Foncier tax, and 5,000,000*l* from Customs and other sources, though to accomplish so much the system of some of the taxes should be changed. But the estimate, in the case of the Foncier tax at least, is a very high maximum; and an addition of 5,000,000*l* to the others would at least add grievously to French burdens. There is nowhere a light tax which could be suddenly raised.

Secondly, we have to inquire what savings can be made in the expenditure. The above sum of 78,000,000*l* was distributed as follows:—

	£
Public debt and pensions	18,285,000
Dotations	1,907,000
Ministry of State	122,000
— Justice	1,317,000
— Public Worship	2,161,000
— Foreign Affairs	534,000
— Interior	2,423,000
— Finance	978,000
— War—Ordinary	14,624,000
— — Extraordinary	5,900,000
— — Algeria	1,334,000
Ministry of Marine and Colonies—Ordinary	5,889,000
— — Extraordinary	2,990,000
— Public Instruction	902,000
— Agriculture and Public Works—Ordinary	2,893,000
Extracrdinary	3,902,000
— Imperial household and fine arts	850,000
Expenses of collecting revenue and of monopolies	8,798,000
Discounts and abatements	411,000
Interest on canal loans, and trentenary obligation	552,000
Purchase of rentes for superannuations	425,000
Guaranteed interest of railways	1,016,000
	78,179,000

The barest glance at these figures will show that the possible *great* reductions are limited. The irreducible expenditure, viz.:—

	£
Public debt and pensions	18,285,000
Discounts, &c.	411,000
Interest on canal loans, &c.	522,000
Purchase of rates for superannuation	425,000
Guaranteed interest of railways	1,016,000
Amounts to	20,659,000

—or more than one-fourth of the whole; and the other expenditure, exclusive of the Ministries of War and Marine, and the extraordinary expenditure on Public Works—what we may consider the regular home expenditure for Civil Government—amounts to 24,219,000*l*, not a very extravagant amount for the ordinary Civil Government and the expense of collecting the revenue in a country like France. There may easily be economy in a few of the items. The disappearance of the Empire may permit an exceptional saving of a million in the "dotations." The charge of collecting the revenue is also very large. But there is not much to come and go upon in the whole amount, while more expenditure will be inevitable in at least one branch—that of Public Instruction. Moreover the vice of French administration and the great source of expenditure again is the multiplication of employés at small salaries, and such an evil is not speedily curable. Something might by got by giving up Algeria; but after all, the apparent difference between the Algerian receipts and expenditure is only 700,000*l*.

We turn then to the Ministries of War and Marine, and the Extraordinary Public Works, which absorb altogether 33,305,000*l*. Here it is obvious enormous savings may be made in ordinary circumstances. But there are special reasons why this expenditure should not for some time be easily reducible. It will be dangerous to stop public works; it will be equally dangerous, perhaps impossible, to disband the army except gradually, and the war must have swelled enormously the number of the officers. In this way France must start afresh with a heavy War Budget, whatever economies may in time be possible by an entire change of system. We should say it is at least improbable that any greater saving can be made than the amount of the *extraordinary* war expenditure in 1867, viz.:—

	£
War	5,900,000
Marine	2,990,000
	8,890,000

It will be a great effort to accomplish all that is indispensable now with only the minimum War Budget of the Empire. The total practicable saving in expenditure, including the million in dotations, may thus be about 10,000,000*l*.

We come then to the question, how much new money France can have to pay interest on increased debt? The answer would be, according to the above figures:—

Probable increase of taxation	£10,000,000
Probable saving on expenditure	10,000,000
	20,000,000
Less former deficit	6,000,000
Amount available	14,000,000

But several deductions must be made. In the first place, France will no longer be the France it has been in extent. It is uncertain how much territory must be given up, but reckoning only the three departments of Bas Rhin, Haut Rhin, and Moselle, there will be at once a great loss of revenue. The revenue in these departments in 1867 from Direct taxes, Registration duties, and Indirect taxes was—

Bas Rhin	£688,000
Haut Rhin	601,000
Moselle	596,000
	1,885,000

And something will also be lost of Customs and other revenue. No doubt some expenditure will be saved, too, but it will be only a portion of the home expenditure, and not very great.

The *second* deduction is the falling off of revenue which must inevitably ensue from this year's war and anarchy. We have hitherto written as if the French revenue would have for starting point what was the closing point before the war; but this will not be the case. The year 1848 produced a drop of one-tenth in the annual revenue, which was not fully recovered from till 1852. The convulsion of the present year has been much more fatal to industry; but the loss of one-tenth of the present receipts would be 7,000,000*l*, and that will be enough to derange all calculations. A *third* drawback will be the new debt of the local authorities, for which they must have new revenue. The competition will diminish the taxable resources of the Central Government.

Altogether, instead of 14,000,000*l* to spare for the interest of new debt, France will, with difficulty, have 5,000,000*l* or 6,000,000*l*. If she obtains more it will be by severe efforts, which no one could venture to anticipate.

We need not say that though France may have money to pay 6,000,000*l* new interest, or even somewhat more, the capital which this sum will represent cannot all be paid to Germany. There are competing losses. The French war expenditure can hardly be less than 80,000,000*l*; the contributions levied on the occupied departments at the rate fixed for Paris may amount to 20,000,000*l*, besides the private "requisitions;" and more than half-a-year's Indirect taxes and Registration duties of the occupied departments, which, including Paris, amount to 23,000,000*l*, will have been wholly lost, increasing *pro tanto* the deficit of 1870. From their nature these taxes cannot be recovered if not collected at the time. In addition, though the Direct taxes of the year may be ultimately got in, a large sum of indirect revenue must have been lost by the war throughout the whole of France. And we have not reckoned the cruel individual losses, which the State must in some way compensate. The debt thus incurred, even at 6 per cent., will absorb far more than 6,000,000*l*. So far from the Germans, therefore, being able to extract easily a large indemnity from France, the puzzle would be how France could find them a much smaller one than they are likely to ask.

RECEIPTS in 1867 of DIRECT TAXES, REGISTRATION, and STAMP DUTIES, and INDIRECT TAXES in the OCCUPIED DEPARTMENTS of FRANCE.

	Direct Taxes. francs.	Registration, &c. francs.	Indirect Taxes. francs.
Aisne	9,481,342	6,735,959	8,725,516
Ardennes	4,425,988	3,436,478	4,026,632

THE DOWRY AGITATION.

THE first sign of a characteristic political feeling which the new electors under the Reform Act of 1867 have given, is the agitation in the great boroughs against the grant for the Princess Louise's dowry. We have taken some pains to ascertain what it does and what it does not mean, and we think we can pretty clearly define both its favourable and unfavourable aspects as a symptom of the wishes of the great mass of the new electors in our great towns. It undoubtedly does not mean, what might perhaps have been in some degree expected if the working-class had shared the views of the middle-class on politics as completely as we sometimes give them credit for,—it does *not* mean that the marriage of a Princess with a subject is considered to be an unworthy alliance, which breaks the charm attaching to the Royal caste; on the contrary, it has been uniformly asserted in all the meetings in which this matter has been discussed,—and the assertion has always, we believe, been met with loud cheers from the meeting,—that the new marriage is a decidedly popular one, and that the precedent of a marriage, believed to be one of pure affection, with a subject is exceedingly welcome to the English people. The feeling of the higher classes, that the Queen has broken through the magic circle which keeps the throne inviolate, and by opening alliances with the cadet branches of the Royal family to the competition of her own subjects, has alienated for ever the respect for the divinity "which doth hedge a King,"—is, we believe, entirely unparticipated in by those who agitate against the dowry. It may be—without any clear consciousness on their own parts—that the constituencies feel easier in demanding that a great British nobleman shall provide adequate resources for his own family, than they would do in the case of a German prince with whose name they had no familiarity, and of whose relative wealth they knew nothing. It is quite possible that, having a better conception of what Lord Lorne's position in British society is, and feeling more definitely their right to require that he shall do as other Englishmen of position do, in providing for his own family without coming upon the nation, their language has been somewhat bolder and less ambiguous than it would have been in the case of a new princely alliance; but it is quite clear, we think, that no feeling of disapproval of the alliance—quite the reverse—is mixed up with the agitation.

On the other hand, it cannot be asserted with any truth that the tendency towards Republicanism has no part in this agitation. That tendency is at present extremely inchoate and ill-defined; but it has got as far as this—a decided grudge against the *expense* of Royalty, and a decided determination to regard the money voted for the throne as *wages paid for work*, which work ought, according to the popular feeling, to be exacted if not freely given in full. Now it is worth noting that both these are, in fact, Republican tendencies. If you are to begin carping at the expense of a throne, and asking whether it cannot be cut down to something nearer what it is *worth*, it is clear that you are already beginning to *price* it; and no sooner is the advantage of a throne clearly priced in the imagination of the people, than, as is pretty certain, the price will be always cheapening, till you get it below the minimum at which a real throne can be kept up. We do not price domestic or national honour; we do not price our territorial integrity. There is no party in the nation, however small, who would really grudge all they thought necessary to defeat invasion, or to keep a solemn national contract. Directly we begin to cavil about comparatively small sums, and weigh them against the advantages of a throne, we may be sure a current of opinion is setting in, which, if it continues, is pretty certain to be fatal to the throne in the long run. And this is far more clearly true if the party which attempts to depreciate the value of Royalty is also found to be weighing the Queen in the same sort of scales as they would any other salaried officer of the nation, and asking how she does the work for which she is paid. Now this has been one of the favourite lines of disquisition at these meetings. The Queen's comparative retirement from public life has been repeatedly commented on, and it has even been intimated that her income ought to have been reduced in proportion to the saving effected by her seclusion from the world, and her avoidance of all official pageantry. That seems to us a very sure sign of the rise of a spirit which, if it spreads, must be fatal to the Monarchy in the end. A Constitutional Monarch, whose appearances in public, and whose displays of Royal hospitality, are carefully scrutinised and overhauled as the work of a paid official, is hardly likely to sit on a very secure throne.

It will be seen, then, that we by no means underrate the

importance of this movement. Important movements in England are very apt to begin with a grumble about some small pecuniary grant, for that is the side on which Englishmen are most sensitive, and on which their tendency to grumble breaks out. We do not regard it as at all the less, but rather as the more important, that, so far as we understand it, this particular cry is thoroughly unjust, and a little contemptible. There can be no doubt that though the Crown has no specific pledge that Parliament will dower the Queen's children, there was what amounted to a very distinct understanding with the throne to that effect—an understanding which it would be somewhat base and thoroughly ungenerous not to adhere to. On the other hand, there is no sort of doubt that the Queen's retirement has not been, in the main, due to any carelessness as to her duty. Now and then, especially in the case of her visit to Balmoral at a very critical juncture in foreign affairs last summer, she has undoubtedly shown less regard for the convenience of her Ministers than was seemly; and this we were amongst the first to point out. But, on the other hand, there is no sort of doubt that since the Prince Consort's death the Queen's health has been really exceedingly infirm, and liable to distressing attacks which made her very naturally afraid of undertaking great ceremonial duties. In relation to more substantial parts of the Sovereign's duty, it is quite certain that no Monarch who has sat on the English throne since the Conquest, has deserved better of her people. In strict and even scrupulous regard for constitutional duties, in the firm good sense which she has displayed, even on occasions when some Sovereigns might have made great difficulties, as, for instance, in relation to the terms of the Coronation Oath on the occasion of the Disestablishment of the Irish Church,—in the dignity and simplicity of her life, and the purity of her Court—Queen Victoria has established a strong claim on the gratitude of her subjects. And it is worse than bad taste—it almost amounts to a want of moral discrimination—to select one of the wisest and most honourable acts of her reign as the occasion on which to appraise the pecuniary value of the throne, and to beat down its demands on the pockets of the English people. If a throne is worth keeping up at all, it is worth keeping up in a certain majesty and splendour. And to proclaim that we grudge to the Queen's daughters a suitable provision out of the public purse, is a very bad mode indeed, because an indirect, irresolute, half-convinced, and almost cowardly mode, of proclaiming that we grudge the expense of the Crown itself.

THE STAMP ACT AND FOREIGN SECURITIES.

We are glad to be able to say that Mr Lowe has consented to relinquish the duty which the late Act imposed on foreign securities, and that the law on this subject will now be reduced to a rational, simple, and satisfactory state.

THE STAMP ACT ON THE MORTGAGE OF RAILWAY STOCK.

The interference with foreign securities, however, is not the only interruption to the ordinary course of business consequent on the Act. The Stock Exchange has been affected in another way. The usual practice has been, in the case of short loans on English railway stock, not to pay an *ad valorem* stamp on the transaction. A deed of transfer, with a nominal consideration, has been given at the beginning of the transaction, and one of re-transfer at the end of it. We much doubt if this practice ever was legal, but now at least it is clearly illegal. And in common sense it ought to be illegal. The transaction is clearly a mortgage. The borrower pledges the stock (say) to a banker, and the banker engages to re-deliver him the stock upon payment of the loan. There is nothing "nominal" about it. It is a plain mortgage, like any other, and ought to be so stamped. But, on the other hand, such a stamp is so high as in practice to be almost a prohibition of short loans. Two ways of stamping such a mortgage have been indicated by authority, but the cheapest amounts to the 3s per cent. on the loan; and if the loan were only from account day to account day, that is 3s for a fortnight, or nearly 4 per cent. per annum. If the banker himself charged 5 per cent. for the loan, the borrower would be paying 9 per cent. altogether, which is more than business will bear.

Some say this is a tax on speculators, and therefore a good tax. We wish to prevent this kind of business, and the more we tax it the less of it there will be. But, in fact, such business is exceedingly beneficial, and especially to the very class who are fancied to be injured—*bonâ fide* holders. If one "*bonâ fide*" holder of railway stock on a large scale wants to sell that stock in a hurry, he might wait some time before he found another *bonâ fide* holder ready to buy it of him. He might suffer much by having to wait, and when he did sell, the price would be low. Being at a disadvantage, he must take what the buyer will give him. A market of *bonâ fide* holders only is subject to great delays of sale, and to great fluctuations. This delay, and these fluctuations, are prevented by the dealers with borrowed money. They run in to buy at the least fall below the proper price, and so support the market. They are always ready to take off an anxious seller's stock at once, and within a trifle of the market value, and so prevent him from losing much. Such operations can only be carried on with borrowed capital. The sum required is very large—no one to whom it really belonged would be at the pains to do the business. And it is very fluctuating. In some states of the market much borrowed money is wanted, and in others very little. A millionaire, if one could be found fit and willing to do the business, would be obliged to carry on many other modes of lending too, otherwise he would often have much money lying idle. But "speculators" with borrowed money are not thus deterred; they only borrow what they want, and they are mostly poor enough to need to attend to business.

Accordingly, it is of great importance not to prevent such transactions. And yet it is not easy to make them legal without giving up the stamp duty on "mortgages," for this kind of mortgages cannot practically be distinguished from any other. And giving up stamps on mortgages would be equivalent to giving up stamps altogether. Such transactions clearly must be stamped if any are to be.

The only mode we can see by which the State can obtain the revenue and the public retain the convenience is that the companies should compound for the revenue and pay it, and upon their so compounding that the transfer of their shares should not be liable to stamp duty. The companies would be ready to pay a considerable sum for this privilege. It would make their shares worth much more in the market than other shares. They would be exempt from a tax to which other shares were subject, and so would stand better in the share list. The easiest mode of arranging the payment perhaps would be that the shares of the compounding companies should be payable to bearer, as on the continent. But this is not the only mode. Everything else may remain as it is, except that the company should pay the money, and that the Government should give them a certificate that the transfer of their shares is in consequence free of duty. There would then be no impediment to business and the revenue would be perfectly secure.

At present the revenue is very insecure. Much of the business will not pay the tax. It will go on as it has always done without paying it. The persons concerned will run the risk of evading it rather than pay it. So long as the lender can have the shares transferred in the company's books when he likes, he does not care for much else. Not one in a million of these documents are ever seen in a Court of Law, and if the shares were in the lender's name no doubt he would be sure of his money. He would only be liable for a penalty for evading the Stamp Duty, but about that he does not seriously concern himself, and the borrower cares even less.

The New Stamp Act, 1870.

4th January, 1871.—Memorandum of an interview with Mr Melvill, the Solicitor of Inland Revenue, at Somerset House.

Transfers of Stocks given as Security for Loans.

After a conversation respecting the various plans employed to carry out transfers of stock upon which money has been borrowed, it would appear that the common custom of using two deeds (transfer and re-transfer), with a nominal consideration and corresponding stamp (formerly 30s, but now 10s), unaccompanied by a mortgage agreement duly stamped, is wrong, and an evasion of the law.

The course pointed out as proper to be adopted is shown in the following sketch:—The case supposed being a loan of (say)

18,000*l* by B to A, on coupons for 20,000*l* railway stock standing in the name of A.

	£	s	d
1. Transfer from A to B, nominal consideration of 5s, stamp	0	10	0
2. Agreement as a mortgage reciting the terms of the loan between B and A, stamped at 2s 6d per cent. on the loan	22	10	0
Together	23	0	0
When the loan is repaid—			
3. Transfer from B to A, nominal consideration stamp	0	10	0
4. Release of mortgage, endorsed or otherwise, stamped at 6d per cent. on the loan	4	10	0
Total expense	28	0	0

This plan, it will be observed, involves an expense of 3s per cent. on the loan, plus the two transfer stamps of 10s each, and does not require any appeal to the stamp office to ensure registration of the deeds by the railway company. (If, at the time of the repayment of the loan, A had sold the stock, his nominee's name, C, would be given to B, and the tranfer made out accordingly upon an *ad valorem* stamp, calculated on the price of the bargan between B and C.) In such case, transfer No. 3, and release No. 4, would be unnecessary.

Another plan for carrying out the same case is the following, if the company does not object:—

	£	s	d
1. Transfer from A to B, setting forth the loan, &c., stamped at 2s 6d per cent. on the amount (18,000*l*)	22	10	0
2. Re-transfer from B to A, stating repayment of loan, stamped at 6d per cent. on the amount	4	10	0
Total expenses	27	0	0

This plan supersedes the mortgage agreement and release, and costs exactly 3s per cent. on the loan. If the terms of transfer and re-transfer were such as to indicate a purchase, for the consideration of the mortgage money, the railway company will probably require a stamp duty of 10s per cent. (on 18,000*l* this would, of course, be a very large sum); but such a requisition would be neutralised by application to Somerset house for an adjudication stamp, which would be affixed (without charge) on proof of the true nature of the transaction.

STAMPS ON FOREIGN SECURITIES.

To be liable at all, foreign securities must be dated or executed after 3rd June, 1862, and then the mere act of negotiation in the United Kingdom brings them within the terms of the Act. The case of the Five-Twenty bonds of the United States was especially referred to, and it was held that if dated after June, 1862 and negotiated in this country, they ought to be stamped; this would, of course, equally apply to Lombard obligations, and, indeed, to all foreign securities, dated as above and negotiated here. M. SLAUGHTER.

Jan. 6.

The committee, after consideration of the above memorandum, and of the Stamp Act, have resolved:—

"That bonds bearing date after the 3rd day of June, 1862, if unstamped, will not be considered a good delivery in settlement of bargains effected after this day.

"FRANCIS LEVIEN,
"Secretary to Committee for
"General Purposes."

"Jan. 9."

THE STAMP ACT AND BILLS AT SIGHT.

A MINOR but still important evil has arisen, under the new Stamp Act, with respect to bills at sight. By the practice at Liverpool three days' grace are allowed on them, and by the practice of London no such days are allowed: upon which the question arises—Are these to be stamped with the penny stamp as bills payable on demand? or are they subject to the *ad valorem* bill of exchange stamp, like any other bill not payable on demand? The question is a serious one, for a draft for 2,000*l* would pay 1*l* if charged *ad valorem*, and only 1d if charged as a "bill on demand," when the amount of the bill does not matter, but all bills pay the same penny.

There are two rulings on this point. First,—that of the Inland Revenue, which says that both in London and in Liverpool—both in places where days of grace are given, and in places where they are not given—those days must be reckoned as the time of the bill, and that therefore the *ad valorem* rate should be charged uniformly, and in all places. Second,—what some other high authorities hold, that it ought to depend on the custom of the place, and that such bills should be charged *ad valorem* in Liverpool, but only require a demand stamp in London.

But there is much practical objection to both views. As to the first, it is hard that two bills, one said to be on demand and one said to be at sight, both payable at the same London counter, and both payable immediately, should pay in the one case a high, and in the other a very low, stamp. That documents equal in use should be equal in stamp duty is the principle of stamps, if stamps have a principle.

And as to the second view, that the stamp should vary with the place, there is even more difficulty. Who is to settle the custom of the place? It may do very well for the mass of bills which are paid. No one cares much what stamp they bear. But for the exceptional bill which is not paid, and which must be sued upon, the matter is vital. That bill will be presented in Court, and at once there will be a wrangle among the lawyers. Suppose it is payable at Gravesend, and that it is only stamped with 1d demand stamp. Immediately the defendant will contend that he ought not to pay the bill because it is wrongly stamped, that at Gravesend bills at sight were never paid without days of grace, and the time of the Court and the money of the litigants will be spent on a most intricate discussion as to what has been the practice at Gravesend. In many such cases there may be no uniform practice, and then there will be much contradictory swearing, and it will be impossible to arrive at any just conclusion. Clearly a stamp duty should, like other duties, depend on an obvious fact, not, as upon this supposition, upon an obscure and dubious fact.

No doubt the real remedy would be to abolish "days of grace," which do not exist in most countries, which are absurdities, and which always lead to trouble and confusion. But till this can be done we think it as unwise either to charge a different duty in different places, as to charge the higher duty in places where the privilege of days of grace is not taken, and where the bill at sight is really for all purposes a bill on demand. The matter is one in which clearness and simplicity in the law is more important than the trivial revenue involved, and therefore we would propose to treat bills at sight, bills on demand, and bills on presentation, all quite alike, and to stamp them all with one penny.

BUSINESS NOTES.

MR GRAVES AND THE POST OFFICE.—Mr Graves, at Liverpool, has argued very strongly in favour of the chief of the Post Office having a seat in the Cabinet, and it will not be easy to answer him. If the Post Office is not thus represented, the tendency to make it a mere revenue department, which would be powerful in any circumstances, would be intensified. Without an independent chief in the Cabinet, the Treasury would control it more, and it is the financial profit which would naturally be the Treasury point of view. An independent chief, on the contrary, though he will have temptations enough to seek as large a surplus as possible, cannot but have a direct interest in the public benefits which his department confers. He will be sure to feel that obtaining a surplus is not the only way in which he can do conspicuous service, and the responsibility and intercourse with the public would at any rate keep him alive to the main purpose of his office. The only question is whether the functions of the office, as compared with others, are important enough to justify the assignment of a seat in the Cabinet to its chief; but at present, at least, there can be little question. A department which supervises the message communications of the country, and which has no small other business vitally important to the national welfare, ought to be something more than a mere administrative machine. Periodically, at least, the whole subject of extending and improving the communications must be a subject of the first importance, and the present is one of those periods. The acquisition of the telegraphs, the cheapened rates on book parcels and newspapers, the introduction of the telegraphs—all show that the department is "in movement;" while there are ample questions in the background, to which Mr Graves referred—the cheapening of the telegraphs, the deliberate adoption of a cheap parcel post for other articles as well as books, and the cheapening and improvement of the money-order system. The importance of these suggested improvements cannot be denied, but they must all be viewed with jealousy by a Minister who is bound to consider only their bearing on the receipts of the Exchequer. We should hope however, that with or without a seat in the Cabinet for the chief of the Post Office, it will be possible to force on the adoption of the parcel post. Mr Graves stated that about 2,000,000 halfpenny postal cards are now distributed weekly,

yielding a revenue of 200,000*l* a year, without decreasing the ordinary letter correspondence at all, and without, we may add, interrupting or retarding the other business of the Post Office. The adoption of the parcel post could not but increase business in a similar manner, and would also forward, and not retard, the other business of the office.

RAILWAY COMPETITION.—The statements in the reports of the Great Eastern and Midland Railway Companies respecting the competition for the coal traffic, are not very reassuring to the shareholders. The Great Eastern report states that the probability of the increase of the revenue from coal being maintained, which was about 10,000*l* in 1870 in excess of 1869, has been "seriously compromised" by the competition. The Midland directors again advert with "very great regret" to the competition "forced" upon them by the Great Northern Company. They go into a minute history of the arbitrations, and criticise severely the action of the Great Northern. That they are angry and indignant is exceedingly evident, and this mood of theirs betokens the danger to the dividends. The affair is, in truth, a most important one for the shareholders of all the lines. Unless an agreement can be come to, the great improvement in the dividends which we have witnessed last year will be checked. Surely the directors of the various companies, if they can agree about other matters, can also agree about coal, and the shareholders should at least force on them the consideration whether it would not be best to stick to remunerative rates themselves, and rather suffer a loss of business than do business which does not pay.

PROTECTION IN THE UNITED STATES.—A paragraph in the *Toronto Globe*, with reference to the lumber trade of Canada, points out one more evil of the United States' protective system to the manufacturing interests of the country. It is well known how shipbuilding, woollen manufactures, shoemaking, hat making, and other manufactures there are injured, and according to our Toronto contemporary, the Americans are losing a large trade which they formerly had in working up Canadian lumber for re-export. The lumberer of Maine is protected, but the worker in lumber loses his foreign market, which is gradually being acquired by Canada. The reason of the loss is so evident that it is astonishing the Americans do not see it:—

> The Eastern States import every year many millions of our lumber, not merely for their own use, but in order to re-export it. They find that, in spite of the duty, it pays them to manufacture Canadian lumber in different ways, and send it to South America, the West Indies, Australia, and Africa. In all these countries lumber is scarce, and commands what we should regard as fabulous prices. Canadian merchants never attempted to compete for this trade till 1864-5. Before the former of these years not a vessel went directly from Canada on such enterprises; during last season some 60 or 70 were so employed. In pushing this trade new markets will be opened up for other Canadian products. A beginning has been made in this direction, but little more. During last season upwards of 200,000,000 cubic feet of timber were sent from Canada to Europe, and more than three times that quantity to the States, while 25,000,000 were sent to La Plata, 1,700,000 to Australia, 2,000,000 to Valparaiso, and 39,768 sugar boxes to Cuba. We have no means of determining how much of what was sent to the States was re-exported, but the amount must have been very great, and a great part of it might quite as well have gone to its destination from Canada, after affording our merchants a profit in preparing it for those markets by manufacturing it into window-sashes, doors, flooring, &c. What is true of the lumber traffic is equally so of that in flour and other commodities; and return cargoes, in the shape of tropical products, will every year find a larger and readier market among ourselves.

This has been the consequence to the United States of adopting Protection in one of its most important trades. A partial transfer of its manufactures to Canada is apparently to be the chief historical issue of its protective system.

STOCKBROKERS AS DIRECTORS.—The Lord Chancellor yesterday *reversed* the decision of Vice-Chancellor Malins in the suit of the Imperial Mercantile Credit Association *v.* Coleman, which was to the effect, it will be remembered, that Messrs Knight and Coleman should pay to the liquidator of the company the sum of 12,000*l*, being the amount of their profits on obtaining for the company debentures to the amount of 356,000*l* from the London, Chatham, and Dover Railway Company. We have not a full report of this important judgment, on which we must reserve our comments; but the Court of Appeal is quite at issue with the inferior Judge. The Vice-Chancellor held that Mr Coleman, being at the time of the transaction a director of the Imperial Mercantile Credit Association, was therefore prohibited from earning any profit out of the transaction; but the Lord Chancellor, on the contrary, finds that the rules of the association permitted directors to make a profit out of any contracts of the company, provided they disclosed their interest, and that Mr Coleman made a disclosure of his interest in the transaction in question. Costs were given to the appellant.

LIQUIDATORS' REMUNERATION.—The statements made—*in re* the Imperial Mercantile Credit Association—before Vice-Chancellor Bacon, respecting the costs of liquidators, are a matter of no small interest to all who are concerned as creditors or debtors in a winding-up. The case came before the Court on a motion to approve a scheme for forming a new company to take over the business of the old one, the motion being opposed by certain shareholders on this ground, among others, that the other shareholders had consented to the scheme in ignorance of the real state of affairs, and that the liquidators would receive under it an unfair remuneration. It had been asserted at one of the shareholders' meetings that the liquidators' remuneration and costs of winding-up amounted to 130,000*l*, and it was now admitted at the hearing, according to the report of the case, that the liquidators' remuneration to the present time would amount to nearly 55,000*l*. In the agreement under discussion, it was stipulated that the liquidators, in addition to their commission on past transactions, were to receive "2 per cent. on all sums "received after providing for payment of present liabilities in "respect of the realisation of such assets, including therein "any further advances made by this (the new) company to "improve the realisation thereof, and also upon the value, to "be ascertained in manner hereinafter mentioned, of any "such assets as may remain unrealised." Now, without pre-judging the facts of this particular case, it would certainly appear that such remuneration in almost any case would be excessive, and the matter is at least one on which shareholders have a right to the fullest information. There is no doubt great difficulty in fixing a liquidator's salary. If he is paid for his time as a professional man, he is tempted to protract the winding-up; and if he gets a large commission the speed in winding-up to which he is stimulated gives just occasion to doubt whether he is not overpaid. The matter can hardly ever be satisfactory to the shareholders, and there will always be complaint of liquidators. We would suggest as a means of remedying some of the evils that where companies are wound up under supervision of the Court, and the liquidator is appointed or confirmed by it, a statement of the costs of liquidation, and of the liquidators' remuneration, should be made up and published (say) in the *London Gazette*. It might not be wise or practicable to obtain such statements in the case of purely voluntary liquidations but where the liquidator is an officer of the Court the regulation could be easily enforced. The advantages would be that creditors would not only know what they were paying, but that excessive charges would cause inquiry which would be unpleasant to those who made them, while honest and speedy liquidators whose charges are moderate would have a chance of obtaining a reputation. As it is, the appointment of liquidators is almost always matter for a scramble between opposing solicitors and accountants, and the object is too often the plunder of the estate by the combination which wins the appointment.

THE IRON TRADE.—Mr Hughes as the arbitrator in the Northern Iron Trade has decided on a reduction of the workmen's wages by 5 per cent., to continue till July. It is also stated from Wales, that the ironmasters there have given notice of a reduction which will average 10 per cent. As the iron trade in the recent revival of prosperity was the first to show signs of improvement, these unfavourable symptoms are all the more worthy of attention. The stoppage of the war may perhaps just come in time to check the flatness which has begun before it goes any great length, but that a serious depression might have ensued seems evident enough. The opening up of other markets, the supply of the first necessities of the belligerents, and the execution of past orders, appear to have compensated at first the loss of business through the war; but the anticipation that the suffering of two such great communities as France and Germany would be injurious to us could not but prove true. The war being over we may now have a new spurt of activity in supplying the loss

of fixed capital which France especially has sustained, but the poverty of both countries will be sure to cause us loss in the end.

TOUTING FOR BUSINESS IN BANKRUPTCY.—An application was made in the Bankruptcy Court this week in reference to a circular issued by a firm of accountants in the City to the creditors in a particular case, which brings into prominence one of the abuses to which the new bankruptcy system is liable. The circular states that the writers of it had ascertained the debtor to have bought largely within a short period of his stoppage, that a thorough investigation was necessary, that they were acting with the trade creditors and with the solicitors for the London and County Bank, and that they invited creditors to withhold their proxies from a gentleman whom they stated to be concerned for the debtor. A circular like this shows one danger which arises from leaving bankrupt estates wholly to creditors. The theory of the law is that in time a class of trustees in bankruptcy will spring up—people who will devote themselves to the collection and distribution of bankrupt estates, and whose business will depend on the good repute they will obtain with creditors. But, as in many other businesses, there will be many to push for employment by illegitimate as well as legitimate means, while the apathy of creditors will rather favour their designs. Creditors will be apt to say that, as they do not intend to look after the affairs themselves, they may as well give their proxy to the pushing man who promises to be vigilant, and who hints at something wrong. They don't expect much, but such a man will make the debtor uncomfortable, and may do some good. We apprehend, then, that the canvassing of creditors by would-be trustees will not cease, though the Court should if possible endeavour to stop such circulars as the one referred to this week if it be true that the mis-statements in it are as gross as alleged. To cancel the appointment of would-be trustees who use such means would only be a fair exercise of the discretion of the Court.

REPUDIATION OF THE PURCHASE OF SHARES.—The Court of Exchequer Chamber—in the case of Bowring *v.* Shepperd—have affirmed the judgment of the Inferior Court, giving damages against the defendant for repudiating a contract he had entered into to purchase certain shares of Overend, Gurney, and Co. The plaintiff sold the shares on the Stock Exchange on the 13th of April, 1866, in the usual manner, and on the 13th of May following the defendant's broker, who had purchased the plaintiff's shares, disclosed the name of his principal, who was accepted by the plaintiff. A transfer was accordingly executed by the plaintiff on the 15th May, but on the 18th the defendant wrote refusing to accept the shares, for which refusal, the plaintiff having had to pay calls, damages are now sought to be recovered. The defence was that there was no privity of contract between the parties; but the Court decided against it—Justices Willes and Bramwell expressly stating that their decision did not depend upon the custom or practice of the Stock Exchange.

THE DIAMOND TRADE OF THE CAPE.—The following statistics from the *Cape Standard and Mail*, respecting the new diamond trade which has sprung up in South Africa, will be interesting, as the first accounts of a new trade:—

OFFICIAL STATEMENT of DIAMONDS SHIPPED from PORT ELIZABETH upon which Wharfage has been paid.

1869.					£
January.....	Briton	1 diamond, valued at.....			800
May	Celt	5	—	.....	400
June	Cambrian ...	2	—	.....	200
August	Northam.....	6	—	.....	205
—	Briton	2	—	.....	2,000
September...	Celt	6	—	.....	1,000
October	Saxon	17	—	.....	1,000
—	Mary	26	—	.....	800
November ...	Norseman ...	26	—	.....	1,400
— ...	Northam.....	50	—	.....	100
	Shipped during 1869...	141	—	.....	500
1870.					7,405
April 14.....	Asia.....	8 diamonds, valued at.....			150
May 14.....	Briton	18	—	.....	75
— 30.....	Roman.....	44	—	.....	4,145
June 14.....	Norseman ...	19	—	.....	375
— 29.....	Northam.....	310	—	.....	2,800
Aug. 13.....	Cambrian ...	248	—	.....	9,005
— 30.....	Briton	41	—	.....	1,200
Sept. 14.....	Roman.....	496	—	.....	13,193
— 29.....	Norseman ...	347	—	.....	15,475
Oct. 15.....	Northam.....	67	—	.....	8,850
— 31.....	Saxon	115	—	.....	1,225
Nov. 13.....	Celt	1,240	—	.....	22,255
— 29.....	Cambrian ...	170	—	.....	7,135
Dec. 14.....	Briton	523	—	.....	11,488
— 29.....	Roman	1,975	—	.....	27,487
	Shipped during 1870...	5,661	—	.....	124,910
	Total for the two years	5,802	—	.....	132,315

To the above are added some small amounts giving the value of diamonds forwarded from Port Elizabeth alone at 146,765*l*; and these figures besides are irrespective of the shipments from Table Bay and Natal, as to which no reliable return can be obtained; but it is estimated that the total shipments of diamonds from the new mines during 1870 have reached a value of about 220,000*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, Feb. 8.

The people of this country, and especially the wealthy and intelligent classes, have for some days been in a state of profound emotion. In addition to the appalling disasters they have had to endure, they seemed to be threatened with the greater one of civil war. Citizen Gambetta, who for months past has been Dictator everywhere except in the capital, openly blamed the Government at Paris for concluding the armistice; and, contrary to its wishes, took on himself to decree that the men who had been ministers, senators, prefects, or official candidates under the Empire, should be excluded from the coming Assembly. On both points, the enlightened part of the community declared loudly against him, and manifested a stern determination not to submit to him. Happily the danger this situation presented has been averted. The rulers of Paris have had the energy to put down Gambetta, and he has withdrawn from the Government. All men who are weary of war, and want to see their country at rest, are heartily glad to be freed from him. By his presumption, and audacity, and incompetence, and by his deluding of the people by infamous falsehood systematically employed, he is in a great degree responsible for the lamentable wants of the last few months, and it is to be hoped that when order is restored he will be called to account. Rid of him, there is a reasonable prospect of peace, provided only that the terms the victors propose be not devoid of anything like generosity. Rid of him, there will certainly be a violent reaction against the Republican form of Government, and not a few thoughtful men predict that it will not cease until the form of Government destroyed in 1848, and the Royal family in whom that form was then personified, are re-established.

Although it was promised that postal communications between Paris and the provinces should be permitted from the 1st, no mail has yet arrived from that city, neither are we informed that any has reached it. The delay is perfectly inexplicable. A few persons who were blocked up in the capital have contrived to escape, and what they say, and what is told by one or two odd copies of newspapers they bring, is all we know of what has occurred there since the capitulation.

Under date the 27th ult. the Government at Paris issued a new decree on the subject of bills. "Considering," it said, "that, in existing circumstances, it is necessary to suspend provisionally all proceedings in commercial matters, the delays granted by preceding decrees are extended up to and including the 13th February next." How the bills that have been held over since 13th August, when the suspension of payment was first authorised, will be met no one can tell; but the almost total stoppage of most branches of trade, and the heavy loss the war has occasioned to every man, justify very melancholy forebodings.

By another decree of the same date the City of Paris was authorised (that is, ordered) to take for military purposes or for poor relief a further sum of 3,000,000f from the 83,000,000f destined by law of 23rd July last to be employed in public works, the said 83,000,000f being raised by an issue of municipal bonds. *Apropos* to the city, letters written before the capitulation say that great anxiety respecting its affairs was beginning to be felt in financial circles. The octroi, the principal branch of the revenue, had been entirely suspended since Paris was invested, and indeed for some days before; and yet, in addition to the ordinary charges, including those for loans—charges which had always absorbed not only all the legitimate income, but all that could be raised by unscrupulous financial manipulation—extraordinary outlay to a vast amount has had to be made for war, for hospitals, and for assistance to the poor. The same letters say that circumstances had not permitted an examination of the city accounts during the long period of

Baron Haussmann's administration, but that sufficient had been seen in them to render indispensable, when quiet times should return, a searching investigation of them and of all his acts.

Telegrams in London newspapers state that Messrs Rothschild of Paris have advanced the 200,000,000f the Prussians require the city to pay. Paris advices, however, say that the Credit Foncier has joined them in making the advance. In reality, doubtless the two have obtained the participation of their respective "groups" in the operation. Those groups comprise nearly all the principal bankers and capitalists of Paris, French and foreign. It was stated that the money was to be lent without interest, but in what time it was to be repaid was not made known. Public opinion at Paris does not appear to have regarded the amount as exorbitant; nevertheless it is a terrible addition to the heavy burden weighing on the city.

A "list of dividends and interest paid at Paris, and of those left unpaid in October, November, December, and January" has been received. It is too long to reproduce, but among the securities in which English readers are chiefly interested are these :—

PAID.

Government Loans.—French 3 per Cent.; French 30 years' Obligations; Ottoman 6 per Cent., 1869; Egyptian Khedive 7 per Cent.; Russian, 1867 and 1869; Belgium, 4½; Peru; United States Certificates, guaranteed by Bank des Pays Bas.

Shares.—Bank of France; Parisian Gas (new); Northern, Southern, and Lyons-Mediterranean Railways; Austrian ditto; Paris Omnibus; Magazines Généraux; Gaz et Hauts Fourneaux de Marseille; Carmaux Coal Pits; Italian Credit Mobilier; Colonial Credit Foncier.

Obligations.—City of Paris; Credit Foncier; Parisian Gas; French Transatlantic; Northern, Eastern, Western, Orleans, Southern, Lyons-Mediterranean, South Austrian-Lombardy, and Madrid-Saragossa Railways.

LEFT UNPAID.

Government Loans.—Italian 5 per Cent.; Spanish 3; Belgian 2; Ottoman General, 5; Ottoman, 1860 and 1863; Ottoman Series; Egyptian, 1868; Hungarian, 1868.

Shares.—Société Générale; Credit Foncier; Austrian ditto; French Transatlantic Credit; Paris Compagnie Générale des Eaux; Spanish Credit Mobilier; Italian Tobacco; Bank of Algeria; Messageries Imperiales; Iron Works of Creuzot; ditto of Chatillon and Commenty; ditto of Avignon; Mines de Pontgibaud; Coal Pits Grand Combe; ditto la Loire; Western, Orleans, Eastern, Russian, East Hungarian, South Austria-Lombardy Railways; J. F. Cail and Co., engine building; Five-Lille ditto; Algerian Société Générale; Forges et Chantiers de la Mediterranean; Docks et Entrepots de Marseilles; Company de Transports Maritimes; Bank des Pays Bas.

Obligations.—City of Bordeaux; Municipality of Lille; Italian Domains; Italian Tobacco; Meridional Railway of Italy; Suez Canal; Trouville Company; City of Florence.

It is to be observed that some of the securities left unpaid at Paris have been paid in the country or abroad, and that most of the others will be paid after the city shall be set free.

From the Paris Bourse we have nothing more than a bare statement of prices on different days; and yet it would have been very interesting to know what speculators were saying on the events that have occurred, and how they regarded the future. These are the quotations that have reached us :—

	Jan. 27.	Jan. 30.	Jan. 31.	Feb. 1.	Feb. 2.
	f	f	f	f	f
Threes—cash	52.75	51.90	51.20	50.80	51.00
End of month	52.85	...	...	...	...
New loan (Empire)—cash	53.75	53.00	52.40	51.90	52.10
End of month	53.85	...	...	...	...
Four-and-a-half—cash	77.75	78.00	79.50	79.50	78.00
Bank of France	...	...	...	...	2325

It is worth noting that during the time Paris was invested, prices ruled higher than those in the principal provincial bourses; for example, on the 27th at Bordeaux, the Threes were 49f 75c cash, and 49f 85c for time; and at Lyons pretty nearly the same prices, it will be seen, presenting a wide difference with those of Paris on the same day. This was probably owing to the conviction being entertained by Parisians that armies from the provinces would relieve them, whereas outside that has long been known to be a delusion. But since the capitulation the Bordeaux prices have been better than those of Paris; on the 1st February, for example, they were for the Threes 52f cash, 51f 85c time. The explanation no doubt is that at Bordeaux the armistice was considered morally certain to lead to peace, whereas in the capital that was not clear.

The Bordeaux branch of the Government does not appear, during the past week, to have decreed new appropriations of public money, but it has ordered that the sort of sugar called in France "white powder above type No 20," of which the import has heretofore been prohibited, shall be admitted for the use of the army, on payment of 55f the 100 kilogs; also that harness, clothing, and equipments bought abroad for the departments of the Army, Navy, and Interior shall be admitted free.

Scandalous abuses are stated to have been committed in the execution of some of the many contracts for the army that have been entered into by the Bordeaux Government. Thousands of shoes, of which the soles are made of pastebroard, have been accepted and actually served out to poor soldiers; thousands of muskets that do not carry half the distance they were warranted to do have likewise been furnished; and one hears strange tales of *mitrailleuses* that cannot be made to fire, of cannon that burst, of clothing that becomes rotten in a week, of cartridges in which there is sawdust, and so forth. The new National Assembly must investigate these matters severely, and bring the fraudulent contractors and their official accomplices, if any, to justice.

Although the Chamber of Commerce of Bordeaux has, as is known, made an issue of small notes, complaints are made in that city that there is not enough of them, and accordingly there is a talk of calling on the Bank of France to put out notes of 10f. That establishment, it is said, can alone issue sufficient for the public requirements, and its paper would enjoy the advantage no other can hope for, of being accepted everywhere in the country. The Bank has always had a great repugnance for small notes, but as it has been obliged by recent circumstances to adopt 25f and 20f ones, it may perhaps see itself compelled to come down to 10f.

On the subject of the Treaty of Commerce with England, mentioned last week, it may be noted that the French Government not having denounced it before the 1st Feb., it will remain in force for the present and the succeeding year. This will greatly displease the Protectionist fraternity. When M. Gambetta was at Lille a short time back, the Chamber of Commerce, which, representing the manufacturing interest, has always been greatly opposed to the Treaty, endeavoured to extort from him, in the name of the Government, a promise to put an end to it; but he said that the matter was of too great importance to be decided by the Bordeaux branch of the Government without consulting that at Paris, and that communications between the two were difficult,—that the moment was not favourable for examining the Treaty in all its aspects,—and that in a word he could do nothing. The Chamber thereupon reproached him with having dissolved the Councils-General, of departments which they said could have expressed the opinion of the country on it. He defended the dissolution on the ground that the Council were reactionist; and a discussion, marked with more heat than was becoming, ensued.

The Procureur-General of the Appeal Court at Rouen, in a circular to his subordinates, draws a sad picture of the state of things in his district. He says that, owing to the war having called away the local police and gendarmerie, the forests of the State are pillaged in a shameful manner, and that even wealthy people do not shrink from the disgrace of buying, at a low price, trees and wood cut down by the poor; that woods belonging to private persons are treated in the same way; that gardens are ravaged; that mendicity has taken "frightful proportions," and that bands of beggars go from house to house and, under threats of pillage and fire, extort more than the owners can afford to give. There is, unfortunately, reason to believe that what is said by the Procureur of Rouen might be applied with truth to all, or nearly all, the departments to which war has extended.

One singular result of the war in Normandy is that it has caused such a scarcity of forage that cattle have had to be partially fed on apples, and that in consequence the price of the fruit has risen so much that cider, the common drink of the province, will be unsually dear.

The Seine has been got free sooner than was expected of the torpedoes and other obstacles to navigation placed by the Prussians, the latter having aided in the removal of them; and accordingly vessels containing flour and other stores for Paris are now able to ascend as far as Rouen. Beyond that city railway and other bridges that were blown down still impede navigation. The railway between Havre and Rouen was hastily repaired to permit the passage of provision trains for the capital, but it had to be closed again yesterday because a damaged viaduct requires to be strengthened—the closing, however, it is believed will only be for 48 hours. From Dieppe to Rouen the railway is open. Trains from Rouen are to go to Amiens, and thence by the Northern Railway to Paris. Others are going daily by the same line from Belgium and the North of France. The Lyons and Orleans Railways, which enter the city by the south side, are also carrying stores very fast. Altogether, in a few days, it seems likely that Paris will be so well supplied that many speculators will not realise the high prices for their wares on which they counted.

Before the armistice the Prussians would not allow the French Post office to transmit money to people residing in the districts occupied by their troops, and would not undertake the duty themselves. The poor folk, being in sore need of pecuniary aid from their friends, got the French office to pray that sums destined for them might be sent to Belgium, and forwarded by the Belgian post. The French office has just, "with great regret," made known that the Prussians refuse their request.

The armistice has not given the activity to the market at Havre that might have been expected, but there has been a

better demand for wheat, flour, and dyewoods. Of other articles the report is as follows:—

COTTON.—In the week ending Friday the sales were 367 bales, and the quotations fixed by the brokers on that day were—New Orleans very ordinary, 102f the 50 kilogs; Oomrawuttee good ordinary, 83f; Tinnevelly ditto, 80f, which were 2f lower than in the preceding week. Since then 644 bales have been sold.

COFFEE.—Since last report there have been taken 50 tons Malabar, 85f the 50 kilogs, in bond; 500 sacks Hayti, 100f, duty paid; 71 Guatemala, 107f 50c; 50 Santos, 105f; 50 Capitania, 95f.

INDIGO.—6 chests Bengal.

In SUGAR, WOOL, HIDES, TALLOW nothing done.

At Bordeaux, in COFFEE, La Guayra has within the last few days been taken at 118f and 120f; Rio washed, 118; Mysore, 117f; and in INDIGO, 36 chests Madras have been sold at prices not stated. From Marseilles and Nantes there are no reports of recent date.

P.S. No official confirmation of the telegram sent to London, that the 200,000,000f required for the war contribution of Paris is to be raised by loan through Messrs Rothschild at Paris and London, has yet been transmitted to this town. With respect to the allegation in another telegram to London, that the Treaty of Commerce is to be denounced, it may be observed not only that the date for denunciation has passed away, as mentioned in the above letter, but that the Minister of Commerce, whom the matter specially concerns, is not now in Paris. The *Liberté*, which the telegram makes responsible for the assertion, is a journal of no authority. The denunciation at a moment at which it is not possible to consult the interests specially concerned would be absurd.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and Feb. 4, 1871:—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870–71.	TOTAL EXCHEQUER RECEIPTS To Feb. 4, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1870—					
Bank of England	...	7,633,761		3,775,717	
Bank of Ireland	...	972,887		931,541	
			8,606,648		4,707,258
REVENUE.

			2,914,008		3,714,390
Totals			65,283,051		67,349,121

The following are the Receipts on account of Revenue during the week ending Feb. 4:—

	Receipts of Week Ending Feb. 4.
	£
Customs	407,000
Excise	827,000
Stamps	186,000
Taxes	312,000
Income tax	693,000
Post Office	100,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	40,702
Total	2,559,702

The total receipts of the previous week were 2,141,631*l*.

The Exchequer issues of the week on account of expenditure were 994,453*l*, viz.:—

	£
Interest of debt	218,000
Other charges on Consolidated fund	nil.
Supply services	716,453
Telegraph services	60,000
	994,453

During the week the cash balances have increased as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Jan. 28	873,167	549,511	1,422,678
— Feb. 4	2,262,497	651,511	2,914,008
Increase	1,389,330	102,000	1,491,330

The other receipts to date were 46,081*l*, the other payments were 120,000*l*.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Hon. the Lords of the Committee of Privy Council for Trade have received through the Secretary of State for Foreign Affairs, from Her Majesty's Minister at Lisbon, the translation of a decree of the Portuguese Government, dated the 22nd of December, 1870, relative to the abolition of the differential duty on goods imported under a foreign flag.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received, through the Secretary of State for Foreign Affairs, from Her Majesty's Minister at Athens copy of a Greek decree, fixing the 1-13th January, 1872, as the date of the introduction of the new Metrical Monetary System into Greece, according to the law of the 20th April, 1867.

The Consular Reports from China for 1869, which have been issued state that the consumption of opium in that Empire increases steadily. The question how far the native opium is likely to supersede Indian is one of great commercial importance. It is thought that from its superior qualities Indian opium will probably, to the point it has reached, about 76,000 chests, hold its own as an article of luxury. The native-grown drug has neither the strength nor the flavour of the imported, but the greater cheapness of the indigenous product enables it to displace the foreign in various inland opium marts. The British Consul at Canton states that the difference in price averages 40 per cent. He observes:—"1,100 piculs of opium paid duty here in 1869, being but 8 per cent. of the quantity which, if not actually smuggled, is, at least, brought in surreptitiously." The Consul at Foo-chow-foo states that the white poppy is cultivated in the prefecture of Wen-chow-foo with great success, and is smuggled presumed into Foo-chow-foo in consequence of the Government prohibition of it; it is much used for mixing with the stronger Bengal kinds. The delegates of the Shanghai Chamber of Commerce, who went up the Yang tze in 1869, found opium grown over a very large area in the provinces of Szechuen, Yunnan, and Kweichow. There the executive authorities shut their eyes to the existence of the plant, and the white poppy-fields may be seen on the most conspicuous places in the great river route, while the cultivation of it is nominally punishable with death. Duties are levied upon it, and establishments for the control of the trade in it are specially licensed by the authorities. The delegates stated that the popular belief is that four men in every five smoke, and one half of the women. Szechuen sells opium to the natives of other provinces to the value of at least three million taels annually. Mr Morgan, the British Consul at Tien-tsin, suggests that measures might be taken in India with a view to check the increasing production of the native drug in China. The Bombay merchant, before taking the Malwa opium to Bombay from the land of the packer, has to procure a pass from the Government Treasury, costing 600 rupees per chest, which pass frees the opium from further taxation

in transit. The Consul remarks that if the transit duty were lowered, the China market conld be supplied with Malwa at a cheaper rate, and that this would cause such an increased demand for it in those parts of China in which the taste for Indian opium still predominates that the Indian Government would probably gain more revenue by the lower rate on the larger quantity than from the present higher rate on the smaller quantity. The Bengal drug (Patna and Benares) is cultivated entirely by the Government itself, and is sold by auction at Calcutta in lots of five chests, with liberty to the buyer, on the fall of the hammer, to take succeeding lots at the same rate. The auctions are monthly; a *minimum* limit of 460 rupees per chest, being the supposed cost, is placed on the drug, and all beyond is profit to the Government. The crop is apportioned in equal quantities to each monthly sale, and the quantity offered for competition is in a great measure regulated by the demand in the markets of China. No private individual is allowed to store opium; when a buyer wishes to export his purchases, they are shipped for him by the Government agent. It is suggested that if larger quantities were offered at the monthly sales, the Government would derive larger actual though smaller relative profits from the greater quantities sold, and these purchasers also could afford to sell their opium cheaper in China, and would thus compete on more equal terms with Chinese producers. The Consul is careful to add that he makes these suggestions solely with a view to the question of finance. He considers the treatment of the subject in its moral bearings out of place in a trade report. But he observes that it might be argued with much force that the unproductive consumption of opium in China diminishes the wealth of the people, and thereby prevents their purchasing such a quantity of our manufactures as they might otherwise be able to consume.

The *Review* gives the following statement of the cash assets of seventy British Life Assurance Offices, held (exclusive of capital) for the security of life policy-holders only, under the name of Assurance and Annuity Funds:—

Founded.	No.	Name of Office.	Accumulated Assurance Fund £
1815	1	Scottish Widows' Fund	5,200,000
1823	2	Law Life	4,655,031

		Total	84,841,080

Calculating upon the basis of the seventy offices mentioned above, we find that the ninety odd principal life offices would have in their possession, not in reversion, but in actual cash securities, no less than about 110,000,000*l*. This again is exclusive of the paid-up capital of the companies, which amounts to between 8,000,000*l* and 10,000,000*l* more. The claims payable annually by the English offices are stated to amount to about 10,000,000*l*, and the annual increase in new insurances to 30,000,000*l*, and the total sum assured to about 400,000,000*l*.

The following statement shows the position of the note circulation in the United Kingdom during the four weeks ended Dec. 31 last, as compared with the previous month:—

	Dec. 3, 1870.	Dec. 31, 1870.	Increase.	Decrease.
	£	£	£	£
Bank of England	23,463,001	23,040,770	...	422,231
Private banks	2,673,493	2,589,785	...	83,708
Joint stock banks	2,364,605	2,267,059	...	97,546
Total in England	28,501,099	27,897,614	...	603,485
Scotland	5,650,073	5,279,585	...	370,488
Ireland	7,575,616	7,432,159	...	143,457
United Kingdom	41,726,788	40,609,358	...	1,117,430

And, as compared with the month ending the 1st of Jan., 1870, the above returns show an increase of 247,536*l* in the circulation of notes in England, and an increase of 927,977*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,395,478*l*, the English joint stock banks are below their fixed issue 471,581*l*—total below fixed issue in England, 1,867,059*l*; the Scotch banks are above their fixed issue 2,530,314*l*; the Irish banks are above their fixed issue 1,077,665*l*. The average stock of bullion held by the Bank of England in both departments during the month ending Dec. 28, 1870, was 22,773,306*l*, being an increase of 662,943*l* as compared with the previous month, and an increase of 3,682,067*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 31st of Dec., 1870:—Gold and silver held by the Scotch banks, 3,396,549*l*; gold and silver held by the Irish banks, 2,953,461*l*—total, 6,350,010*l*; being a decrease of 45,784*l* as compared with the previous return, and an increase of 505,048*l* when compared with the corresponding period last year.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 28th day of January, 1870:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	343418	584682	353006
Royal Bank of Scotland	216451	616353	516063

G FORBES, Chief Cashier.

Dated the 9th February, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	24,217,492	Securities	30,582,250
Public Deposits	6,421,837	Coin and Bullion	21,782,833
Private Deposits	18,369,371		
	49,008,700		52,365,083

The balance of Assets above Liabilities being 3,356,383*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase. £	Decrease. £
Circulation	...	333,069
Public Deposits	1,331,821	...
Other Deposits	...	721,887
Government Securities	...	10,658
Other Securities	390,734	...
Bullion	...	90,548
Rest	12,656	...
Reserve	229,297	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Feb. 8, 1871. £	Week ending Feb. 1, 1871. £	Week ending Feb. 9, 1870. £
Thursday	13,120,000	9,978,000	12,433,000
Friday	12,013,000	23,038,000	15,276,000
Saturday	15,834,000	14,134,000	14,105,000
Monday	10,906,000	14,139,000	10,266,000
Tuesday	11,527,000	14,489,000	11,568,000
Wednesday	11,657,000	14,649,000	10,529,000
Total	75,057,000	90,427,000	74,177,000

JOHN C. POCOCK, Deputy-Inspector.

Bankers' Clearing-house, Feb. 9, 1870.

The total since the 4th of January, 1871, is 385,956,000*l*, compared with 398,551,000*l* for the corresponding period last year, showing a decrease of 12,595,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	Feb. 13, 1861.	Feb. 12, 1868.	Feb. 10, 1869.	Feb. 9, 1870.	Feb. 8, 1871
Circulation, including bank post bills	£ 20,305,895	£ 24,097,687	£ 23,805,390	£ 23,259,687	£ 24,217,492
Public deposits	4,700,293	4,055,138	4,728,745	7,377,812	6,421,837

Exchanges on Paris (short)	25 30 40	25 10 20	25 12½ 20	25 15 25	...
— Amsterdam ditto	11 17 18	11 17½ 18½	11 19½ 12 0½	11 18½ 18½	11 17⅞ 18
— Hamburg (2 months)	13 8½ 8¾	13 9½ 10	13 10½ 10½	13 10½ 10½	13 10½ 10¾
Clearing-house returns	...	55,967,000	65,343,000	74,177,000	75,057,000

In 1861, the Bank unexpectedly raised its rate of discount from 7 to 8 per cent. There had been a considerable recent increase of the business at the Bank, but the flow of bullion to America had stopped, and money in the open market was easy. The measure of the Bank was however justified by a renewal of the drain of bullion, which was now principally a drain of silver to the East to pay for imports of cotton ordered thence on account of the stoppage of the American supply. The bad harvest was also still to be reckoned as a cause of dear money.

In 1868, the long period of 2 per cent. after the 1866 panic continued, and capital seeking employment was still accumulating.

In 1869, the money market was considered to be in a rather delicate state, in consequence of the great diminution of the bullion in the Bank, compared with the same week of the previous year. The supply of money in the open market was also gradually diminishing. In politics, the results of the French Treaty were being discussed, *apropos* of an agitation for "reciprocity" which had been got up, and the alleged distress caused by foreign competition.

In 1870, money was easy at 3 per cent. for the moment, the payment by Government for the telegraphs having increased the supply. But generally more activity was anticipated. The prospects of the Ollivier Ministry were still greatly discussed, and there were fears of internal troubles in France.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,567,248*l*; in 1868, an excess of 4,539,516*l*; in 1869, an excess of 980,200*l*; and in 1870, an excess of 421,213*l*. In 1871, there is an excess of 1,149,132*l*.

DISCOUNT AND MONEY MARKET.—There is no change to note in the quotations this week as compared with the last, but the market has continued firm throughout the week, with a good demand for money, and the closing quotations are also firm. The rate in the open market being 2½ for short Bank paper, the effect has been to increase the demand at the Bank, and the account this week shows an increase of "other" securities" to the amount of 390,000*l*, the demand thus shown having been fully maintained yesterday and to-day. The firmness of the market has been partly due at the close of the week to the requirements of the Stock Exchange settlement, for which there has been a good business in loans from day to day at 2 per cent.; but there is a fair business demand besides, in anticipation of a rise in the rate which is generally looked forward to. Still there have been no great withdrawals of bullion during the week, and the Bank reserve continues very large, while there is a disposition to avoid commitments until something definite is known of the result of the French elections, and the negotiations for peace.

The increase of "other" securities at the Bank during the week is, as we have noticed, 390,000*l*. On the other hand, the private deposits have diminished 721,000*l*. The withdrawals of bullion during the week have been, on balance, 90,000*l*, but the reserve is 229,000*l* more in amount than it was last week. The public deposits have increased 1,332,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	2½	per cent.
Do 4 —	3	per cent.
Do 6 —	3½	per cent.
Trade bills—3 months	2¾	per cent.
Do 4 —	3¾	per cent.
Do 6 —	4	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½	per cent.
Discount houses at call	1½	per cent.
Do with seven days' notice	1¾	per cent.
Do fourteen days	2	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6	2½	...

Amsterdam	5	4	5	3½
Turin	5	6	5	6
Brussels	2½	4	2½	3½
Madrid	5	5	5	5
Hamburg	...	...	4	4
St Petersburg	5	8	5½	7

ENGLISH GOVERNMENT STOCKS.—There have been few special features in the stock markets this week. At the beginning the continuunce of suspense as to the issue of the present armistice caused the markets to be flat; but on Wednesday the receipt of intelligence that M. Gambetta, instead of continuing to set the Paris Government at defiance, had sent in his resignation, revived the hopes of a pacific issue, and a slight improvement followed. The approach of the settlement also caused dulness, owing to the realisations of speculative operators; but as the settlement progressed the scarcity of stock, which has existed for several months, again became manifest in one or two railway stocks, and there was a general rally, which did not however extend much to foreign stocks. These have been rather weak, in sympathy with a depression in Turkish securities, due to continued apprehensions as to the financial condition of Turkey, and reports of the movement of Turkish troops on account of the Roumanian difficulty. In general, however, the fluctuations have been within narrow limits, and the changes in the week are small. The suspense as to the armistice continues, the want of confidence in peace being arrived at shown in the Queen's speech tending to keep up doubts, though the decided belief is that peace will somehow

be obtained. But there will be so much doubt until the French Assembly meets that transactions are necessarily checked.

In English Government stocks the fluctuations have been very slight. The highest price touched, viz., 92 $\frac{1}{8}$, on Tuesday, is hardly $\frac{1}{16}$ more than the closing price of last week, and the price which has ruled through the week is also the lowest figure, viz., 91$\frac{7}{8}$ 92. The closing price to-day is 91$\frac{7}{8}$ 92, a fall of $\frac{1}{16}$ from the closing price of last week. English Government Stocks are peculiarly sensitive to the present suspense. A stable peace, which would make money dear, and induce large sales of securities by French holders, would operate to lower the value of Consols, but until peace is assured, the great accumulation of money sustains the market.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money.		Account.		Exchequer Bills.	
	Lowest.	Highest.	Lowest.	Highest.	March.	June.
Saturday	91$\frac{7}{8}$	92	91$\frac{13}{16}$	92$\frac{1}{16}$	10s pm	13s pm
Monday	91$\frac{7}{8}$	92$\frac{1}{8}$	91$\frac{7}{8}$	92$\frac{1}{8}$	8s pm	13s pm
Tuesday	91$\frac{7}{8}$	92$\frac{1}{8}$	92	92$\frac{1}{8}$	8s pm	11s pm
Wednesday	91$\frac{7}{8}$	92$\frac{1}{8}$	91$\frac{7}{8}$	92$\frac{1}{8}$	7s pm	12s pm
Thursday	91$\frac{7}{8}$	92	91$\frac{7}{8}$	92	7s pm	12s pm
Friday	91$\frac{7}{8}$	92	92	92$\frac{1}{8}$	7s pm	12s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	91$\frac{7}{8}$ 2	91$\frac{15}{16}$ 2$\frac{1}{16}$	+ $\frac{1}{16}$
Ditto account	91$\frac{15}{16}$ 2$\frac{1}{16}$	91$\frac{15}{16}$ 2$\frac{1}{16}$	... ...

FOREIGN GOVERNMENT STOCKS.—The market in this department has been flat, but fluctuations have been slight, with one or two exceptions. Argentine improved 1 on account of purchases to strengthen the market in anticipation of the new loan. Russian 5 per Cent. also improved $\frac{1}{2}$; and there have been one or two minor changes. The principal exception however is Turkish, which steadily declined throughout the week. The closing price on Thursday, compared with last Thursday's, showed a fall of 1$\frac{1}{4}$ in the 6 per Cent. loan of 1865; $\frac{7}{8}$ in the 5 per Cent., 1865; 1$\frac{1}{4}$ in 6 per Cent., 1862; and $\frac{1}{2}$ in 6 per Cents, 1858; and the fall has not been recovered from to-day to any appreciable extent, a farther fall having besides taken place in the 1858 loan. The change is considerable especially while other foreign stocks, even of a speculative kind, have been comparatively stationary. There are a good many rumours afloat as to the difficulty of the Turkish Government in providing for its dividends and drawings, to which the hitch we referred to last week appears to lend confirmation. But the general situation of the Government seems perhaps quite enough to cause distrust in present circumstances. The weaker foreign securities are especially likely to be sold largely when the Paris communications are opened, and Turkish, besides being weak, have been most largely dealt with in Paris. To-day the flatness of the market has continued, with little business doing, and there are few changes to notice for the week, even of a nominal kind, besides those we have referred to. There is now very little buying by investors, and speculators, we believe, have rather overbought in the spurt of business which followed the capitulation of Paris.

The French National Defence loan has fluctuated a good deal, from between $\frac{7}{8}$ 1$\frac{1}{8}$ prem. and 1$\frac{3}{8}$ $\frac{5}{8}$ prem., closing finally at 86$\frac{7}{8}$ to 87$\frac{1}{8}$. The North German loan, first issue, has remained at between 2 and 2$\frac{3}{4}$ prem., closing at 2$\frac{1}{2}$ to 2$\frac{3}{4}$ prem., and the scrip of the second issue, closes at $\frac{3}{4}$ to 1 prem.

There has been no announcement this week of the intended loan of the Argentine Government. Early in the week there were also reports of a loan on account of Paris, to enable the city to pay its war contribution of 8,000,000*l*, but the reports were not confirmed. We should doubt very much whether the latter announcement is probable until peace is signed. There will be no difficulty in obtaining a temporary advance in Paris itself, and those who make the advance would find it expedient to wait for peace before inviting public subscriptions. In any event the security of the Paris municipality, with 50,000,000*l* and upwards of debt left by M. Haussmann, and other new debt caused by the war and the stoppage of its octroi revenue, would require careful scrutiny. Even before the war the financial condition of Paris had become a problem for the Government, and the difficulties of putting its affairs straight will now be very much greater.

The subscriptions to the last North German loan in Germany amounted to four times the amount offered—viz., 120,675,000 thalers, and the allotment was made as follows:—Subscribers of 400 thalers (100*l*) or less received the whole, subscribers of larger amounts one-seventh.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

ENGLISH RAILWAY STOCKS.—There are not many changes to note. Some dulness prevailed early in the week, as the settlement approached, the announcement of the London and North-Western dividend, which was 7$\frac{1}{4}$ instead of 7$\frac{1}{2}$ per cent., also causing some weakness; but afterwards a rally took place, on the settlement showing a scarcity of Midland stock. The traffic returns of the week are also favourable, and the declaration of the South-Eastern dividend of 4 per cent., which was rather better than was generally expected, produced some good effect. On the whole, the result of last half-year is looked on as very good, though the great increase of traffic has failed to yield quite a proportionate increase of net revenue; and there is now a slight preponderance of buyers. If the traffics are maintained, there is ample margin for a steady rise in most of the principal lines.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	87$\frac{1}{2}$ 8	87$\frac{7}{8}$ 88$\frac{1}{2}$	+ $\frac{1}{4}$

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted, for the week ending February 4, to 674,216*l*, being an increase of 26,177*l* on the corresponding week of last year. The aggregate for the current half-year is now 2,631,456*l*, being and increase of 70,717*l* on the corresponding period of last year. The aggregate is only reckoned from the 1st inst., in the case of the companies whose half-years end on 31st January and 31st July. The principal increases for the week have been—North-Eastern, 5,091*l*; Great Western, 4,305*l*; London and North-Western, 5,877*l*; Caledonian, 2,140*l*; Midland, 2,058*l*; and Lancashire and Yorkshire, 3,191*l*. The following shows the increase or decrease in each case, for the week and in the aggregate:—

RAILWAY TRAFFIC RETURNS.

The subscription list of the Glasgow and Cape Breton (Nova Scotia) Coal and Railway Company, Limited, whose prospectus we have already noticed, will be closed next week. The capital is 100,000*l*, in 10,000 shares of 10*l* each, of which 1*l* is payable on application, 2*l* on allotment, with further calls at intervals of not less than two months. The railway will be 21 miles in length, from Sydney harbour to Cow Bay, in Cape Breton, and it will have the traffic of five collieries which are in full work, and, according to a Nova Scotia Government return, quoted in the prospectus, yield 180,000 tons annually. But as traffic is now only possible in the summer, the railway, it is anticipated, will largely increase the business. It is also calculated that the United States' tariff on coal will shortly be reduced, which will rapidly increase the demand for the coal in question. The prospectus contains ample details as to the yield of the collieries, expense of construction, and other particulars.

AMERICAN SECURITIES.—The transactions in Five-Twenty bonds have been restricted throughout the week, but prices are slightly higher, and a firm tone prevailed at the close of the market. The changes are as follow:—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90⅜ ½	.....	90⅜ 1	+ ¼
Ditto 1865 Issue	90 ¼	.....	90½ ⅝	+ ¼
Ditto 1867 Issue	89 ¼	.....	89½ ⅝	+ ¼
Ditto 5 % 10/40 Bonds, exchange 4/6 ...	89 ¼	.....	86⅜ 7½ xd	+ ¼

Pennsylvania Gen. Mort. 6 % Bonds, 1910	90½ 1½	.....	90½ 1½	... ...
Virginia 6 % Bonds	54 6	.....	53 5	— 1
Ditto 5 % Sterling Bonds	55 8	.....	55 8	... ...

JOINT STOCK BANK SHARES.—There was a fair amount of activity in this department at the opening of the week, and the tendency of the quotations was upwards. Prices close better on the week, but the transactions during the past two days have been limited. The principal changes are—a rise of ¼ in Anglo-Egyptian, ⅓ in Anglo-Italian, British Columbia, British North America, and Oriental, and of 1 in Australasia, Chartered Mercantile, Colonial, and London and River Plate. On the other hand, English, Scottish, and Australian Chartered, London and Westminster, and Union of Australia have declined ½.

Advices from Frankfort state that another bank under the auspices of Von Erlanger and Sons, is about to be started by a combination of the Anglo-Austrian, the French-Austrian, and the Union Bank of Vienna.

TELEGRAPHS.—A cheerful feeling has prevailed in this market, and several important movements have taken place. All the leading lines have been dealt in to a fair extent. Anglo-Mediterranean shares have risen 2; Anglo-American, 1; British Indian Submarine and Falmouth and Gibraltar, ⅜; British Indian Extension, Marseilles, Algiers, and Malta, and Mediterranean Extension, ½

The directors of the Société Transatlantique Française have announced an interim dividend of 2 per cent. for the quarter ended Dec. 31; but the usual meeting of shareholders is postponed until accounts have been received from the French Government.

EXCHANGES.—There is no material change to notice.

MINES.—There are few changes to report in the quotations for British mines, but those are mostly of a favourable nature. East Lovells have advanced ½; Great Wheal Vor, 1½; Tankerville, 1; and Grenville, ¼. Drakewalls have declined ¼, and West Chiverton, 1. In foreign mines, Eberhardt shares have risen 1, and Cape Copper 1½; while St John del Rey shares are 1 lower on the week. The leading feature in the market to-day was the sustained demand for Eberhardt shares.

MISCELLANEOUS.—Credit shares have been in some demand during the week, and there has been a buoyant tendency in prices. Credit Foncier and London Financial are ½ higher, while General Credits have ruled firm in value. Construction shares have also been in demand, Silver's having risen 2½, and Telegraph Constructions ¼ on the week. Among other changes, we note—a rise of 1 in Bolckow-Vaughan and Crystal Palace, 2 in Royal Mail Steam; but Anglo-Austrian Bondholders' Committee's certificates have declined 1; British American Land, 1; and Peninsular and Oriental, 1.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There is no demand for the continent, and about 25,000*l* has been sent into the Bank during the week; on the other hand, sovereigns continue to be withdrawn for Alexandria, the amount for the past few days being 75,000*l*. The Salsette has brought 12,000*l* from Alexandria; the Cordillera has brought 63,500*l* from South America; the Argyleshire has brought 20,000*l* from Auckland—total, 95,500*l*. The Tanjore has taken 165,000*l* in sovereigns to Egypt, and the Oneida 1,150*l* to the Brazils.

Silver, owing to the demand for Holland, has slightly increased in value, and the price may now be quoted as tolerably firm at 60 1/16d per oz standard. The Salsette has brought 20,000*l* from India; the Aleppo has brought 18,800*l* from New York; the Argyleshire has brought 3,000*l* from Auckland—total, 41,800*l*.

Mexican dollars.—With the exception of a small order for China, the imports, which have been but small, are taken for refining purposes. The prices remains firm at the quotation mentioned below.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10¼d to 1s 10 3/16d on all three Presidencies.

Indian Government loan notes show no alteration in price. The 4 per Cents. are 90 to 90½; the 5 per Cents., 98½ to 99; and the 5½ per Cents., 106 to 106½.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0 7/16d per oz std; ditto, containing 5 grains gold, 5s 0¾d to 5s 0 7/16d per oz std; Mexican dollars, 4s 10 3/16d to 4s 10¾d per oz.

There were no bullion operations at the Bank of England to-day.

According to the official returns published in to-night's *Gazette*, the imports of the precious metals into the United Kingdom during the week ended February 8 were—Gold, 46,116*l*; silver, 146,691*l*. The exports were—Gold, 377,575*l*; silver, 245,600*l*.

FAILURES AND EMBARRASSMENTS.—The *London and China Telegraph* mentions the suspension of the large mills known as the Hilversumuche Stoom Spin en Wevery, Hilversum, near Amsterdam.

"This limited company," it is stated, "only a few years since established a steam mill for spinning and weaving. It started originally with a capital of about 50,000*l* in shares, and a few months ago contracted a new loan. Up to now the liabilities and assets have not been ascertained."

The *Glasgow Herald* mentions the failure of Messrs McCulloch, Paterson, and Co., ship builders, Port Glasgow; also of Messrs Pratt and Wentworth, manufacturers of stores, Boston—Liabilities, 600,000 dols; assets, 500,000 dols; and Messrs Lyman, Page, and Co., in the boot and shoe trade. Liabilities, 280,000 dols.

COURSE OF THE EXCHANGES.

MEETINGS OF COMPANIES NEXT WEEK.

1871.

Feb. 13.—Nottingham and Grantham Railway, Grantham.
Great Eastern Railway.
Grosvenor and West End Hotel.
London and Blackwall Railway, Fenchurch street, Terminus Hotel.

14.—Midland Railway, Derby.

15.—British American Land Company.
East London Railway.
Metropolitan Railway, City Terminus.
North Staffordshire Railway, City Terminus.

16.—London and South-Western Railway.
North London Railway.

17.—Lands Improvement Company.
North-Eastern Railway Company.

18.—Great Northern Railway Company.
Great Southern and Western Railway of Ireland.
London and North-Western Railway.

FEBRUARY SETTLEMENTS.

Ticket Day—February 27th.
Account Day—February 28th.

PUBLIC COMPANIES.

RAILWAY COMPANIES.

Afon Valley Railway.—Creditors' claims must be sent to the official liquidator by the 9th March.

East London.—The report states that the Brighton Company have promised to open the portion of the line between Deptford road and the South London Railway at the Old Kent road on the 1st March. During the past six months the total receipts, after deducting the Government duty, have been 2,359*l*, 47 per cent of which belongs to the company. The business of the large foreign cattle market about to be erected at Deptford Dockyard will bring additional traffic.

Glasgow and Cape Breton (Nova Scotia) Coal and Railway.—The subscription list closes on the 14th inst. for London, and on the 15th inst. for the country.

Great Eastern.—The balance available for dividend is 90,042*l*, as compared with 68,342*l* at this time last year, out of which a dividend at the rate of 1¾ per cent. per annum (against 1 per cent.) absorbs 73,064*l* (against 44,751*l*), leaving as surplus 16,978*l*. Interest on unproductive capital is not charged to revenue. It is thought that the rivalry between the Great Northern and the Midland will reduce the profit on the Great Eastern coal traffic, though an advance was shown during the last half-year.

Isle of Wight (Newport Junction) Railway. This new company is offering 2,800 six per cent. preferred A 10*l* shares for application. The line will connect Newport and Sandown.

Lancashire and Yorkshire.—Summary of the revenue accounts for the half-years ended 31st December in 1869 and 1870:—

	1869. £		1870. £
Gross receipts	1,316,991		1,376,364
Working expenses	613,969		653,242
Net profits	703,022		723,122
Add former balance	13,222		26,422
	716,244		749,544
Deduct preference charges	272,429		276,551
Applicable to dividend	443,815		472,993
Dividend at the rate of 6¾ per cent. per annum	428,409	(7 % p. a.)	444,276
Surplus	15,406		28,717

Capital Account.

	Expended. £		Received. £
To 30th June, 1870	23,598,953		23,385,894
During the half-year	193,727		211,154
Total, 31st December	23,792,680		23,597,048

Estimated capital outlay during the current half-year, 245,000*l*. The surplus revenue, 28,717*l* carried forward, is equal to more than another ¾ per cent. per annum in dividend. The Shawford branch has been opened, and various other works are in progress. Bills have been deposited to enable the company to extend the railway from Chatburn to Hellifield on the Midland, and to make two short branches, one to Astley bridge, near Bolton, and the other to Heap bridge, near Bury; also for a branch railway from Low Moor to Pudsey, in the West Riding of Yorkshire. The Chatburn Extension, 11½ miles in length, will complete the connection between the company's line and the Midland Railway in the district, and the Low Moor to Pudsey line will be about five miles long. The estimate of additional capital required by these new works is 700,000*l*. Reference is made to the death of the late chairman, Mr George Wilson.

London and North-Western.—Dividend announced at the rate of 7¼ per cent. per annum.

London and South-Western.—The following is a summary of the revenue accounts for the second half-years of 1869 and 1870:—

	1869. £		1870. £
Gross revenue	907,583		947,903
Working expenses	469,919		475,525
Net profit	437,664		472,378
After adding previous balances, &c., and after deducting all preference charges, there remains available the sums of	213,255		237,900
Dividend on the ordinary stock at the rate of 5½ per cent. per annum	205,158	(5½ % p. s.)	224,702
Surplus	8,097		13,198

The capital expenditure to the 31st December was 17,019,657*l*; leaving a balance in hand of 50,235*l*. Debenture charges have been reduced by paying off 5 per cent. and 4½ per cent. bonds and renewing them at lower rates, and as stock. The directors propose, in lieu of the former terms, to undertake the working of the new Barnstaple and Ilfracombe line, as it is important to the company that it should be constructed, at a fixed annual payment of 6,000*l* as a consideration for all the earnings of the line.

Metropolitan.—The past half-year's gross receipts were 204,876*l*, as contrasted with 199,826*l* for the corresponding half of 1869. After deducting working expenses and preference charges, the sum of 65,234*l* remains available for a

[CONTINUED FROM PAGE 176.]

dividend at the rate of 3¼ per cent. per annum, leaving as surplus after this payment 99*l*. The deferred stock dividend is at the rate of ½ per cent. per annum. The capital expended to the 31st December was 7,295,101*l*, including 103,682*l* during the six months under consideration. The Chatham and Dover traffic will be accommodated about next May. The agreement with the District Company terminates at the end of the current half-year, but it is believed that company's board are prepared to consider any fair and equitable proposal for its renewal.

Metropolitan and St John's Wood.—The net traffic receipts for the six months, including the rebate from the Metropolitan, amounted to 5,339*l*, to which was added for rents 299*l*, making, with the balance of 197*l* from last accounts, 5,836*l*. The net amount available for dividend, after deducting management and debenture interest, was 1,862*l*. The directors recommend that a dividend at the rate of 2 per cent. per annum be declared on the preference shares, which would absorb 1,832*l*. Negotiations had been opened with the Midland Railway Company with a view to the formation of a junction with that railway, and the introduction of an extensive coal traffic.

North Staffordshire.—The half-yearly revenue accounts ended 31st December, 1869 and 1870, contrasted:—

	1869. £		1870 £
Gross receipts—Railways	202,910		212,781
— Canals	49,926		47,593
Total	252,836		260,374
Working expenses	114,319		119,455
Net	138,517		141,019
Add previous balance	1,145		1,529
	139,662		142,548
Deduct preference charges	89,620		92,795
Available for dividend	50,042		49,753
—on ordinary stock, at the rate of 3 per cent. per annum	48,452	(3 % p. a.)	48,452
Surplus	1,590		1,301

The capital expenditure is 6,660,551*l*, including 43,671*l* during the half-year. The capital receipts are 6,760,092*l*. The canal traffic was influenced by the drought in the summer, and the frost in the winter. A considerable amount of capital outlay is still unproductive. The board state that the property is an improving one, and they see no reason for an immediate sale to neighbouring companies.

Midland.—Comparison of the two half-yearly revenue accounts ended 31st December, 1869 and 1870:—

	1869. £		1870. £
Gross receipts	1,869,197		2,022,035
Working expenses	884,828		967,594
Net revenue	984,369		1,054,441
Add previous balance	5,754		6,653
	990,123		1,061,094
Deduct preference charges	525,455		577,522
Available	464,668		483,572
—for ordinary dividend at the rate of 6½ per cent. per annum	*450,480	(6½ % p.a.)	*468,065
Surplus	14,188		15,507

* Dividends on the Birmingham and Derby stock included in these amounts at the rate of 5½ per cent. per annum in 1869 and 5½ per cent. in 1870.

Capital Account.

	Expended. £		Received. £
To 30th June, 1870	36,851,458		36,738,886
During the half-year	1,034,688		942,203
Total, 31st December, 1870	37,886,146		37,681,089

Estimated outlay during the current half-year 1,132,000*l*. The [illegible] in hand upon the English and Scotch traffic agreement remains undivided. The at present unproductive capital outlay amounts to nearly 1½ million pounds. The Settle and Carlisle line is commenced at every available position, and fair progress has been made. The Codnor Park branch, the Shipley extension, the Junction at Wigston, the Yate and Thornbury, Ashby and Breedon, Stenson and Weston lines, the Tamworth Curve and Clegan Branch, are making satisfactory progress, and the two latter are approaching completion. The progress on the Mansfield and Worksop line has been slow, in consequence of the large amount of rock met with. The Coton Park and Radford and Trowell branches are being proceeded with in a satisfactory manner. The absorption of the Matlock into the Midland system takes effect on the 1st of July. The Mansfield lines are nearly ready. A participation in the lease of the North and South-Western Junction at 7 per cent. is applied for in Parliament. "It is with great regret that the directors find themselves compelled to advert to the serious and wholly unnecessary reduction in the London coal rates, forced upon them by the indefensible action of the Great Northern Company."

Rhymney.—The net balance will admit of a dividend on the ordinary capital at the rate of 3 per cent. per annum, as compared with 2 per cent. per annum in the corresponding half of 1869. The Cardiff and Caerphilly section is approaching completion.

Salisbury and Yeovil.—A dividend at the rate of 7 per cent per annum is announced; surplus, 1,417*l*.

Sirhowy.—Half-year's revenue, 14,593*l*; net balance, 8,923*l*, to which is added the previous surplus, 1,385*l*. An ordinary dividend, at the rate of 10 per cent. per annum, leaves 2,623*l* to the current account.

South Devon.—A dividend at the rate of 3⅞ per cent. per annum is recommended.

South-Eastern.—The dividend is notified at the rate of 4 per cent. per annum, 22,997*l* was brought into the account, and 1,500*l* remain to be carried forward.

Staines, Wokingham, and Woking.—A dividend at the rate of 2⅛ per cent. per annum is announced.

Taff Vale.—Dividend announced at the rate of 10 per cent. per annum.

BANKS.

Anglo-Italian.—Dividend announced at the rate of 4 per cent. per annum; surplus 2,474*l*.

Birmingham Joint Stock.—Dividend declared at the rate of 20 per cent. per annum (20,390*l*); surplus, 2,899*l*.

Lloyd's Banking.—The dividend for the six months was announced at the rate of 12½ per cent. per annum, while 5,000*l* was added to reserve (now 85,000*l*).

London and South-Western.—The adopted half-yearly report showed a disposable balance of 6,166*l*, out of which a dividend of 6s per share was declared, and 500*l* was added to reserve, leaving 2,800*l*, including rebate. The position of the bank was stated to have improved.

Pares's Leicestershire Banking.—The year's profits have amounted to 38,664*l*, to which has to be added 4,372*l* brought over from the previous year, making altogether 43,036*l*. The directors recommend the payment of 6*l* per cent. for the half-year, and an extra dividend of 2*l* per cent. for the half-year, making the dividend 14*l* per cent. for the year, free of income tax. They further recommend that 4,000*l* be added to the reserved fund, and 4,311*l* to be carried forward.

Sheffield and Rotherham.—Dividend declared at the rate of 12½ per cent., with a bonus of 5 per cent. The reserve, with the addition of 4,435*l*, amounts to 78,949*l*.

York Union Banking.—Year's net profit, 20,150*l*. Dividends equal to 15 per cent. for the year have been declared, free of income tax. The surplus increases the guarantee fund to 76,238*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

General Credit and Discount.—At the meeting the 5 per cent per annum dividend was declared.

ASSURANCE COMPANIES.

Manchester Fire Office.—A dividend of 5 per cent. was declared at the meeting, making 7½ per cent. for the year. Balance, 15,514*l*.

TELEGRAPHS.

Anglo-Mediterranean Telegraph.—Quarter's interim distribution, 2 per cent.

Falmouth, Gibraltar, and Malta Telegraph.—Receipts for January 4,418*l*.

Société du Cable Transatlantique Française.—The directors of this company have declared an interim dividend of 2 per cent., or 8s per share, payable on 1st March for the quarter ending 31st Dec. Owing to the non-receipt of accounts from the French Government during the continental war, the usual general meeting to approve the balance-sheet, and declare a final dividend for 1870, is postponed for the present.

MISCELLANEOUS COMPANIES.

Brighton Hotel.—The gross profits for the year amounted to 12,649*l*, as against 9,078*l* in 1869; while the net profit was 6,467*l*. A dividend of 3 per cent. was declared, free of income tax, absorbing 3,147*l*. It was also decided to write off the unproductive expenditure of the previous years, 2,168*l*.

British-Indian Tea.—The yield for 1870 has been about 264,000 lbs. A small revenue surplus is looked for on making up the accounts.

Charing Cross Hotel.—Half-year's receipts, 38,873*l*; net balance, 11,277*l*. Dividend declared at the rate of 10 per cent.

Corporation of London 4 per Cent. Bonds.—This new issue for the construction of the foreign cattle market has been taken up in full.

County and General Gas Consumers, Limited.—The liquidators have declared a second dividend of 10s in the pound to the creditors, making 20s in all.

Durham County Permanent Benefit Building.—Creditors' claims must be forwarded to the interim official liquidator by the 28th instant.

Estate Company.—The report recommends a dividend at the rate of 5 per cent. per annum, with a bonus of 10s per share, leaving 2,057*l* to be carried forward. The net increase of the rentals during the past year has been 874*l*, and the prospects and the various properties are stated to be satisfactory.

Hewsain Colliery and Coal, Limited.—Mr R. A. McLean has been appointed liquidator, and all claims should be sent to him by the 25th inst., the 25th of March being appointed for the adjudication.

Langham Hotel.—Half-year's dividend recommended at the

rate of 10 per cent. per annum, while 10,000*l* is added to reserve.

Lion Brewery.—At the meeting a 7 per cent. dividend was declared, making 12 per cent. for the year.

London Rice Mill.—Year's dividend announced at 12½ per cent. 10,000*l* is added to reserve.

Millwall Dock.—Half-year's net profit, 12,635*l*; dividend at the rate of 3¼ per cent. per annum announced on the preference shares.

Nictheroy (Brazil) Gas.—An addition of 336 public lights has been ordered by the authorities, and further additions of 350 lights are to be constructed. The 1,100 unissued shares are to be offered for subscription.

Tower Subway.—The directors recommend the addition to the capital of 6,000*l* in shares, and 2,000*l* in debentures. The new mode of using the subway for foot passengers at low fares is found to answer expectations.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade ruled quiet to-day, notwithstanding the short supplies of English wheat on offer. The only feature at Mark lane is the demand for barrel flour, which is being bought up in large quantities for export to France. The price for barrels to-day was 32s, and country sacks were quoted at 40s to 41s, at which currencies flour is relatively dearer than wheat. Prices were unaltered for both English and foreign wheat to-day, but the transactions were unimportant in number and extent. Maize and oats were about 1s lower on the week, while barley, beans, and peas were held at late rates. The week's imports of foreign and colonial produce into London have amounted to 9,050 qrs of wheat; 3,200 barley; 960 sacks and 2,960 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled quiet.

The Liverpool cotton market has been dull during the past week, and only a limited business has been done at rather easier rates. The total sales are 59,160 bales, of which the trade have taken 44,210 bales, speculators and exporters 14,950 bales. The imports for the week are 92,250 bales; the actual exports, 17,153 bales, and to-day's stock is estimated at 610,390 bales. Quotations for American descriptions have declined ⅛d to $\frac{3}{16}$d per lb; East Indian $\frac{1}{16}$d per lb, and Bengals ⅛d per lb since last Friday. To-day the market closes dull; sales 8,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended February 9, 1871:—

	Imported.	Exported.
American bales	58,485	9,257
Brazilian	13,810	550
East Indian	15,895	6,300
Egyptian	6,078	123
Miscellaneous	2,148	177
Total	96,416	16,407

At New York, on February 9, middling Upland cotton was quoted at 15¼c per lb. Telegraphic advices from Bombay to the 7th current quote the cotton market dull, at 187 rupees for fair Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Jan. 14:—Although home accounts have not been of a character calculated to induce operations in cotton, the amount of business recorded for this mail exceeds very considerably last week's total. Very few orders on account of English constituents have been practicable, but limits from continental firms would appear to be more liberal, as a pretty fair business has been done for shipment to the Mediterranean ports, especially those through which Southern Germany draws supplies. The descriptions chiefly inquired after have been Sawginned Dharwar and New Khandeish; the former at a level of about 206 rs per candy, and the latter at prices varying from 180 rs to 194 rs according to quality. The total week's business amounts to 3,400 candies. The increased amount of business done has not had the effect of lightening the general depression which prevails, and prices generally are weaker on the spot. Dealers are apprehensive that the

position of the article in Europe is somewhat hazardous in view of the large American crop looming before the trade, and the possibility of political complications, which might involve England in a war, and are consequently extremely cautious in their operations. In former years January was a month in which large contracts were usually entered into for February and March delivery, whereas this season we have not heard of a single contract for the last named month, and the engagements for February are, comparatively speaking, extremely small. Supplies of new cotton are still coming forward to this market on the smallest scale, and the question of how long prices are to remain relatively so much above home quotations depends entirely upon the monetary strength which the ryots are possessed of. That it is great is evident from the reluctant manner in which the trifling arrivals in the up-country markets are parted with whilst picking is progressing rapidly, and, with the believe within them that Bombay dealers must very soon enter the market in order to fullfil engagements, we do not think that during the present month we shall find up-country holders making any marked concession in prices. We have nothing new to report from the districts regarding the growing crops.

Grand total	35,392	.....	3,812

Actual exports since last mail left, 13,214 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated January 27:—This week's cotton market has been still duller than before, and prices have further given way about ¼d per lb, with a decline also of $\frac{1}{16}$d in freight. The limited business is owing in a great measure to the extreme scarcity of specie that has prevailed, and which yet continues to such an extent as seriously to impede operations in general. To-day's quotations are:—Fair 8¼d to 8½d per lb, f.o.b.; good fair, 8¾d per lb, f.o.b.; fully good fair, 8¾d per lb, f.o.b.; good to fine (Gallin), 10d to 13d per lb, f.o.b. Freight about ¼d per lb for steam-pressed bales.

The colonial produce markets have shown less activity this week. Sugar has sold on easier terms for both raw and refined goods. Supplies of coffee on sale have been limited, and prices have been well supported. Tea and cocoa are without change. Rice has been little inquired after.

The following report, dated January 9, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The shipping operations of the past fortnight have been interrupted by the holidays usual at this time of year; the list of manifests show that notwithstanding this, the total clearances since our last are of considerable extent, the distribution of the same being as under-noted:—

PLANTATION COFFEE.

	1870. cwts.		1869. cwts.
To Great Britain.....	174,263	.....	150,570

	184,132	.....	152,679

NATIVE COFFEE.

To Great Britain	16,711	.....	13,699
Foreign ports.....	2,986	.....	2,388
Australia and India ...	1,206	.....	356
	20,903	.....	16,443

Arrivals of coffee from the interior have continued on the usual scale, but with slight interruptions at Christmas and the New Year. The business in parchment has, however, not been so large as at the date of our last, dealers generally being fully occupied with deliveries on former contracts. In native coffee we hear of but a few transactions at our quoted rates; the receipts of this description having again fallen off. Crop operations are now so far advanced as to enable us to state with certainty that the total produce of coffee for the current season will be far below that of the past year—probably not more than 820,000 cwts.

Messrs Mohr Brothers and Co., of Rangoon, writing on December 31, remark:—Supplies of old rice have stopped entirely, and of new rice only a few boatloads have reached our market yet, which were taken at 111 rs per 100 baskets, 5 parts rice, equal to 5s 1d per cwt, f.o.b., at the exchange of 1s 11½d per rupee. We do not look for regular supplies of new Natsain Taddy before the middle of next month, but some of the earlier kinds will sooner be brought to market. There is some demand for the latter for shipment to the Straits and China, but there is no inquiry for the coast this time, and as tonnage for Europe will apparently be scarce in the beginning of the season, it is generally expected that our new season will open at moderate prices. The harvesting of the new crop is being completed under very favourable circumstances.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, January 10:—The transactions during the past week comprise the sale by auction of 3,300 chests. Prices of fine have again occasionally been rather easier, and other qualities have slightly fluctuated without any positive change to notice in value, excepting for clean Oudes and Benares indigo for America, which are unusually scarce in the present crop, and when such are met with in the catalogues, they are warmly competed for, and bring prices almost on a par with those of last season. Now, that the season is far advanced, we find a large quantity of very ordinary and low native Oudes appearing, and as before remarked, Oude indigo altogether is considerably below its usual standard of quality this year. The quantity sold to date is about 65,000 maunds. Exports of indigo from November 1, 1870, to January 7, 1871:—To Great Britain, 8,182 chests; France, 128; Trieste, 1,798; foreign Europe, 128; America, 895; Gulphs and Levant, 441—total, 11,572 chests.

Messrs. Kilburn, Kershaw, and Co. report:—Without at any moment displaying activity, the silk market has been steady and firm since the beginning of the year, with a very fair daily business. The demand has been chiefly for China and Canton silk, and prices of both sorts have stiffened, and may be quoted generally a good 6d higher. The capitulation

of Paris, and the armistice which has succeeded that event, have had but little real effect upon the silk market, but there is little doubt that peace would greatly stimulate business. Importers are very firm, and show every determination to secure the full quotations of the day. Japan silk has within the last few days been more inquired for, but only at low rates. Bengals have sold very fairly where parcels have suited the wants of manufacturers, good clean native silk being in chief favour. Deliveries continue good, and are far beyond what might have been expected under the disasters which have befallen France.

The public sales of colonial wool continue to be well attended by home buyers, and the opening advance in values is maintained.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on December 30, remark as follows respecting the wool trade:—The holidays have interrupted business, and there has been little doing in wool during the past fortnight. The unfavourable news received by the last steamer has also checked operations. Holders are not inclined to make any concessions, and we cannot quote any very marked decline in prices. There is very little business doing, and our quotations may be considered nominal. In greasy wools for the American market there is a brisk business, and our last quotations are fully maintained:—Grease—Full-grown, superior, 5¾d to 6d; fine, light, for scouring, 4½d to 4¾d; heavy and inferior, 3½d to 4¼d. Fleecewashed—Superior, clean, 8¾d to 9¼d; good average, 8d to 8½d; inferior and seedy, 7½d to 7¾d. Snow-white—Prime Uitenhage scoured, 14d to 14½d; second quality ditto and country scoured, 12d to 13½d; inferior country scoured, 10d to 11½d. The clearances since our last have been:—For London—Finella, 1,403 bales wool; Queen of India, 1,035 bales; Queen of May, 853 bales; s.s. Roman, 2,167 bales.

Annexed is Messrs T. J. and T. Powell's circular:—The leather market during the past month has felt most strongly the effect of the demand for military shoes and accoutrements, which have been required by the contending armies on the continent. All the goods needed for the manufacture of such articles have been eagerly inquired for, and have been readily sold at steadily advancing rates. The severity of the weather has also retarded the supplies, and contributed to reduce the stocks of nearly all descriptions of leather to a smaller point than they have reached for many years. Prices of nearly all articles are higher, but the chief advance has been on dressing and shaved hides, curried hide leather, and heavy kip butts in the russet. How long this extra demand may continue is of course uncertain. It is greatly to be desired that the existing armistice may result in terms of peace, and we feel but little doubt that, should the war be ended, considerable supplies of leather will continue to be required from our markets. At present the wants of Germany are large, and as they were growing to importance for some time previously to the war, we trust that with peace a permanent, and possibly a not less extensive, trade may be established. The home demand is however of the first importance, and it is satisfactory to know that, with the full employment now general in the manufacturing districts, an increased consumption of leather may be expected. Raw goods have shown an active market, with a generally upward tendency. The total of imports is about an average, and no new feature is indicated by the stocks on hand.

Messrs Churchill and Sim have published the following statistics:—

The annexed is dated New York, Jan. 27:—The money market has at length reached that condition of abundance and ease which enables business men to manage their affairs without embarrassment, and to take advantage of any favourable turn in the course of mercantile affairs. It is true that trade continues slow, but this is largely due to seasonable influences. In anticipation of a speedy cessation of the war between Prussia and France, and a consequent increase in the demand for breadstuffs, provisions, cotton, petroleum, &c., these staples have been held above the limits of foreign orders, with the consequence of a comparatively light export trade. The plethora of National Bank notes continues, and there is no little trouble in assorting and returning them to the banks of issue. They can only be exchanged for greenbacks at a discount of ⅛ to ¼ per cent. The rates for call loans have settled to 5 to 6 per cent., while the discount rates for first-class mercantile acceptances are 7 to 8 per cent. The gold market has ruled remarkably steady, while exchange has scarcely varied.

THE COTTON TRADE.

LIVERPOOL.—FEBRUARY 9.

The cotton market has been dull throughout this week, and under the pressure of a very abundant supply, prices have further given way ⅛d to ¼d per lb. Sea Island continues in fair request at fully previous rates. American has been pressed for sale, and has declined fully ¼d per lb. New York advices to the 8th inst. quote midding Upland 15¼ cents, costing to sell in Liverpool 8 1/16d per lb, by steamer. In Brazil the business has been very limited, and the lower qualities are heavy, while good to fine remain steady. Egyptian, though in fair demand, has declined fully ¼d per lb. East Indian has been slow of sale, without change in the medium qualities, but the common and better sorts are generally ⅛d lower.

In cotton to arrive the business continues large, with lower rates, the latest quotations being—American, basis of middling, from Mobile, February-March shipment, 7⅞d; February-March, not below good ordinary, 7 11/16d; New Orleans, ship named, loading, 7 11/16d; January shipment, 7¾d; February-March, 7¾d; Texas, ship named, just sailed, 7 11/16d; bales, February-March shipment, 7 9/16d; any port, February-March shipment, 7½d; low middling, not below good ordinary, Texas, steamer, at sea, 7¼d; New Orleans, February shipment, 7½d; Dharwar, sawginned, fair new merchants, shipping, steamer, canal, 6⅝d; Oomrawuttee, fair new merchants, January shipment, steamer or overland, 6½d; February-March, Cape, 6⅞d per lb.

The sales of the week, including forwarded, amount to 59,160 bales, of which 1,900 are on speculation, and 13,050 declared for export, leaving 44,210 bales to the trade.

FEBRUARY 10.—The sales to-day will probably amount to about 8,000 bales, with a dull market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	230,560
An increase of quantity taken for consumption of	20,940
A decrease of actual exports of	7,760
An increase of stock of	257,960

In speculation there is a decrease of 50,950 bales. The imports this week have amounted to 92,250 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to February 4) is 390,000 bales. The actual exports have been 17,153 bales.

LONDON.—FEBRUARY 9.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market has been dull throughout the week, with a very limited demand for cotton on the spot, at about ⅛d to ¼d per lb below last Thursday's prices. For arrival, a fair business has been transacted at ⅛d per lb decline.

NEW YORK.—JAN. 27.

The market has been dull and rather dragging all day, and the weakness of last evening has developed into a concession from holders in order to realise, though care is taken not to overburden the position with large offerings. Sellers claim that they have just about as much confidence as ever, but they are not encouraged by a responsive feeling on the part of buyers either domestic or foreign. Paris still persistently refuses to "fall;" that accumulation at Liverpool continues to increase, and though the latest public advices from abroad known during the day were strong, they seem to fail entirely as a stimulating influence. The crop continues to reach the seaboard in liberal quantities, and this week's receipts are not calculated to add much strength to the position. Spinners still experience some difficulty in selecting choice stock, but aside from this few complaints are made of the assortment available. We quote as follows:—

	Upland and Florida. c c	Mobile. c c	New Orleans. c c	Texas. c c
Ordinary per lb	13¼ @ ...	13¼ @ ...	13¾ @ ...	14¼ @ ...
Good ordinary	14¼ ...	14¼ ...	15¼ ...	15¾ ...
Low middling	15¼ ...	15¼ ...	15¼ ...	15¾ ...
Middling	15¾ ...	15¾ ...	16¼ ...	16¼ ...
Good middling	16¼ ...	16¼ ...	16¾ ...	17¼ ...

For future delivery the movement has been slow and the feeling slack, with most of the advantage in contracts in buyers' favour. The offerings are not extensive, but still ample for the outlet. We hear no intimations of a January corner. Sales as follows, on basis of low middling unless otherwise noted:—Last evening—January, 300 bales at 15 1/16c, 200 at 15½c; February, 100 at 15⅜c, 800 at 15¼c; March, 600 at 15 1/16c, 700 at 15½c; April, 200 at 15⅜c, 100 at 15 1/16c; May, 100 at 15¾c; free on board at Galveston 200 on private terms. Exchanges—¼c paid to exchange 100 January for 100 March; ⅛c paid to exchange 500 January for 500 February. To-day—January, 100 at 15 1/16c, 400 at 15¼c; February, 300 at 15 1/16c, 1,300 at 15⅛c, 900 at 15 3/16c, 100 at 15⅛c; March, 250 at 15 1/16c, 3,200 at 15½c, 100 at 15 1/16c; April, 200 at 15⅜c; May, 500 at 15¾c; free on board at Baltimore, 100 on private terms; free on board at Charleston, 300 on private terms; free on board at Mobile, 500 at 14¼c. The average quotations of yesterday's forward deliveries were—January, 15.22c; February, 15.36c; March, 15.56c; April, 15.7 c. May 3 34 at 15¼c. Receipts at New York since Friday night, 28,563 bales; total receipts since Sept. 1, 1870-71, 592,540 bales; total receipts for the same time of 1869-70, 408,780 bales. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports since Sept. 1, 1870:—New Orleans, 691,082 bales; Mobile, 240,086; Charleston, 238,425; Savannah, 491,082; Memphis, 115,209; Galveston, 123,451;

Wilmington, 56,771; Norfolk, 189,579; other ports, 21,100—total, 2,166,797 bales. Foreign exports at Southern ports and New York since Sept. 1, 1870:—New Orleans, 481,674 bales; Mobile, 121,928; Charleston, 87,921; Savannah, 273,134; Galveston, 44,707; New York, 319,100; other ports, 18,825—total, 1,311,289 bales. Stocks at principal ports:—New Orleans, 188,686 bales; Mobile, 65,847; Charleston, 40,018; Savannah, 90,615; Galveston, 58,142; Norfolk, 10,091; New York, 80,000; Boston, 8,000—total, 542,399 bales.

NEW YORK, Feb. 4.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 155,000 bales, and since the 1st of September, 2,354,000 bales. Shipments to England, 63,000 bales; to France, none; and to the continent, 11,000 bales. Total since the 1st of September, 403,000 bales; stock at all ports, 620,000 bales. Middling Upland, 7½d, cost and freight, per steamer.

NEW YORK, Feb. 7.—The receipts of cotton during the last four days have been 85,000 bales. Export to Great Britain, 40,000 bales; to France, none; and to the continent, 15,000 bales. Middling Upland, 7 5/16d, cost and freight, per steamer.

NEW YORK, Feb. 8.—To-day's receipts of cotton at all United States' ports have been 29,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Feb. 9.—This market continues dull in tone, and the transactions during this week are even on a smaller scale than last week. The tendency of prices is towards increased ease, but the reduction in values is very slight and much less than what has taken place in cotton during the same time. Cloth is comparatively firmer in value than yarns, as spinners have not so heavy engagements as manufacturers, hence they show more desire to sell. None of our large buyers have yet bought, except miscellaneous lots for assortment. Shipping yarns are very quiet, and home trade counts are only bought for present wants. In cloth there has been a daily general demand for small lots, which has kept stocks from accumulating, but no large orders have been placed. Market closes quiet, and prices tending downwards.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Since Tuesday there is no change in the position of the market, which continues quiet, but comparatively steady, owing to the heavy engagements of producers.

BRADFORD.—There is little change to report in the wool market. A moderate consumptive business, however, is doing in demi-lustre wools, especially in good wethers, and to some extent in hogs. Prices are firmly sustained, holders having no alternative, in consequence of the stiffer rates in the country, but to seek full values. There is a fair business doing in the yarn market, though the advanced rates still operate prejudicially against transactions. There is no new feature in the piece trade. Prices are firm.

CARDIFF.—In the steam coal trade quietude continues to prevail, and until the question of peace or war is decided, there is no likelihood of a favourable change. The house coal collieries have been kept fairly employed with the coasting and local orders. The iron trade is dull, and the low prices which prevail, more especially for rails, have necessitated notices to be given of a reduction in wages.

LEEDS.—There was a rather small attendance of buyers in the cloth-halls. There were only a very few representatives of any but Leeds houses present, and there was no disposition to purchase largely of any class of goods, but a little business in almost all except heavy winter fabrics. Mixture meltons, fancy coatings, white Victorias, tweeds, and plain cloths, formed the larger bulk. Prices were steady.

ROCHDALE.—The flannel market was moderately attended by buyers, but they purchased only small selections of plain and fancy goods. The trade in Yorkshire goods was also quiet, not being quite so active as we lately had to report. Not much was done in wools, but prices are well maintained.

NOTTINGHAM.—There is no material change to report in the condition of the lace trade this week, and the amount of business doing is quite an average for the time of the year, there being a pretty good demand both for the home market and for shipping. Silk is firm, but rather quiet. Manufacturers of hosiery continue well employed, and operatives are earning good wages.

BIRMINGHAM.—No general improvement can be reported yet in the condition of the South Staffordshire iron trade, but some of the "list" houses are certainly busier, and there is reason to hope, now that peace is all but concluded, that the tide is at length about to turn. Among the smaller makers business continues extremely sluggish, and underselling, though not carried to such excess as a week or two back, is still the rule. Nevertheless, for some descriptions of finished iron prices are decidedly stiffer, and as much as 2s 6d per ton advance is asked upon last week's rates. For local manufacturing purposes a good inquiry is experienced for rods, light castings, sheets, gas strips, &c. The export demand, which runs chiefly upon hoops, sheet-bars, angles, and the smaller varieties of merchant iron, continues small. The pig-iron market continues steady for the leading brands.

WOLVERHAMPTON.—The iron and coal trades had a quiet aspect. The local and the Government demand keeps up, and enables the mills and forges to maintain a continuance of about the time they were running a week ago. Coal and stone sold somewhat better, pigs were quiet but firm; and a few transactions were reported in sheets and angles.

BELFAST.—Flax—Merely moderate supplies were offered for sale in our various markets during the past week; an active demand generally prevailed, and in many instances advanced rates were realised. Yarns—All descriptions have been in good demand, and this department may be announced as in a healthy condition. Linens (brown handloom)—A steady business has again been transacted in light linens for bleaching and cloth for dyeing and hollands. Powerloom—Most descriptions of powerloom goods have found purchasers at steady rates. Bleached and finished linens—There has been very little change of importance in any branch of this department during the past week.

DUNDEE.—Although the prospects of peace, issuing from the pending negotiations, are not considered so favourable as could be wished, our flax market for goods on the spot continues as firm as ever. With the exception of the finer descriptions, which are still dull of sale, tows continue in active demand, and prices of good medium qualities have rather an upward tendency. Jute continues exceedingly firm. Flax yarns continue firm, and although the amount of business doing is not large, the market has a healthy tone. Tow yarns are still in active demand, and prices are very stiff. Jute yarns are also active, and prices are moving upwards, The demand for linens is good, not only for the home market, but also from some of the more important markets abroad.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Jan. 27.—The flour market has ruled quiet and somewhat unsettled, with the close lower, but most holders refusing to sell at the decline. Rye flour has met with increased demand and is firmer. Sales include superfine at $6.10 to $6.30; flour at $6.10; superfine rye at $5.50 to $6; Western round hoop shipping at $6.65 to $6.75; Wisconsin spring at $6.85 to $7.25; Minnesota spring at $7.50 to $7.60. There has been an active speculative demand for wheat, and prices are higher; but the close was rather tame, with, however, none of the advance lost. Sales are at $1.52 in store for inferior No. 2 spring; to-day, $1.54 to $1.55 for No 2 new spring in store, including 7,500 bush at $1.55 afloat; $1.60 for amber Michigan afloat, for milling; $1.70 for white Michigan. The corn market has been rather quiet to-day, but prices are rather steady, Sales at 82c on track to 85c afloat for New Western mixed; 87c for Jersey yellow delivered for export. In oats there has been a very moderate trade done to-day, but firm prices rule.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has ruled quiet this week, notwithstanding the continued demand for shipment to France. The purchases for export have not been so extensive as anticipated, owing to the heavy stocks accumulated in Belgium, and to the

uncertainty attending the transport of produce to Paris. Large supplies, however, have now reached the city, and the crisis now appears to have been surmounted. Nevertheless, further and more considerable shipments must be made before the stocks of cereal produce in the North of France can be brought to their proper level, but much will of necessity depend upon the progress of political events. The trade ruled quiet to-day, and very few purchases were made; the tendency of prices was consequently downwards. During the early part of the week sales of flour progressed freely, barrels being taken off at 32s, but to-day there was less animation, and a reduction of 6d would have been submitted to to effect sales. Supplies of English wheat were small, and holders demanded late rates, which checked business. The attendance of millers was small.

Spring corn, which ruled firm on Monday, was dull to-day, and the tendency of the market was in favour of buyers. Maize and oats show a reduction of about 6d per quarter on the week; but the quotations for beans and peas are nominally unaltered. Inferior barley is rather cheaper on the week. Linseed and rapeseed have sold on former terms.

Mr Geo. Dornbusch thus reports the state of the floating grain trade:—During the last eight days 89 grain and seed-laden vessels have arrived at ports-of-call, viz., 54 wheat, 11 maize, 9 barley, 2 rye, 1 oats, 1 beans, 6 linseed, 2 cotton-seed, 1 oil cake, 1 locust beans, 1 valonea. The floating grain trade has lost activity, and prices for several articles have been tending downwards. Wheat has been difficult to sell, and 6d to 1s cheaper. Maize also has been slow to sell at about 6d decline. Barley at first dull; later the demand revived, and values improved. Rye in moderate demand at late prices. The reported sales are as follows:—Wheat—14 arrived cargoes: Berdianski, 52s to 52s 6d; Marianapoli, 52s to 53s; Ghirka, 48s to 51s 3d; fine Rostoff ditto, 51s 3d; new ditto, 51s 1½d; Don ditto, 48s 9d per 492 lbs; No. 1 spring and New York, 55s 3d to 55s 6d per 480 lbs. On passage, 1 cargo Ghirka Odessa, 52s 2d and 52s 6d per 492 lbs, and a lot 1,080 quarters palish, at 51s per 480 lbs. To be shipped, 4 cargoes: Ghirka Odessa, 52s 9d; Marianopoli, 52s 6d to 52s 9d; Ghirka Nicolaieff, 52s 9d per 492 lbs. Maize—5 arrived cargoes: Odessa, 34s 10½d; Wallachian, 34s 9d; Foxanian, 35s; Roumanian, 32s 6d per 492 lbs; Danubian, 35s 6d per 480 lbs for London. On passage, 1 cargo Odessa at 35s per 492 lbs. Barley—5 arrived cargoes: Azow, 27s 3d to 27s 9d; Marianopoli, 27s 3d; Soultctra, 28s per 300 lbs. Rye—1 arrived cargo Azow, at 35s 9d per 480 lbs. Linseed is 6d dearer. 2 arrived cargoes: Azow, 60s 6d, and Turkish 61s 6d per 424 lbs; and 600 tons E.I. Calcutta at 59s 6d to 60s 9d per 410 lbs. On passage, 600 tons, at 61s 3d to 62s per 410 lbs. Rapeseed quiet but steady. 100 tons ordinary brown Calcutta arrived, at 68s. On passage, 50 tons Toro Calcutta, at 69s 6d; and 2,750 bags Soumanee from Kurrachee, at 69s 6d to 70s per 416 lbs. Cottonseed quiet, at about late rates. 360 tons Egyptian arrived, at 9l 10s; and 250 tons ditto shipping, at 9l 2s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market continues without animation, the week's business being limited in extent, and prices remain unchanged. Arrivals will shortly increase, which renders the trade cautious in their operations. According to the latest returns, there was a diminution in the stock of 14,630 tons as compared with last year, and an increase in the home deliveries of 2,550 tons. Official returns for the year were not issued yesterday. Sales of West India in three days, 210 casks. 40 casks crystalised Demerara by auction were taken in at 38s for fine yellow, 5s 8d duty. Jaggery, Manila, and other low descriptions are depressed. Crystalised Mauritius is unsaleable at the late advance. Two floating cargoes of Brazil have sold for the United Kingdom. Prices of dry refined goods have given way, but are still high in proportion with raw sugar.

Mauritius.—2,449 bags in the public sales partly found buyers: soft brown, 26s to 30s; grey and yellow, 30s 6d to 34s 6d. Fine crystalised, 38s 6d. Crystalised white, 6s duty, taken in 40s to 41s per cwt.

Bengal.—800 casks low brown were taken in at 23s to 24s per cwt.

Foreign.—There have not been any public sales, and the transactions on the spot is confined to 6,000 bags clayed Manila at 26s to 26s 6d. A floating cargo of Pernambuco has sold at 27s, and one of Maceio at 26s per cwt., both for the United Kingdom.

Refined.—The market is quiet and lower for dry goods: common to fair, 50s to 53s per cwt. Supplies keep rather limited, but production is on the increase. Prices remain steady at last week's quotations.

MOLASSES.—No sales reported this week.

RUM.—The business of the week has been chiefly ranging from 1s 6d to 1s 7½d in common kinds of West India. Demerara, 2s to 2s 1d per proof gallon; Jamaica, steady at the late advance. There have been sales made in Mauritius at 1s 5d to 1s 5½d. The total stock of rum is now 1,470 puncheons 3,060 hhds above that of last year.

COCOA.—A steady demand exists, but the market is not at all active. Privately Guayaquil has been in demand up to 58s for superior quality. 692 bags Trinidad by auction went at full prices, ranging from 55s to 90s for grey to fine quality, and superior at 118s. 138 bags Grenada were partly sold: ordinary at 50s to 50s 6d per cwt. 286 bags Guayaquil and Surinam withdrawn.

COFFEE.—There have been arrivals from Colombo: others are due; and the total stock here is 3,400 tons, larger than at the same date last year. The shippers have taken only moderate supplies of plantation Ceylon. At the public sales 760 casks 1,117 barrels and bags went at steady rates for colory kinds: middling to good, 66s to 75s; and fine, at 76s to 82s 6d; pale to grey at 60s to 72s, sold flatly. Native is quiet, there being sellers for arrival at lower rates. Good ordinary on the spot has sold at 56s 6d to 57s. 165 frazils Mocha were partly disposed of at 93s to 95s for common mixed Alexandria. 10 casks 683 cases 350 bags East India: Mysore, &c., 70s to 81s; small berry in proportion. 383 bags East India from the Mauritius sold at 58s to 60s 6d for native kinds damaged prior to shipment. 193 bags washed Rio sold at 62s 6d to 68s. 80 casks 15 barrels Jamaica withdrawn. Privately, sales of Rio have been made at 55s to 58s, and 3,000 bags Bahia at 50s to 52s 6d. A floating cargo of Rio has sold for a near port at 52s; one without the price given; one of good firsts at about 53s 6d for a Northern port; and one of Bahia at or about 51s 6d per cwt for the Mediterranean

TEA.—A steady business has been done in black-leaf congou from recent arrivals: medium to good, at former rates; fine, rather dearer. Foo Chow teas of the lower grades remain dull, and the market is still well supplied with these. Other sorts steady. Greens have obtained high prices, including fine and very fine gunpowder at 3s 6d to 4s 2½d per lb. Common kinds sell slowly. The deliveries continue large, and the stock in the Kingdom, estimated at 90,250,000 lbs, is now only 500,000 lbs in excess of last season's.

RICE.—The sales have again been upon a large scale, and at higher prices than last reported. Cleaned has also found ready buyers. Transactions on the spot have included Askoolie, &c., at 10s 4½d to 11s; white Bengal, low to fine, at 10s 3d to 14s; Bassein, 10s 6d to 11s 3d; Rangoon, 10s 9d to 11s; Moulmein, 11s to 11s 3d; Madras, 10s to 10s 7½d. Sales afloat have been about 1,000 tons. Casla, Sooli, &c., 8s 6d to 9s 4½d; Askoolie, 10s 10½d, ex quay. 650 tons Madras at 10s 3d to 10s 9d. 960 tons Rangoon just arrived, sold at 10s 3d, ex ship, without guarantee of quality. 2,000 tons soft grain for spring ship-

ment; Necrancie, 10s 6d; Rangoon 10s 9d. 3,063 bags Bengal by auction were taken in above the value.

IMPORTS and DELIVERIES of RICE to Feb. 4, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports.....tons	13970	3080	8400	5250
Deliveries	10150	4150	6400	4750
Stock	56960	48390	34640	17100

SAGO.—The supply is ample, and the market has become dull. 973 boxes by auction were taken in at 18s 6d to 19s for small grain. Of 1,034 bags, a parcel of good small sold at 17s 6d, but remainder taken in. 134 bags bold grain withdrawn.

SAGO FLOUR.—A parcel of Borneo has sold at 16s 3d, and 400 bags bags Singapore afloat at 15s 6d per cwt.

TAPIOCA is dull. 649 bags Singapore were chiefly bought in. 2,189 bags Penang withdrawn. A few lots sold at 2d to 2½d per lb.

SPICES.—The market has been rather quiet, and the demand for black pepper has partly abated. Privately a few small sales of Penang are reported at 5⅞d to 5 1/16d. 828 bags by auction were bought in at 6d. 100 bags good Aleppy sold at 6⅛d. Singapore has sold for arrival at 5⅞d, "with all faults." White has been in steady demand, with sales of Singapore at 7⅜d, and for cash a shade less; Penang, 7⅛d. 1 case Penang nutmegs sold at 3s 7d for 65's; 2 cases bought in. Mace steady. 7 cases Penang partly sold at 3s 3d to 3s 4d for middling; the remainder bought in. Business has been done in Zanzibar cloves at 3d. 10 cases 'Penang were chiefly bought in at 1s 2d. Pimento meets a better demand. 1,838 bags by auction chiefly sold at 1⅞d to 2⅛d per lb. 94 barrels Jamaica ginger were taken in at 36s to 40s for ordinary qualities. 1,000 bags Bengal partly sold at 25s. 23 cases cassia lignea of mixed quality sold at 5*l* 6s. 25 cases cassia buds realised 8*l* 12s 6d to 8*l* 15s per cwt.

SALTPETRE.—There has been a good business at irregular prices. The sales of Bengal have included 3,000 bags, refraction 5⅛ to 3½, at 29s 6d to 30s 6d, according to prompt, and low qualities at 28s. 50 tons landing at 29s 6d, usual terms, and 50 tons at 28s on the basis of 15 per cent. refraction. 100 tons to arrive, of which the particulars are not reported.

IMPORTS and DELIVERIES of SALTPETRE to Feb. 4, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	910	770	480	850
Total delivered	1040	1360	1190	1230
Stock	2260	4235	3470	7750

COCHINEAL.—There has been some inquiry at last sales' prices. The deliveries since the beginning of the year showed 940 serons increase as compared with 1870, but the stock is 2,200 serons in excess.

OTHER DRYSALTERY GOODS.—Cutch remains inactive. 220 boxes Pegue by auction were taken in at 23s. Several parcels of China galls have sold at 44s 6d to 47s, being dearer. There is some inquiry for lac dye. Gambier steady. 929 bales block part sold at 15s 6d. A parcel of pressed cubes taken in at 17s 3d. By private contract fine block has sold at 16s; sales afloat at 15s 6d. 216 bales Bengal safflower went at about former rates, and partly sold: ordinary to middling, 7*l* 17s 6d to 11*l* 5s; good to fine, 11*l* 12s 6d to 14*l* 5s per cwt.

SHELLAC.—550 chests have found buyers at firmer prices. Orange, including native, at 6*l* 5s to 6*l* 12s 6d; liver and native ditto 5*l* 17s 6d to 6*l* per cwt.

METALS.—There has been a want of activity prevalent in the markets, but prices have undergone few changes excepting for tin, which is easier. Straits, 132*l* to 133*l*. For arrival 129*l* to 130*l* accepted. A moderate amount of business has been done in copper. Chili, 65*l* to 66*l*; English, 72*l* to 75*l*; Walaroo, 73*l* 10s to 74*l*. A few sales have been effected in spelter. Silesian, 17*l* 15s to 18*l*. A parcel to arrive at 18*l*. English lead is steady, at 18*l* to 18*l* 5s. The iron trade has not yet shown any improvement. Rails however remain unchanged in price. Scotch pig iron has met a much better demand, and the deliveries have increased. The price is higher, closing at 52s 9d per ton cash, and 3d more with a month's prompt. There is a good demand for tin plates.

JUTE.—The market has been firm, with rather better prices also for manufactured goods in Dundee. A few parcels have sold for arrival, chiefly at prices ranging from 21*l* 15s to 24*l*. The public sales on Wednesday comprised 3,421 bales, and about two-thirds of that quantity sold at fully 10s above the last sale quotations: low to fine, 20*l* to 25*l* 10s per ton.

HEMP.—Small sales have been made in Manila at 53*l*. Other kinds are quiet. At auction, Petersburg clean sold at 34*l* 5s per ton.

LINSEED.—There has been a steady demand for seed, and prices are rather higher. The sales include Calcutta at 60s 6d to 61s: to arrive, 61s 6d to 62s. Black Sea firmer. 60s 6d paid for some off the coast, and 60s 6d to 61s per quarter spring shipment.

OIL.—Sales in common fish oils have been limited. Considerable business in sperm, and yesterday there were buyers at 83*l*. Olive shows an improving tendency. Mogadore has sold freely up to 48*l* 10s. A cargo of Gallipoli at 49*l* 10s per ton, spring shipment, for the continent. Linseed oil has advanced with a good demand. On the spot, 31*l*; for delivery, 31*l* 15s to 32*l* 5s the quotation. Palm dull for inferior, of which there is a good supply. Lagos scarce, and worth 38*l* 10s. Rape quiet. English brown, 46*l* to 46*l* 5s; last four months, 44*l* 10s; refined, 48*l* 10s to 49*l*; foreign, 50*l*. Large sales reported in cocoa-nut. Ceylon now quoted 40*l* to 40*l* 10s; Cochin, 44*l* to 47s per ton, according to quality; fine being scarce.

PETROLEUM dull. American refined, 1s 6d to 1s 6½d per gallon.

TURPENTINE.—French spirits, 36s 9d to 37s per cwt, being rather dearer.

HIDES.—At the sales of East India on Thursday 222,840 hides chiefly sold, and went without material change in prices. Buffalo hides withdrawn, as there was not any demand.

TALLOW.—The prospects of peace, which gave a temporary stimulus to speculation last week, no longer exercise any influence upon the market, and a quiet tone now prevails, prices of Russian being weaker in all positions, viz.:—45s to 45s 3d on the spot to June, and 46s to 46s 3d per cwt, October to December. The public sales this afternoon will contain over 2,800 casks.

PARTICULARS OF TALLOW—Monday, Feb. 6, 1871.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The market is flat. Sales of West India 36 casks, making 246 casks for the week. 200 casks brown Bengal by auction were taken in at 20s 6d.

COFFEE.—341 casks 252 barrels and bags plantation Ceylon by auction sold on former terms up to 85s 6d for bold colory; 79 half-bales Mocha were taken at 110s, and 228 bales Alexandria at 94s. 14 tierces 103 cases East India by auction, part sold, 63s to 77s 6d. 1,492 bags Costa Rica, 66s 6d to 71s. 662 bags Guatemala at 53s 6d to 65s 6d.

RICE.—1,400 bags Madras sold at 10s to 10s 6d. 7,600 bags Necrancie Arracan taken in at 11s 6d. A cargo of 900 tons old Rangoon sold at 10s 3d per cwt.

SAFFLOWER.—109 bales Bengal were chiefly taken in.

OIL.—767 casks palm part sold at 29s to 35s 3d. 417 casks cocoanut part sold at 40s to 40s 9d per cwt for Ceylon. Cochin taken in, 7 tons sperm sold at 83*l* 5s to 83*l* 15s per tun. Whale oil withdrawn.

TALLOW.—About 2,850 casks were offered by auction to-day, and only partly sold rather lower. Australian sheep, 42s 6d to 43s 9d; beef, 35s to 42s 6d; South American part sold at 40s 6d to 43s 6d per cwt, but the bulk of the latter was taken in. Town and Petersburg unaltered.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market is rather dearer, with a fair inquiry for France. Dutch crushed continues firm at previous rates.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that St Michael and Valencia oranges have improved in value, the stock of the latter being reduced from an export demand for France. Lemons of good quality are scarce, and realise a high price. Seville sours in demand. Barcelona, black Spanish, and Brazil nuts have a ready sale, without alteration in price.

DRY FRUIT.—The Board of Trade Returns are looked upon with satisfaction, and though the healthy position of fruit has failed to cause any upward movement, yet it has had the effect of strengthening the ideas of holders, and proposals for business at lower rates have been refused to a large extent.

ENGLISH WOOL hardly so firm, but dealers stand out for price.

FLAX.—Market firm.

HEMP.—Market dull, and little business doing, the bulk of the recent imports of Manila being of very inferior quality; good maintains its value, and is still scarce.

SEEDS.—The trade rules firm for all varieties. Rapeseed brings more money and mustard seed sells more freely; all other seeds meet an improved demand.

TOBACCO.—The demand for North American tobacco during the past week has been limited, and the sales have been only of a retail character. In segar tobacco and substitutes, there has been rather more demand, and prices of useful qualities are very firm.

METALS.—We have had a sluggish state of market all the week. Copper is firm in quotations, without any considerable demand. Iron is steady. Tin is a trifle easier in prices of all kinds, although stocks continue small. Spelter has been in moderate demand. Tin plates continue to sell steadily.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	46	6
Fat by ditto	2	2
Yellow Russian ditto	46	6
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 929 casks.

PROVISIONS.

Bacon moving very slowly has caused a reduction of 2s all round. Prime sizeable Waterford is 65s, f.o.b.; heavy, 62s, f.o.b. Limerick and Cork, 64s, landed; superior, 58s. Lard has advanced 2s. Hams, a bad trade, at late prices. Fine butter very scarce, at 156s to 164s.

METROPOLITAN CATTLE MARKET.

MONDAY, Feb. 6.—The total imports of foreign stock into London last week amounted to 2,182 head. In the corresponding week in 1870 we received 6,456; in 1869, 2,925; in 1868, 1,211; and in 1867, 7,456 head.

There were only short supplies of both beasts and sheep on sale here to-day, but the general quality of the animals was good. The Scotch beasts, of which there were 170 in the market, came to hand in excellent condition, but there were some very rough animals from Ireland. Owing to the depression in the carcase trade, there was very little animation in the demand, and a severe fall in prices was only prevented by the limited numbers offering. Best Scots cannot be quoted above 5s 8d to 5s 10s per 8 lbs, and the latter figure was somewhat exceptional. With only about eleven thousand sheep in the pens, trade ruled dull, butchers being able to buy their meat dead on easier terms. Best Down wethers sold at 6s, but prices, as a rule, were scarcely equal to those current last Monday. Calves were unchanged in value. Pigs nominal.

SUPPLIES ON SALE.

	Feb. 7, 1870.	Feb. 6, 1871.

HOP MARKET.

BOROUGH, Friday, Feb. 10.—The market has been characterised by less firmness, though the business doing, considering the period of the year, has been extensive, and values have been thoroughly supported. Mid and East Kent, 40s to 140s: Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Feb. 10.—Full average supplies of potatoes have been on sale. The demand has been to a moderate extent, at about late prices. English Regents, 60s to 90s; Scotch Regents, 60s to 85s; and Rocks, 55s to 70s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 10.—The business this week has been of limited extent only, and chiefly for some lots that had been offered for and withdrawn at the auctions during last week. The tone of the market is very firm.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Feb. 10.—At this market to-day wheat was very firm in tone. White wheat sold at Tuesday's prices. Red wheat was 1d dearer. Flour was a turn better. Maize small supply, and 3d lower.

WAKEFIELD, Friday, Feb. 10.—There was a fair consumptive demand at the market to-day, and extreme prices were realised. There was a limited show of barley, which sold at full rates. Beans and peas were steady, at previous quotations.

The Gazette.

TUESDAY, February 7.

BANKRUPTS.

Edward Mansell, Dulwich, auctioneer.
Fritz Theurer, Oxford street, restaurant keeper.
William Hewer Beach, Gloucester, shipowner.
Thomas Cook, Greenwich, engineer.

JAMES EPPS and CO., Homœopathic Chemists, London.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

TEETH.—MR WEBB (MANY years with Mr Eskell, of 8 Grosvenor st., Bond st.) SUPPLIES ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations, at consultations free. Terms moderate. Note.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home from 10 till 4, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 802, improved Jan., 1871, afford the following advantages:—

1st. EXTREME LIGHTNESS (being completely self-supporting), combined with greater efficiency, durability, and comfort than by adapting the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2nd. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, exhibiting this desideratum with an absolute certainty, the operation being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
64 LUDGATE CITY, and
25 HARLEY ST., CAVENDISH SQ., London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 2s.

FINE FLAVOURED, STRONG BEEF TEA at about 2½d a pint. ASK FOR LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.

DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 6d. Umbilical ditto, 42s and 52s 6d; postage, 1s 6d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, STRAINS &c. They are porous, light in texture, and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s and 14s each; postage, 6d.

WHITE, Manufacturer, 228 Piccadilly, London.

H. J. NICOLL, MERCHANT Clothier to the Queen, the Royal Family, and the Courts of Europe.

JOHN CHRISTIE, Manager.

CHARTERED BANK OF INDIA, AUSTRALIA, and CHINA.

Head Office—Hatton court, Threadneedle street, London.

Incorporated by Royal Charter.

Paid-up Capital £800,000

COURT OF DIRECTORS, 1870-71.

CHAIRMAN—Thomas Alexander Mitchell, Esq., M.P.

Andrew Cassels, Esq.	Thomas Lancaster, Esq.
James Fraser, Esq.	William Macnaughtan, Esq.
John Jones, Esq.	Joseph R. Morrison, Esq.

Branches and Agencies.

Bombay,	Rangoon,	Hong Kong,
Calcutta,	Singapore,	Shanghai,
Akyab,	Batavia,	Hankow.

The Corporation buy and sell, and receive for collection Bills of Exchange payable at the above-named places; issue Letters of Credit; undertake the Purchase and Sale of Indian Government and other Securities; hold them for safe custody; and receive interest or dividends as they become due.

Deposits of money are received for not less than 12 months, bearing interest at five per cent. per annum.

CREDIT LYONNAIS (Limited).

Capital, entirely paid up, 20,000,000 Francs (£800,000).

Lyons, Paris, Marseilles, London.

Notice is hereby given, that the half-yearly coupons (No. 14) for the usual Interim Dividend at the rate of Five per cent. per annum are NOW PAYABLE at the Offices of the Company in France, and also at the London Agency, No. 5 Austinfriars, E.C.

DEBENTURES AT 5, 5½, AND 6 PER CENT.

CEYLON COMPANY (LIMITED).

The Directors are prepared to Issue DEBENTURES, to replace others falling due, viz., for 1 year at 5 per cent., for 3 years at 5½ per cent., and for 5 years at 6 per cent. per annum, also for longer periods on terms to be ascertained at the office of the Company.

R. A CAMERON, Secretary.

Palmerston buildings, Old Broad street, E.C.

THE TRUST AND LOAN COMPANY OF UPPER CANADA.

Incorporated by Royal Charter.

Established 1851.

Capital, £1,000,000; Paid-up, £250,000; Uncalled, £750,000; Reserved Fund, £79,547.

DIRECTORS.

The Right Hon. Edward Pleydell Bouverie, M.P., President.

Charles Morrison, Esq., Deputy-Chairman.

James Hutchinson, Esq.	W. Gordon Thomson, Esq.
The Hon. Ashley Carr Glyn.	T. M. Weguelin, Esq., M.P.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

This Company was the first established in England for the purpose of receiving, upon the security of a large subscribed capital, money on deposit at a fixed rate of interest, and lending the same, together with the paid-up capital, on mortgages of real estate in Canada.

The Company has been in successful operation since 1851.

The Directors are now issuing Debentures for three years and upwards. Any information required can be obtained on application to

F. FEARON, Secretary.

7 Great Winchester street buildings, London.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

NOTICE.

COMMERCIAL HISTORY AND REVIEW OF 1870. *As part of an early number of the* Economist, *we shall, in continuation of the Series commenced with* 1863, *issue a Supplement under the above title, containing a careful Digest of the leading Merchants' and Brokers' Circulars in the different branches of Trade, Returns of Prices, Accounts of the Banks of England and France, Appendices relating to special subjects of Mercantile Interest connected with the Year, &c.; the object of the Supplement being to place in possession of our readers a Commercial History of* 1870 *worthy of preservation and adapted for reference.*

Just Published. No. I. New Series. Price 8d and 8½d.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for January, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to January 25.

Advertisements for next Number, to be published on Feb. 25, must be sent, to ensure insertion, on or before Feb. 23.

OFFICE—349 Strand.

THE STAMP ACT BROUGHT IN LAST NIGHT.

The Bill which Mr Stansfeld brought in last night, after putting on a satisfactory footing the law as to foreign securities, also makes an arrangement which, we understand, is acceptable to the Stock Exchange. As to the Stamp duties on short loans of railway or other stock, it enacts that for every 5,000*l* of "stock or marketable security" mortgaged a 10s stamp shall be paid. And marketable security is defined to be "a security of such a description as is capable of being "sold in any stock market in the United Kingdom." There is no limit of time in the Bill as to the duration of the mortgage; all mortgages of this kind, whether long or short, will pay the same stamp of 10s per 5,000*l*.

The only objection which we see to this is that the landed interest may not like it. They may say—Why should mortgages of railway shares be stamped at a lower rate, and mortgages of land at a higher rate? And on the face of the law the objection seems specious. But in practice the landed interest pay now, and will probably continue to pay, less on their mortgages for short periods than the borrowers on railway shares. Most of the short mortgages of real property are made by deposit of deeds with bankers, and in practice these are not stamped at all. The banker relies on being able to stamp the memorandum of deposit at any time on payment of the penalty of 10*l*, as it is much cheaper to pay that penalty on the one memorandum which comes into Court than to pay the Stamp duty on the thousands which never come there. In practice, therefore, short loans on land are entirely exempt from Stamp duty.

It may still be said to be unfair that mortgages for long periods of railway and other stock should pay less than similar mortgages of land. But in practice, again, there is very little in this, for there are scarcely any long mortgages of railway stock. The only important class of mortgages of railway stock or share property are for short loans on the Stock Exchange.

THE TRADES' UNIONS BILL.

The Bill introduced by Mr Bruce on Tuesday evening to regulate Trades' Unions is a characteristically English measure. It cannot be praised for theoretical completeness; on the contrary, it has every sort of theoretical defect. But it removes or alleviates many practical evils; it introduces many practical improvements; it is suited to the present temper of men's minds, and to the stage of the discussion which its subject has reached. And therefore probably it ought to pass, and will pass.

As we have often explained, we consider that a large measure of principle is necessary properly to regulate this matter. It is necessary in the first instance to sweep away the last relic of the mediæval objections to combined action. When people were ignorant and Government weak, there was nothing so much dreaded as an *imperium in imperio*—that is, a combined set of persons acting together for certain purposes, and according to certain rules. Probably in these times the feeling was just; few things then were to be dreaded so much. But now, when public opinion is well informed, and when Government for good purposes is strong because that opinion supports it, conjoint action is not an evil to be dreaded, but a good to be fostered. We should give men every facility to join together for legal objects, and to act together in legal ways.

As to one class of such associations, we have thoroughly

adopted this principle. In proposing the Company's Act of 1856, Mr Lowe said that the right of incorporation was "a right to be claimed, not a favour to be granted." And as to joint stock companies, that doctrine has ever since been acted on. They receive the right to sue and be sued, and every other facility which the law can give to a combination of persons with as much ease and as little formality as possible. And it was thoroughly in accordance with the whole spirit of English legislation that this sort of associations should be the first to obtain their due. They are by far the strongest kind, and they are by far the most important kind; they ask the loudest for it, and the effect of giving it to them is incomparably greater than that of concession to any other. But the result is that while we have given full rights to the more complex form of associations, we have denied those rights to the most simple. The oldest and most natural form of combination is a *club*, in which there is no necessity for a share capital, as all the combiners are equal, and where none of them has any separate interest in the conjoint property. By the English law such associations are not recognised as associations; they have no collective capacity; they cannot sue or be sued as a corporation or a company; they are in the Law Courts an aggregate of persons without union.

As respects the clubs of the higher classes, this omission of the law has caused no difficulty. They put all their property into the hands of trustees, and as they choose those trustees from the wealthiest and most respectable class of Englishmen, they are very seldom robbed; they do not care to sue each other, for they regard expulsion from the club as an adequate penalty for all offences; they keep out of law entirely.

But as regards the "clubs" of the poor—the Friendly Societies—much difficulty was soon felt. They were always in "scrapes." Their treasurer either had embezzled their funds, or their secretary had run away with them, or defaulting members would not pay the subscription to which they had agreed. These societies especially needed a legal status, and in their case Parliament was not unwilling to give it. There was evidently no danger, but plainly much advantage, in helping the poor to save. And, as usual with Englishmen, it dealt only with the evil before it. It did not deal at all with the general principle of association; it only gave this one kind of association—Friendly Societies—the protection it wanted, and gave it by way of exceptional privilege. The result, however, has not been fortunate. When the Legislature gave peculiar advantages to its special favourites, it was obliged to provide that none save those favourites should enjoy them; and with that end it enacted a special system of rules to distinguish these societies from all others, and established a special officer as Registrar to see that these rules were observed. And in so doing it became responsible for those whom it selected, and irritated those whom it rejected. The popular impression has been, and is, that the Friendly Societies so regulated and certified have been examined and ascertained to be good. But, in fact, they are mostly insolvent, and have never been in any true sense examined at all. And, on the other hand, "Trades' Unions" which wanted to be considered as "Friendly Societies," and to be privileged as such, were refused, at which the working men were very angry.

If the proper plan had been chosen, if from the beginning all "clubs" had received, or been made capable of receiving, a legal *status* on complying, like joint stock companies, with simple conditions these evils would have been escaped. We should not have been liable for the sins of our favourites, nor harassed with the inevitable discontent of powerful organisations which the working classes much prefer to our favourites, which only wished to be ranked with them, but whom we would not admit. And there is no real obstacle now in reverting to right principles. Years hence we shall have to do it, and as far as substantial facts and realities go it would be easier now than then.

But though the real difficulties are small, the difficulties of *opinion* are very great. There are two angry sides to the Trades' Union controversy, and neither ask for the remedy of principle—perhaps neither as yet is altogether prepared to accept it. The masters are fearful and jealous of giving any privileges to Trades' Unions, and they might be frightened if they were asked to assent to a large measure on a new principle of which they did not see the issue. The working men have been educated by the State to believe in "Friendly Societies," and accordingly they do so believe; they would dislike and object to the withdrawal of special countenance from them. What they wish is not the abolition of privilege, but the extension of privilege. They wish not that all societies should be equal in the eye of the law, but that the societies which they like best should be the law's favourites as well as theirs.

To this defective state of opinion Mr Bruce's Bill is very nicely adapted. It removes the worst evils, and does as much as could now be hoped for; and in English legislation it is no new thing to have to wait long for consistent principle and real completeness. The points of the Bill are these.

First,—it abolishes altogether the common law superstition that Trades' Unions are not to be recognised by law because they are "in restraint of trade." This doctrine was invented by a very learned and acute Judge, at a time when "Trades' Unions" were thought to be necessarily pernicious, and when also it was thought possible to put them down. "As you take any stick to beat a dog with," so this old doctrine was looked out of the law books, and applied to the societies which it was wished to dissolve. But now, to go into no disputable considerations, everyone is agreed that Trades' Unions cannot be put down, and that they are, for good and evil, an inseparable as well as most living part of our present society, and therefore this ingenious application of ancient doctrine must be dismissed as useless and pernicious.

Secondly,—it establishes a system of registration for Trades' Unions analogous to that which now exists for Friendly Societies, and it gives all Trades' Unions so registering the power to sue and be sued, a special and quick remedy against defaulting officers, the power to hold land or erect buildings necessary for their objects,—in a word, all the usual privileges of a Friendly Society. This is consistent with present opinion, and we do not wish to object to any decent compromise of an irritating question. Still the evils of the proposal should be seen. A special registration is in the nature of a special endorsement: it gives a sanction of special goodness to those societies, which other societies side by side with them have not. The Friendly Societies have traded on it for years. Their late Registrar, Mr Tidd Pratt, was one of the best known men by name in England among the saving poor. The universal impression was that so good and excellent a man would not have "certified" any society which was not solvent and would deceive the poor. Now a "Trades' Union" is, as we once before said, "a Strike Society tied to a Friendly Society." Certain funds, not, actuaries tell us, at all more than enough, are subscribed by the poor to support them in sickness and old age, and these funds are used by the "Strike Society" to raise the rate of wages, to prevent the rate from falling, and to enforce many other conditions on masters. But it is plain that such a joint society is insolvent *upon principle*. A bare minimum of subscriptions being raised for one purpose, large parts of them are upon occasion taken for another purpose. No working man can ever be sure that a majority of the Union may not use for present fighting the money he saved for future maintenance, and we do not like the State to endorse this.

Of course we in no way object to the foundation of such societies. If working men prefer this kind of combination let them try it. But the State should give what is so radically vicious no special favour, sanction, or approval. Trades' Unions should be *legal* clubs, but they should not be *privileged* clubs.

Thirdly,—the Bill enacts that no workman shall use violence to anyone, or intimidate or molest anyone for Trades' Union purposes, and sends him to prison for three months if he does.

In theory no doubt this enactment ought to be part of the penal code. If we had such a code, with clear definitions and sufficient doctrines, these penalties would follow from it, and would need no special enactment. There would be a general head "Molestation" in which this offence would be included with many others. And this would be a great gain, because it is not very easy to say what is molestation and what is not, and the delicate discussion on that nice question is more likely to be rightly decided upon a general and abstract argument than in a particular and irritating instance. But as we have now no such code, some definition is necessary, and therefore Mr Bruce has rightly given it. There will be much controversy about its terms, but we think, upon the whole, they will be sufficient for their purpose—at least we cannot mend them.

On account of their importance we give the words of the Bill defining "Intimidation and Molestation" :—

3. Every person who does one of the following acts, that is to say—

(1.) Uses violence to any person or any property,
(2.) Threatens or intimidates another person, as defined by this section, or
(3.) Molests or obstructs another person, as defined by this section,

with a view to coerce.—

(1.) Any master to dismiss or to cease to employ any workman, or any workman to quit any employment or to return work before it is finished;
(2.) Any master not to offer or any workman not to accept any employment or work;
(3.) Any master or workman to belong to any trade union;
(4.) Any master or workman to pay any fine or penalty imposed by any trade union;
(5.) Any master to alter the mode of carrying on his business, or to alter the number or description of any persons employed by such master; or,
(6.) Any master or workman to do or abstain from doing any other lawful thing in connection with his business or employment respectively,

shall be liable to imprisonment, with or without hard labour, for a term not exceeding three months.

Threatening or intimidating in this section mean only such threatening or intimidating as would justify a justice of the peace, on complaint made to him, in binding over the person threatening or intimidating to keep the peace.

A person shall be deemed to molest or obstruct another person in any of the following cases, and no other cases; that is to say—

(1.) If he persistently follow such person about from place to place:
(2.) If he hide any tools owned or used by such person, or deprive him of the use thereof:
(3.) If with two or more other persons he watch or beset the house or other place where such person resides or works, or happens to be, or follow such person tumultuously through the streets.

Nothing in this section shall prevent any person from being liable under any other Act, or otherwise, to any other or higher punishment than is provided for any offence by this section, so that no person be punished twice for the same offence.

Provided that no person shall be liable to any punishment for doing or conspiring to do any act on the ground that such act restrains or tends to restrain the free course of trade, unless such act is one of the acts hereinbefore specified in this section, and is done with the object of coercing as hereinbefore mentioned.

LORD GRANVILLE'S NEUTRAL POLICY.

THERE will not be much doubt on the part of any reader of the Correspondence on the War, just presented to Parliament, of the great strength of the case that may be made out for the policy of abstention which the English Ministry have so sedulously and consistently—in some cases apparently almost reluctantly—pursued. Indeed, no one, however deep his sympathy with either party might be, could select a moment at which interference would have been calculated with any certainty to diminish the evils to be apprehended, though it would be very easy to show that those evils might easily have been indefinitely increased by interference of any sort. Perhaps the strongest case which has ever actually been made out is for interference at the very outset of the war—interference on the German side. There is no doubt at all that the war, *apparently* at least, and quite truly in its popular aspect, was a war of pure aggression on the part of France, and a war of aggression for a most jealous, mischievous, and indefensible purpose,—that of preventing the unification of Germany. It may be very plausibly urged that the neutral Powers might have put a peremptory veto on a disturbance of the peace of Europe for such a purpose, and might have fairly threatened the aggressor with an overwhelmingly powerful coalition against him if he persisted, attaching, however, their own conditions to the offer of their alliance to Germany. If the war could have been prevented at all, it might perhaps have been prevented by such a measure. We know now, what we did not know then, how ill-prepared the ruler of France was for the war, and how profoundly he distrusted his own resources. It is hardly likely he would have ventured to face a powerful coalition against him. He might honourably have yielded to such a demonstration what he could not have yielded to fear of Germany alone. But when we come to look closer into the case it seems not nearly so strong, and indeed the balance appears to turn very much the other way.

We have said that, popularly speaking, the war was, on the part of France, one of pure aggression; but statesmen cannot look solely at the popular view of the case. If they contemplate anything so grave,—so full of momentous consequences to all Europe as an alliance in a great war,—they must be satisfied that from the statesmanlike view of the case, their intervention will, in all probability, be adequate and effective. It would not do to offer an alliance which would fill the people of France with bitterness and vindictive feeling towards England, without feeling sure both that you were committing no injustice to their view of the case, and also that you were not merely staving off an inevitable war, which would be sure to break out again with worse results the moment the intervening Powers should happen to be otherwise engaged. Now, there was evidence, we imagine, well known to our statesmen though not to the public at large, that the German statesmen themselves had come to look on a great trial of strength, a great duel, with France as so absolutely inevitable, that they were not particularly scrupulous as to the mode in which it should be forced on. A certain amount of mystery certainly hung over the final outbreak of the quarrel—a mystery never cleared up—since the supposed exchange of insults between M. Benedetti and the King of Prussia at Ems certainly never took place; nor has it been at any time explained how the telegram reporting it, which really ignited the gunpowder, originated. Nor do we believe that the particular origin does very much matter when once two great nations and their statesmen have come to the point of regarding a struggle as inevitable. Such a struggle may be delayed by the inteference of neutrals, but it is not very likely to be prevented; and the delay may be mischievous, and merely cause a very much greater complexity and extension in the area of strife than there would have been had there been no delay. It is certain that within four years there were four great alarms of war between France and Germany—the alarm in 1866, when Austria was beaten; the alarm as to the Luxembourg question in 1868; the alarm as to the Belgian railway question in 1869; and the alarm which actually ended in war in 1870. Now this chronic condition of the quarrel points to a state of feeling which it was not possible for either delay or intervention to pacify. And the mystery as to the final outbreak points to the same condition of things—indicating that the statesmen on one side or on the other were so impatient of the chronic feud that they did not *wish* to see the quarrel made up, and designedly precipitated the war by the false report of a fabricated insult. Could it have been of any use for us to have attempted to stifle such a quarrel as this—one of deep-rooted jealousy between two great races and States? Could it have been right to interfere without clearly understanding by whose fault the declaration of war was at last precipitated, and that our interference would not cause the interference of others on the opposite side, so that the calamities of the war might have been indefinitely increased? Could we have properly interfered in a war which had been smouldering so long, on the very eve of breaking out, and which we had reason to believe could hardly be concluded at all without giving evidence of a defined superiority of military power on the one side or the other? When two nations have been disputing for mastery for years, and threatening repeatedly to try their strength by arms, it is far less likely that the quarrel can be appeased without a real trial of strength, than it is when there is a real external ground of difference which is susceptible of being removed.

But if there is so strong a case against intervention on the outbreak of the war, what shall we say of the case against intervention at any later period? It may be said that when first it was known that France would admit herself in the wrong and pay a heavy war indemnity to Germany, while Germany, on the other hand, was understood to insist on territorial cessions, the neutrals might have intervened to compel Germany to dispense with that unfortunate and impolitic condition. Well, but it is in the first place pretty clear that none of the neutral Powers were at all disposed to unite with England to impose a policy of this sort. No one who reads the correspondence can fail to be struck with the extreme caution and reluctance with which the neutrals view any proposal for joint action. And in the second place, it would have been

somewhat hard on Germany to unite against her to prevent the mischievous policy of territorial annexations when we had not united with her to prevent the invasion of German soil. Such an intervention must have stirred the pride of Germany to the very depths, must have moved her to prepare for a gigantic struggle with the intervening neutrals no less than with France. If she had conquered in such a struggle,—and that is quite possible,—the war would have been far longer, the results more disastrous as well as wider spread than they are now, and undoubtedly the terms of peace would have been far more oppressive. If she had been beaten, the people of Germany would have said, with some justice, and remembered for generations, that neutrals who stood aloof when Germany was invaded. and the talk was of dismembering Germany, united against Germany when France was threatened with conquest, and the talk was of dismembering France.

But the neutrals might have pressed on Germany to name her terms of peace, and expressed an authoritative opinion as to their character, not shrinking from supporting it by force if necessary? Of course they might; but this would have been little more than an incentive to Germany not to be moderate under menace, and in case she had not been moderate, we should have been compelled to prolong the war to make her so, at a greater sacrifice, perhaps not only to Europe, but to France herself, than will now be imposed. To cut the matter short, when a war of pure national jealousy and fear like this breaks out, there is scarcely any possibility of stopping it till it has been more or less fought out; and the intervention of third parties is apt so to complicate the issue, to raise false hopes, to exasperate exaggerated fears on both sides, as to render it almost impossible to intervene with any prospect but that of creating further mischief. If France had ever been willing to yield more than a money indemnity,—if she had ever been willing to gratify the pride of Germany by yielding the *principle* of a territorial cession—England might have mediated with effect. If Germany had ever asked for our good offices, England might have mediated with some effect. But mediation pressed upon the parties,—*i.e.*, mediation of an intrusive and threatening character,—hardly could have resulted in anything but a widening of the area of war with all the incalculable calamities certain to result from such a disaster. It is never pleasant to *be* helpless when monstrous misfortunes are happening around us. But the dislike to *seem* helpless when we really are so is pretty certain to end in plunging the world deeper into those misfortunes than it was before.

THE NEW PLANS AS TO THE ARMY.

Mr Cardwell's speech last night will give much satisfaction and relief to business men, and that on several grounds.

First,—it shows that the excited schemes for making every man a soldier, on the Prussian or some similar plan, have had no influence on the Government. Persons near at hand never indeed supposed that such schemes could have any influence. Still there had been so much talk and writing about them, that in some quarters there was not unnaturally some anxiety. But no nation could consent to such burdens, except under the most sharp and imminent necessity. The Prussians themselves only began their present system after their great defeat at Jena, and the rout of all their old army. And nothing less would have made them begin. We are now exposed to no similar danger; have no probable expectation of being exposed to one; and it would be absurd to take so painful and costly a remedy when we have no disease requiring it.

Secondly,—it is satisfactory to find that we are much stronger than was thought. With our usual love of self-depreciation, so much has been said against our army, that it has been fancied abroad as well as at home that we have no force at all. But in fact we have the following large force:—

Regulars	108,108
Militia	139,000
Yeomanry	14,000
First Army Reserve	9,000
Second Army Reserve and Pensioners	30,000
Volunteers	170,671
Together	470,779

And whatever doubt there may be as to the efficiency of Yeomanry or Militia, there can be no doubt of the efficiency of the Regular Army. In case of sudden invasion—of a "dash at England," as some headlong foreign statesmen have sometimes thought of—we should have more than 100,000 regular soldiers to oppose to them, and this would be much more than enough to meet and destroy any hasty armament that could be unexpectedly thrown on these shores.

In case of a war abroad, we could not indeed compete with Germany or France in point of numbers; but we never did compete with them. On a few occasions in the last great war, England, it is true, engaged to supply proportionate armies to those of the great continental Monarchies, but then it was stipulated that we should be at liberty to pay *non*-Englishmen—Dutch or Germans—to serve for us. By calling out the Militia we could immediately and without effort send abroad a far larger force of pure Englishmen than the Duke of Wellington ever commanded either in the Peninsula or at Waterloo. We may therefore for the present be quite free from panic. Indeed there is an unmistakeable sign of it—Mr Leatham has a motion to *reduce* our army by 20,000 men.

Thirdly,—we are to get rid of the strange and dangerous system of purchase. We say "dangerous," because it really is so in these times. Formerly, when gentlemanly bearing and bravery made the principal part of an officer's qualifications, the purchase system had no immense evils, and it had some advantages. But now that the military profession has become a grave and difficult study, when it has become a profession, as law is a profession, it is as absurd to expect a really qualified soldier to pay to fight for you, as to expect a good barrister to pay for giving you his opinion.

Fourthly,—it is satisfactory that *all* our forces are to be under a single Government. At present our principal reserve—the Militia—is commanded, and its officers are selected, by the Lord-Lieutenants of counties. This is also an old-world arrangement, which had many advantages in its day, but of which the use is past, and the evil only remains. Unity of command is essential to military efficiency, and the more necessary the more different are the various forces which it is desired to combine together. There are many new details as to the Militia and the Volunteers on which experience must decide. But as to the great principle of unity in command there can be no doubt, and there is no counteracting disadvantage in introducing it. Neither the separate command of the Lord-Lieutenants, nor any part of the present "jumble," is of any real advantage to the nation.

Mr Cardwell's plan, therefore, will be satisfactory to the Government, and will strengthen the Government; and the more so, because on this point there were grave doubts as to its competency. Mr Cardwell has proved that, though not a military man, and with no first-hand knowledge of military matters, he knows how to choose skilled councillors who have such knowledge, and knows also how to explain clearly and precisely the plans which they have suggested to him.

THE AMERICAN COMMISSION.

We do not feel by any means certain of a satisfactory result from the joint Commission appointed to arrange all matters in dispute between this country and the United States. The appointment of that Commission, as we hope presently to show, was a wise act, and it is composed of very good men; but everything will depend upon the acceptance of its report, and that acceptance is by no means certain. What we may call the abnormal features in the American constitution come out more strongly in matters of foreign policy than in domestic affairs. For a foreign negotiation to be successful it is necessary that two distinct powers with widely diverse interests—the President and the Senate—should be in accord, and when the Report is presented either may have some reason for disapproving it. The President may be just ready for re-election, and require the Irish vote; or he may have been succeeded by a man of different opinions; or he may have changed his mind, as he has done once already. In that case the treaty must drop through as completely as if it were a treaty with Germany or Russia, and unacceptable to the Emperors of those countries. Even if the President approved, the Senate may not, and its approval is equally indispensable. It may be anxious at the moment to give the President a rebuke, or may be under the influence of some gust of feeling against England, or may wish to conciliate Senator Sumner, or may from circumstances consider that still better terms might have been obtained. Then, though the President and Senate have all legal power in the matter, the popular feeling must be consulted, and popular feeling at that moment may be in-

fluenced by some cause entirely without connection with the fisheries or the Alabama claims, or any other matter now referred to the Commission.

It is well, therefore, not to be too hopeful; but still the consent given by the Government to the joint Commission was a judicious act. In the first place, similar Commissions, notably the one in which the late Mr Bates was chief, have resulted in removing causes of offence. In the second place, the arrangement, nominally one for inquiry, is really a reference to arbitration; and although the power of the arbitrators is not final, still their moral weight will be great—so great probably that either nation can give way, without a sense of humiliation or of yielding to mere force. That is a very great thing to secure, is indeed the greatest element of value in international arbitrations. Half the dangerous quarrels among nations arise out of the fear of appearing to give way through timidity, of being humiliated in the eyes of the world. Very few quarrels not involving cession of territory would be entirely beyond settlement if the nations involved could reason as coolly as lawyers when settling a compromise for their clients; and in estimating a quasi-judicial decision, such as the joint Commissioners can pass, the nations can keep cool. And above all and before all the Commissioners are better able than diplomatists to travel a little out of the record, and suggest, as private individuals so often do, a compromise for the sake of peace, which looks irregular or even absurd, but which nevertheless satisfies the parties much better than any concession more consistent with the rigour of the law. For example, in the matter of the Alabama claims, strict legality is probably on the side of the Union; but it is nevertheless most difficult to make any concession without appearing to alter our municipal legislation under pressure. In the matter of the fisheries again, legality is on our side; but it is most difficult for the American Government to give way without surrendering an interpretation of treaties to which Americans zealously adhere, and in favour of which the President himself has expressed a distinct opinion. Taken separately, a good-tempered agreement on either point would be nearly hopeless; but the Commissioners, by taking them together, may arrive at a compromise which will content everybody. It is stated indeed that the rulers at Washington already see this, and think they can buy the right to fish,—which is very valuable to them, as yielding a race of hardy and adventurous fishermen,—for the money value of the Alabama claims, and some money besides. That arrangement may be possible or impossible, wise or unwise; but it would involve no indignity, nothing but a fair negotiation under the presidency of business men. As a matter of public convenience, there is no dispute which it would be more profitable to get rid of than this one about cod; for, as we have before observed, fishery quarrels are like quarrels about game, they appeal to popular instincts, and rouse feelings out of all proportion to the value of the property at stake. Besides the fisheries, the British Government possesses all manner of make-weights in an arrangement with the Union. On the greatest of these—the "free navi-"gation of the St Lawrence"—we must wait for Canadian opinion, as the effect of any concession in that direction can be determined only by men with minute and local geographical knowledge; but there are questions of boundary all along the frontier, questions of mining rights, and of navigation rights on the Pacific side, which will leave the Commissioners, should any part of the case go against us, with plenty to offer without descending to actual money payment. The presence of Sir J. Macdonald on the Commission is a proof that no Canadian right will be forgotten—for instance, the right to compensation for the cost of the Fenian raid,—but we who guarantee Canada have also some rights. The Canadians are excellent people, but they can hardly expect to guide our diplomacy;—to have all the advantages of independence, while bearing only a part of its expense.

THE LONDON DISCOUNT COMPANIES—REPORTS AT 31 DECEMBER, 1870, AND FOR THE PREVIOUS THREE YEARS.

We continue our investigations of former years of the accounts presented by the three public Discount Companies in London—the *National Discount Company*, founded in 1856; the *General Credit and Discount, Limited*, founded in 1863 and reorganised in 1866-7; and the *United Discount Corporation, Limited*, founded in 1865. Besides these three public companies there are, as is familiar to practical persons, a considerable number of Private Discount Houses, some seven or eight of which, it is probable, are of a magnitude fully equal to the average of the three public institutions to be now discussed.

(A) London Discount Companies—1867-70—Capital *Paid up*, and Reserve Funds.

Dates.	National Disc'nt.		General Credit.		United Disc'nt.	
	Capital.	Reserve	Capital.	Reserve	Capital.	Reserve
	£	£	£	£	£	£
1867—31 Dec.....	797,000	497,000	1,500,000	180,000	134,000	—
1868 „	797,000	497,000	1,500,000	180,000	138,000	2,000
1869 „	797,000	497,000	1,500,000	215,000	140,000	2,000
1870—30 June.....	797,000	497,000	—	—	140,000	2,000
„ —31 Dec.....	797,000	497,000	1,500,000	40,000	140,000	4,000

The *Subscribed* Capitals are:—*National Discount*, 4,000,000*l*, in 25*l* shares, with 5*l* paid, selling at 12; *General Credit*, 2,000,000*l*, in 10*l* shares, with 7*l* 10s paid, selling at par; the *United Discount*, 375,000*l*, in 15*l* shares, with 6*l* paid, selling at par.

The diminution of the *Reserve* at the *General Credit* arises from the writing off in 1870 of the losses then ascertained on the South-Eastern of Portugal Railway and the London, Chatham, and Dover Railway for advances made in 1865-6.

The *General Credit* only publish their accounts at 31 December, holding a merely interim meeting in July.

This Table (A) presents but few changes. The Reserve of the *General Credit* is reduced in a manner more apparent than real, in order to adjust the accounts to the ultimate results of "lock-ups," which began in 1864-6.

The next Table (B) is of more interest, as showing the progress of the Deposits held by the companies:—

(B) London Discount Companies—1867-70—Deposits, and Cash and Government, &c., Securities.

Dates.	Deposits.			Cash and Gov. Securities.		
	National Discount.	General Credit.	United Discount.	National Discount.	General Credit.	United Disc'nt
	£	£	£	£	£	£
1867—31 Dec...	6,935,000	763,000	1,058,000	973,000	—	54,000
1868 „ ..	7,946,000	2,491,000	2,088,000	1,838,000	260,000	70,000
1869 „ ...	8,057,000	3,576,000	1,555,000	1,100,000	361,000	56,000
1870—30 June...	8,089,000	—	1,728,000	1,550,000	—	58,000
„ —31 Dec...	9,152,000	4,608,000	2,175,000	1,520,000	726,000	52,000

At 31 Dec., 1870, the *National Discount* return 1,263*l* of *Acceptances*; the *General Credit*, 125,000*l*; and the *United Discount*, nil.

The increase of the Deposits, of course obtained in the largest degree from country and London banks, in each of the three cases since 1867 is remarkable, and justifies the inference that during 1868, '69, and '70, and especially in 1870, there has been a progressive growth in the savings of the country available for purposes of floating capital in the hands of Bankers and Bill Brokers.

The paucity of Acceptances in these accounts is commendable. It was one of the grossest vices of Overend, Gurney, and Co. to have a large amount of outstanding Acceptances. If a prudent Banker will not accept, certainly a prudent Bill Broker will be still more reluctant to do so. It is his business to sit in judgment on the floating paper of other people, not to issue any of his own.

On former occasions we have endeavoured to construct, on the basis of the published accounts of the Discount Companies, *Estimates*, more or less plausible, regarding—first, the total amount of funds employed by Discount Brokers in London as distinguished from Bankers; second, the average unexpired usance of the Bills Discounted with such Brokers; and third, as an inference from the preceding data, the total amount of Bills Discounted by Brokers in London in the year, and the average amount of such Bills falling due in each of the 300 working days—this latter point being of interest, as connected with the fluctuations of the money market from time to time.

The following Table (C) reduces this process into figures:—

(C) LONDON DISCOUNT COMPANIES—1867-70.—Progress of Total Means held as Capital, Reserves, and Deposits—Three Companies, as above.

Description.	31 Dec., '70.	31 Dec., '69.	31 Dec., '68.	31 Dec., '67.
I.	£	£	£	£
Capital Paid-up	2,437,000	2,437,000	2,435,000	2,431,000
Reserves	541,000	714,000	679,000	677,000
	2,978,000	3,151,000	3,114,000	3,108,000
Deposits	15,935,000	13,188,000	12,475,000	8,751,000
Total Means	18,913,000	16,339,000	17,589,000	11,859,000
II.				
Average of 3 Companies	6,152,000	5,446,000	5,863,000	3,953,000
III.				
Estimate of (say) 7 more Discount concerns (in all 10) at same average	61,520,000	54,460,000	58,630,000	39,530,000
IV.	millions.	millions.	millions.	millions.
Equal at an average unexpired date of 50 days of the Bills Discounted to a *total Discount per annum* of (say)	430	380	410	280
V.				
Leaving to fall due at each of the 300 working days (say)	1,400,000	1,260,000	1,370,000	930,000

The Estimates of this Table (C) proceed, as in former years, on the assumption that the pretty high average of Total Means shown by the public companies applies to seven of the private concerns—making ten in all,—and also on the assumption that the average unexpired term of the Bills discounted by Brokers in London is 50 days. The "turn over" of (say) 1½ million per working day, which results from these data, is quite consistent with and confirmatory of the extreme sensitiveness of the London market to even small variations in the number of Bills offering, or in the money available to absorb them.

In the following Table (D) we bring together the items relating to the Profit and Loss of the Companies, and the proportions of profit arising from Capital, Reserves, and Deposits:—

(D) LONDON DISCOUNT COMPANIES—Year 1870—Profit and Loss Results. (In cols. 1 and 2 the 0,000's are omitted—thus, 80 = 800,000*l*, and 4 = 40,000*l*.

1 Paid-up. Cap.	2 Paid-up. Res.	3 Company.	4 Half-Year.	5 Profits, less Rebate.	6 Computed Results— Int. 4 % on Cap. & Res.	7 Yielded by Deposits.	8 Pr Ct. s d	9 Expenses of Management
Mlns	Mlns		1870	£	£	£		£
80	50	National Disc'nt.	June	74,000	26,000	48,000	12 –	10,227
		"	Dec.	77,000	26,000	51,000	11 –	9,927
				151,000	52,000	99,000	23 –	20,154
14	—	United Discount	June	11,100	2,800	8,300	9 6	4,348
		"	Dec.	12,400	2,800	9,600	8 9	3,831
				23,500	5,600	17,900	18 3	8,179
1,50	4	General Credit...	Year	119,000	61,600	57,400	24 10	15,158
2,44	54	Year's Totals ...		293,500	129,200	174,300	21 10	43,491

The Dividend in 1870, of 17 per cent per annum at *National Discount*, absorbs 136,000*l*; of 7 per cent. per annum at *United Discount* absorbs 9,600*l*; of 5 per cent. per annum at *General Credit* absorbs 75,000*l*.

The Profits in col. 5 are the results after allowing for Rebate on Bills in hand at the close of the accounts, but *before* deducting expenses.

We assume in this Table (D) that the managements make 4 per cent. per annum on the fixed funds arising from Capital paid up and from Cash Reserves, and accordingly cols. 7 and 8 give the Total and *Percentage* amounts derived from the Deposits. The average Percentage of the three companies for 1870 is 1*l* 1s 10d per cent. of profit on the Deposits, out of which, of course, expenses, &c., have to be taken before the Dividend Surplus is arrived at. The *National Discount* show a Percentage of 1*l* 3s, and a surplus of business profit over expenses of 79,000*l*; the *United Discount* show 18s 5d, and a similar surplus of 10,000*l*; the General Credit show 1*l* 4s 10d, and a business surplus of 42,000*l*. These Percentages are not very different from the corresponding figures shown last week for the Joint Stock Banks. Assuming the Discount Companies to turn over their deposits (say) seven times in the year, the average margin of profit at each turn over would be (say) 6s per cent.

The *General Credit* are weighted with an excessive paid-up Capital of 1½ million—nearly twice as large as that of the *National Discount*. The *General Credit* should repay half their capital for several reasons, not the least of which is that large paid-up Capitals in the hands of a Discount Company are constant temptations to admit advances of a "finance" character, and where financing begins prudent discounting ends. The *General Credit* have certainly not fallen into this fault, but their large paid-up Capital is a burden and a temptation, which should be lessened.

Finally, as regards the Dividends and Bonus Divisions, we have the following results:—

(E) LONDON DISCOUNT COMPANIES—1867-70—Dividends and Bonus per Cent. per Annum on Paid-up Capital.

Dates.	National Discount.	General Credit.	United Discount.
1867—31 Dec.	15	5	6
1868 —	15	5	6
1869 —	16½	5	6
1870—30 June	16	5	7
" —31 Dec.	17	5	7

The Dividends are rather higher in 1870 than in the three previous years. The *General Credit* would have given better results but for its excessive capital.

It may be assumed with a good deal of confidence that the discount business of London has maintained in 1870 the prudent and safe character of the three previous years.

BUSINESS NOTES.

THE NEW BOARD OF TRADE TABLES.—We pointed out last week as a probable cause of the apparent diminution of our exports, shown by the Board of Trade Tables for January, that in consequence of the new Table being made up at an earlier date than formerly, it does not really include a whole month, whereas the former Table did so. The following is a return of the "values of British goods exported from London "and the outports in the month of January, 1871, that were "not included in the January account of exports:"—

	Values. £
London	603,422
Liverpool	1,453,735
Other outports	704,975
Total	2,762,132

This return more than accounts for the apparent diminution shown by the return for January. The difference was—

	£
Exports in January, 1870	13,923,185
— January, 1871	11,458,039
Decrease	2,465,148

But if the above sum of 2,762,132*l* had been included, there would have been an increase of 296,984*l*. Any inference as to the falling off of our exports founded on the Board of Trade Returns for January is therefore premature—the real fact being entirely different from the apparent one. The error, as we have explained, will not affect other months as much. The closing days of one month will be accounted for in the return of the following one, so that we shall in each case compare a full month with a full month of the previous year. But we shall not compare the exactly corresponding month, and till the new system has been at work for more than a year, this may be the source of irregular fluctuations.

COMPULSORY SURVEY OF MERCHANT SHIPS. — Mr Plimsoll has re-introduced the Bill for the compulsory survey and registration of ships by the Board of Trade, to which we objected last Session at the time of its introduction. The object of it is to apply to all merchant ships, with the exception of ships registered at Lloyds', or the Liverpool underwriters' registry of iron vessels, the provisions of the Acts for the survey of passenger steamers. Various regulations are likewise laid down for fixing the maximum load line of vessels, and on other technical points. The lives of seamen in merchant ships are supposed to be insufficiently protected by the present law, and the Bill is expected to improve matters by Parliament and the Board of Trade doing for seamen what they will not do for themselves. The objection is that such a Bill necessarily interferes with trade, and that regulations of the kind referred to are apt to prove unexpectedly troublesome hindrances, while they cannot really insure the safety of those whom the Government seeks to protect—cannot do more for them than they are well able to do for themselves. The policy of the Passenger Acts, on which the present Bill is modelled, was itself questionable; but it could at least be said in defence that passenger steamers were used by miscellaneous crowds of people, who could have no previous means of testing their safety, and who only used them in the most temporary manner. There was room for a more or less plausible plea that the survey of such vessels was an affair of police. In the present case, however, seamen are people whose business is with ships, who are particular about the risks they run in unseaworthy vessels, and may refuse to go to sea in them, who can understand the meaning of a registry at Lloyd's; and if they are sometimes not so careful as they might be, that is surely their own affair. The inconsistency of the Act is shown by the exceptions of vessels registered at Lloyd's, or on the registry of Liverpool underwriters. This amounts to official recognition of the certificates of bodies over which the Board of Trade has no control, and if agreed to would be a precedent to be greatly deprecated. If the Government is to certify at all, it ought not to accept the certificates of unofficial bodies in block.

CONCESSIONS BY FOREIGN GOVERNMENTS. — Investors who are tempted to take the shares or bonds of a company which possesses the concession of certain foreign Governments, should read the case of the "International Contract Com- "pany (Limited), Joseph Pickering's claim." The question at issue was of comparatively little public interest, though the sums involved are large—being merely whether Joseph Pickering, having sold a concession for two railways in Peru to his brother Edward Pickering, who afterwards assigned it to the International Contract Company, had any claim upon the latter for the price, viz., 302,000*l*. This could be merely a question of evidence, and the Vice-Chancellor, Sir John Stuart, has decided against the claim; but the statements made in the pleadings are remarkable. The plaintiff's contention being that Edward Pickering had bound the International Contract Company as their managing director, it became a point to show that the transaction was a reasonable exercise of discretion, and the price reasonable. In proof it was accordingly stated that Mr Pickering had been obliged to enter into engagements to pay no less than 50,000*l* to officials in Peru, and 12,000*l* to other parties. These statements do not appear to have been disputed, but the assertions on the other side were as strong—that, in fact, the agreements, which began with frauds in Peru, ended in a mere juggle in England, and that Joseph Pickering had never even proved that he owned more than a fourth of the concession which he affected to sell. Of course this statement was only *ex parte*; but it is a subject for remark itself, by those who are tempted to hold shares in companies for taking up concessions, that the case was one in which such charges and statements have been bandied about. It is a curious pendent to the transaction that the International Contract Company was not going to work this twice-transferred concession itself—that another company, the Peruvian Railways Company (Limited) was launched for the purpose, under the auspices of the International Contract Company, and it was only after this roundabout process that the public were to participate in the profit.

THE B LIST OF CONTRIBUTORIES.—An illustration of the want of any principle in the law which regulates the liability of the former shareholders of a limited liability company for the debts due at its winding-up has been afforded this week by the decision of the Master of the Rolls in *re* Blakely Ordnance Company (Limited), Brett's case. The law is that if the debts at a winding-up cannot be paid by existing shareholders, those who have been shareholders at any time within twelve months previous may be put on the list of contributories, provided any debts existing when they ceased to be shareholders continue unpaid. They are not to be liable merely in respect of these old debts; on the contrary, once made contributories, they are to contribute rateably till the general deficiency of the other shareholders is made good; but, nevertheless, the question of their being contributories is dependent on the existence of these debts. This state of the law has given rise to the present case. The liquidator of the company took out a summons against Brett, who had been a shareholder within the twelvemonths, having discovered that there were four debts due at the winding-up, which were not contracted after he had ceased to be a shareholder. The debts were not in existence when the summons was takn out, as Brett and other persons whose case he was selected to represent had paid off two of them altogether, and by a compromise obtained a release of the company from the others; but the liquidator contended that the debts having been in existence at the winding-up, the disputing shareholders were liable. The latter, on the contrary, argued that the debts having been extinguished before they were made liable, there was no case against them, the condition of their liability having failed. The Master of the Rolls took the latter view, and the shareholders are accordingly released; but whichever way he had decided, it is obvious, we think, that the whole law is most arbitrary. If past shareholders once made contributories are to be liable not merely for the debts through which their liability arises, but for other debts as well, it would have been equally consistent, or rather not more inconsistent, with justice to hold them liable if the debts had existed at the winding-up, whether they were afterwards extinguished or not. Past shareholders are now made liable in consequence of a purely arbitrary condition, and it would be no more arbitrary if interpreted according to the liquidator's view. It is not difficult to see on what principle the law as to the liability of past shareholders should be amended. It is simply a matter of expediency—a mere point in the question of the *limits* of liability in such companies, and the common-sense rule is—either release past shareholders altogether, which might put creditors on their guard by increasing their risks, or fix a definite time within which shareholders who sell out shall remain liable in place of their successors. Beyond taking precautions that shareholders shall not sell out by wholesale on the eve of insolvency—an object which is accomplished by fixing a definite limit of time—we do not see what occasion there is for the Legislature to interfere. There is no use, at any rate, in a rule which makes the liability of past shareholders depend upon an accident, and as we now see by the present judgment, provides a loophole for the escape of ex-shareholders where the debts *through* which they are made liable are less than the contributions they would be liable for—that is, in the very cases where their liability would be most beneficial to the creditors.

STOCK BROKERS AS DIRECTORS.—The fuller report of the Lord Chancellor's judgment, in the case of the Imperial Mercantile Credit Association *v.* Coleman, shows that the whole case has turned upon the evidence. The Vice-Chancellor held that Mr Coleman, as a director of the Association, was bound to repay to it the profits he had made in his capacity of broker, in disposing of the Chatham and Dover debentures which the Association had negotiated — his view of the evidence being that Mr Coleman had not sufficiently disclosed his interest. The Lord Chancellor on the contrary held that Mr Coleman had sufficiently disclosed his interest, and that as the articles of the Association authorised the employment of the directors as agents upon the latter disclosing their interest, Mr Coleman was entitled to the profit he had made. The Lord Chancellor however was very careful not to throw any doubt upon the general rule of law, the apparent difference between him and the Vice-Chancellor being that the latter held that the extent of the directors' interest in the contract should be stated, while the Lord-Chancellor thought that a less definite notice of the interest was sufficient. "The company," he said, "could not expect "to have all the assistance afforded by Coleman in nego-

"tiating this transaction, and the benefit of all the fish "brought to their net, without allowing any remuneration to "be received by Knight and Coleman." The Bill was therefore dismissed with costs, and a direction given for repayment of the money which had been paid pursuant to the Vice-Chancellor's order.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and Feb. 11, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870-71.	Total Exchequer Receipts			
		To Feb. 11, 1871.		Same time last year.

The other receipts to date were 90*l*, the other payments were 150,500*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

HAVRE, Feb. 15.

The reaction against the Republic is even more violent and complete than had been foreseen. The majority of the men elected to the National Assembly are notoriously adverse to that form of Government; and in some places, among them Havre, the supporters of it have met with signal discomfiture. Paris, to be sure, has "voted Red," in fact has returned the craziest, most fanatical, and most desperate ultra-Democrats it could put hand on, joining to the monly a few moderate men. But Paris is always in opposition to the rest of the country; perhaps to prevent it from doing mischief in the new situation that has arisen, it would be well to deprive it for a time of the privilege of being the seat of the Government and of the Parliament, and to establish them in some provincial town. In the different political crises of late years, this has been repeatedly proposed; and it would render ineffective any new revolutionary outbreaks of the great city. There is nothing in the project repugnant to French ideas; indeed, out of the capital it would be generally approved. There is nothing new in it either, for under the *ancien régime* neither the Court nor the Government was at Paris.
